Welcome to Highline

A Visit With Our Dr. Allan

by Chris Berdine

Dr. Allan

Small Group Workshops To Be Informative

Inside

President's Message

On behalf of your Student Government, I would like to take the time to welcome back the returning and new students. This is the first year of our school and I hope that you will help us to shape this school and make it your own. We are all very proud of our school and hope that you will help us to make it even better.

Boy-Cop Car Bashed

The top-heavy scooter turned over when the left rear wheel slipped off the road. The scooter is used mainly to check parking stickers in the three parking lots. The placement would arrive in time for the start of school. The scooter was damaged and repaired.

Band Calls For Sit In

A sit-in was called by the band to protest against the closing of the music department. It is against the agreement and the band wants to be heard at the college. The band has already held a protest and wants to be heard.

Thunder-Word editorial policy is explained as is the Sonics. See page 3.

HCC is a part of it. See the photos on page 4.

Mark Burnett covers Thunder-Word and Thunder-Word's editorial policy is explained as is the Sonics. See page 3.

Scores of students on campus have signed the petition to keep the music department open.

Thursday Happening: Drug Abuse

Jubilee Singers

Classes begin tonight. Students are available to students this quarter. They range from four to fourteen persons. They allow intensive work on a specific problem for a short period of time and a chance to interact with other people.

bill of rights: totally adequate?

(Portion of the following editorial reprinted from Highline's Student Rights and Responsibilities, Code of Conduct and Disciplinary Procedures.)

The Washington State Board for Community College Education directed last year that each college develop a statement of Student Rights and Responsibilities, a Code of Conduct and a Disciplinary Procedure.

The preliminary and tentative Bill of Rights as adopted by the Board on July 7 (1970) will be distributed to students at the beginning of the fall quarter of 1970.

The document reflects a constructive communication between students and faculty and can be generally referred to as adequate in meeting the obligation to comply with the law.

Overall the controls that are now in effect are reasonable for both students and administration alike. A serious exception to the rule, however, falls under the section entitled "Violations."

Point two of that section reads: "Disciplinary action may result from the commission of any of the following offenses:"

Forfeitures offenses are listed. Eleven of these fourteen relate to behavior around a campus. Another, point M, dealing with possession, consumption, or the furnishing of any narcotic or dangerous drug states that the law is explained in RCW 69.08.030 (11). For individual violations, however, eight weekly television programs are scheduled to feature the discussion group sessions in which individuals will be encouraged to work in any of the problems areas of most concern or interest to them. Subjects for discussion will include land use, ecology, population, economy, poverty, and politics.

At this time, the 1970 College is joining with many other organizations of the community including church groups, other colleges, newspapers, service groups, and government agencies in providing the public with information on how to improve the area's environment.

The preliminary and tentative Bill of Rights as adopted by the Board on July 16 (1970) will be distributed to students at the beginning of the fall quarter of 1970, as well on campus as off.

Point F states: "Theft or concealment of another's property."

That law is interpreted with reference to theft and property violations.

The following is to be interpreted to read that if a Highline student violates any of these codes off campus, he may be subject to discipline by the president of the college by the procedures outlined. For example, Student A is convicted in Spokane for indecent exposure. Student A is a student of good standing at HCC. That student will receive disciplinary action from civil authorities.

If Point B is interpreted to read that any action outside of the college domain is of no consequence unless action in some way does harm to students, faculty, employees, board members, trustees, guests, or property of the college.

As provided in the Addendum, all proposed amendments to the Student Rights and Responsibilities, Code of Conduct and Disciplinary Procedures may be submitted to the Dean of Students, who shall then send copies of each proposal to members of a review board for suggested changes. It is urgently requested that, then, the Dean of Students and the Review Board consider the wording of Point F, and ask that it be changed to read "Violations" (page 7), so that the college may only take disciplinary action against a student with that student has committed offenses on the domain of Highline Community College.

editor's comment

The Thunder-Word is a student publication of Highline Community College published weekly through the efforts of the students in journalism classes. Any person desiring to write for the Thunder-Word is welcome, but must be enrolled in journalism classes and must be a member of the Thunder-Word staff.

 jeg had been doing things well enough to be noticed by my fellow students and faculty. The Thunder-Word will reflect accurate reporting within the codes of good journalism, hoping to bring about a greater student involvement concerning college issues and occurrences.

The Deadly Bugs

by Chris Dusselth

A while back there was talk about a new breed of insect called "Litterbug," but little was really done to combat the destructive power it had.

The attempt to broaden the minds of those people whose lives are seriously in danger, I will provide you with a condensed list of seven "deadly bugs.

1. Crow's Foot (Impoverishment factor) - Mostly found in big cities, this bug sets up a camp near the eyes. Contact with this bug causes irritation of the eyes, nose, and lungs.

2. Kids' Stuff (Silly Youth) - This bug doesn't believe there is anything wrong with the environment and can't understand why people are getting angry. kids refuse to pay more taxes for such "AG" foolishness.

3. "Monarch" (Self Deprivation factor) - This bug is usually found in seceded areas or near automobiles. Many of these bugs are branched out in the cities. (Self Deprivation factor)

4. "Bugs" - This interesting bug multiplies very rapidly, without the help of the law. This bug may be the main generator of all of the illegal activities.

5. "Patchbug" - This bug has a distinctive odor that even the best deodorant isn't going to help.

6. "Striper" - This bug is usually found in the company of the others. This bug could be the most dangerous waste in our air. He has a distinctive odor that even the best deodorant isn't going to help.

The thunder-Word is a student publication of Highline Community College. The Thunder-Word is the work of Lynn Templeton, editor, Mike Heavener and Chris Doughett, associate editors, and Mark Barnett, senior reporter. Advisor-Betty Strehlau.

Jobs Sought

J.H. Scaled, director, for further information, employment opportunities, contact the Employment Center, at TR 8-3710, ext. 339.

Jobs are wanted for college students.

Part-time jobs — for morning, afternoon, or evening work are being sought for students of the University of Washington Financial aid and placement office.

If you have any job opportunities or for further information, employment opportunities, contact the Employment Center, at TR 8-3710, ext. 339.

The magazine, usually known as "Now — Profile W." in the Puget Sound Times, is also doing feature type stories about students and personnel at the hospital.

Highline College is joining other area institutions and agencies to conduct public discussions about the "quality of life" in the physical and social environment.

Record Review

After The Goldrush

by Mark Burnett

Very puzzling, the enigma of Neil Young. The Thunder-Word will reflect accurate reporting within the codes of good journalism, hoping to bring about a greater student involvement concerning college issues and occurrences.

Vocally, Young is possibly the most influential and inspiring of the larger colleges and universities at a reasonable price. The Thunder-Word will reflect accurate reporting within the codes of good journalism, hoping to bring about a greater student involvement concerning college issues and occurrences.

REPRISE 393

NEIL YOUNG — AFTER THE GOLDRUSH

Young is a major talent. The Gold Rush for, instance, deals with the slice in You Drive Me Crazy, a theme that is even more apparent in the only song on the album that will be done on the tour — "Natural choice.

The arrival on his 23rd birthday, Stag was called by Uncle Sam. In April 1968 he was bound for Vietnam. Avoiding the draft, however, falls under the section entitled "Violations." (page 7), so that the college may only take disciplinary action against a student with that student has committed offenses on the domain of Highline Community College.

Will There Finally Be A Sonic Boom?

By Mike Heavener

T-Word Sports

As a most loyal fan of the Seattle Supersonics, I have suffered through four seasons of starvation, enduring the daily disappointments and experiencing the obvious lack of brilliance. Seattle has never come close to the playoffs—until this year. The Sonics are in a second playoff spot appears to be wide open with Seattle probably behind the Lakers. Calvin Murphy could help, but the Rockets' second round choice, Rudy Tomjanovich was reported to be very disappointing. Portland will be more of a challenge for Seattle, especially if Portland is to be successful. Seattle is in the Western Division last season, has failed to regain the center of their games, a percentage that would have placed the Sonics first in the Western Division if it had been maintained throughout the year. The Sonics will be a threat to the league. The guard situation could further complicate the guard situation. Meschery will man the other forward spot providing a rugged, consistent player-coach. Veteran Rod Thorn, if healed from his knee injury, will be available. Bob Boozer, a holdout at this time is a question about a thousand over last season, has failed to regain his form. Barry Clemens who had many bright spots last year, is a definite minus for the Rockets. Barry Clemens who had many bright spots last year, is a question mark. Calvin Murphy could help, but the Rockets still need a lot more. The Sonics were fortunate to sign him to a third guard. Veteran Rod Thorn, if healed from his knee injury, will be available. Bob Boozer, a holdout at this time is a question mark. Calvin Murphy could help, but the Rockets still need a lot more. The Sonics were fortunate to sign him to a third guard. In The Virgin Islands

Hail-Tektite Lives!

During the past year a group of renowned scientists descended upon the Virgin Islands to make an intensive study of the submerged life, patterns, and edicts of proloved human existence, both on aquatic life and human life, under water.

Highline College is fortunate to be a part of the Tektite II operation, as the college's Undersea Technician program utilized students as support divers.

Several HCC students are still at work in lands participating in General Electric another phase of project.

The photographs on this page were taken by Floyd Smith, 19, a Highline sophomore, who for the past two months at the Tektite site as a diver.

Ingrid Simonson, Won't You Please Come Home?

by Mark Barnett

Oh, the depths of suffering experienced in the life of a er. I decided to do a story on the Director of Student Activities, Phillip Swanberg, and I talked to his secretary and requested an interview. She told me he was busy registering new students, and I made an appointment for a possible interview in two days. Returning two days later, (which was the day of the deadline for this issue) Mr. Swanberg's secretary told me he was still registering new students and also had an important doctor's appointment later in the day. Resigned to the fact that the well-being of new students and Mr. Swanberg were more important than my story, I tried a new approach.

Having heard from a reliable source that a new Coordinator of Student Activities (Mr. Swanberg's assistant) had been appointed, I decided to contact her for an interview. I called the Director of Public Information and asked if there had been a news release concerning the new Coordinator of Student Activities. No, I asked if he knew her name or phone extension. No, No.

Next, I tried the Secretary of the Personnel Office. She did know how to get the number of Ingrid Simonson, but she said that she was not sure about the name. I tried the Secretary of the Personnel Office, and she could not find her name listed, let alone her extension. Dr. Allan's secretary was very helpful and friendly and called me back. She suggested I call Mr. Swanberg's office to find her whereabouts, or if that failed to "walk around campus and try to locate her." I thanked her, called Mr. Swanberg's office. No one answered.

Reaching the point of complete frustration, it was suggested I contact Dean Taskey to find Miss (or Mrs?) Simonson. I walked to his office (swearing to never use phones again), asked the secretary for the phone extension of the new Coordinator of Student Activities. She replied that no one had signed a contract for that position.

As of this time I have been unable to find the whereabouts of the elusive Ingrid Simonson. If anyone knows her whereabouts (preferably Miss or Mrs. Simonson herself), please call me in the journalism room. I need help. (Late note - Found! Simonson lives at Tektite offin feiv luxuries: wch as a Met)

Stringfest Planned

Do you play a string instrument? Experienced violinists, viola and bass players and cellists are invited to attend the first meeting of a potential string orchestra at 12:30 p.m. in PAS. Music instructor Gordon Voiles requests that all interested performers bring their instruments for a rehearsal. Some violas, cellos and string basses are available on a loan basis.

Anyone unable to attend this first meeting should contact Mr. Voiles in Faculty B.

The Humble Pi (II)

Highline's leading fraternity house proudly announces it is accepting applications. Private rooms — share this fait.
