On Olympic Coaching Staff
The California grape boycott is one of the most influential labor strikes in the United States today. There are many aspects, both for and against the attempt of Cesar Chavez to better the working conditions of the California grape pickers. On one hand, the Committee on Labor and Public Welfare, U. S. Senate, Subcommittee on Migratory Labor says, "No other industry or group of workers has been so poorly paid yet contribute so much to our Nation's wealth and welfare." On the other hand, a report by the Perishable Agricultural Commerce Corporation of California insists that "California farm workers have never been better off. They have been among the highest paid in the country." The California farm workers have not been paid in the nation. The effective minimum wage is $1.65 per hour and piece rate earnings are at least $2.00 per hour. These wage rates are also the average yearly earning of the average family. According to the California Dept. of Employment, various races have placed the average yearly earning of the average white family, people, and families of income. Although migratory worker's wages are also the average yearly earning of the average white family, people, and families of income. However, in a recent report, the Rev. Wayne C. Hartman, Jr. Director of California Migrant Ministry, the average migrant worker picks a bag of grapes in six to eight hours and earns $4 to $6 during this period of time, working on the farm.

The grape picker is destitute to gain support from the government. One of the misconceptions of this movement is that farmers have joined the union and in actuality the grape pickers are the lowest paid farm workers for the worker but a battle for more power for the worker.

The grape pickers of California are no longer primarily migratory workers; more than half in labor and the highest paid farm workers in the United States. The union has successfully defended the grape picker as destitute to gain support from the government.

The union has gained support nationwide with millions of dollars in support. It is estimated that 1200,000 Grape workers have joined the grape boycott in support of the boycott. Children in large cities on the west coast have picnics to show their support to the boycott.
Marmes Site Founder Speaks At Highline

By Greg Porter

Dr. Richard Daugherty, a professor of archaeology and a member of the faculty at Washington State University, spoke at Highline about the archaeological finds from the Marmes Shelter. The Marmes Site, which faced the problem of being flooded and now is flooded, is one of the sites found near the mouth of the Palouse River. There are three sites named Mffiregor, Porcupine, and Marmes. From 1953 through 1964, Dr. Daugherty worked at the Mffiregor site.

Dr. Daugherty led a team of archaeologists to discover 15 human skeletons ranging from 12,000 to 8,000 years old from the sites. These bones, which are the oldest in the Western Hemisphere, date back to the early Paleolithic period.

The Marmes Shelter is a large structure with a deep layer of volcanic ash, which was used for temporary shelter by the early inhabitants. The bones were found under a layer of ash that was 6,700 years old, while the bones below were much older.

Dr. Daugherty has primarily dug in the Marmes layer, and the excavation has been ongoing since 1953. The site has been funded by the Washington State Board of Regents to drain the site so that further excavation can be carried out.

MID-SEASON MEETING OF THE ASHC

Exchange: S.D.S. and Y.R.'s Plan

Quarter of Confrontation

By Dick Byrkan

What's happening on campuses around the area, and around the state? Perhaps a better question would be, who cares? Despite the seeming disinterest in the activities of other campuses and universities, there is a new generation of students who will vote on campus issues.

The University Young Republicans have established an Anti-S.D.S. committee, to create disturbances at S.D.S. rallies. A committee member was asked if this meant that the Y.R.'s were 'descending' to the level of the opposition; he answered, 'yes.'

The beginning spring quarter brings news of academic reform to the Seattle Pacific College campus. The campus, vocal in its defense of its present liberal arts curriculum, is facing the threat of being classified as a 'Lower Division' school by the state. This threat has prompted the establishment of a Black Student program, that would begin next fall.

A bulldozer cut was made in front of the Marmes shelter to study the geological history of the area and in the process, a number of new findings were made. A 10,000 year old cremation burial site containing six human remains was also found.

In addition, a 10,000 year old cemetery was found on the site of the Marmes shelter, that was later proven to be from yet another layer.

The Marmes Site is a large shelter with a deep layer of volcanic ash, which was used for temporary shelter by the early inhabitants. The bones were found under a layer of ash that was 6,700 years old, while the bones below were much older.

The bones of an elk that had been known to be 15 per cent larger than the largest elk recorded in history were also found. A 10,000 year old cemetary burial site containing six human remains was also found.

Art Happenings: Coffee House Invaded

The many-times-pot-off art class costume happening re- occurred Thursday evening, 3 March, the last day of the semester at the Hungry Mind Coffee House in Burton. Presenta- tion was made by design stu- dents who labored diligently throughout last quarter on many highly individualistic costumes.

Coffee-drinking customers sitting in a semi-dark atmosphere were presented with a startling array of some beautiful, some wild, and some way-out shapes and designs straight from the recesses of the inner mind or "year 2001" comic books. Beauty and the beast theme was exemplified by pretty girls contrasted by monster costumes. Through- out the evening, art students circulated among the tables to the accompaniment of jazz rock records.

The brightly-colored costumes were fashioned from paper maché, fabric, fur, metal, plastic and fiberglass. Some sprouted horns, others had beaks, high-domed heads and assorted appendages of claws and fins. Others fluoresced and flashed intermittent lighting.

As the evening progressed, some of the more uninhibited coffee house customers joined in the happening by getting into costumes of their choice and strolling among the crowd. A mind-expanding psychedelic light show topped the evening off to make a good ending.

THE AMERICAN INDIAN was given an unusual depiction in this costume of Joe Bitzan’s at the free-wheeling interpretive Art Happening. Photos by Helen Martin. MONSTROUS was an understatement for the costume designed and worn by Larry Corpuz at the recent Art Happening at the Hungry Mind.

BODY PAINT AND BIKINI was the costume worn by Diana Smith, who was trying to depict a spinning psychedelic flower at the Happening. TOP-NOTCH was with mushrooming colors was Helen Martin. Slightly reminiscent of a mushroom or an atomic explosion, Helen roamed around the happenings, taking time out from her own picture taking to have her own costume photographed.

Scheitel and Satire Combined In Comedy

By NORMAN RICH

When a person tries to create satire, with an original and imaginative flair, he undertakes a most difficult task.

Highland's Wayne Scheitel, supported by Dean Yanzon, Jean Endlich, Brian Jacobs and others, has attempted to do this in his presentation on this concept of satire. The "Tonight Show" presented on April 1 in the Lecture Room was a welcome addition to the problems his grade at Highland. It has the best and smartest humor—humor.

Shakespeare Comedy In The Offering

The Shakespearean comedy, "Two Gentlemen of Verona," will be performed by the Highland College Theatre Lab for the Spring Quarter presentation.

The play, under the direction of Miss Shirley Robertson, is a colorful and comedy dealing with the "debt of love and friendship." The play should be of special interest to students of Shakespeare as well as to the students of the arts and sciences who have come to terms with the art of acting in Shakespeare's era and to create his characters in his later plays.

An interesting concept will be added to the presentation. It will be performed in some style—theater in the round—which should add to the play's overall effect.

Main members of the cast include Wendy Beckman, Jean Endlich, Brian Jacobs, John Helfsteler, Susan Jacobs, Wifredo Hernandez, and Susan Quimle.

Main members of the cast include Steve Evans, Johnathan Lynch, James Frank, Brian Jacobs, Lou Massie, Karen Moot, hundreds of thousands of the Yakima Indian nation to grow asparagus and berries 1000 workmen and 1000 machines. Two blocks, L. V. Magowan is on the boards of Southern Pacific Railroad and has been working on his income from agricultural sales in 1967.

This second largest supermarket chain in the world and the largest buyer of table grapes in the West, has close links with agriculture and the table grape industry.

Safeway, with more than 2,000 retail food stores, buys $2.5 million worth of grapes a year, and has been a leader in convincing other supermarket chains to continue handling grapes.

Safeway's managers claim to be neutral in the grape strike dispute, but their actions in continuing to buy scale grapes on such a massive scale guarantee the growers a huge market for their produce. Union officials have the latest Safeway annual report and Industry. Safeway's actions are followed by many other chains which would merely be responsive to consumers' moral and economic pressures.

It is no accident that Safeway's managers have taken such a strong stand against the farm workers and in favor of the growers. A look at their Board of Directors shows that they are involved in activities throughout the world.

One of the directors of Safeway, J. G. Boswell, is also president of J. B. Boswell Inc., one of the largest cotton growers in California and the largest grape grower in Arizona. Last year Boswell represented the Department of Agriculture, and the Federal Government for NFT Japan to land upon this very seed and to show a basic content in the United States since 1968.

One error takes a moment to adjudge, but the sound is prolonged and must always be made.

The plight of the pickers is not unlike that of some of the present day farmworkers. After playing some classic Indian selections, Miss Devi switched to American pop, beginning with "My Love is an Indian Woman." The audience was quite taken with the Indian music as well as the performance. After playing some classic-Indian selections, Miss Devi switched to American pop, beginning with "My Love is an Indian Woman." The audience was quite taken with the Indian music as well as the performance.

The intricate carvings depict the seven note scale with twenty-two sounds in a four-foot pipe which is rammed with You Are My Sunshine. Because one's hands must jump up and down the instrument.
Triangular Track Triumph

by DALE BOILING

The Highline Community College track team opened its outdoor season with a win over strong Everett and not-so-strong Bellevue Community Colleges Saturday, March 29. Running on the Everett track, the Thunderbirds scored in all but two events to bring the final tabulation to Highline 51%, Everett 79%, and Bellevue 11.

Freshman sprinter Erik Swanson paced the point getters for Coach Don McConnaughey with 10 points. Swanson racked up his tally by winning the 100 and 220 yard dashes in 11.8 and 22.4, respectively, and by anchoring the second place 440 yard relay team.

The victory of this year's team, Jack Pyle, displayed his talents, won the triple jump, the 440 yard run and the mile run. Pyle's team does not enter events less than a mile, turned the lap in 1:30.3. His time of 4:21.4 is more than respectable at this early date for the mile.

Another second year man, Gary Andrus, won the shot put at 45' 3", and two feet ahead of his nearest opponent. Andrus also placed second in the discus with a toss of 140'.

The discus winner was Bruce Martin. Martin threw 143' 7", after taking fourth in the shot.

Steve Wittler ran the 320 in intermediate hurdles in 48.3, good enough for a victory. Wittler got a poor start in the 220 yard high hurdles, however, and placed second, just 3 seconds behind the winning time of 15.3.

Gary Nelson turned the corner in 2:04.8 and came home in 50.8 to take the lead in the 880 yard run. Rich Norman, third in the 440, took the 880 in 2:05.6.

Coach Norm Johnson wanted to win the mile relay. Wood and Norman were joined by Wittler and Swanson in the 440 yard relay.

The next outing for the team is a trip to Oregon State University to meet the Beavers and Clark Community College while the OSU varsity meets UCLA.

(Carl Hogstrom)
Mr. Don Orphan said that the team selected three swimmers for recognition in the swimming program. The most outstanding swimmer was Ron Johnson, the Team Captain was Marc Lautman, and the third swimmer was Mike Moore. Larry Scott was second in the 120 weight class, Lee Pederson was third in the 115 weight class, and Rick Mathis was third in the 115 weight class. The wrestling team won, 0 lost and 1 tied. The wrestling season was a varsity sport, and they were met in varying degrees in the operation of the team this past season. To this end it is my feeling that our season was tremendous.

Land Reform Would End War In Less Than A Year

By DICK DYKEMAN

A new concept in land reform is being tried in South Vietnam to end the war in less than a year. The program is called the Peasant Owners' Program, and it is being sponsored by the U.S. Army and the Vietnamese government.

The program was developed by U.S. Army officers and is being implemented by the Vietnamese military. The program is based on the idea that the Vietnamese people are the key to ending the war. By giving the people a share in the land, they will have a stake in the country and be less likely to support the Viet Cong.

The program involves the establishment of Peasant Owners' Committees, which are elected by the villagers. These committees are responsible for managing the land and ensuring that it is used for the benefit of the community. In addition, the Peasant Owners' Program includes support for education and health care.

The success of the program is measured by the level of participation in the elections and the rate of support for the government. The program is expected to be in place for at least three years, after which it will be assessed and possibly extended.

The Peasant Owners' Program is just one of many efforts by the U.S. and the Vietnamese government to end the war. However, many experts believe that it has the best chance of succeeding, due to its focus on the people and its potential to provide economic benefits to the Vietnamese.

In summary, the Peasant Owners' Program is a promising new approach to ending the war in South Vietnam. If it is successful, it could help bring an end to the conflict and bring peace to the region.

HCC Students Have Varied Backgrounds

By ROBERT R. RICHARDSON

During the past few years, Highline Community College has seen an increase in the number of non-traditional students. These students come from all walks of life and have a variety of backgrounds.

The non-traditional students at Highline Community College include adults returning to school after a long absence, veterans, parents, and working adults. Many of these students are seeking a second career or a degree that will help them advance in their current job.

The non-traditional students at Highline Community College are a vital part of the college community. They bring a wealth of experience and knowledge to the classroom, and their presence helps create a diverse and dynamic learning environment.

The college is committed to providing these students with the support they need to succeed. This includes offering flexible scheduling options, such as evening and Saturday classes, and providing academic advisors who can help students select courses and plan their degree programs.

The success of the non-traditional students at Highline Community College is evident in the college's enrollment numbers. Since the implementation of the non-traditional program, the college has seen a significant increase in the number of students from non-traditional backgrounds.

In summary, the non-traditional students at Highline Community College are a valuable part of the college community. They bring a wealth of experience and knowledge to the classroom, and their presence helps create a diverse and dynamic learning environment.

Land-Encasing Ceremonial Axes

By JAMES V. WHITE

The ceremonial axes shown above were used by the elder New Guinea tribesmen. They are covered in colorful encasings. The small circle in the middle is a quarter, showing the relative size of the hunting implements.

The axes are used as ceremonial objects, and they are often depicted in sculpture. The axes are also used as weapons, and they are often carved with intricate designs.

In conclusion, the ceremonial axes shown above are a fascinating example of New Guinea art. They are a reminder of the rich cultural heritage of this region.
