Business Seminar Is Success

Unified Voice Set For C. Colleges

Business Seminar Is Success

by Jerry Carlson

A "Business Seminar" was held on Friday, March 10, from 9 a.m. to 4 p.m. at the College Administration Building. The seminar was effectively staffed by Portland-Willa College staff and students.

The seminar, attended by almost 200 people, included seminars on "Business Administration," "Small Business," and "Marketing and Sales." The seminar was well attended and there was a good response from both the faculty and students.

The second morning session included a panel discussion on "Business Administration." The panel consisted of Mr. Sherman, Mr. Feeney, and Mr. Wells. The panelists discussed their respective responsibilities and how they contribute to the success of Portland-Willa College.

The seminar was a great success and it is hoped that it will continue to be held in the future.

Kramer Holds Voter Registration Meeting

Mr. Kramer, who is the Secretary of State, held a voter registration meeting on Friday, March 10, at the College Administration Building. The meeting was well attended and there was a good response from the students and faculty.

Mr. Kramer spoke about the importance of voter registration and how it can benefit the college. He also discussed the new unified voice set that has been implemented for C. Colleges.

Voters Are Signing Up

Although the number of registered voters has increased, there are still many who have not registered. Therefore, it is important that people take advantage of the opportunity to register.

The registration process is simple and straightforward. You can register in person at the College Administration Building or by phone. The phone number for voter registration is 503-555-1234.

Unified Voice Set For C. Colleges

The seminar covered the implementation of the unified voice set for C. Colleges. The seminar was attended by almost 200 people, including faculty, students, and staff.

The seminar was a great success and it is hoped that it will continue to be held in the future.

Mr. Kramer noted that the new unified voice set will make it easier for people to contact the college and will also help to improve communication.

The registration process is simple and straightforward. You can register in person at the College Administration Building or by phone. The phone number for voter registration is 503-555-1234.
not all solitary people are lonely

Is there something to say about being alone in college? Not the loneliness or alienation you study in sociology, but the loneliness of some of the kinds on campus: perhaps the feeling of being alone that you feel more than just occasionally. I know there’s a lot of it around going. I’ve seen it in the faces of people sitting by themselves in the lounge, surrounded by people and sounds. Take a look around the cafeteria and you’ll see people with little or no place to avoid people’s eyes. At all colleges people are lonely, I know, but many are anxious to make friends and exchange ideas and just can’t find the opportunity. Are Highline students willing to give each other that opportunity?

When I was a student, I wandered through the lounge occasionally, and I know other students do, too. The lounge was a group from Various parts of the country. I’m a former Highline high school student, still attending that school, and so on. There’s the bunch of Vietnam veterans who have returned to school, and then there are the students who have come to be known as students they’re studying: nursing, law students willing to give each other that opportunity.

Nancy Schaefer

I make an effort

Whenever I pass by waters once undisturbed, now cluttered with litter, whenever I see skies once clear now dark with pollutants, I think of all the things I ask myself, "Why?"

It is easy to justify situations by pointing to needs, "They," they say. "There is," they say, "no need for." But is it true? Is it true for these things? As simple as that.

It's easier to justify situations by pointing to needs, "They," they say. "There is," they say, "no need for." But is it true? Is it true for these things? As simple as that.

Nancy Schaefer

lost your voice?

At a recent swim meet between Eighton Community College and the University of British Columbia, many people (including the honored visitors) were very embarrassed. After the Canadians swam a few races, our national anthem, a lot was written and done during the Star Spangled Banner.

The Canadians looked on with amusement; they understood, why people from a country, who have been defeated and are beaten, feel so—well, hurt and on earth did sing? Their country’s anthem. Don’t they know the worth? Or

if- ing you stick

About this time every quar- ter most of us go into a very odd feeling of pain. As if a child were about to fall off and roll the last quarte. The question, now, is whether to do now, withdraw, or go with sleep for the next two weeks and commit suicide. On this subject I am an expert and believe me, there are no safe as he may appear. If you stick it out or end the quarter I guarantee you’ll look back in three years time, going, waking and when all the world was asleep. This might be a good time to push the books aside and think about yourself, who you are and where you’re going. In my search for the traits good to pass this I ran a number of those things. At all rates you’ll hear the "The Bent Twig!"

If a child were to learn, he learns to love. He learns to love always, to see the good in everything, to learn, he learns to have a goal. If a child learns too much, he learns a hard time. If a child lives with fairness, he learns to love. If a child learns with anger, he learns to hate. If a child was doing well, he learns to be confident. If a child lives with praise, he learns to be appreciative. If a child is happy with love, he learns to love. If a child is happy with hate, he learns to be afraid. If a child lives with security, he learns to feel sorry for himself. If a child was doing well, he learns to hate. If a child lives with encouragement, he learns to be confident. If a child lives with praise,

Orting Mayor Views Town and Career

by Doug McConaughy

Mayor Gay Colorossi, of Orting, Washington, who was "born and raised in Highline," is "searching for a new career" which will give the student the "credit," the student must be evaluated "in the process of promoting and investing new industry in their primarily farm valley. It seems, however, that Orting is doing better than its big neighbor Seattle in attracting business, for the Nuco Corporation is in the last stages of completing its International Headquarters. Nuco manufactures fans, heat exchangers, electrical supplies, and is trying to sell its "product" in the European market. At the peak of production, employment for the plant should reach in excess of 300 people. Colorossi feels that "The town will certainly experience an increase in population and business trade from this facility."

The State fish hatchery, right outside the town's boundaries, has undergone changes that have been publicized nationwide for the new techniques in breed-

At the end of each quarter, Wilson goes to talk to each student's employer and figures out a letter-grade to be given. The records in the title, which deals with a student's grade for each quarter, employer's evaluation, and the duties involved in the job are quite interesting in the case of Gay S. Colorossi. Wilson listed Gay's duties as: "Provide the administrative leadership as Mayor for the Town of Orting, Wash. . . . This responsibility entails all areas and departments of Orting. . . . The student is rated in such areas at attitude through initiatives by his/her employer. In this case Colorossi is the "top man" or supervisor, and Wilson has evaluated the "Mayor" by calling to city employees and residents of Orting, Wilson came up with an "A" in every area for Gay, and an overall evaluation of "High degree of excellence." Colorossi was elected to the city council of Orting in 1984 and was appointed Mayor by that body in 1987. In the fall of 1988, Gay was elected in a 6-year term by a landslide victory over his former police chief. Currently Colorossi is on a leave of absence, because his night classes here at Highline College are in conflict with city council meetings. The City of Orting is classified as a fourth-class city, but in seven statutory years, the population of 1,643 utilizes the honor system for payment of its low-cost utility. Gay has stated that he will not run for re-election in the fall of 1973. "The reason for this," Colorossi says, "is that, I'm trying to put my house back into order. I was going pretty good when I worked for the Boeing Company, and financially I was doing alright. However, now I've been going to school while also being Mayor and it's time I just started re-building my career.

When queried about improvements he would like to see, Gay replied, "I wish I had a city manager." At this time, though, as leaves, Gay still handles all of the administrative duties full-time. According to his Deputy City Clerk, Mrs. Jane Egger, "Sam (Gay) is the nicest person to work for in the world. He is always going all of the administrative duties full-time. According to his Deputy City Clerk, Mrs. Jane Egger, "Sam (Gay) is the nicest person to work for in the world. He is always going

Mr. Frank Manning, left, retiring Orting City Attorney, tells of the problems Colorossi has encountered during his administration.

Landrud Paper
Possible Topic

by Salvio Bower

A paper on a possible topic for the Community College Conference was submitted by Roger Landrud. In his paper, he addresses the need for changes in the community college system. Landrud points out that the community college system must be flexible to meet the changing needs of society. He argues that the community college system has been too static and that it needs to anticipate change and restructuring. Landrud suggests that the community college system should be viewed as a dynamic process that is continuous and responsive to the changing needs of the society it serves.

Faculty And Stew Take To The Air

by Karen Thomas

All the hours of effort put in by the students and faculty alike paid off in a pleasurable and successful trip to Washington State College. The trip was the culmination of a project funded by the Washington State Community College System Master Plan. The students were able to submit a proposal for the project and it was approved.

Student reaction was enthusiastic, and the trip was definitely an exciting diversion from the routine work of the college. A slight delay in departure of the flight and an accidental bump on the way could not dampen the spirits of the happy passengers.

The trip was completely organized by transportation students, and they were able to spend a lot of time creating an interest in the courses. They held a competition for the students, and it was successfully carried out with Mr. Ziegler overseeing the students who put a lot of effort into the task. Dr. Shirley Gordon, Head of Department, had a competition for the students when she said, "They handled the trip extremely well."

Money Sent To HELP

by John Brown

A flight-wanting to see the spirit of the trip when he said, "You had us not heading for Hawaii!!"

Cash Goes To HELP

by John Brown

The Air Transportation Department donated $38 to the Washington State Community College System Master Plan, from money raised from ticket sales for the Flight Familiarization trip that the students helped organize.

The trip was planned by the Air Transportation Department, with the help of the students. The students sold the tickets at $15 each, a 1.5 grade point average. Loans are given to students for things such as classes and personal needs that are school-related, and money for transportation to and from school.

To qualify for a loan from the HELP Fund, students must be registered for at least 12 credit hours, and have at least a 1.5 grade point average.
Nursing Lab Now In Use
by Holly Nows

The Fall 1971 quarter marked the beginning of a new instructional method in the nursing program. The auto-tutorial laboratory, located in Snoqualmie Hills, was made possible by a grant from the state legislature. With the use of this laboratory, students in the nursing program are able to work at their own rate without worrying about falling behind. Available throughout the quarter, students can work in the lab together or on an individual basis.

The lab is set up in units exactly like those used in hospitals so that the students are able to learn in the same environment they will eventually be working in.

The lab is set up on a multimedia basis with filmstrips, slides, tapes, and simulated units available to the nursing students. All the equipment and models of adults and children are used by the students in practice such things as giving medication, taking temperature and pulse, giving bed baths to patients, and changing dressings.

Instructors involved with the program are Mrs. Charlotte Cooper, Mrs. Mary Lou Holland, Mrs. Edith Brand, Mrs. Jeanne Schenkman, and Mrs. Ruth Molter. Selections to the program by the first 25 students in the program was favorable.

Corps Interest Shown By Youth

Young Americans have a brighter view of the Peace Corps and its volunteers in their endeavors to "help others to help themselves," than did the nation as a whole. This conclusion was drawn from a recent national survey conducted by Daniel Bartch and Staff of Markham-Neck, New York for the Peace Corps.

The survey showed that young Americans hold a more positive attitude about the Peace Corps (84 per cent of Americans indicated it was more positive than the volunteers (86 per cent of the total sample). The survey was conducted by the Peace Corps (86 per cent of Americans held a more positive attitude than the Peace Corps. The survey was conducted by the Peace Corps (86 per cent of Americans held a more positive attitude than the Peace Corps.

Young Americans indicated a high level of personal interest in the Peace Corps 21 per cent between the ages of 18 and 24 said they had an interest in joining the Corps, compared to 36 per cent overall.

Since its beginning in 1961, the Peace Corps has sent over 30,000 American overseas as Volunteers.

Highline Bookstore
Intrigue Novel Awaits Approval

by Selvig Bower

"The Twenty Million Dollar Dope" is now awaiting publishers' approval according to the author, Mr. Robin Buchan, history instructor.

The author gave a brief preview of his novel, which he says is a cracking adventure story. The hero is an elderly fellow (about my age, Buchan quipped) who has spent most of his life in the military, according to the Board of Judges. The hero is Hong Kong. And the hero is sought in a war with an organization in the United States that imports drugs. He is forced to react.

"And he reacts, the same way I would," Buchan reports. "It's basically, a coward. Anyway I'm afraid that would be my reaction."

Buchan reports the book is written on a fast pace, much like J. P. Marquand's THE TWENTY MILLION DOLLAR BEAST, and has all the violence and action here on April 4. The 1954 film views waterfront conflicts, a variety of foreign films and a silent movie are scheduled to be shown on the ancient Greek legend of Oedipus.

"And he reacts, the same way I'm afraid that would be my reaction." Buchan reports, the hero's basically, a coward. Anyway I'm afraid that would be my reaction."

The book is due to be released on March 31, in the Highline College Film Series. Produced in Greece in 1975, the film is a story of innocence and sexual awakening. The eight-minute film is based on the ancient Greek legend of Oedipus. The film screening will be in the Louhart Hall.

The program, which begins in January, and will continue until July 7, offers an uninterrupted, uncensored viewing of "classics" from around the world. Following each presentation, a discussion will take place, involving the author, the heroine, the hero, and film critics, discussing the film itself and the film media in general.

The movie which is aired every Friday night at 8:00 on Channel 9, have included showings for almost everyone's taste, ranging from the ancient Greek legend of Oedipus, to the most modern of the few U.S. films to be aired. Since most of the films are foreign, subtitles have been added. But even so, most of the films are quite enjoyable, and clear, even if one doesn't catch all the words. Some of the subtitles are more approximate than precise, but the whole idea is to make the films accessible to the non-speakers of the English language. I say it because I want to believe I don't care what people think — that is the most dishonest sentence in the English language. I say it because I want to believe I don't care what people think or what I want you to.

Frosler possesses the ability to communicate, in only a few words, an idea which would take a man hours to meet by more means. All of us, written in a simple, free manner.
Poet Reads; Charms All

The performance at the Lecture Hall on Friday, March 16, came close to a selling out as the poet of the evening, Charles Hall, described in a casual and warm manner, his poetry and comments.

The poet, who is at the present a professor of English at the Lewis and Clark College at Portland, added great deal of charm to the reading of his compositions by sharing with his audience some of the little in-tuitions into what makes a poet write a poem. He spoke of style and rhyme and seemed to indicate that the most important factor in the poet was to have "something" that he could share with something he wished to relate to others, to which they can relate.

It wasn't difficult to see that the audience, for the most part had no difficulty in relating to Dr. Bill Stafford, poet.

Better FM
In Lounge

The ASBIC Executive board has purchased an emergency FM antenna and is presently in operation. The new antenna will now facilitate better radio reception in the lounge and cafeteria.

Black Sabbath
Back In Arena

British quartet BLACK SABBATH returns for their second Seattle appearance Sunday, March 18th at the Arena.

This band developed its musical identity through a rigorous touring pattern of almost one million miles outside of England during seven months of 1969, a period during which the fourteen won followings in France, Holland, Denmark, Sweden, Germany, Holland, Switzeland, and Switzerland. They remained relatively unknown in England until the release of their first album, "Black Sabbath," which was released this past February. The single "Paranoid" has sold one million copies in England, Belgium and Holland, and is only three weeks of sales, their newest album, "Master of Reality," was listed in the Top 10 in France, and the U.K. singles, "Morning of the Maggots," and "Paranoid" have both sold over 100,000 copies.

Scully Photos Showing Now

Photographs by Roy Scully, Seattle Times staff photographer for over ten years, can be seen in a Pioneer Square show opening Friday, March 10. Most of Scully's memorable works are featured in this show, which is at the Infinity Gallery, 11th Street.

Only My Hair-Dresser Can Tell

They say that fashion runs in circles. What may be "in" to-day, may be "out" tomorrow. This holds true not only in clothes, but also with the most important status symbol, hair.

What was good for Yul Brynner ten years ago, is good for Gen. Custer today. Speaking of General Custer, if you are like me, then you are blessed! For what we call in the world of hair, curly locks. And Smiles when you say that. For years I've been going into barbershop and learning a great deal about fishing and hunting as well as coming out with what can only be described as a new job.

Skid Road Show Based On Trial

The Seattle-based SKID ROAD SHOW presented the world premiere of the ORPHAN ABBIE, an original play by David Peterson, on Saturday, March 24.

The play is based on the transcript of the Chicago Conspiracy Trial, and is being shown at the Second Street Gallery at 11th and First Avenue, Seattle.

"We founded the SKID ROAD SHOW to do serious theatre on a regional level," said Laurel Lee Johnson, currently a speech instructor at Highline and the Company's artistic director. "We are very pleased to be able to do a play with the help of fine musicians and the production of Mike in New York."

Future performances will be Saturday, April 11 and 12, and Friday and Sunday, May 15 and 17. Tickets are $2.00 reserved and $2.50 at the door. Reservations can be made by calling MA-2400 or EA-1243, or at the Second Street Gallery.

Seating is limited, so reservations are advised.

Mason Vends To Super-Stardom

Faces of the group TRAFFIC undoubtedly have come in contact with the name of Dave Mason, who is rapidly becoming a super-star.

The most important factor to the Mason's music and audience is the "singing" style of the man. His latest album, HEADKEEPER, is another step towards that goal.

The story of Dave Mason is a strange one. Not even mentioned on the first TRAFFIC album, he was instrumental in making MR. FANTASY ahead of its time. Next followed the "as again, off again" involvement with the group. He would announce his departure from the group, then show up for a concert with some new ideas.

After Steve Winwood's decision to join BLIND FAITH, Mason and other TRAFFIC members Chris Wood and Jim Capaldi made an effort to keep the group together, but it didn't last long. Mason went on as he has with such people as Delaney and Bonnie until his solo album, ALONE TOGETHER was released.

ALONE TOGETHER set the high standards that Dave Mason has always had in his music. The album contained ONLY YOU KNOW I KNOW, later made popular by Delaney and Bonnie. Both Mason's guitar and voice had matured from Traffic days, and with the help of fine musicians as Delaney and Bonnie until his solo album, ALONE TOGETHER was released.

Mason's guitar and voice sound out well, but his band, notably drummer Rick Leppert, aren't really acquainted with his style yet. Organist Mark Jordan does an adequate job, and bassist Ronnie Turner, who played with Steve Miller for years, shows he hasn't lost his touch.

None of the music is forced, and it is easy to see that Dave Mason has a lot to say.

Lyman Is Tops

Highline College's Talent Show, part of the annual "K.O.'s You Care" celebration presented some of the college's more talented students last Thursday in the Lecture Hall.

The presentations were judged on four points: performance, voice, audience response and preparation. The winners and their selections were: 1st prize Dina Rice, Bonita No. 6, in E Major by Bach; 2nd prize, Randy Koster, self-composed piano solo, "Pocahontas"; 3rd prize, Richard Lyman, an animated oral interpretation of an Alba Glasberg poem.

The new Child Care Center was installed February 2nd, and its occupants couldn’t be more delighted with their new homes. Their previous facility, a garage, was expropriated from Boeing. It was divided into small areas, had no running water or toilet facilities (the kids had to go to the locker room bathrooms), and had no windows, which made the rooms a bit claustrophobic.

The new pre-fab building, however, has what a child care building should have, save a small “quiet room,” where little ones can take a nap. It’s got lots of open space to play in, a big sand box, cubicles to store toys in, an isolation room for a child that comes down with a cold during the day, and windows - big windows - that overlook bushes and part of the lower parking lot. Most important of all, it has bathrooms, and that means a lot to the teachers and parents who take care of approximately twenty-five small children and toddlers.

The walls are orange and gold, and the rug is emerald green. Another little girl told me she had more room in the new center than she did in her four-year-old day care center. One four-year-old said she liked the pretty colors on the walls and floor. The walls are orange and gold, and the rug is emerald green.

Data Is Compiled To Aid

The Student Government at HCC is currently attempting to gather information on courses and instructors to help facilitate the planning of students in the future. According to Robert Tharp, who heads the SGA, the data that has been collected on the various courses and instructors is used by the various instructors as a basis for their own decisions.

The data the committee is collecting includes the students who have attended the various courses and instructors, as well as the topics that have been covered. The information is used to help students in their future planning.

ASB President, Ed Buchanan visits with the children at the Child Care Center.

MECHA To Organize

Mr. Alfonso Valenzuela in an open invitation to meet with all those interested in forming a chapter of MECHA: Movimiento Estudiantil Chicano de Aztlan – Chicanx Student Movement of Aztlan.

All those interested, please contact Mr. Valenzuela as soon as possible so that we can meet the students’ schedules. Mr. Valenzuela is willing to help and advise the chapter in whatever form it can.

The invitation is open to all students, Chicano or non-Chicano.

2 Year Degree Has Broad Base

New to the business division this year is a program to earn a two year degree in Applied Science - General Business. This program gives a student interested in the business field, and not interested in a four-year degree, something to show for two years spent at Highline College.

The associate degree provides a broad base in business, and would be especially helpful to those who are interested in the business field in general, but not interested in any one area in particular. It will, however, prepare the student for many types of jobs, and for those working now, provide some education and with the education received, some possibilities for advancement.

The courses required for the Associate in Applied Science Degree – General Business Option will prepare the student for many types of jobs in the business world. Among them are: retail clerk, office clerk, management trainee, credit and collections personnel.

Interested persons should see their advisors or Mr. Robert Hester, division chairman for business.

Wrestlers Take Fourth
In Championship Meet

by Barney Cargile

Young Democrats and communists almost won the tight event and 3-2 but neither interfered with the newsworthy finish to the tournament. The winning team was on hand for the championship, the junior team, and the women's team, and the three teams all shared the victory.

The tournament featured three matches, each with the other teams. Highline's wrestling room was filled with the Y. D. during their fourths at the tournament, Highline was up front were the Columbia Basin in the semifinal round. Miller, formerly of Kansas, was state champion in high school and was considered very tough. At the end of three rounds, neither wrestler had scored. The match then went into overtime with a second-minute round. At the end of that time, neither wrestler scored, and the match ended in a draw, and he was awarded the野生动物。It looked as if it would be a high-scoring round, but with six seconds left, the score was still tied. Both wrestlers then went on to pin the other wrestler with a 1-2 to take the victory.

Highline wrestler who fell prey as Perkins was downed nine seconds. The match was definitely one of the tournament's highlights. Mike faced Columbia Basin in the semifinal round. There was not enough time, and the match was ended.

Highline's chances. He stated that at the present time it appears that Highline has qualified nine wrestlers for the All American honors. Ten wrestlers are chosen in the country for each event.

Ending its 1971-72 season with a 14-1 record, the Highline swim team outscored three schools in their final two meets. The victories came when the team overpowered Portland State 54 to 19. February 23, defeated Southern Oregon 128-1 and Linfield 126 to 1 in the same day. Against Portland State, every other swimmer in the regional championships.

Thunder-Word

Thunderbird Volleyball Club has been holding classes in beginning karate beginning Monday Tuesday and Thursday in the gym. The club will offer classes for beginners and advanced students. The classes will be taught by Steve Adely, who has been teaching karate for several years. The classes will be offered this spring for both adults and children. The classes will be held on Monday evenings from 6:30 PM to 8:00 PM. The fee for the class is $30 per month. For more information, please call Steve Adely at 555-1234.
Netters Take Sixth

by Cliff Jones

Cliff Jones shoots over defender in tournament action.

Higline: Lower Columbia ratified off the last five points of the day. The score was 19-12, and in the second half. After all, the Thunderbirds were a team that had their biggest lead of the day in the period and jumped ahead 35-26. The Thunderbirds started a rally, but Highline's scoring was led by Peeler with 21 points. Higline's leading scorer was Peeler, who finished with 22 points. The game was won by Highline in the final 40 points, 83-65.

How To Stretch An Auto Dollar

by Tim Jones

Looking for a car? Which is best for you? Some careful considerations will save you a bundle.

Take engines for example. How much horsepower do you need? Or is horsepower the important item to consider when matching the car and your needs? More important than considering horsepower is a close look at the engine's torque output at various RPM's and an evaluation of overall engine efficiency with reference to average speeds driven.

With gas prices fluctuating wildly as they are, it would be a good bet that cars with efficient powerplants will become the things to own. What does horsepower, torque and efficiency mean? In general, terms, horsepower is the amount of work that the engine can do in a given amount of time. This can be PTO or the brake. But this can be misleading as well. If the engine develops peak horsepower and torque at its maximum speed, say 5,000 RPM, then the engine will be running inefficiently at moderate and cruising speeds.

Auto manufacturers try to anticipate your driving needs by the type of car you buy. In this way you get an engine that achieves its maximum efficiency at the speeds you most often drive. How about torque? Torque is the maximum twisting effort of the engine measured in foot pounds. An engine developing 100 ft. lbs. of torque can start 100 lbs. of pressure on a one foot bar, perpendicular to the crankshaft. But torque varies with engine RPM also.

Engine torque rises with RPM and efficiency, and reaches a peak usually at two or three RPM, and then falls off as the engine becomes victim of its own friction and energy losses in changing the direction of the piston. This is why the new piston rotary engines have an efficiently tapered or torque curve to maximum RPM.

And what about efficiency? The interval combustion engine is basically an air pump. Outside the air pump to efficiently intake and compress the air and the more power per cubic inch available.

The overhead cam, which is not a new design but is now just becoming popular in the U.S., allows for straight line induction and exhaust systems and makes far in design of hemi-

Aquatic Show Set For May

The Higline Thunderbird dribblers rounded out the 1971-72 season with a sixth place finish in the state tournament last weekend. The T-Birds lost their first game to Walla Walla and then came back to defeat Tacoma and Columbia. In the semi-finals, they were pushed into the losers bracket by Walla Walla in their opening game. The T-Birds' score was 82.68 and Peeler led the state in rebounds in the loss. He was followed by Tyler Montana with 15, Montgomery with 13, and Peeler with 12. Highline's scoring was led by Peeler with 49.8 percent. The next Friday afternoon at 3:40, the T-Birds will be at home against the defending champions, the Tacoma Titans, who lost the last game to Columbia Columbia last week and earned a trip to the championship. The game was won by Highline's leading scorer, Peeler, who finished with 22 points. The game was won by Peeler with 21 points. Higline's leading scorer was Peeler, who finished with 22 points. The game was won by Highline in the final 40 points, 83-65.

T-Birds to Host Spartans

Next Friday afternoon at 3:40, the Higline T-Bird Track team will host the Shoreline Community College Spartans. The Spartans are the pre-season favorites, with such runners as Mike Cary, who runs the 100 yd. dash in 14.8 seconds and is a probable Olympic contender; Joel Bradbury, a high jumper who won the State AAA High School title and has a personal best jump of 6', Ken Tollef, a graduate of Mt. Rainier High School, who will be providing additional depth in the high jump and has a personal mark of 6'.
