Highline Community College
Winter Quarter 1969-70

November 13 through December 15
- Registering
- Student Services
- Register by Appointment

Returning Student Registration: December 15 through December 19
- New Students: December 22 through December 31
- Open Registration for Any Student Without Appointment:
  - January 5 through January 9
- Late Registration:
  - February 6
- Midterm:
  - March 20
- Last Day of Classes:
  - March 20 through March 24
- Final Exam:

Refund and Withdrawal Calendar:
- December 31 - Last day to withdraw with 100% refund (less $10.00 non-refundable deposit)
- January 9 - Last day to withdraw with 80% refund
- January 23 - Last day to withdraw with 50% refund (less non-refundable deposit)
- This is also the last day to withdraw without the possibility of academic penalty.

The above refund rates apply to complete and official withdrawals. See the current catalog for additional details regarding refunds and withdrawals.

Changes of Schedule:
- January 6 through January 8 - Times: 9 a.m. to noon and 5:30 to 7:30 p.m.
- January 9 - Times: 9 a.m. to 5 p.m.

Changes of schedule initiated by the college (faculty or administration) will be accepted at any time without charge.

Dec. 26 - Last day for mail in Registration.

Hope For Ugly Men

The society for "the beautiful people," is becoming democratic at Highline. According to Ernie Clark, sophomore class president, the "Ugly Man" contest is coming to HCC November 17-21. The ugly man contest is sponsored by different clubs for a local charity. Each club enters an ugly man who goes around campus collecting donations. The person collecting the most money will be crowned "UGLIEST MAN" at Highline. Girls can enter too, but they will be competing for UGLY MAN also. (What girl would want to be the ugliest girl on campus, anyway?)

Ernie collected about sixty dollars. So if you're as ugly as girls (or boys) say you are, have a club sponsor you in the contest. You probably have a head start on everyone anyway if you have the nerve to enter. And who knows, you might even be uglier than you thought.

Journalism Scholarships Awarded

Professor Ely, left, and Charles Burrell, 1968 Highline graduate, received scholarships of $500 each from the National Press Foundation. Professor Ely is the head of the journalism department at Highline and is also the advisor for the campus newspaper. Charles Burrell is a returning student who is working on his second year at the college and is planning to enter the field of journalism.

Peace Corps Extends - Expands College Program

The official of the Peace Corps and the State University of New York College at New Paltz announced a new program that will allow students to receive academic credit for Peace Corps service. The program is designed to provide Peace Corps volunteers with the opportunity to earn college credit for their service. The program is open to all Peace Corps volunteers, and those who participate will receive a certificate of completion at the end of their service. This program is intended to help Peace Corps volunteers make the transition back to college and career after completing their service.

Faculty To Perform

The program will offer a variety of courses, including communication, business, and public relations, that will be taught by the Peace Corps volunteers. The program will also provide opportunities for Peace Corps volunteers to interact with college faculty and staff, as well as other Peace Corps volunteers. The program is open to all Peace Corps volunteers, and those who participate will receive a certificate of completion at the end of their service.

Watch for Sophomore Shafet

This program is intended to help Peace Corps volunteers make the transition back to college and career after completing their service.
**Editorial Comment**

I sympathize. The State Highway Department should be commended for making it possible to drive down Highway 99 to South 240th.

I'd like to make a left turn. This leaves you with one of three alternatives for error, so it better be good. I'm against u-turns. Careful on backing out, it's easy.

I appreciate it, sorry 'bout that sir. Alas, the battle of wits is underway. The property belonging to another.

The Black Athlete Crisis: Demands of the black players reasonable? Should a coach respond to losing teams. Obviously this could apply to any team.

Most of the teams on which these incidents have been occurring are Black teams. Will a Black player be expected to play or not. They decided to play. UCLA is undefeated and ranked nationally in the top ten.

**LETTERS**

I have you ever tried to get to the North parking lot from Highway 99 via Kenton Mine Way? For those of you who have not yet participated in this endeavor, I'm sure you will understand why.

This island is not of the pleasurable sort with sandy beaches and palm trees, but of tar and cement that prevent anyone desiring so, to make a left turn. This leaves you with one of three alternatives for getting us on in a '30th.

The best way not to make of the fastest, shortest, U-turn you've ever attempted. Two-foot banks on both sides leave little margin for error, so be good. I suggest taking a small car, anything under four feet stands a good chance of making it. Deep, deep left turn, the big ones never make it! A left turn is taking the first left up an old dirt hill, I assume this is so, was some old timer's driveway. Be careful of the other motorists.

Your third and final choice is to draw down a block, make a right, then a left to wend your way through. I'm sorry to appreciate you, sorry you don't like that, the hill is only half wide. No street signs exist on Kenton Mine Way without getting clubbed, be aware of this sharp curve right after where you've got to take it. Be careful, by all means, please. (Especially.)

For those of you not fool hearty or crazy enough to make a choice of these alternatives, you can go any way you wish.

The controversy surrounding black athlete status raises many questions. Are the demands of the black players reasonable? Should a coach respond to a player demand? Should a player sit back and speak out when he feels he is getting poor treatment? It is obvious across the country have become more aware of the Black athlete. Black coaches have been hired along with other improvements in athletic programs. But are these things final solutions to the problem?

The major points of the Black athlete crisis: Demands of the black players reasonable? Is it realistic to demand total commitment to a program? At Arizona, is the problem is solved, coach and the athlete are happy. At UCLA, is the problem is solved for the student athlete is happy. At UCLA, is the problem is solved for the student athlete is happy. Is the problem solved?

We must make the decision: Do we want gambling and if so for gambling are allowed.

We must make the decision: Do we want gambling and if so for gambling are allowed.

To the Editor:

The question is: To be or not to be. I do not want to spend the money on a video camera and I am not interested in3.

Pete Hyatt

**Black Athlete Crisis:**

**What Are the Problems?**

By Mark Burnett

University of Washington football coach Jim Owens suspends four black players from all athletic activities for refusing to total commitment to the program. At Wyoming black players are suspended for wearing white uniforms in practice. The game was scheduled with Brigham Young University. At the University of Washington, men's basketball coach Harry Neumann has suspended the team for "negative type treatment." And many incidents of this nature are happening around the nation at this time.

The controversy surrounding black athlete status raises many questions. Are the demands of the black players reasonable? Should a coach respond to a player demand? Should a player sit back and speak out when he feels he is getting poor treatment? It is obvious across the country have become more aware of the Black athlete. "Gee, I Didn't Know It Was There!"

by Norm Wickstrom

With a soft voice that focus you to the edge of your seat in
the audience, Mrs. Martha, director of the Highline Learning SkillsLab, explained the pur-
pose of the laboratory. "When a student comes to us seeking help
in a certain area, whether it be math, spelling, English, study
skills, etc., we design a specific course for him." 

She then went on, "Of the lab's existence," she con-
cluded, "we train and when they leave, the first thing we usually hear
from them is, "Gee, I didn't know it was there!" It is the ideal
place to find out if you can't make Math 101 or some
other course without going on elsewhere, but you must have
to commit yourself for a quarter or two with enough
amount of time to find out.

Mrs. Mach stated that the lab is especially valuable
for new students as well as those
who are returning to school after several years.

Mr. George Doan, director of
the lab, is a staff of a rather large
staff. There are a lot of students
enrolled in the lab and the staff
is quite large. It's a happy staff,
and all the students who work in
the lab are here on their own volun-
tary. The program is designed to
help students develop skills and
replace, classroom teaching.

"A student can come in and spend as little or as much
time at his schedule allows or as often as he needs to. A student can take a
workshop of a half day or receive two credits per quarter, or he may work in, in the middle of
the quarter, work for 15 hours and receive a credit," Mrs. Mach added.

Mr. Doan noted that the lab has been in operation for
two years and, to date, it has received 5,000 new enroll-
ments. In addition, they have purchased many new
instruments and have recruited new students.

Mr. Doan added that the lab will operate through
this year. He added that the school will take over the
operating expenses starting next year.

Faculty
Positions Filled

All faculty positions at High-
line Community College have
been filled with the appointment
this week of a counselor for the
guidance and counseling staff, he reports Dr. Frank Brussell, di-
rector of personnel.

The college has a full-time faculty of 157, including
30 teaching faculty and 17 admin-
istrators. There are also 176 full-time staff employed for clerical,
book service, maintenance, and
related service activities. And, for the upcoming year, the college
has added 21 new staff members,
13 in the first year of study.

There are 31 full-time faculty
and staff employed by Commu-
nity College of King County,
for whom they are employed.

The new counselor, Dr. Brussell said, was recruited as a
result of a campaign for the
office of a master's degree in voca-
tional-educational counseling at
the University of Minnesota.
Veterans Benefits Significant

The following article is a snippet from the May 2012 issue of "Thunderdome," the newsletter for veteran students at Highline Community College. The article discusses the benefits available to veteran students and highlights the importance of seeking out these resources.

Highline High School —

A few years ago, the school had always been a good money maker for the district, and the administration was pleased to note that the high school was making a profit. The school had a budget of $39 million, and the district was able to support the school with new programs and facilities.

But not everything was perfect. The school had to cut some programs, and the district had to make some tough decisions. The district had to consider the future of the school, and the district was forced to make some hard choices.

The district decided to cut the school's budget by $5 million. The school had to find ways to cut costs and improve its operations. The school had to find ways to reduce its expenditures and increase its revenues.

The school had to reduce its personnel costs, and the district had to find ways to reduce its maintenance costs. The school had to find ways to increase its revenues, and the district had to find ways to improve its operations.

The district had to consider the future of the school, and the district was forced to make some hard choices. The district had to consider the future of the school, and the district was forced to make some hard choices.

Aviation Institute will come to HCC

Establishment of an Aviation Institute at the Hennepin Technical College has been announced. The institute will be a part of the college's expanding program in aviation education. The aviation institute will offer associate degrees and certificate programs in aeronautical engineering technology, flight operations, and flight maintenance. The institute will be located at the Minneapolis-St. Paul International Airport, which is one of the busiest in the nation and has significant economic growth potential.

The aviation institute will be housed in a new building to be constructed on the college's campus. The building will be designed to accommodate the needs of aviation students and faculty. It will include state-of-the-art classrooms, laboratories, and computer labs. The building will also have a flight simulator that will provide students with hands-on experience in flight operations.

The institute will offer degree programs in aeronautical engineering technology and flight operations. These programs will provide students with the knowledge and skills needed to pursue careers in the aviation industry. The institute will also offer certificate programs in flight maintenance and flight operations.

The aviation institute will be staffed by experienced professionals in the field of aviation. The faculty will include experienced pilots, aircraft mechanics, and flight instructors. The institute will also have access to industry partners who will provide students with internships and job opportunities.

The aviation institute will have a strong partnership with the Minneapolis-St. Paul International Airport. The airport will provide access to real-world experiences for students, including internships and job opportunities. The airport will also provide funding for the institute's operations.

The aviation institute will be a part of the college's ongoing effort to expand its program in aviation education. The college has already established programs in flight operations and flight maintenance. The aviation institute will be the next step in the college's expansion of its aviation program.

The aviation institute will be funded through a combination of state and federal funding, as well as private donations. The college will also seek partnerships with industry to support the institute's operation.

The aviation institute will be ready to accept its first class in fall 2023. The college is currently accepting applications for students interested in pursuing a degree or certificate in aviation.

Social Science Courses Up-Dated

The Social Science Department at HCC has been updated with new courses in Anthropology, History, and Political Science. The new courses have been developed to provide students with a more comprehensive understanding of the social sciences.

The new Anthropology courses include a course on prehistory and a course on the anthropology of contemporary America. The new History courses include a course on the history of the United States and a course on world history. The new Political Science course includes a course on political theory.

The new courses have been designed to be accessible to a wide range of students, including those who are pursuing a degree in the social sciences and those who are pursuing a career in a related field. The courses will be taught by experienced faculty members who have expertise in the relevant fields.

The new courses will be available to students starting in fall 2023. Students interested in taking these courses are encouraged to speak with their academic advisor to determine the best course of study for their individual needs.

Counseling Ratio Low

The counseling ratio at the college is currently low, with each counselor seeing an average of 150 students per semester. This ratio is lower than the national average, which is around 200 students per counselor.

The counseling department has been able to maintain this low ratio through the use of technology and the implementation of new counseling models. The department has implemented a virtual counseling model that allows students to access counseling services via video conferencing.

The counseling department has also been able to increase the number of counselors on staff, which has helped to keep the ratio low. The department is currently seeking to hire additional counselors to further reduce the ratio.

The low counseling ratio is beneficial for students, as it allows them to have more personalized attention from their counselors. Students have reported feeling more comfortable and able to open up when they know they are seeing only one counselor.

The counseling department is committed to maintaining this low ratio and continues to seek ways to improve the counseling services for students.
Highline Library Offers Unusual Drugs Info

One can find almost anything in the Highline C.C. library—classics, periodicals, textbooks, and if you search hard enough, you may find such miscellaneous items as "Marijuana Consumer's Guide." This was published with much enthusiasm in 1968 and it is claimed its "Practical knowledge" was found in the vertical filing along with others. However, it is kept behind the desk.

"This is a 'Consumer's Guide' and a 'Dealer's Guide' both of which specialize in how to produce $2,000 worth of Marijuana from 800 worth of Pot, and how to convert inferior grade pot into Consumer Grade Marijuana," explains one of the instructors. The book deals with such useful topics as testing literature as "The Marijuana from Peyote," making it, "I can turn down my light," how to grow it, and even how to produce it. The book also contains "Helpful Hints." The name of the book was quickly replied, "It's the hardest thing on earth to produce; we have placed an estimated 50,000 copies in the libraries of the area."

The instructors stress, "We have been involved with many different organizations. We have been working with local and state law enforcement, as well as many drug rehabilitation centers and drug testing laboratories."

Blind Minority Aid
The first Highline American Society meeting was held Tuesday, October 23, at 12:30 in the library conference room. Curtis Robinson presided over the 18 members present. The goals and purposes of the organization were discussed. A motion was made to change the name of the organization from American Society of Black Student Union. Some means for fund raising and service projects were presented. A motion was made that Mr. King offer the idea that the next meeting be held November 16, at 12:00 in the library conference room. It was emphasized that everyone is welcome especially black students.

Second Meeting
October 31, at 12:15 the second meeting was held in the library conference room. Curtis Robinson presided over the 21 members present. Projects for this quarter were discussed. Some of them are a candy sale, talent contest, and a dance. There was also a serious discussion concerning something that these students are looking for. Curtis is trying to keep the blind minority of Highline. Anyone will be gladly appreciated.

Highline's Money Tree

By John McGowan
If you were to go down to the IHC building at 8:00 a.m. every Monday and Saturday until 4 - 5:00 p.m. every week for a year, you would contribute to what is known as the Money Tree at Highline at least ten years.

When you first began at the University of Idaho a few years back, you may have been a member of the student group that was called the Highline Library. Miss Hilliard was later to go on and work at Greenridge Farms in Berkeley, California, and then at the University of Washington where she is now at least one quarter professor. With this and a few other jobs which she has had, she is now gaining the qualifications necessary to be hired as a graduate assistant at HCC in the fall of 1969. By second year at all, Miss Hilliard worked her way into her present position as the Director of Financial Aid and Placement. Among Miss Hilliard's many interesting responsibilities are on-campus employment in the accounting department, as well as the co-workers, Mrs. Beverly Dickson, Mrs. Faye Linn, Laura Thomas secretary, will have placed an estimated 800 students by the end of this quarter. Also announced at the "Educational Opportunity Grants (is this year); Leadership Awards.

As an instructor, Miss Hilliard is the world's most difficult. We always have more applications than money.

"If I were to ask that great objective which Church and State are both demanding for the sake of every man and woman and child in this country, I would say that this goal is 'more abundant life."

Franklin D. Roosevelt

MONEY TALKS

And in tone is persuasive with an NBC special on your budget... have money when you need it. Let me show how the program is-and so effective-to have your own personal checking account!

NBC NATIONAL BANK OF COMMERCE

Inflation is when everybody is so rich that no one can afford anything.

Highline to "Map Out New Class"

Ever wonder where you were going? Ever get lost in an unfamiliar city? If at one time or another you turned a map to receive the solution to the problem, and if you ever stopped to consider how much time and energy you probably wasted trying to find your way, you have become familiar with the construction of maps. A cartographer or cartography is the profession of making maps for Despero-Guptery Co., a large map making company in Chicago. "The cartography class will cover the design and construction of maps, deal with the problems involved, and teach the student to look at maps critically. There is a demand for well trained cartographers to work for federal and state government, the military, the railroad industry, development of a map is a higher institution. But for those who want a broad knowledge of the local level, highline hopes to offer a larger program of cartography as that completion of this course. In this class the student can receive a certificate of completion."

"Our way of serving man faces a major test in our day with bubbling alkulizers to get rid of yesterdays'."
Third In State For Cross Country Team

BY John Burton

November 1, 1969 saw the host team in the Highline Community College Thunderbird Invitational Cross Country Meet take first place for their third win of the season. The T-Birds took seven of the first twelve places to give them a very close second place, losing by only four total points.

The T-Birds took second and third, with Jack Callies coming in second with 32:34 and Steve Peterson taking third with a time of 32:24. The scoring went as follows; (with lowest score winning) Highline Thunderbirds 27 Everett Trojans 31 Bellevue Seahawks 47 Skagit Valley Cardinals 54

The first place runner was Wayne Funk with a time of 20:34. He is a member of the Everett Trojans, who took four of the first ten places to give them a very close second place, losing by only four total points.

The other first ten places, first, fourth, sixth and seventh were taken by Everett which made for a very close meet. Their score was considerably lowered by their last two point scoring runners who placed thirteenth and fifteenth. They also had a runner in twelfth place.

Bellevue and Skagit Valley didn't stand much chance with all their places being considerably higher than Highline's or Everett's. Skagit's first runner, Kevin Mullins, took eleventh and Bellevue's first runner, Don Pedrick, took sixteenth.

The team will have six returning lettermen, one of which took the state championship in his weight class last year. Returning to the team this year are Greg Lake, 118 lbs.; Dan Jugler, 143 lbs.; Mike Moore, 168 lbs.; last year's state champion; and Steve Whidden, 177 lbs. who took third in state last year; and Dave Grieser, 190 lbs.

Coach Wooding explained that of the twenty-eight hard working athletes turning out each day, there will be no cut. He said that there was no need for such a cut because they would decide on their own whether to stick with it or quit.

The team will have a lot of competition because there are many strong teams in the state. The Grey's Harbor they will be going against Grey's Harbor who has taken State consistently in the last few years. The T-Birds took third in the state last year.

Wrestlers Start Daily Practices

**ALL SORTS OF SPORTS**

By John Stover

Skiing is a sport that Highline students have taken to heart. Although the school has never had a ski team, students have been involved in the sport in various ways. Some members of the ski club have competed in ski races and have even won medals. Others have simply enjoyed the thrill of skiing for its own sake. The ski club meets weekly to discuss skiing techniques and to plan events.

The ski club meets weekly to discuss skiing techniques and to plan events.

**EXTRA INNINGS**

By Dennis May

**Ski Fair Set**

The ski club has planned a Ski Fair to be held in the cafeteria on Friday, December 4. The fair will feature a raffle, a silent auction, and a bake sale. All proceeds from the fair will go to support the ski team.

**Kar Korner**

By Lyndsay Osborn

**Ideal Vs. Reality**

One of the most common themes in the world of sports is the distinction between ideal and reality. In sports, the ideal is often represented by the professional athlete who is at the top of his or her game, while the reality is represented by the struggling amateur who is just trying to make ends meet. This distinction can be seen in the world of basketball, where the ideal is often represented by the professional who is at the top of the game, while the reality is represented by the struggling amateur who is just trying to make ends meet.

**Ski Club Schedule**

Skiing is a sport that Highline students have taken to heart. Although the school has never had a ski team, students have been involved in the sport in various ways. Some members of the ski club have competed in ski races and have even won medals. Others have simply enjoyed the thrill of skiing for its own sake. The ski club meets weekly to discuss skiing techniques and to plan events.

**EXTRA INNINGS**

By Dennis May

**Ski Fair Set**

The ski club has planned a Ski Fair to be held in the cafeteria on Friday, December 4. The fair will feature a raffle, a silent auction, and a bake sale. All proceeds from the fair will go to support the ski team.

**Ideal Vs. Reality**

One of the most common themes in the world of sports is the distinction between ideal and reality. In sports, the ideal is often represented by the professional athlete who is at the top of his or her game, while the reality is represented by the struggling amateur who is just trying to make ends meet. This distinction can be seen in the world of basketball, where the ideal is often represented by the professional who is at the top of the game, while the reality is represented by the struggling amateur who is just trying to make ends meet.
