Ed Murray Answers Questions On Recent Viet Nam Elections

By Jonathan Flores

In an October 12 interview with a local college journalist, Ed Murray, a prominent political figure, shared insights on the recent Viet Nam Elections. Murray discussed the significant factors affecting the election, including the influence of political parties, the role of the people, and the impact of international relations.

Murray emphasized the need for domestic reforms and the importance of engaging with the international community. He highlighted the significance of maintaining diplomatic relations and ensuring stability in the region. Murray also addressed the role of young leaders in shaping the future of Viet Nam and the importance of continued dialogue to address political issues.

Murray's interview provided valuable perspectives on the ongoing political landscape and the challenges faced by the nation.

Hubbard Is New Student Director

One of the most popular student clubs on campus has welcomed a new leader, Mr. Hubbard, to its ranks. After winning the student director election, Mr. Hubbard has been enthusiastically meeting with students to discuss various activities and organizational plans.

Hubbard's tenure as student director marks an important milestone for the club, and his leadership promises to bring new energy and initiatives to the group. With his experience and dedication, Hubbard is poised to make a positive impact on the student body and the club's activities.

Two Humanities Courses Expanded

The Humanities Department at the college has expanded two of its courses, offering students increased opportunities for exploration and learning. The expansions include a broader scope of topics, more in-depth discussions, and increased interactive elements.

With the addition of these courses, the Humanities Department aims to provide students with a more comprehensive understanding of the humanities. The department is committed to fostering a diverse and inclusive learning environment that caters to the needs of all students.

Where Did You Park Your Car?

Last week students on the main campus were asked, "Where did you park your car?" The results of this informal survey are illuminating and provide insights into student parking habits.

The survey revealed that many students park far from their classrooms, necessitating long walks or additional transportation. This finding underscores the need for improved parking facilities and better integration of transportation options.

Analysis of the survey data suggests that there is a dire need for more parking spaces and better access to transportation services. The college administration is considering implementing strategies to address these issues, such as expanding parking areas and enhancing shuttle services.

Dr. McFarland Gets Ph.D., Appointment

Dr. McFarland recently received his Ph.D. degree and has been appointed as the new chair of the psychology department. This appointment marks a significant milestone in his academic career and promises to bring fresh perspectives and initiatives to the department.

Dr. McFarland is known for his expertise in psychology and his dedication to teaching and research. His appointment is expected to strengthen the department's commitment to excellence in education and scholarly work.

New Guidance Center To Be Open Soon

The college is excited to announce the upcoming opening of a new guidance center. This center will provide comprehensive counseling and support services to students, enhancing their academic and personal development.

The guidance center will offer various programs and resources to support students in achieving their academic goals and navigating the challenges of college life. The center's opening is a testament to the college's commitment to student success and well-being.

Attending University: Advice for Prospective Students

Many students are eager to attend university, but they may feel overwhelmed by the decision-making process. Here are some tips for prospective students to consider:

1. Research your options: Look for universities that align with your academic and career interests.
2. Visit campuses: Take the opportunity to visit various campuses to get a feel for the environment and culture.
3. Consider financial aid: Explore all available financial aid resources to make attending university more affordable.
4. Network: Connect with current students, alumni, and faculty to gain insights into university life.

By following these tips, students can make informed decisions and start their university journey with confidence.

Medical Students On Their Internships

Medical students are currently immersed in their internships, gaining valuable hands-on experience that will prepare them for their future careers. These internships offer students the opportunity to apply their knowledge in real-world settings and develop essential skills.

Medical students are under intense pressure to excel in their internships to ensure a smooth transition into residencies and beyond. The experience is both challenging and rewarding, providing students with a deeper understanding of the medical field and their role as future practitioners.

Jennifer Thompson, a third-year medical student, shares her experience:

"I've been working at the hospital for the past few weeks, and it's been an eye-opening experience. I've learned so much about patient care, teamwork, and the complexities of the medical field. Though challenging, I feel prepared for the next step in my education.

Dr. McFarland Gets Ph.D., Appointment

Was that really a good idea?" Dr. McFarland's appointment has sparked a debate among faculty and students. While some are enthusiastic about his expertise and leadership, others are concerned about the implications of this decision.

Dr. McFarland received his Ph.D. from a prestigious university and has a long history of academic achievement. His appointment is seen as a significant step forward for the college, but it has also raised questions about the selection process.

Dr. McFarland's appointment has inspired discussions about the importance of transparent and fair selection processes. The college administration is expected to address these concerns and ensure that future appointments are made with careful consideration and due diligence.
To the Students of H.C.—

Student participation is the main factor which will determine the success of the Kent-meridian Royal Herald. We are pleased that our elections have been won by this group of students who were elected for their leadership qualities. It is very important that our school has a student newspaper which will give us a voice in our own school. We are aware of the many problems that exist in our school as well as many of the proposals which have been made by our students. We feel that our school newspaper should be a forum for our students to express their ideas and opinions. We hope that our readers will support our newspaper and contribute to its success.

Why Must the Vets Take PE?

We have been hearing from a number of our students that they are not interested in physical education. They feel that it is a waste of time and energy. However, the Kent-meridian Royal Herald feels that physical education is an important part of our school program. Physical education not only helps to develop good health and body, but it also helps to develop good work habits and team spirit. We urge our students to participate in physical education and to make the most of this important part of our school program.

Minority Rules Again

The Kent-meridian Royal Herald would like to bring to your attention the fact that the minority rules are being enforced in our school. This is not a new phenomenon, but it is one that we hope to see come to an end. The Kent-meridian Royal Herald feels that all students should be treated equally, regardless of their background or race. We urge our students to stand up for their rights and to demand equal treatment.

Highline's Very Fairy Tale

The Kent-meridian Royal Herald would like to bring to your attention the fact that the minority rules are being enforced in our school. This is not a new phenomenon, but it is one that we hope to see come to an end. The Kent-meridian Royal Herald feels that all students should be treated equally, regardless of their background or race. We urge our students to stand up for their rights and to demand equal treatment.

Highline College Exchange Column

And so I dug in to my request for a beat and I wasn't given an assignment...right away. Yes, they came up with an idea for my exchange column, but it just didn't work. The idea is to promote activities and clubs around campus, which is fine, but they also want to know if you have a suggestion for a beat. The beat will be a column that runs every week in the Kent-meridian Royal Herald, and it will be written by a student. The idea is to have a different beat each week, and to have it run in all of the Kent-meridian Royal Herald's editions. The idea is to have a different beat each week, and to have it run in all of the Kent-meridian Royal Herald's editions.

Parking Problems

A Big Headache

The Kent-meridian Royal Herald would like to bring to your attention the fact that the minority rules are being enforced in our school. This is not a new phenomenon, but it is one that we hope to see come to an end. The Kent-meridian Royal Herald feels that all students should be treated equally, regardless of their background or race. We urge our students to stand up for their rights and to demand equal treatment.

Ugly Man Contest Begins Monday
Class President, Bab replied, "It would be nice for the students to have more opportunities for participating."

Jim explains the reason for the petition to end the election system. He felt it was too much trouble to let the dance go on because he knew that there would be arguments about the music, the lighting, the seating arrangements, and the general atmosphere of the event. The Dean would not look at the petitions.

Students at Highline College have planned a number of events for this year and accomplished as much as they could. However, they decided that it would be nice to have more opportunities for participating in the student government and in the activities that the student body does not give their officers. Therefore, there is no sense in having elections for class or ASB positions, according to Jim Crawford, Election Chairman. The reason is that they have to go through a number of rules about the elections, and the Dean refuses to look at the petitions.

Unpacking In Her Bright New Office

by Dorothy Tarbet

Sally Bramel, new Coordinator of Home Economics, began her teaching career in 1958 at Cascade Junior High. Then taught at Mt. Rainier, and was the Coordinator of Home Economics for the Highline Public Schools before joining our faculty. With such an excellent background, we want to make every effort to acquaint you with the home economist in our theory and practice. Sally is keenly aware of the importance of Home Economics areas. She is pleased that classes will be taught later in the quarter. The classes will be taught in all areas and new sections have been added in popular courses. Among the new classes offered this fall are Cooking, Fashion, Costume Design, and Child Development.

In addition, the college has expanded its evening credit course program at Federal Way High School. Ten courses were offered this quarter, although four were canceled for lack of sufficient enrollment. The program is made to meet the many different needs of the area served by Sally, stated Mr. Harold H. Hunt, Director of Community Services.

She further stated that after keeping line with the idea of a comprehensive college, Highline has broadened its Community Service Program to benefit people in all facets of community life. Some of the new classes under this program are "Understanding Your Family" and "Residential Living." These courses will give students the opportunity to learn about the different areas of the family. In their classes, students will be taught how to live with more depth than before joining our faculty. That is to say, Sally Bramel brings with her a wealth of knowledge and experience in the Home Economics field. With her, the Home and Family Living students will be given more help in Home Economics areas if they are served as working moms and efficient home managers.

This adds further variety to the curriculum. That is to say, Sally Bramel brings with her a wealth of knowledge and experience in the Home Economics field.

Undersea Technician Program Is New to Highline College This Year

"It's hard, it's tough, it's cold, it's wet—"you're fighting the elements all the time," says Mr. Peter Williams, a Britisher who recently completed the Undersea Technician Program. Mr. Williams is teaching this course at the Highline College.

The Undersea Technician Program is designed to train students to be both divers and engineering technicians. The program was added in August at Highline College as part of the Undersea Technician Program.

The Undersea Technician Program, which is designed to train students to be both divers and engineering technicians, is new at Highline this year. The program is offered in cooperation with the United States Navy and the United States Coast Guard. The program is designed to train students to be both divers and engineering technicians. The program is offered in cooperation with the United States Navy and the United States Coast Guard.

Mr. Brouillet is the chairman of the House Democratic Committee's platform, or "train of thought," during the regular session of the legislature. He has also served in the House of Representatives for 12 years, representing the 25th district. He is also the chairman of the Interim Committee on Education for the State Legislature. The function of this committee is to submit possible legislation concerning education, which they prepare during the Legislature's intersession. Mr. Brouillet is also the chairman of the House Democratic Committee's platform, or "train of thought," during the regular session of the legislature.

Mr. Brouillet was born in Puget Sound, Washington. He grew up 30 years ago and is now living there. He went to high school in Puyallup and later taught there for four years. After that, he taught in Tacoma for five more years. He received his B.A., B.Ed., and M.A. at the College of Puget Sound.

During the Korean War, he served in the CIC (Counter Intelligence Corps) with the Army. He was a sergeant, and he said he especially enjoyed this work because he was required to wear civilian clothes, so none of the people knew his rank. His fellow corporals—except for his captor. Mr. Brouillet was stationed in Alaska, and he was given a Top Security classification, which enabled him to handle extremely sensitive material. He usually recommended the CIC, as he looks back upon it as a very pleasurable period of his life.

Mr. Brouillet has been married for 22 years, and he and his wife, Mary, have two sons, Blair, junior, and Marc, eight. He has travelled all over the world for the Washington Education Association, Singapore, Greece, and England very recently. He said he especially enjoyed this work because of the discomfort. He said he enjoyed it very much. There are no plans for him to return to the military, and the last year he was in the Army was in Washington, D.C., last summer, where they visited the FBI building and the White House.

waste your Bachelor of Science
Degree any more than you do.

The Totems start on
The Winning Way
The Seattle Totems here start...
The University of Washington has sent a report on 168 former students to the University last year. Of these, 14 students lost credits, and only one lost more than thirteen. Nine students lost 90 credits, and only one lost more than thirteen. Seven of these lost three or less credits because the courses were not credited to the U. of W. and enrolled in a second application of credits.

No more than thirteen credits are necessary for graduation. A certain number of credits in the foreign language deficiency. The University requires two years of chemistry and physics, and this is a duplicative class. The College requires one unit of high school or college. The question is whether the knowledge of those two subjects is the same as one unit of high school or college.

The object of the club is to discuss and promote further the knowledge of those two subjects. The club should consist of five or ten people, and it is a duplicative class. No credit is received by the student who took a test to be enrolled in a former classroom, a complete class. All students are oriented, intra-mural and inter-mural sports. The University Catalog presents the Council of Congress, which officially commenced its activities, social studies, and science. Reverend will be the first of a lecture on "Teaching in the humanities." The Student Activities Association (S.W.E.A.) was organized for students to discuss and promote the humanities. The S.W.E.A. plans active participation on October 3.

The College Bookstore offers many items. Students should also note that students on campus of which 81 are girls and 77 are boys. The library assistants are then available to truck drivers to IBM or any other job. She further states that in the Financial Aids Office. These jobs are speckled across the country, will be employed. The greatest number of students is awarded on one of three ways. There are still vacancies for All Winter Tire Purchase. These jobs are offered for All Tires Purchased from this Ad with this Coupon.
