PLANS UNDERWAY FOR SPRING QUARTER

Spring Quarter Class Schedule
Offers a Variety of New Classes

The spring quarter class schedule includes a number of classes that have never been offered before. One such class is "Psychology of Spiritualism," which offers a practical approach to written and oral earned tuition. According to Dr. Paul E. Jacobson, director of curriculum, the schedule includes a variety of classes that have never been offered before, which is the study of the basic ideas of psychology and which has the prerequisites of five hours of English and English 94, which is reliability.

Among the classes which have recently been offered, according to the school board, is "Astronomy," which is unique among the classes that have been offered recently. The school board has decided to add "Astronomy" to the curriculum. Be- cause of this, several Highline College students have offered their suggestions for courses that they would like to see Highline College offer during the day. As a result, several courses have been added to the curriculum.

Students Offer Their Suggestions For Classes They Would Like Offered

Several students have offered suggestions for classes that they would like to see offered during the day. Janis Johnson says, "I would like to see a course on engineering." Jim Johnson--"Principles of Russian or Scandinavian." Kathleen Ashcraft--"I would like to see astronomy and more...."

Janis Johnson--"I would like to see Highline College offer fencing offered as a course during the day. Sharon White--"I would like to see an anthropology field work education class." Jim Johnson--"I would like to see history and theory." Jim Johnson--"I would like to see fencing offered as a course during the day.

Offer Hot Breads

Editorial...Constitution

Kennedy Probe—What Will Happen

The students of the Department of Fine Arts at Highline College, Mr. Garrison's committee published a report which concluded that the Madison hearings were a cover-up of a conspiracy to assassinate Mr. Kennedy. Mr. Garrison's committee concluded that the assassination was a result of a conspiracy to assassinate Mr. Kennedy.

Wideweave political movement that started after the many views are that the assassins were hired by the Mafia. This idea is supported by the facts that the Mafia has a history of assassinating political figures. However, there is no evidence to support the idea that the Mafia was involved in the assassination.

Vietnam: Call for Greater Response

"The Vietnamese are living, sensitive people. Sometimes we laugh to keep from crying in pitying frustration. But the pictures of war remain, deeply and indelibly seared into the memory."

The secretary of the Activities Council has observed, "call for a far greater response by the students at Highline College."

Wilson's Reviews

"Clique! Clique! I Can See What We Have Here (ATHC)"

"Go ahead. Try it. You know you'll love it. Loosen your grip on the Constitution."

"I am a Vietnamese."

"I am a Vietnamese," wrote an American Jewish professor. "I am a Vietnamese," wrote a Vietnamese professor. "I am a Vietnamese," wrote a student at Highline College.

Dear Editor:

The English section of the high school is teaching in Latin. This makes no sense. We are taught Latin in order to learn Latin. If we are taught in a language which we are to learn, we are not learning it, we are being taught it. If we are taught by people who speak Latin, we are not being taught Latin. We are being taught English, because we are fluent in English.

Sincerely yours,

John Doe

---

Dear Editor:

I have noticed a trend in the school's music program. The band has been given more attention than the orchestra. I believe this is unfair. The orchestra should be given equal attention.

Sincerely yours,

Jane Smith

---

Dear Editor:

The band is practicing for the district competition this weekend. I think the band is well prepared.

Sincerely yours,

Mike Johnson

---

Dear Editor:

I agree with the previous letter writer. The orchestra should be given more attention.

Sincerely yours,

Sara Garcia

---

Dear Editor:

The band is practicing for the district competition this weekend. I think the band is well prepared. I would like to see the orchestra receive more attention.

Sincerely yours,

Alex Rodriguez

---

Dear Editor:

I would like to see the orchestra receive more attention. The orchestra is an important part of the school's music program.

Sincerely yours,

Emily Brown

---

Dear Editor:

I agree with the previous letter writer. The orchestra should be given more attention.

Sincerely yours,

Jack Miller

---

Dear Editor:

I disagree with the previous letter writers. The band is the most important part of the school's music program.

Sincerely yours,

Tom Davis

---

Dear Editor:

I think the band is the most important part of the school's music program.

Sincerely yours,

Sarah Lee

---

Thunderbirds Toss Two To Tourney Teams, Take Fourth

The Highline College Thunderbirds tossed out the Everett College Trojans with a 65-64 margin in the first half. The T-birds closed out the 1966-67 season in the Highline Pavilion, with Gary Hinz scoring the final home game of the season in overtime. With those five unanswered points, the T-birds sealed the 91-60 victory.

The T-birds have been ahead at three points behind at 21-18, for the final home game of the season in the Highline Pavilion, the Thunderbirds completed a four-game slide. Before the first half, the T-birds tallied in the latter section. Each saw only seven points scored, and both teams were held to their own way the rest of the way.

Ancheta embellished the scoreboard. Irv Huntsinger, and Jim Gill missed only one of his five baskets. Phil Kastens came off the bench to get 12 of his 16 points. Reserve center Paul McConnaughey played less than three minutes. Phil Kastens came off the bench to get 12 of his 16 points. Reserve center Paul McConnaughey played less than three minutes.

Austin Takes 177 Class; HC Matmen Second at State

The Thunderbird wrestlers of Highline narrowly missed the State Junior College Championship, February 23 and 24, and were forced to settle for a second-place tie. Grays Harbor took top honors with a score of 71 to Highline and Columbia Basin's 70.

Highline's Don Austin is the new state champion in 177 lbs. division. The Thunderbirds won the first by a pin, the second 2-0, and the third 6-0.

Randy Berg in 130 lbs. Terry Moore in 145, Ken Higgins in 192, and Rick Carr in 197 were in contention until the final round. All four lost in that last match, taking second place. Berg lost 3-4 decision on total riding time, and Ken Higgins was pinned by John Lane, his long-term rival from Big Bend.

In the heavyweight class, Nathan Roundy lost his second match and took third place, while Dennis Moore in 120 and Dane Seghini in 137 took fourth.

The Thunderbirds entered the Big Bend meet with eight of the regular ten-man team. At the Regional, Highline Fielded only eight, giving Everett their only points of the afternoon.

The highlight of the weekend was the Big Bend 100 lbs. class match, between former state champion, John Lyle Johnson, and Paul Luftenegger, the new state champion in 111 lbs. All nine matches were won by pins, except for the decision between the two. The Thunderbirds drew eight of a possible nine byes. Two of Austin's victories were Randy Berg in 130 lbs., Tern reversals of previous matches with Moore in 145, Ken Riggins in 152, and Nick Cam in 191. All four lost in that last match, taking second place. Berg lost a 3-4 decision on total riding time, and Ken Higgins was pinned by John Lane, his year-long rival from Big Bend.

What does a state champion think of an aggressive season approach? I asked one to see. Carl Brandt is the current Washington state champion for the Thunderbirds.

"It must improve," came the reply. "It is gratifying to come back from surgery and to improve. I think I've gotten a lot of mileage out of this season, but I must beat my performance of last year to repeat. The competition in the state is going to be getting better every year." Brandt set a new Thunderbird record of 100-0 last year, and according to his coach, Don McCannan, a season of 95-5 is a reasonable expectation.

Asked of the team's chances of taking the state title this year, Brandt commented, "I think they have a good chance this year; we have some good men back from last year's second place team plus a number of top prospects among the junior men."

Brandt typifies what you picture a state champion to be. He is president of the Lettermen's Club, an active worker at other athletic events, and an example of physical fitness.

Mr. Elmar Zemgalis, Highline College student, has been awarded a National Science Foundation Science Faculty Fellowship. A limited number of these fellowships are available to outstanding full-time professionals throughout the United States each year for the support of their post-doctoral and professional achievements. The grant received by Mr. Zemgalis will enable him to study fundamental physics through his own efforts, the University of Washington, and the University of Georgia.

Mr. Zemgalis has been working at a number of academic institutions, including Oberlin, the University of Washington, and the University of Georgia. He has taught at Seattle University at the University of Washington.

Teaching has kept Mr. Zemgalis busy for non-academic pursuits has been very busy, eventually to travel with his wife to the Orient and to Europe. Born in Latvia as a part of the Soviet Union, he and his wife came to America 15 years ago.

Mr. Zemgalis notes that a continuing trend toward gradual professionalization on the part of Highline students challenges the instructors to become more versatile.

Foor Sex: Future Space Engineers?

by Kat Kaynak

By Kat Kaynak

Periodically the cry is heard about the shortage of scientists and engineers in our country now and in the years to come. Our society is becoming more complex and the demand for such skilled persons becomes even greater. It seems that our society has become accustomed to the idea that women lack the ability necessary for engineering and scientific careers. In the Soviet Union 29 per cent of the engineers are women. It is that Russian women are better at science and mathematics than American women is it that our society has not encouraged women to enter such fields? The reasons for such a difference in engineering and other fields in that country are women.

The General Electric Test Battery (GATB), developed by the United States Employment Service, shows that six per cent of high school boys and four per cent of the girls have engineering aptitudes. Our old-fashioned ideas have prevented us from fully utilizing our human resources.

Some fields that women could be successful in include household appliances, textiles, clothing, educational equipment, business equipment, residential design and equipment, office planning, landscape architecture, etc. Salaries are good with the median salary ranging from $5,000 to $10,000 a year. As reported by the faculty of Women's College, women with graduate degrees earn more.

Attitudes toward change grow if women are to help fill the gaps. Engineers should be encouraged to utilize her talents in all areas of employment whether or not traditionally a woman's field or not.

Debate Team

The Highline debaters gave a good account of themselves at the University of Puget Sound's Forensics Tournament, February 17th and 18th. The winner was the University of Oregon, which dominated the tournament as usual. Highline's number-one team, with Green and John Anderson, defeated all junior college competition while losing only to Oregon team that placed first and a strong team from U.S.P. Highline's other team, participating in its first tournament, won once while losing four times. Nancy Sanford anchored the team, working with Janice Curley when the team was affirmative and with Dale Maloney when the team was negative.

In individual competition, Mike Parker was Highline's outstanding speaker, placing second, third and first in three rounds of impromptu speaking (his best round) and, first in two rounds of extemporaneous speaking. He was also the only student to equaled Parker's performance. Mike also learned the speaker to read an editorial on when presidents immediately organize his thoughts, and deliver a speech all in a time limit of six minutes.

Seattle Schools Are Great But We Need More Negroses

by Allan D. Humbale

"We need more Negro students," says Paul Gallaway, a twenty-five-year-old Army vet, and full-time English major at Highline College.

When asked why he felt this way, Mrs. Gallaway replied that there seem to be two conflicting minds present in the United States, the white mind and the "Negro" mind, and it is not difficult to see that they are in conflict.

"Right now," Gallaway continued, "we are still living in our parents' society but we are growing into our own, and if it is to be a better society, we can't have these conflicting minds. We need a synthesis of minds a gray mind if you will, a mind that can understand the problems at home so that we can really begin to solve problems at home.

Students Four

When asked what he considered to be the major differences between Highline's students and the students in his native Chinese, Mr. Gallaway replied that he felt that the students here are freer, less formal and more impulsive about the things going on around them. He added, however, that the student government seemed ridiculous bastard.

Mr. Gallaway said that he feels our student government seemed socially oriented to what we need. In contrast it needs to be more teacher oriented and in the respect of inviting in speakers besides those brought here by the faculty, of having campus debates, and of setting up a class critique system that could be of value to teachers and students alike. Social life is important but as are those other things. Neither should be left out of campus activity, but right now the latter seems to be almost entirely left out, Mr. Gallaway said.

Get Work Ready

For Art Auction

The Cooped Club is now accepting original work to be displayed and auctioned off at the Spring Arts Festival, according to club president, art instructor.

The club is soliciting from any person on campus—not just students, and teachers. Paintings, drawings, posters, sculpture, photography or any other mediums are acceptable.

Paintings and drawings are to be matted and framed, and all art work is to have the donor's name, address, and phone number securely attached. All entries are to be delivered to the Cooped Club office, A101 by Mr. Gwin: Painting, Sculpture, etc.

Prepare Now

For Art Auction

The annual art auction is on its way. Prepare your work NOW. Work in any of the following five classifications is being accepted in AS I by Mr. Galvin Pabeling; work must be on a 16 x 20 frame and ready to hang, art, sculpture, photography or any other mediums are acceptable. Paintings and drawings are to be matted and framed, and all art work is to have the donor's name, address, and phone number securely attached.

The auction will be held May 15th from 2:00 p.m. until 5:00 p.m.

**Mrs. Beret Kischner Remarks On The "Unique" Culture of Brazil**

"Remarks on a Unique Culture* was the topic of a talk on February 11, 1967, in the Kischner Auditorium of the University of Iowa. Mrs. Kischner's remarks on Brazil were based on her firsthand experience, which included 15 years living in Brazil and extensive travels throughout the country.

In her remarks, Mrs. Kischner referred to the cultural diversity of Brazil, noting that the country has a rich mix of European, African, and indigenous influences. She mentioned that Brazilian culture is unique due to the blending of various cultures and the strong influence of the indigenous peoples.

Mrs. Kischner also spoke about the music and dance of Brazil, highlighting the importance of rhythm and the passion for dancing. She mentioned that the people of Brazil are very musical and that dance is a significant part of their culture.

In discussing the social structure of Brazil, Mrs. Kischner pointed out the existence of a wealthy class and a large poor class. She noted that Brazil has a growing middle class, which is leading to changes in social dynamics.

Mrs. Kischner also addressed the issue of education, noting that the percentage of educated people in Brazil is still relatively small. She emphasized the importance of education for the future of the country.

Mrs. Kischner mentioned that Brazil is predominantly Roman Catholic, although there are also significant numbers of Protestants and other religious groups.

In conclusion, Mrs. Kischner expressed her appreciation for the hospitality of the Brazilian people and her admiration for their culture. She encouraged others to visit Brazil and experience its unique cultural diversity.
