Volume 3, No. 2

Address: 2634 S. 142nd Street, Seattle 88, Wash.

November 22, 1963

Highline Cheer Staff is Chosen

Cheer Squad, back row: Mrs. Barbara Young, advisor; Barbara Callis, Carol Richards. First row, Cathy Montague (alternate), Vickie Loomis, Carol Musselman. Not present, Judy Herbert.

The election of the yell staff was held in the cafeteria on November 7. Judy Herbert, Vicki Loomis, Carol Richard, Barb Callis and Carol Musselman were chosen to represent the school.

Nineteen girls and two boys turned out for the five positions. Each entry gave a rou-

Democrats Meet

"Students should be informed on popular political issues," was the way Barbara Young, co-advisor of the Democratic Club put it. Asked on what level the club concentrated, Mrs. Young said interests would be more on the state and local level. She said school bond issues should be important.

The club's objective is to bring speakers to Highline College in hopes of stimulating "critical thinking" among the students. Mrs. Young would not identify, but promised some very interesting and explosive political figures on the club's program.

Officers in the Democratic Club include Mike Hale, president; Dick Peterson, vice president; Jon Naff, secretary-treasurer; and the advisers, Mrs. Young and Mr. George Donovan.

New Magazine By Writing Club

George Stephens, Creative Writing Club president, announces that the Creative Writing Club is sponsoring a magazine of original writings of the Highline College students. The magazine, called "Excogitation No. 1," will feature all acceptable student material in the way of poems, short stories, prose or any other original material.

Students may place their work in cigar boxes located in the student lounge, library and other points around the campus or they can contact one of the club members. The club meets once a week in the student lounge.

The next meeting will be held November 22 (today) at noon. All short stories, when submitted, must be typed, double spaced.

tine which was graded by the judges. Fifteen ballots were cast by the members of the Activities Council. It took one hour for the routines to be presented. They were well received by the audience.

Frosh Plan Dances With Novel Themes

The freshman class has big plans for this year. At the top of the list is the freshman class dance to be held at the Space Needle. The date has been set for spring, but plans are already underway. John Logan, freshman class president, will be holding a meeting for all freshmen wishing to work on committees for the dance, Tuesday, Nov. 26, at 10 a.m. in room 407.

Also planned is a Grub Dance where everyone wears his grubbies, and a possible freshman class cruise.

Amendments Pass

The two proposed amendments to the ASB Constitution passed without much difficulty. The effect of the changes will be fully felt next year.

Changing the elections from fall to April serves a double purpose. The students will have a chance to know the candidates and can assess their accomplishments during the year.

The main reason for this change, however, is to give the newly elected officers a chance to organize and build a program during the summer months. This change promotes a smooth, well-run student government.

Scholarship Won

Just before press time word was received that Gordon Brastad and Kriste Knapp have won the South Central Kiwanis Scholarships of \$150. Details in next issue.

CALENDAR
Nov. 25 Wash. Pre-College Test, 9:30 a.m. to 3:30 p.m.
Nov. 26 Activities Council Meeting, 9:00.
Nov. 28-29 Thanksgiving Recess.

Mid-Management Program Set

A two-year mid-management program will begin at Highline College next fall for those students interested in business administration.

The program will provide, in a period of seven quarters, almost all of the courses found at a four-year college. This can be done by eliminating some of the electives such as foreign language. It is normally a two-year program in which the student attends regular classes and is employed with some co-operating firm chosen jointly by the student and the advisor.

The student's first year will be spent in learning the fundamentals of business management. During this time he will take courses in accounting, economics, general business, communications, report writing, public speaking, conference techniques, and business law.

The second year will be the student's specialization year, in which he will concentrate on either marketing or financial management. The State requirement is that a student work in a selected business for 150 hours a quarter. Another requirement of the course is that

the student participate in a business management seminar which will consist of small groups gathered together to discuss their experiences and problems on the job.

Mr. John K. Aldrich, the head of the program, stresses that the program will be operated strictly on a college level. The students must be serious and have a capacity for the course, including a proficiency in English and Mathematics. Because 80 per cent of the subjects are college transfer subjects, a student who changes his mind about taking the course will lose nothing.

The advantages of the course are easily seen: for one thing, the student may immediately apply what he is learning in school; this will reduce his forgetfulness of what he has learned; the program will also benefit employers in that they will have goal-oriented employees.

The program has been highly successful in junior colleges around the nation for about five years, and has even met with success in our own state at Yakima Junior College, and various other two-year institutions throughout the state.

Christensen Talks At Highline

Richard Christensen spoke to Highline College students November 5 on the invitation of the Highline College Republican Club.

Mr. Christensen's topic was "What Should Be the Present Role of the Republican Party?"

Students asked for his personal comments on their questions after his talk.

He started by saying that the Republican party is not against anything, but draws from a heritage of lessons learned from our forefathers. Then he asked, "Why do we sign a peace treaty with those who are out to destroy us?" The party operates on heritage, the Constitution, and fiscal responsibility.

Mr. Christensen would like to change the present system of fiscal responsibility. The party is fed up with sending tax money to Washington (D. C.). Why send state dollars to the Federal Government and then ask for these same dollars back to spend on education, roads, and other tax-dollar programs? The result is that the state gets back about 40 to 50 per cent of the money sent in. Mr. Christensen wants to keep tax dollars in the state, and spend those dollars here, and get the most out of each dollar.

Story Is New Tech. Director

Dr. David B. Story has been appointed Director of Technical Education and Community Services at Highline College according to Dr. M. A. Allan, president.

The new director comes to the Highline College staff from the Boeing Company, Seattle, where he was supervisor of industrial relations training evaluation. Prior to his employment with the Boeing Company, he was superintendent of a school district in Chester, New York. He has had extended experience in public school teaching and administration in New York State.

Dr. Story attended public schools in Avoca, New York; received the bachelor of arts degree at Dartmouth College, New Hampshire; the master of education degree from Alfred University, New York; and the doctorate of education from New York University.

Chemistry 100 Is Added for Winter

A new course, Chemistry 100, will be offered this winter quarter at Highline for the first time. The class has been scheduled for Tuesdays and Fridays at 2 p.m. The instructor will be Mrs. Volland. This will be primarily a lecture course, with a small amount of laboratory work.

Chemistry 100 is an introductory course open to students without previous courses in chemistry and to those needing additional preparation for Chem. 101, 102, and 103. Basic calculations, laws, theories and principles of chemistry are emphasized.

Pep Band Needs More Musicians

The Pep Band, which will play for all home basketball games as well as possibly a few traveling games, held its first meeting on Wednesday, November 13.

Mr. Larry Blake, the advisor for the band, was very enthusiastic about the turnout but replied that all students who play an instrument are needed. The band will rehearse every Monday, Wednesday and Friday at 9 o'clock in the bandroom at Glacier High, and will play for the opening game of the basketball season on December 4.

Guests at Ranch

Peter Ruchirat and Somchai Pongpech, international club students from Thailand, will be the guests of Tom and Nita Whitted at Sky Meadows Guest Ranch, over the Thanksgiving week-end. They will join international students from the University of Washington. Mrs. Charlotte Davis, advisor to the new International Students Club, will accompany the students.

Service Club Is Headed By Balmer

The Service Club of Highline College met with Mr. William Shaw, coordinator of Student Activities, on November 19 in the Student Government Office and elected Jo Ann Balmer as president.

The members discussed the various functions and activities for the coming year and among these were painting trash cans and escorting visiting guests to our campus.

Study Conditions Cramped?

You may have noticed, as you seek a place of quiet to study, that the library, the lounge, and the cafeteria, are filled to capacity. Then, much to your dismay, you remember you didn't drive today, but George did, and he has the keys, so you can't study in the car.

So what do you do? . . . You end up talking over a cup of coffee, tea or milk. As a result your studies fail and you say you have a logical excuse? . . . Well you may or you may not.

During the day there are several rooms around campus that

are empty at various intervals of the day. These are free to be used for study, not gab-fests, for students with work they'd like to get done: on MONDAY, WEDNESDAY, and FRIDAY . . . from 11 a.m. to 12 noon, room 501; on TUESDAY and THURSDAY . . . from 11 to 12 noon, room 503; and daily, Monday-Friday 12 to 1 p.m., room 406.

Remember if you want to talk, go to the student-lounge or the cafeteria, but reserve these study rooms for studies and students with studies. Who knows, you may want to study sometime?

Gambling On Campus

by Dennis Brown
Last week I was bitten by the gambling bug. I was in the student lounge, taking it easy with some friends, when I got the urge to eat. I wasn't really hungry, I just wanted a snack. I would have gone to the cafeteria but the high school students were eating lunch. I had one choice: take a chance on playing the candy machines, either one, it made no difference. Both had my favorite candy. I chose the machine by the Squirt machine. I put down

a small wager with my friends that I wouldn't get my candy or my dime back. I placed the dime in the "one-armed bandit", pulled the knob, crossed my fingers, and won! I collected my winnings and got Mr. Leonard Johnson. He gave me my dime back, and I tried the other candy machine. I made the bet, and won. I again got Mr. Johnson, he again gave me my dime. I gave up and begged a piece of candy from a friend. I still take the chance, though, and I still win.

Letter to Editor

One of the major faults of the Highline College campus is the parking lot. At the entrance of the lot, one is greeted by a sea of mud and various strategically located bottomless chuck holes. Now, it is a well known fact that chuck holes mature and grow with age, especially with a diet of rain and car wheels.

So far my car has suffered two mashed mufflers and tall pipes, scraped bumpers and bent license plates, not to mention the general and constant battering to the vehicle's undercarriage.

In one corner of the lot there sits a counterpart to the Pacific Ocean. As I stood and watched various automobiles attempt to cross this great expanse of liquid for about ten minutes, I noticed many of the smaller cars floundering. Some gave the impression of having the drivers half submerged in the muddy water. (I visualized a look of horror appearing on the operators' faces as they faced the possibility of drowning in their own car).

I believe that the Highline school district should take the trouble to fill these holes. If they have time to sweep the water off the portable roofs, they have time to level off the parking lot and make it at least half-way decent to traverse. The time to act is now, before it's too late.

D.M.

We Want To Know

Nearly every day the student bulletin announces that there will be a meeting of the A.S.B. Executive Council, or the Social Committee or the Program Committee, yet very few people beyond the members know what is happening at these meetings.

It is imagined that anything done is very important, but the lack of communication to the student-body cripples the effectiveness of any decisions made.

A few weeks ago the student-body was told to vote on two

CARS ON CAMPUS

by Steve Fitzpatrick

Rudy Vulkelle's 1968 Chev. Impala is one of the cleanest cars on campus. It totes a healthy 348 with tri-power as its only motor modification. The stock body is lowered four inches all the way around, and is a beautiful carcara green. The interior is simple but at-

tractive, with lovely deep rug, floor stick and a Dixco tach.

Rudy bought the car this summer in its present condition. He decided not to race it, as he doesn't like to think of blowing anything in this gem. He likes his carriage just the way it is!

Woodward At Meet

W.S.U. hosted a conference of all of the state Community College Health and PE people, November 18 and 19. Mr. Everett Woodward, Director of Health and Physical Education, represented Highline College. This conference was a part of their long range annual conference plan of calling to their campus the various disciplines. Mr. Stan Berry, W.S.U., was the chairman.

amendments, but not told why these amendments were proposed or any pro and con ideas presented on the two issues. Perhaps more people would have voted had they known what these amendments meant.

There should be bulletins posted on any decisions reached and the meetings should be open to attendance for any member of the student-body. Few people know, including myself, the real importance of these meetings. If some kind of communication could be established, maybe people would take more interest in school politics.

Thunderbirds Open December 4

By Dick Peterson

Just 12 days from now, on December 4, the Highline College Thunderbirds will take to the basketball courts against the Seattle "U" Frosh to open their 63-64 hoop schedule in a non-conference game that will be played at Highline High School starting at 8 p.m.

The Thunderbirds, who will have had only two weeks of workouts behind them, will face a tough team from Seattle "U" who boast a couple of high school all-Americans. Last season the Thunderbirds fell to the Seattle "U" Paposes twice, but both games were action filled.

THE FIFTH QUARTER

by Ron Siegel, Sports Editor

Have you wondered how the Washington State Junior College basketball conference is set up?

The basketball conference is composed of two divisions, North and South.

The members of the Northern Division are the Highline Thunderbirds, Columbia Basin Hawks, Everett Trojans, Wenatchee Knights, Skagit Cardinals, and the Yakima Indians. The Southern Division teams are the Grays Harbor Chochems, Olympic Rangers, Lower Columbia Red Devils, Clark Penguins, and the Centralia Trailblazers.

This will be the last year of this set-up. There will be four new schools next year. These are: Shoreline, Spokane, Big Bend, and Peninsula.

Each school has an athletic director and a commissioner of athletics. Highline's Director of Athletics is Mr. Everett Woodward and the commissioner is Mr. Jack Mackenroth.

These two men with the basketball coach, Mr. Jack Hubbard, draw up the basketball schedule.

Highline plays each Northern Division team twice, once at home and once away. They play each Southern Division team once, for a total of 15 league games.

They play 10 non-league games against junior college teams and college freshman teams, which brings the total to 25 games for the season.

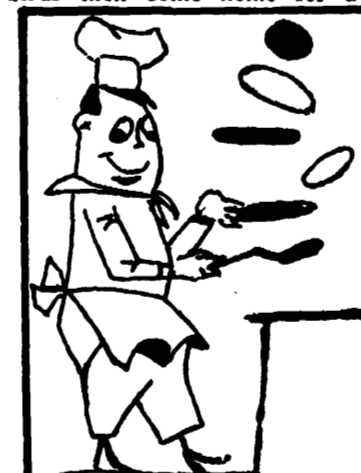

At the end of the season the winners of the two divisions play a two out of three playoff for the conference title.

ODDS-N-ENDS

Dick Layzell, who played basketball and threw the shot for Highline, just completed a successful season as the starting wing-back for the Western Washington Vikings. Congratulations to Mr. Dwight Pool and his Columbia Basin Hawks for rapping up another football championship. The Central Washington Wildcats won the Evergreen Conference football title.

THUNDERBIRDS (Continued from page 2)

Two days later, on Friday night, the Highline College hoopsters will travel to Olympic College in Bremerton to meet the Rangers in a non-conference game. The Thunderbirds then come home for a Saturday night (December 7) game in which they will meet Clark College from Vancouver. Game time is 8 o'clock and the action will again take place on the Highline High School basketball court.

New Intramural League Set

Highline College has formed an intramural flag football league for the fall quarter.

The flag football teams consist of six players to a team with each team having three substitutes. The teams have a regular schedule of games. The games are played at 11:00, 12:00 and 1:00 on Glacier High School's field.

There are three leagues: "National," "American" and "Northwest."

The "American League" teams and captains are: "Engineers," Mike Hiatt; "Gophers," Rick Foyston; "Chem 101," Rick Tiffany; "Highlines," Dennis Hilling.

The "National League" teams and captains are: "Challengers," Dave Mickelson; "South Side No. 1," John Merrell; "South Side No. 2," John Merrell; "Lancers," Charles Kirk.

The "Northwest League" teams and captains are: "Derbs," Joe Mirante; "Highline Packers," Fred Graf.

Tom Carlson Rolls Bowling 246

Last week's intramural bowling action was highlighted by Tom Carlson's 246 game. Tom rolled six straight strikes before he finally missed on the seventh frame. Five other bowlers also got "hot" and hit for games over 200.

After last week's action was over, the "Come Back Wahines" had a very slim half game margin over the up-and-coming "Playboys." There is only a total of six games difference between the first and sixth place teams.

Hikers Start On 50-Mile Hike

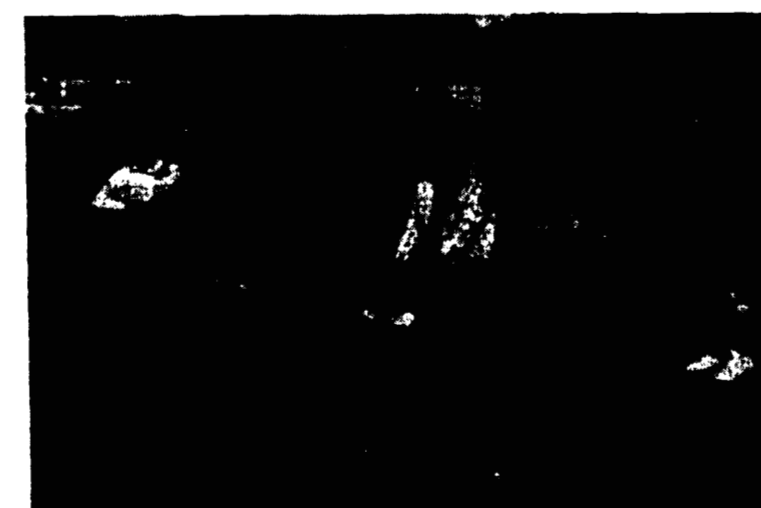

Nine Highline College students, who unofficially call themselves the Highline Hiking Club, started a fifty-mile hike from Issaquah to Norma Beach, Sunday, November 9, 1963. The route of the hike followed the old railroad tracks from Issaquah to Lake Washington, around the north end of Lake Washington to the University of Washington, through the ship canal and up the east coast to Norma Beach.

The trip started at 4 o'clock on Sunday morning and at the twenty-eight mile mark, six of the students had to drop out. The three remaining students, Francine Brown, Pat Dalton, and Frank Stasny, continued walking until about 1:30 Monday morning. They decided to stop because of the weather. They said if the days had about ten more hours of daylight, they could have finished the hike. Approximately six hours of the trip were used for break stops. The total distance hiked was approximately thirty-nine miles.

The members of the club plan another hike later in the school year. If any other students are interested in the later hikes, they should see Frank Stasny for further information.

Page 4—The Thunderword Science Club Has Plans for Future

Members of the Highline College Science Club held its first meeting on November 7 under the direction of its advisor, Mr. Warnock.

The main topic of the first meeting was to discuss ways of getting new members interested in joining the club. It was decided that the club would start a poster campaign along with a person-to-person publicity program to try and show potential members the opportunities offered by the club.

Another project mentioned was the building of a science display for the Highline School District Science Fair in which members of the college club would sponsor and explain a non-competitive entry. It was decided to wait until the club has a few more meetings before voting on what type of entry would be entered.

The Science Club would like to remind anyone interested in the club that he can get more information about the club either by seeing the advisor, Mr. Warnock, or a member of the club.

Plans for Sciences Invite Coordination

The Natural Science courses will have a new look next fall at the new campus of Highline College. In a large science building, Biology, Chemistry, and Physics will be taught simultaneously. Highline will be the first college to try this method of teaching. In one lab, students can get together and interchange their ideas among one another about their course. This should give the student a wider knowledge of the different courses in Natural Sciences.

Dr. Paul Jacobson, chairman of Natural Sciences, welcomed five new Natural Science instructors this year. They are: Mr. Thomas Warnock, Physics, and also coordinator of the Science Club; Mr. Kenneth Knutson, Biology; and Mr. Elmar Zemgalis, Mr. William Searing, and Mr. Edwin Newell, Mathematics.

Annual Staff Meets First Deadline

The college Annual Staff has been working at a feverish pace the last two weeks, working against a deadline of getting twenty-four pages, the cover, end-sheets, and the full-color page ready for the publisher.

The staff has held meetings on Saturday mornings at the college the last three week-ends and these meetings have helped a great deal in getting the copy and art work organized and started.

This year's Annual will consist of approximately ninety pages and for the first time will feature a full page of color inside the Annual. The staff is trying to make this year's album a photographic memory book showing all of the activities which will be offered during the school year. Members of the staff have said that this year's book will be, "The best yearbook yet!"

Students are reminded to get their orders into Mr. Leonard Johnson as soon as possible because only those who order Annuals now will have one reserved for them in the spring, with the rest going on a first come-first served basis. Get those orders in now for the new Annual.

Ski Club Plans

All skiers and snow bunnies can purchase membership cards from Julie Haas for \$2.50 which includes: partial payment for ski trips, free ski instruction from, among others, Larry Zweihart, an instructor from Snoqualmie Pass, and ski movies. The club meets on alternate Tuesdays and Thursdays at 9:00 and 10:00. If there are any questions see the officers or an active member.

Sarver Stresses Gymnastics

Mrs. Mary Sarver helps Carol Elsner with a balance beam exercise.

"American women are trying to catch up with the rest of the world in athletics." These were the words of Mrs. Mary Sarver, women's physical education teacher, after returning from a five-day National Institute on Girls' Sports held at the Oklahoma Center for Continuing Education.

Mrs. Sarver was one of three representatives from Washington attending the conference, which was concerned with track and field events and gymnastics. She represented the sport of gymnastics. During the week,

Apple Sale Coming

The Highline College Art Club met on Wednesday, November 13 to discuss the making of posters for the candy apple sale that is planned for the campus. A definite date has not been set for this sale.

The University Reader's Workshop presented "The World of James Thurber" Wednesday night at Highline College.

discussions and speeches were heard and classes were held on the techniques of teaching beginning skills. Mrs. Sarver, besides attending other classes, taught a free exercise class.

To show girls that they can participate in sports successfully, a beginning gymnastics class will be offered to girls starting the winter quarter. It will be an activity class with credits transferable to other colleges. The class will teach the Olympic gymnastic events of free exercise, balance beam, uneven bars and vaulting, with some practice in tumbling and trampolines. There is also a gymnastics class planned for boys.

One of Highline's students, Carol Elsner, a physical education major, has been competing for three years in gymnastics and will be competing in the events this year. She is in the Senior Advanced Division which is the highest division in the Seattle area.

To further gymnastic training in the Highline School District, Mrs. Sarver will be holding a high school clinic for high school teachers in early February to demonstrate the techniques of teaching beginning gymnastics.

Return Books Dec. 23

Mr. Leonard Johnson, Student Coordinator of Facilities, would like to notify all students, that December 23, is the last day books-for-resale will be accepted at the bookstore.

New International Club Is Forming

Preliminary plans for a new International Relations Club have been completed and the proposed constitution is being submitted for official recognition.

The purpose is to develop greater international understanding through round table discussions, guest speakers, student programs and community resources. The club plans to contribute to the needs of others through international projects and correspondence. Meetings will be informal and will be held at the members' homes.

At the first meeting, four members were appointed to draw up a constitution, to clarify the aims and to select a name. The members of this committee are Vasselros Arbnitis, Myron Strandberg, Mohammed Ekrdhem Kazemi and Sandra McLean.

Advisor for the club is Mrs. Charlotte Davis.

Emblem Jackets Here

ASB officers received new emblem jackets this week. They serve to identify the student leaders.

The emblem takes the form of the official college seal. Above the shield is the name of the office which the wearer holds.
