Class Officer Elections Held

Freshmen and sophomores will soon elect their class officers at Highline Community College.

Sophomore Representative on the Senior Class will be Linda Wilkerson.

Yesterday evening, October 10th, Linda Wilkerson was chosen to be the Sophomore Representative on the Senior Class which, along with the Junior Class officer, will oversee the election of the Senior class officers.

Radio, Paint Can Have a Blast

By Steve Wickstrom

A radio and a paint can had a blast last week in the men's locker room at the school. The radio was plugged into the wall, but wanting to try and start the bleachers, a man knocked out the radio and the paint can set. Some damage was caused, but the area was cleaned up and the blaster was arrested.

Enrollment Trend Continues to Climb

By Steve Wickstrom

According to Dr. McNally, the enrollment trend at Highline Community College continues to climb. As of October 10th, there are an estimated 4,816 students enrolled at the school, an increase of 542 students from last year and a 108.7 percent increase over last year's 4,572 full-time equivalent students. The figure includes special students who are matriculated and only estimates of students or students taking 15 or more hours. "The increase continues to climb," said Dr. McNally. "We have a record number of students this year, and it looks like we will have a record number of students next year as well."

Million Dollar Midway Drive-In To Be Built

By Tom Williams

The student union of Highline Community College is planning to build a million dollar drive-in on the campus. The drive-in will be used to raise funds for the student union and will be located on the old baseball field. The drive-in will have a capacity of 200 cars and will be open year-round. The student union is planning to start construction in the spring and hopes to open the drive-in by the fall of 1971.

Given Chamber

The Undersea Technology Foundation has given a $17,500 recompression chamber to the school. The chamber is used to simulate the effects of pressure changes on the human body. The chamber is used to train divers and to study the effects of pressure changes on the human body. The chamber is used to train divers and to study the effects of pressure changes on the human body. The chamber is used to train divers and to study the effects of pressure changes on the human body.
Dean of Instruction Answers Queries

Some basic, fundamental questions, questions that concern each student at HCC, were submitted to Dr. Shirley Gordon, Dean of Instruction. Following are the Q. A. and A. It is intended that these questions will enable the student better understand his position in a community college.

T-WORD

What is the major function of a community college and how does the instructional curriculum of HCC meet this function?

DEAN

1. The major function of the College is outlined rather concisely on page 1 of the new catalog under the four principal objectives which are (1) to provide its students with a broad, comprehensive general education, (2) to offer university level courses in a select number of areas, (3) to provide a program of technical and vocational curricula, and (4) to offer a program for adults including academic, technical, and community services. The instructional program of the College is measured by the courses offered both in the day and evening programs which include academic courses which are transferable to certain programs and specific occupational courses: remedial work; community service courses which are usually non-transferable for most students in the community who are not pursuing a college program; a program in adult basic education in which people who need instruction in basic reading and writing are served; and a rather extensive program for adults who are working for a high school diploma. These are some of the courses done through the instructional program. Then, too, the College offers many other programs and facilities to this community.

HCC adopts policy on campus disorders

The President's Office released the following regulations governing campus disorders:

1. Differences and disagreements existing in the college community should be resolved through dialogue consistent with the community college setting. Recognition of the rights of free speech and peaceful assembly is fundamental to the life of the college. 

2. The rights of the community must be in such manner as not to be disruptive of the primary or subsidiary functions of the college or as not to interfere with the rights of others.

3. There is a need to preserve the campus as a free forum for the discussion of ideas that are of concern to all people. It is also our obligation to see that the laws are observed. It is the policy of the College that single individual or small groups may not use the facilities of the College to disrupt the function of the college or to further its own ends.

4. Persons will be permitted to question the right to speak and disrupt issues, but no one will be permitted to infringe on the rights of others.

5. There should be a planned demonstration if a demonstration is a free expression of the human spirit.

6. If it appears desirable to the President or his designee, demonstrations and the proposed solutions.

On campus disorders will be alert to any indications of student unrest or student planning for a demonstration and will promptly relay such information to the Dean of Students or his designee in the event of the Dean's absence.

In the judgement of the President or his designee, the problem is use potential.

(a) The primary educational responsibility of ensuring the opportunity for all members of the community to attain their educational objectives;

(b) The subsidiary responsibility of promoting the health and safety of person in the community by maintaining and protecting property, keeping records, giving services, and sponsoring nonverbal activities such as lectures, concerts, athletic events, and social functions, then the President or his designee will consult the college attorney.

Steps that should be considered in responding to this situation:

(1) The Dean of Students or his designee will attempt every possible means of communication with those students who have been notified and establish a continuing series of communications in an effort to determine:

(i) The reason for the demonstration and the proposed solutions.

(ii) To convey the policies and objective of the College.

The President of Students, or his designee, will keep the President's office and the members of the President's cabinet fully informed.

(c) If it appears desirable to use potential of the college or the rights of others.

(d) To provide its students with a broad, comprehensive general education, to offer university level courses in a select number of areas, to provide a program of technical and vocational curricula, and to offer a program for adults including academic, technical, and community services. The instructional program of the College is measured by the courses offered both in the day and evening programs which include academic courses which are transferable to certain programs and specific occupational courses: remedial work; community service courses which are usually non-transferable for most students in the community who are not pursuing a college program; a program in adult basic education in which people who need instruction in basic reading and writing are served; and a rather extensive program for adults who are working for a high school diploma. These are some of the courses done through the instructional program. Then, too, the College offers many other programs and facilities to this community.

T-WORD

A Planned Demonstration: If a demonstration is a free expression of the human spirit.

A. Placed Demonstrations: If a demonstration is a free expression of the human spirit and is decided by the President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

B. Materials: If it appears desirable to the President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

C. Frankly, the concern of the college and its legal responsibility in the matter.

D. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

E. In any event, the President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

F. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

G. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

H. In any event, the President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

I. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

J. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

K. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

L. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

M. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

N. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

O. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

P. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

Q. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

R. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

S. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

T. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

U. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

V. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

W. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

X. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

Y. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

Z. The President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college.

T-WORD

A. Planned Demonstrations: If a demonstration is a free expression of the human spirit and is decided by the President or his designated representative, it is not a violation of the rule that planned demonstrations may be conducted only in areas which are material and substantially interfere with pedestrian traffic or the normal function of the college. This is a reflection of a possible emergency situation, as soon as information is available the Student Personnel Division, The President's Office referred to this document.
A Nice Way To Learn

Steelheads, on guard! Fifty more fishermen this fall will be knowledgeable in the latest secrets of fly-fishing, attracting, and catching steelheads as the result of one of the short courses being offered starting in November at schools in southwest King County.

The steelhead catching courses are offered by Community College District 8 and will be given at Federal Way and Highline high schools. The expertise will be provided by instructor James Martin, head of trout fishing in the Trout Club of Washington.

The course will be offered on Wednesday evenings at Federal Way, and on Monday evenings at Highline for five weeks. Class sessions will be from 7 to 9:30 p.m. at both schools, and the fee for the course is $15. There is a limit of 25 for both schools.

Thirteen other special courses and lecture series, ranging in topic from defensive driving to management functions, will be offered during the same period. Reports Fred S. Martin, coordinator of continuing education, a bulletin listing courses and other information may be obtained by calling Highline Community College, 363-3322, or the Federal Way Continuing Education Center, VE 9-1454.

One of the courses being offered is a five-week course on constitutional education. The course is co-sponsored by The Grapevine and the counseling department of Highline College.

Business's Goal: Stimulate Interest

By Frank Venske

While the economy may be booming, American business is in trouble. That is the attitude taken by Mr. Patrick E. Venske, assistant chairman of functional sciences, who devotes himself to help business managers in their daily processes.

"The basic problem is that percentage-wise, fewer good students are graduating from high schools today than were a few years ago," Mr. Venske says. "They are going to a teacher by the Old Vic." Since all the theatres were closed during World War II, touring with a company of actors throughout the United States, Mr. Venske says, he has been teaching drama alive for me.

"Traditionally, a student is suited for a specific skill that can be learned in a short period in any one of these schools. A good example of this is the student who is interested in being a lawyer or doctor. But there is a great need for skilled persons, and many times these positions are overlooked. If Mrs. Tide marred Mao-Tsetung-Tide, her name would be Mrs. Mao-Tsetung-Tide.

Two program areas are concerned with management functions, especially for the future.

Applied Sciences

Offer Good Future

"Many young people are missing out on a very profitable work experience program," said Mr. Roger Smith, chairman of the Applied Sciences Division.

Under Mr. Smith are 26 vocational programs. After a short period in any one of these areas, a student is suited for a job in his field.

Many students are not aware these courses offer a chance to earn valuable experience as well as to provide an income while he is still in school. A good example is welding, a skill that can be learned in one year. At the end of this time, the student could attend school during the day and work for a few hours in the evening.

By Beverly Tremad

"A rose by any other name would smell as sweet...." So spoke Juliet on her veranda one night in the pages of William Shakespeare. But a drama instructor by any other name would be Miss Shirley Robertson.

Miss Robertson, in charge of the Drama Department, is known to her students as warm and personable. One of her students, sophomore Sue Quinnell, says it best. "She is not an ordinary teacher because she cares about her students and gets involved with them. She made drama alive for me.

The Highline drama instructor majored in English and French at the University of Liverpool where she received her degree. She then realized that she wanted to act. She received her first actual training from a professional director in the north of England whom she remembers as "a very remarkable person who had been trained by the Old Vic."

Shirley Robertson broke into acting shortly after the outbreak of World War II, touring with a company of actors throughout northern England. Since all the theatres were closed during the war, they played to audiences in army camps, munitions factories, and "all kinds of places," according to Miss Robertson.

By the end of this experience, Miss Robertson was in charge of the drama department at Hereford College of Education in England. On her arrival at Highline in 1962, she taught English, drama to drama department had been organized. When the first drama course was offered in the spring of 1963, only six students enrolled. According to Miss Robertson, "they didn't know what a stage was, never mind how to stand on it."

In contrast, the year there are about 126 students enrolled in drama, about the average for the last year.

In January, Highline's own Shirley Robertson will be going on sabbatical leave. When in England last summer, she was interviewed by the Mirror and invited to work and study under the head of the drama department at the University of Liverpool. Her comment on this is, "I am very excited about it."

Miss Robertson has been teaching drama and oral interpretation exclusively. "Some of the students are doing very advanced work," she notes. "There is an exciting growth to skills and interest in the theatre that I have never seen, and I've been in the theatre now more years than I'd care to say."

But Miss Robertson did want to say that "The two great loves of my life are William Shakespeare and Louis." Louis is the nine year old French Poodle. Louis was named after the French President. Louis is a pretty good actor himself. He has appeared in "Lue's Labor Lost," "Lady of Culture," and "Tenderness of Horses."

Yet one of Highline's great loves is drama instructor Shirley Robertson. Throughout the past years she has provided drama students with superior instruction and experience.

As student Skip DeCham says: "She is always there for the individual student. She takes a solid interest in her individual and helping problems. She is willing to lend one to help a student, especially in a time of crisis or need. She has strong dramatic enthusiasm for four people, and it can't be catching off on us."

What more can be said of a teacher, except that a teacher by any other name just wouldn't be Miss Shirley Robertson.
Editorial Comment

In this sound happy, action oriented age of acid rock, riots and ballyhooing television commercials, one is often criticized by his peers if he be not in their midst adding his voice to the din. Students and faculty at Highline College have been labeled by various critical groups. Devote with the over worked adjective "apathttk" for having failed to participate one hundred percent in the Vietnam Moratorium Oct. 15.

On the contrary, those who did not participate in the Moratorium are to be commended for having the courage to exercise peace. Everyone for having failed much action.

Moratorium. But since their discussion was conducted intelligenUy going to have any more meaning to the present administration.

Thus, the socialization process continues. Until each individual shall teach the class for which the student has enrolled and paid his fee. Not given leadership a blow it to the feeling that October E, 1969 would be remembered for a la Highline as it did on other handful of faculty did attempt to present an opinion to the editor:...

Socialization?

In ten years, the government has produced a government that doesn't know in which direction to head. When the Vietnam Moratorium took over most everyone was quiet for the first five months. But that day well be remembered for a long time...

Nixon Cutting Draft Call? to the editor:

As the nation realized itself for the Vietnam Moratorium, one had the feeling that October 15, 1969 would be remembered for a long time. Could a nationwide protest involving millions of people succeed in showing the Administration that America is sick of Viet-

Now that the first nationwide movement to draft any of America's college students is over, do you feel the moratorium served to bring together for a short time a part of America's youth that have been divided by the country dedicated to establishing a moratorium? (When we think only of the die-hard elements...) Let's take the moral aspect of this...

I'm for peace. That's not the purpose of the M. College students...

"The Committee" Breaks With Tradition

Will friends, we have a solution (a constructive means of using those unconventional desires) ENROLL IN A MUSIC GROUP NEXT QUARTER.

The Committee, a San Francisco based satirical review company, will perform November 5th, at 8:00 p.m. in the H.C.C. Pavilion.

Improvisation is the central technique. The company has discarded all traditional aids such as props, scenery, makeup, costumes, scripts,, linear plot lines and time-space boundaries. What remains is a highly mobile theatrical form, which is a new creation with each performance.

The Committee demonstrates repeatedly that it is possible to present a full evening of totally improvised yet quality theater. The members are on sale in the Student Government Office.

Let's Make Music

You spend endless hours each day absorbing treasured gems of knowledge, either through osmosis or avid concentration. If you feel that you are beginning to feel empty at the top of your height of learning, you are probably in need of an immediate object. You can build your own musical instrument for very little cost. The following are the instructions (or is it musings?) to build your own musical instrument:

1. Find a couple of used Tupperware, and cut them open.
2. Find a pair of wooden spoons, and cut them also.
3. Find a pair of plastic spoons, and cut them also.
4. Mix the plastic spoons with the wooden spoons.
5. Add a pinch of creativity.
6. Add a pinch of imagination.
7. Add a pinch of inspiration.
8. Add a pinch of dedication.

Now you have your own musical instrument, which can be played in the middle of the night when you are feeling lonely and in need of some entertainment. Enjoy.

Music Series

Upcoming

The "Friends of Music Series," sponsored by the University of Washington, will present this year's second chamber concert on November 12th - featuring The Delirius Consort.

The performance will be held in the Student Union Building Auditorium, on the UW campus. Seats must be reserved; for reservations, contact the office of Lectures and Concerts (U.W.).

Readers' Theatre To Perform

The Readers' Theatre of Hightline College will present the play "Theatre," by John Patrick, on November 5th, in the Lecture Hall.

The project will be directed by Professor Robert Ingalls, who is currently teaching Improvisation. The central idea of the theater is stimulating the listeners' imaginations and curiosities in relation to the literature being presented.

The key performers are: Barbara Butler as Antigone. She has had five years of work with Barbara Butler, and now she is a very charming." She is a very charming," and she seems to be very pleased with the work.

For more information, please contact Peg Klinkham, in the Student Government Office.

NOTES:

1. Admission is $1.50 without mask and $3.00 with mask. The event is free, kitchen facilities are available, and dogs are welcome. Call Mrs. Nielson, VE 9-4471.
2. It's "Homecoming" time, today at noon in the Student Lounge. The first one was a raging success, and this one promises to be even greater.
3. Our students are interested in performing in a Future Philosophy, so please contact Peg Klinkham, in the Student Government Office.

GREEN RIVER INVITES US FOR TONIGHT

Green River College invites Hightline College students to a Halloween Costume Dance tonight (October 31st) from 10 p.m. to 1 a.m. in the Green River gymnasium.

Admission is $1.00 without mask and $3.00 with mask. The evening will feature the "Town Crier" for music and a light show by the "Rock'n'Dish." Prizes for costumes are $5.00.

Cast Chosen for Fall Play

By Kathy Krejci

"To be or not to be," Hamlet's famous quote from Shakespeare's play, is hardly the latest word on the drama of life these days. As a matter of fact, it's quite the opposite, as the members of the drama club play, "Under Milk Wood" are "very much in it and just not to be."

The play has been completely cast and production is underway. The cast for "Under Milk Wood," includes: Barbara Butler as Antigone. She has had five years of work with Barbara Butler, and now she is a very charming." She is a very charming," and she seems to be very pleased with the work.

Many of the members are from Miss Robertson's Theater class and a few from the Junior Play class.

Most of the members are from Miss Robertson's Theater class and a few from the Junior Play class.

The church, located near Salt Water Park, needs a caretaker. No janitorial duties are required. The rent is free, kitchen facilities are available, and dogs are welcome. Call Mrs. Nielson, VE 9-4471.

S.W.E.A. Is Rewarded For '68-'69

The Student Washington Education Association officials receive the city's award, Eleanor Brins, advisor; Maureen Weeks, Bruce Edwards, and Kathy Traffic. Mrs. Eleanor Haines, advisor for the Highline College chapter of the Student Education Association for the past five years, has just received from S.W.E.A. headquarters the coveted "Award for Outstanding Cooperation toward Selective Training Recruitments." The award was in behalf of Highline S.W.E.A.'s general membership and the inspirational leadership of Lin- don Bruce Dankoosh, President during 1968-69 and Diane Swain, President during 1967-68 and new President for 1969-70, Terry Hootenson, Program Chairman and Activities Council Chairman, 1968-70, and Kathleen Aircraft, President 1967-68 and now on the Publicity Committee. Emphasis has been or will be volunteer tutoring by S.W.E.A. members for the past two years and this was one of the strongest permanent in considering High- line worthy of the Award, according to Miss Barbara Kline.

GOODBYE CORVAIR

Many people feel that the Corvair has burned up along with the Edsel, Kaiser, Hudson, and Pines. I for one feel a tinge of dismay at the little car's passing.

What caused its decline? People seem to credit Ralph Nader with extermination of the Corvair. Mr. Nader set out on an increasing campaign to reveal the Corvair for what it really is. I don't blame Nader for being a menace to society. Nader used the early Corvairs as his guinea pigs. His experiments destroyed many families. In these early models, suspension, handling, and lack of power, left much to be desired. Nader also attached its time and strength. From all those problems were evident, but the potential was there.

In the middle of Nader's investigation the revised Corvair came out. They had bigger engines, with power of (for a small car) huge size. The suspension was improved greatly. Nader overlooked all of this. He must have figured that once a Corvair, always a Corvair. He was exceptionally better. Nader overlooked all of this. He must have figured that once a Corvair, always a Corvair. He was exceptionally better. Nader overlooked all of this.

Now that Nader's investigation the revised Corvair came out. They had bigger engines, with power of (for a small car) huge size. The suspension was improved greatly. Nader overlooked all of this. He must have figured that once a Corvair, always a Corvair. He was exceptionally better. Nader overlooked all of this. He must have figured that once a Corvair, always a Corvair. He was exceptionally better. Nader overlooked all of this.

People began to realize the value of the Corvair soon after it was discontinued. Used car lots couldn't keep enough of them. And as a result the price rose, even on the old cars.

Many people feel that the Corvair is the little car that wasn't given a chance. Now we can only hope to find a good used one and give it a hard ride around the block. The fewer ones will surprise you. All I can say now is, "Goodbye Corvair."
Cagers Meet Samuri
In Season's Debut

By Lynn Tompkins

The Thunderbird basketball squad are continuing their daily practice sessions in preparation for the games that begin on October 31 and ultimately for the Orange Bowl at Miami on the Saturday, November 10, at the Orange Bowl gym.

Coach Don Knowles' team will play its first game of the season this Friday against the fast Lower Columbia team with the Seattle Midwest at the University of Washington gym.

Next for Coach Knowles' boys comes a two game home stand Wednesday and Thursday at Yakima before they leave for their fall vacation and will return to the University of Washington gym.

The Green Gaters will be joined on the court by Bob Denver, the actor who portrayed in the television show "The Beav.

Skier's Paradise

Most new additions to Washing State's ski facilities for the coming season will be centered in the Snoqualmie area complex.

Snowmass Summit reports more snow after the season's opening day with 5000 skiers on the slopes, an additional 10 chairlifts, and parking space double that of previous years.

Cross Country Schedule

Skiing will be taught to a new group of students on the Woodland Park ski slopes and the new skiing equipment will be available at the winter camp.

Cross Country Takes First;
Second In Row

By John Barton

The third cross country team took first place in the Mt. Vernon Invitational meet, Thursday, October 31st, to make it a second win in a row. They were competing against Simon Fraser, Tacoma, Bellevue, Skagit Valley, and Centralia.

The record for the 3.5 mile course is one of 18.30 set by Steve Hansen of Shoreline. He set the record September 3, 1969. This record was broken Thursday by the first place runner from Tacoma, Al Dawson with a time of 17.40, and by Steve Peterson from Highline who had a time of 18.21. Don McDowell also of Highline tied the record of 18.30.

Steve Denison and Jack Callies took fourth and fifth places at 18.30 and 18.38, for Highline.

Immediately after the first race, Al DeMant of Simon Fraser, seventh, was Kevin Molen of Skagit.

The cross country schedule is as follows:
The 3.5 mile run will be a race to end November 1 in Mont Vernon.

Jim Berwald

The team's fourth meet was a division meet at Green River. Saturday, November 2, the game was won by a split. (Lowest score wins).
