Statistics Show HCC Meets Citizens' Need

Highline. Comments. Our highest compliments to those who do all the things that cannot be done in any other way, according to the philosophy of higher education. Our new student services are a result of the hard work on the campus and in the business, and the hard work of those who have come here to learn. Statistics show HCC's commitment to serve all students in the communities it represents nearly all students have had easy access to. This was made possible by the continued education and the expansion of courses according to the current needs. The vote by Dineen Gruver, coordinator of adult education, told a legislative hearing that Continuing Education has a high demand and the number of students enrolled in the past year has increased. If so, many of the courses offered by the state's 26 community colleges can well be considered a community service. The uncertainty lies in the number of space needed. Highline's occupational programs have long waiting lists for courses in business. Yet, not enough space for occupational programs such as the Highline College's Vocational Complex. Nearly 1,900 registrations were made this fall, and many are waiting for classes to be offered. The high demand for classes is a normal function of the school's reputation. However, the number of students enrolled in the past year has increased. If so, many of the courses offered by the state's 26 community colleges can well be considered a community service. highline tech

Some changes are being made. Community colleges which used to be preparatory schools for four-year institutions are becoming vocational schools.

According to Higline's administration, less than a third of the students presently attending high school plan to go on to a university. The assumption here is that most students are interested

To meet the demand, highline and other community colleges are letting out welders, secretaries, nurses and policemen by the multitude. The process is billed as a service to the community when it comes time to seek employment.

For the community college to serve the employment needs of the community, is a noble plan indeed. Our community also includes a growing number of astute young people who realize a liberal arts education isn't such a great asset when it comes to seek employment.

Logics tell us then that we should rearrange our educational priorities. It has been suggested that state community colleges be 50 per cent vocational and 50 per cent academic. To satisfy that goal, the State Board for Community College Education plans to spend $88.1 million constructing vocational instruction spaces over the next two years.

For the community college to serve the employment needs of the community is a noble plan indeed... with one reservation: Community colleges in the future will be overrun with technical whose sole purpose will be to turn out technicians for our technological society.

Colleges have the ability to be the watchdog of government, business and industry. During the past decade, college campuses have been centers for anti-establishment thought. To upset the campus is a symbol of rebellion; to others it's a symbol of the nation's conscience. Whatever the symbolism, the college is a valuable counterforce in our society.

However, pollution and runaway technology cannot be checked if colleges begin serving the interests of the status quo.

Possibly no conflict of interest will arise. To ensure that one doesn't, the academic and vocational interests of the college should be as autonomous as possible.

Maybe the community college should be divided into two different schools.

Letters

Editor:

Just thought the readers might like to know that my letters are not being reprinted as they were written. The editor appears in a drastically shortened and altered form. Mr. Gruver, common courtesy would allow a notation for words and paragraphs omitted.

I thought I might give my views on reading objectively and editorially.

To recognize something which is slanted, determines whether or not the writer is pushing you toward a certain point of view and vision. The writer may seem to express a general knowledge of a subject, using enough truth to make it all seem possible, to the casual reader. The writer may select certain facts and omit others to get you to accept his slant. Another way would be to distort facts by arranging them in such a way as to insinuate a correlation that is actually nonexistent.

Therefore, get an overall view of the article; determine what it is trying to express. Next, decide what is actually said and what is indirectly suggested. Then, look for points of view. See if anything has been left out or misstated, misrepresented, discredited or distorted.

This procedure will enable the reader to sort out fact from fantasy and enable him to make up his own mind. Instead of having the writer impress his own conclusion on you. (Let me make my case again.)

A:ter all.

Tour Turnout Indicates Change

by Brian Moe

What was it that prompted only 55 percent of the eligible voters in this country to go to the polls? (I'm not talking about the presidential vote but for the立马_7
dent volunteerism is a great project because it lets the student really get to know the students also be aware of any problems there may be.)

The easy answers would be to say that many people such disenchanted with both nominees and political parties either, or that a lot of voters work long hours and are too tired, or that Nixon will win that they decided their vote would not matter anyway.

But it is also very possible that tens of millions of people have become disillusioned with the system altogether. Now, all of a sudden, the voters feel they have no vote at all, and no one cares how they vote. People from all walks of life, from all kinds of occupations, are seeing corruption and spending them on crap that is not needed, not even in the interest of the world.

Perhaps a better question would be, what kept the other 45 percent away? After all, it was the task of the people to elect a president. The voters’ favorite course of action was to be de-lected to the extent that only 10 million people went to the polls, out of a possible 102 million.

As pointed out by the author, there are many reasons why people are no longer interested in the political process. Many people today are looking for a change. Now, in leadership, it does not matter who leads a sick horse, the horse is still sick — but the system itself.

The new democracy has provided its own remedies for its own ill in the form of the student. It is now possible to come up with something good enough to promise for a future.

Volunteer Evaluates Involvement

Editor:

As a volunteer at the University, I would like to share some of my thoughts and feelings about student voluntarism.

First of all, I feel that student voluntarism is a great project because it lets the student really get to know the surrounding communities and to also be aware of any problems that they might be having.

Certain criteria must be set up before the volunteer arrives. The main criteria is that the volunteer must be able to understand the community. The second criteria is that the volunteer must be able to become an elementary school teacher and a leader for the students. The third criteria is that the volunteer must be able to take classes pertaining to teaching children. The fourth criteria is that the volunteer must be able to go to the C.I.P. office and inquire as to where he/she can get experience as a teacher.

I am now tutoring at the Northeast Regional Education on the Auburn/Enfield High. This is the type of program that I am looking for such good experience! From the classes I am taking at Highline

I am now the President of the Student Government Association on the Auburn/Enfield High. This is the type of program that I am looking for such good experience! From the classes I am taking at Highline

Fair Trial Urged For Hitchhiking

by Randall Kusao

The proposal to repeal the state law legalizing hitchhiking is absurd. The law has been in effect less than a year and already there are groups sponsored by the state's anti-social organizations.

It was perfect: clear skies, moderate temperatures and stinking smoke. Every day that the "smell-ter" was operating, the pollution levels were so high that even the healthiest of people couldn't go outside without being sick.

California has successfully allowed legalized hitchhiking for years as has British Columbia. And a hitchhiking station at a military base is as common as short hair.

The state patrol stands on their belief that pedestrians and high-speed traffic are a natural situation. This is the case. The police should be encouraged to make hitchhiking safer. Widening freeway ramps, building hitchhiking stations and stricter traffic control would greatly reduce the danger.

Improving an individual's right to hitchhike or to pick up a hitchhiker is hardly a just solution. As yet, no one has produced any concrete evidence to support claims that careless safety is psychologically or physiologically detrimental to human health. There is absolutely no scientific proof of insanity, morality, addiction, or chromosome damage, though all these claims have been made.

The American public has been told the truth about hitchhikers from the outset, perhaps there would be fewer peopel experimenting with the hard drugs.

The next move is to see the "smell-ter" in the smoke. It was just a bad smell, a bad smell from California, but it was a bad smell from California. It wouldn't be quite so bad if you have any concerns or questions feel free to come to the President's office and talk to me or with other members of your government.

ASB President

CU Supports Pot

by Paul Lindhddl

Recently, the Seattle City Council voted to decriminalize the use and possession of marijuana. Shortly afterwards, the Consumers Union recommended the total legalization of the drug.

Our country, or the west coast at least, is finally coming to the realization that marijuana is not nearly as evil as people think it is.

As the Consumer Union said, "since a Consumer Union study, begun in 1968, first researched since 1968. It is high time (no pun intended) that some action be taken against the present punitive, regressive approach to the use of marijuana.

As yet, no one has produced any concrete evidence to support claims that cannabis causes psychological or physically detrimental to human health. There is absolutely no scientific proof of insanity, morality, addiction, or chromosome damage, though all these claims have been made.

The American public has been told the truth about hitchhikers from the outset, perhaps there would be fewer peopel experimenting with the hard drugs.

When looked at in the same light as alcohol and tobacco, one wonders the logic involved by a society that would hold legal two such harmful products, yet take so firm a stand against marijuana.

The most pertinent question is whether the harm done by marijuana approximates the harm done in the use of other drugs. As yet, no one has produced any concrete evidence to support claims that marijuana causes psychological or physically detrimental to human health. There is absolutely no scientific proof of insanity, moral or addiction, or chromosome damage, though all these claims have been made.

Introduction

The State Board for Community College Education has put together a six-year plan for coordinating the efforts for the entire state community college system. According to Dr. Orville D. Carnahan, hilaline president, the plan can be improved upon year by year, so that the system will be continuously looking six years into the future.

The plan, Carnahan said, the plan can be improved upon each year until it becomes a workable guide.

The six year plan is designed to:

1. Obtain statistics to show where state community colleges are going. Since the legislature must approve community college housing, Carnahan said, it is necessary to keep the legislature fully apprised of the system's needs.

2. Provide a better information system for the state's community colleges.

3. Each college will submit its six year plan to the Board for Community College Education.

4. Set objectives so that the system can measure its progress and failures.

What it amounts to, Carnahan said, is a means for a long range planning instead of planning on an immediate basis. It's a take off on the "measurable" objectives plan used by most instructors, Carnahan stated. Under that plan teachers measure how well they meet their own objectives.

The general objectives in the state's first six year plan are:

- Satisfy the educational goals of students.
  - Maintain an open door by admitting all students with the exception of the limits of the law and the resources available to the system. Carnahan said that all Washington residents are entitled to go to any state college.
  - Offer the citizens of each district a comprehensive program of occupational, cultural, recreational and academic programs.
  - Develop and employ approaches to instruction which will result in efficient and effective learning.
  - Ensure that each district functions as an integral part of the community it serves.

- Obtain make efficient use of human and capital resources.
- Develop procedures which will allow students, faculty, administrators, staff and community representatives to participate in the formulation of policies and operating decisions affecting them, their families and the college.
- Develop procedures through which students, faculty and members of the community college system can influence their professional goals.

"In short, it is in the process of becoming," Carnahan stated, "the plan that HCC community colleges are going to use to get the most out of the money they get from the legislature and the taxpayers of the state." The school's Underseas Technician Program has recently purchased the pier on the Seattle waterfront that was leased from Pacific NorthWest Investments.

The pier was condemned by the county last spring. That pier, Carnahan said, will be opened for bidding on Dec. 13, with construction concluding in mid-March or April.

Enrollment Lagging, Board Told

By Dileen Gover

Highline Community College recently purchased 76 feet of waterfront at Federal Beach on which to build a pier for the school's Underseas Technician Program.

The pier which originally housed the Underseas Program at Renton was condemned by the county last spring. That pier was leased from Pacific Northwest Investments. The school's Underseas Technician Program recently purchased the pier on the Seattle waterfront that was leased from Pacific Northwest Investments.

The Shoreline Management Act requires that the building plans be advertised in both newspapers to allow for environmental dissent. Carnahan said the architect's estimate for construction of the 260-foot pier was $146,400 — can be covered by a special grant from the Board for Community College Education.

The act also requires a small building to house a compressor, a storage shed and a crane. The school still houses the Underseas Program in a large room.

Mundt Supports Life-Long Education Plan

The Task Force is a joint venture of the Senate Higher Education and the State Council on Aging. Its recommendations will be announced May 15.

The community college system has long been committed to the philosophy expressed by the Republicans when they said, "We should do what we can to see to it that the elderly have the opportunity to continue to enrich their lives in mind and body."

EDMONDS, WASH. — John C. Mundt, state community college director, recently announced support for the education of the Governor's Task Force on the Elderly.

Speaking before the Faculty Association of Community Colleges of Edmonds Community College, he said, "We should do what we can to see to it that the elderly have the opportunity to continue to enrich their lives in mind and body."

"Education is a two-way street," Mundt said, "and it is important to remember that education must be offered to people at all ages and stages of life." The Task Force is a joint venture of the Senate Higher Education and the State Council on Aging. Its recommendations will be announced May 15.

The community college system has long been committed to the philosophy expressed by the Republicans when they said, "We should do what we can to see to it that the elderly have the opportunity to continue to enrich their lives in mind and body."

Mundt, who chairs the task force, said, "There should be no admission requirements for the elderly and they should be eligible for financial assistance, if need be, to work toward credit and degrees he said.

There should be no admission requirements for the elderly and they should be eligible for financial assistance, if need be, to work toward credit and degrees he said.

"I feel that district boards of trustees should give serious consideration to the idea of cutting back the school's educational programs currently being offered to the elderly," Mundt said.

"This will involve students, faculty, administrators, staff and community representatives to participate in the formulation of policies and operating decisions affecting them, their families and the college."

Committee Reviews Food Services

by Dr. Charles Sandifer, speech instructor. Other committee members are Jack Chapman, director of security; Al Jackson, director; Cathy Burns, registration office manager; Sharon Ryon, ASB senator; and Ann Tillo, business instructor.

ASB distributed a questionnaire to Food Services. The results indicated 45 percent of the respondents were satisfied with the service and 40 percent were dissatisfied. The committee recommended that the agency to evaluate the student volunteer field experience. Rather than asking only the student to evaluate their placement function within the agency, the CIP representative will enable the CIP office to more accurately determine the national value of the volunteer field experience.

CIP Sends Feelers To Evaluate Work

by Mary Brown

The Community Involvement Program on campus is currently mailing evaluation forms to all students placed as volunteer workers this quarter. Ruth Schaefer, CIP head, stated that this is to aid the CIP office in determining the "total value" of the field work the students are doing.

Schaefer also commented that this is a reversal of the usual trend of evaluating the student volunteer field experience. Rather than asking only the agency to evaluate the student volunteer, the CIP is first asking the student to evaluate their placement function within the agency.

Hulst Tells D. C. Group About State-Wide CIP

OLYMPIA, Wash. - A statewide community college program for the past year was described at a national meeting recently in Washington, D.C. by John Mundt, state community college director, announced.

The Community Involvement Program, state community college coordinator, the Community Involvement Program (CIP), is a cooperative statewide project of the Washington State Education Association, the Washington State Legislature, the Washington State Department of Education and the Washington State Postsecondary Education Board. A key to its three-year study of the transition from adolescence and adulthood.

"The Community Involvement Program provides community college students the opportunity to earn college credit by taking part in community college experiences which relate to fields of study," Mundt explained.

Students may work in clinics and hospitals, business and industry, recreation facilities, governmental bodies, youth groups, law enforcement agencies or on special projects.

"Under Hulst's leadership, the Community Involvement Program has virtually every community college in the state," Mundt added.

The CIP office at Highline is located in Room 312 of the Counseling Center.

Need A Loan?

For those students wondering where their tuition money for winter quarter is going to come from, it might be wise to check with the financial aids office on campus. If your family income is less than $10,000 and you secure a loan, you may have up to $1,500 available in the current academic year. Repayment of the loan begins between 9 and 12 months after you leave school and may last up to 10 years to repay the loan. Students interested in declaring a loan must submit an affidavit that has been signed by a person having the authority to administer oaths. The affidavit states that you will use the loan only for educational purposes. Further information on loans and other means of financial aid may be found in the Student Information Guide.

Buy-Back Policy Set Nationally

National policies have a big influence on Highline College's buy-back policies in the bookstore, according to Mrs. Myrna Trelividge, manager.

Textbooks not being used during the following quarter are bought for a used-book market at the current used-book market price which is established on a national basis by wholesale used book distributors.

The pricing of new books is determined solely by the publisher. Prices are subject to change at his discretion based on the strength of paper, ink and labor. From the price structure offered by the publisher, students receive a 20 percent discount on which is operated. Figures across the country indicate that if it costs in a range of 15 percent to 35 percent, with the average price range of 27 percent to operate a textbook department.

Highline College's administration allows a liberal book adoption policy for the faculty so that the best texts and most current information can be used in the students' hands. This goes, though, when the student is left with the book and cannot get the student as a liberal buy-back price. Therefore, some years the store stays open, some years it makes some profit.

In an attempt to hold down the cost of textbooks, the bookstore provides the following book buy-back service.

1. The store will pay one-dollar for books that are needed the following quarter if they are in good condition and if they are current editions.

2. Paperback textbooks will be purchased at 80 percent of the cost if they will be used the following quarter and if they are in good condition.
**Special Holiday Fare At SCCC**

Seattle Central Community College's original stage presentation of Charles Dickens' *A Christmas Carol* is being presented on December 10 at 7:30 p.m. in the school's Pacific Theatre.

The stage production of the Olympic College's original stage version of Dickens' *A Christmas Carol* will open tonight, December 10, with doors opening at 2:30 p.m. The show has a cast of 20 and stars Michael Brill as Scrooge.

In addition to the play, handicrafts bazaar sponsored by the Alise Case Smith Guild and the Dr. Howard Kent Guild of Children's Orthopedic Hospital will be open to the public. Proceeds of the bazaar will be donated to the hospital's free and part-pay medical care fund.

Campfire Girls under the guidance of the Olympic Heights Leaders' Association will sell Christmas cards, and Margo Westberg will present an original Christmas puppet show.

**Tickets for the Seattle concert of Frank Zappa and The Mothers of Invention, presented by Paramount Northwest, are still available at the usual Paramount Northwest outlets: "U" District, Southeast, and Tacoma Mall. Rock of Monte. Seattle: Lighthouse Uniform Co.; Impulse Music; Joan West in Bellevue; The Other Half. Seattle: Santa Fe; Paramount Northwest. The group ran for two years in Seattle. Zappa in addition to being a guitarist, is a composer of his special kind of electronic music. Zappa and the Mothers of Invention also have their own record label, called Reprise.

The proceeds of the bazaar will be donated to the hospital's free and part-pay medical care fund.

**Music Department ON TOUR**

"The Moondog Express," a rock group featuring music of the past and present, will perform on Dec. 10 and Jan. 5.

**Student Activities Office**

In addition to the play, Frank Zappa and The Mothers of Invention, presented by Paramount Northwest, are still available at the usual Paramount Northwest outlets: "U" District, Southeast, and Tacoma Mall.

**SPECIAL EVENTS CALENDAR**

- Dec. 10: 10-10:30, HCC Music Department performs in the Lecture Hall.
- Dec. 12: 2-2:30, The Seattle Repertory Theater presents CHARLIE'S AUNT. Special preview. Tickets may be reserved in the Student Activities Office.
- Jan. 3: 2-2:30, ASHCC Film Series in the Lecture Hall.

**Brak's PARKER PAINTS**

**Failing Can Be Success**

by Barbara Darlin

"How to Fail Successfully" was the title of a talk by Dr. Dale Turner at the Lecture Hall, Thursday, Nov. 30. Dr. Turner quoted arm by qualities is a failure even if he doesn't gain wealth or prestige. And the person who does not have these qualities is a failure no matter how successful the world judges him to be.

Students wishing to hear a tape of the talk may do so at the Listening Lab in Shanklin Hall.
There is something beautiful about the things man makes with his own hands. The beauty is in and of the creation — not dependent upon external circumstances. The creation is the maker's own. It involves his hands, his mind, and his heart, thus it cannot be duplicated by another.

Here the camera captures the beauty of working with glass — a unique, seemingly elusive medium which man has used and developed for at least 35 centuries. These pictures were taken in the glassblowing class taught on campus by Warren Dunn (pictured at right).

The class which was started last winter will be offered next quarter as well.

Winter Means Snow — Onslaught Of Movies

by Tim Hildreth

The month of December not only brings the winter snows but also the winter onslaught of motion pictures, most of them worth seeing.

Opening what should be a rather long run at the Town theatre is LADY SINGS THE BLUES. The moving story of early blues singer Billie Holiday, it is destined to be a success with Diana Ross portraying Holiday.

Miss Ross not only sings, but proves that she has acting ability as well. There are a few bits of unnecessary nostalgia as any film of this nature would have, but they go by relatively unnoted. It is rated R-17.

George C. Scott is back again — this time as an irate sheep farmer "on a rampage, for good reason." The movie is RAGE and it is now playing at the UA Cinema 150, Seattle. Any movie with George C. Scott is worth seeing and the believable plot in this one adds to his performance. A PG rating has been given here.

A surprisingly unsuccessful film as far as the box-office goes, is A SEPARATE PEACE, which will be ending soon at the UA Cinema 18. Based on John Knowles classic best seller, this moving motion picture of the lives of two best friends growing up together at a Prep School during the second World War is not hitting home with the average movie-goer. Rated PG, it is an entertaining and worthwhile movie to view.

One can't forget (or! CALYPSO) now playing at the Cinerama theatre. The most talked about stage play is now a movie. The viewer will be seeing the stage play however, for the only thing Hollywood did here was to take a couple of cameraperson into the theatre and film the play. The result — a very poor quality piece of film. Rated X, even with its bits of humor, this one isn't worth the time or the price of a ticket to see.

Two films which haven't a ripple yet, but should attract large crowds, are MAN FROM LA MANCHA and YOUNG WINSTON. MAN FROM LA MANCHA will open soon at the Upperline theatre. Starring Sophia Loeb and Peter O'Toole, this musical should be quite a success.

Perhaps in a lesser spotlight is the movie YOUNG WINSTON, which opens in Seattle during the third week of December. The film deals with the life of the young Winston Churchill. So far the reaction of the critics has been "so-so."

Play Tryouts Set for Sunday

Casting auditions for the theatre Laboratory's Winter production will be held on Sunday, Dec. 10 at 7:30 p.m. in the Theatre (Mamo 122). Any student is welcome to try out. The play is NO ONE WILL MARRY A PRINCESS WITH A TREE GROWING OUT OF HER HEAD.

Yule Concert Sunday

A Christmas concert will be presented Sunday at 3:30 p.m. by the Highline music groups. Admission is free. Featured will be the concert choir, vocal ensemble, brass ensemble, and vocal workshop students.
Christmas Flashback

Remember when you were a little kid and Mom and Dad would take you downtown to the palaces of toys: The Bon Marche and Freytag and Nelson's. Why, just the thought of it and how you went wild and forgot about J. P. Pinches, Pow-Wow the Indian Boy and Clutch Cargo on Channel 7? Well, it's been a long time since.

But, I still go down to the Bon and Freytag's, the official start of Christmas, I want to say and shot a couple of rolls of Tri-X of today's kids with today's toys.

Look at the photographs and try to see a little bit of yourself 10 or 15 years ago.
Brouillet Moves To Olympia

by Honey Hunt

Frank Brouillet, 48, from the state's 21st legislative district, was named as superintendent of the Highline district last week by Gov. Dan Evans.

Brouillet has been a member of the legislature since 1969 and has served in the state house and state senate for 10 years.

He received his bachelor's degree from the University of Washington and his master's degree from Washington State University.

Brouillet said he was surprised to hear of his appointment as superintendent, but he was pleased with the opportunity to serve the state.

"I am honored and humbled by the trust placed in me," Brouillet said.

Brouillet will take over the position of superintendent from Gary Johnson, who announced his retirement earlier this year.

Johnson has served as superintendent since 1984 and has been a strong advocate for education reform.

Brouillet said he will focus on improving the quality of education in the Highline district and increasing the number of students who graduate from high school.

"I plan to work closely with the Board of Directors and the community to ensure that our schools are providing a quality education for all students," Brouillet said.

Brouillet's appointment has been met with mixed reactions from educators and parents in the Highline district.

Some have expressed concern about Brouillet's lack of experience in education administration, while others have praised his background in public service.

"I think it's a good move," said John Smith, a teacher in the Highline district. "He has a lot of experience in state politics, and I think he can bring a new perspective to the superintendent's job."
HCC Beats The Bush for Vets

by Salveig Bower

Highline College is taking an active part in the Vietnam Vet Outreach Project, a program designed to bring more veterans to campus.

Robert Benoi has been hired an director of the program at HCC, which has been budgeted $30,000 for recruiting, according to Roster War, registrar.

"Three things are most important: buying the bus, trying to get veterans in school," Watt stated. The three active participants are Bruce Wallis, Sandy Proctor, and Bill Stewart.

The States Board for Community Education states the problem: "The increasing numbers of veterans are leaving the military service without the skills and training needed to compete in the civilian job market, thereby falling into the ranks of the unemployed, a condition that needs to be dealt with this growing crisis."

John C. Mhdmt, director of Public Affairs, says: "We used the force of law and great zeal to incorporate these veterans into the military. We should now use the same zeal as we actively recruit the veterans into a useful role in civilian life."

In this effort, the community collegeeds have a key role to play.

Robert Benoi

Program Inadequacies

The National Advisory Council on Vocation Education lists four specific inadequacies of existing programs.

1. Lack of program coordination. Scattered and isolated efforts that result in confusion.

2. Information gap. The unawareness of the veterans of the full extent of benefits from the G.I. Bill and the wide range of choices in education.

3. Under emphasis on basic

by Mary Brown

"The Indian Experience," a day-long program sponsored by New Christiana, will be held at the University of Washington, School of Law, 117th and Military Road, beginning at 1 p.m.

New Christiana is a Catholic continuing education program.

The "Indian Experience," described by its sponsor as an adventure in awareness and education about native American cultures, will begin with introductions of all workshop panels and the moderator, Hilda Bryans, Social Issues Reporter for the Seattle P-I.

At 2 p.m. the group will divide into six workshop sessions dealing with contemporary issues such as the federal status of the Indian today, Indian fishing rights, alcohol problems and education.

Displays and artifacts will be shown and "artist-in-action" Marvin Oliver will be carving wood beginning at 3 p.m., followed by John Keathman's senor men show "The Indian EXPERIENCE" at 3:30. Keathman, a local artist, will present his EXPERIENCE to overflow audiences at the ACT Theatre this past summer. The production has also been shown on television.

A native barbeque will begin at 5 p.m. with entertainmnt provided by members of the Lummi tribe.

At 6:30 the panel will recon- ven for questions and responses to the workshops. The program will conclude with a "cultural literature" offered by the Reverend Eare Myers.

A donation of $1.32 per adult and $1.26 per student, covers the cost of the entire program including dinner. Without dinner, the donation is $7 per adult and 75 cents per student. Prior regis- tration is required, and may be made with the Registration Chairman, 603 SW Stevens in Seattle. Call 242-4332 or 242-1346 for further information.

Asian, Chicano Courses Offered For Winter

by Salveig Bower

The Social Science Department offers several new courses for winter quarter. Two of the new courses are not listed in the catalog and two others are still in the proposed stage.

The new courses all come under the category of Special Studies. One not listed in the catalog is offered by Roberta Ziruato, instructor, and Mario Miranda, president of the MECHA club on campus.

History of Japan is also being offered for the first time winter quarter and is under the instruction of Jack Pierre.

Courses are also offered under the designation of Special Studies 126 and "students of the Chicano and Chicano Literature. All three of the courses dealing with the Chicano were formulated and proposed by Roberto Ziruato, instructor, and Mario Miranda, president of the MECHA club on campus.

History of Japan is also being offered for the first time winter quarter and is under the instruction of Jack Pierre.
An Oct. 26 law provided across the board increases of approximately 26 per cent to veterans going to school under the GI Bill.

The increases applied also to those in vocational training programs, and to wives, widows and children going under VA's Dependents' Educational Assistance Program.

Administrator of Veterans Affairs Donald E. Johnson said the average trainee received a check for $428, and some got as much as $600.

It is estimated that first-year costs of VA education programs under Public Law 92-530 increased rates will exceed $2.5 billion.

Rates for veterans taking apprenticeship and other on-job training were increased approximately 30 per cent.

Johnson pointed out that the base rate increases retroactive to September, and provided for prepayment of allowances at the beginning, rather than at the end of training months.

Thus, in their Nov. checks, some veterans who started training in late September were paid for that training at the increased rate. In addition, they were paid for October (the month just trained) and prepaid for November, as required under the new law.

Current rates are $328 monthly for a single veteran going to school full-time under the GI Bill; a veteran with one dependent gets $358; those with two dependents will get $420 and $18 a month more will be paid for each dependent in excess of two.

Wives, widows and children going to school full-time also get $260 monthly allowances. For training less than three-fourths time, they get $190 monthly, and for half-time, $115.

Full information on the new education law is available at VA offices, or from representatives of local veteran service organizations, the agency added.

Piper Addresses Those Interested in Education

Mrs. Lee Piper, minority affairs advisor at Highline Community College was scheduled to address members of the local SWEA district at the Washington Education Association in Seattle yesterday.

SWEA is the professional organization of the Student Washington Education Association that comprises approximately 2,000 students interested in becoming teachers and establishing a separate department of the Washington Education Association.

All individuals interested in education, whether actively involved in pursuing a course in the field of education or not, were invited to attend the meeting.

In announcing the engagement of Mrs. Piper as the feature speaker, District II director, Shaunlee Burg, a sophomore at Highline CC, had the following comments:

"I am most pleased and excited about such an outstanding woman as our speaker because she goes beyond rhetoric, action follows her. She is interested in all groups of people regardless of the ethic background and in finding workable and practical solutions that can and do involve people here and now when problems need solving."

Until educators, students, community activists, business men and citizens all become less aware of existing problems with and among people, instead of separate meetings, nothing will be accomplished."

Mrs. Piper attended Lansing University and Michigan State University, as well as Hunter College in New York City. Her Indian name as an Eastern Cherokee, is spelled "u gi da th," meaning Red Feather.

Her activities with Indian affairs groups include; Recent President of the American Indian Women's Service League, secretary of the Northwest Indian Tribal Club, and with the Northwest Indian Education Association, the American Friends Service Committee.

Mrs. Piper will be discussing how education can serve as an effective vehicle through which all people may take an active part in and for the good of the whole, family, state, and community," Burg said before the meeting.

Continuing Ed Offers Nurse-Related Courses

Three continuing education courses in the nursing field are being offered in winter quarter at Highline. The courses are for would-be nurses, aides, and registered nurses.

A "preview" of nursing will be offered as an one-evening short course on Feb. 12 for anyone interested in discussing the two-year and three- or four-year college programs that lead to a registered nurse career. There is no charge for the preview, which is scheduled from 7 to 10 p.m.

"Training for those interested in becoming nursing aides will be offered Wednesday evenings for 16 weeks beginning Jan. 23. The fee for the two-credit course is $81.40. The class will be limited to 15 students.

For registered nurses, a course in "Crisis Intervention for TNS" will be offered on Thursday evenings starting Jan. 19. Basic theory and principles of crisis intervention will be covered with emphasis on applications in the nurses own setting.

More information about any of these courses may be obtained by phoning the Continuing Education Office, ext. 301.

Fuke It Or Make It

Carl Brown, chairman of the commission of the Puget Sound Regional Minority Education Commission, presented "Fuke It or Make It," a motion picture produced by the consortium through a grant from the coordinating Council for Occupational Education.

The film is designed to reach minority persons into community college vocational education programs. Copies may be purchased from Oscar Productions in Seattle or borrowed from Shoreline or Tahoma Community Colleges. Running time is 20 minutes.
Students Teach at HCC Preschools

by Jane LeCuyer

Fifteen parent cooperative preschools in this area are operated by the University of Washington College of Education Department. These groups, for 2-1/2 year olds are organized and operated by the parents. The college provides a sponsor from the faculty for each group. The teachers are students at the University who have completed their preschool education courses. They are hired and paid by the parents. The preschools are located in Federal Way, Burien, Des Moines, East Lake, Riverview Heights, Boulevard Park and Rainier Beach. A special addition this year is a Tenderlovers group for 1 year olds which meets at Trinity Methodist Church.

A college faculty advisor visits each school at least once weekly for professional interpretation. to provide education in: social, emotional and physical domains; to assist the teacher, children and parents. They also counsel the parents individually as desired.

Highline faculty members participating in the program are Charlotte Silverman, Beverly Rowland, Pat Kirkwood, Dorothy Finney and Louise Pettigrew.

Parents, when enrolling their children in the preschool, also enroll themselves in the college course "Pre-School Parent Education." Thus, through experience, education and first hand observation, a parent gains a better understanding of her own child and how to meet the needs of her own children as they interact with others, and exchange experiences with other young parents.

The children benefit by having guidance in exploring their world and the looks of their worlds. Equipment available for active play includes climbers, slides and blocks.

Crayons, finger paints, clay, pastes and coloring materials are there for creative work. The child is free to experiment with whatever he wishes.

Snack times provide the opportunity to learn self help and good social habits and field trips are made for first hand experience to enrich their outlooks of the world.

Early childhood education has become popular nationwide. Cooperative preschools such as these, can be used for a very nominal fee. The large number of groups involved enables them to acquire equipment and supplies, at a reduced cost. Workshops provide opportunities to learn, and the community resources available allow in-service training of cooperative group teachers and parents.

College Offers Courses For Educating Young

by Jane LeCuyer

Five classes in particular from among those being offered in the Early Childhood program this winter at Highline Community College are of special interest to parents and to teachers of young children, suggests Dorothy Finney, instructor and coordinator of education programs. Anyone who is 18 or older may register for one or more of the classes for the standard community college tuition rate of $3.25 per credit hour.

Three of the courses are being offered during early afternoons and two courses are scheduled for weekday evenings.

"The Child Under Six" is a 5-credit course that will meet on Mondays from 12:30 to 3 p.m. throughout the quarter from Jan. 9 through Mar. 2. Two short courses of 1 credit each are scheduled for Wednesdays from 1 to 3:30 p.m. The first, "Literature for Young Children," will meet Jan. 19 through 31, and the second, "Art for Young Children," will meet Feb. 1 through Mar. 1.

For information call 1-86-4499.
Thunderbirds Lose Altitude

History does not repeat itself. Just ask Don Knowles, head basketball coach in last year's home opener. Highline went down in defeat on a last second half court shot by Skagit Valley's Warren Melvin. In this first home game it happened again. With the score tied at 56 all, Ft. Steilacoom's Warren Melvin put up a midcourt shot and his Raiders a 60-58 victory over Highline.

After tying the score up at 50-50 with eleven minutes to go in the first half, Highline failed to score another point for nearly ten minutes. The T-Birds finally scored a basket but found themselves down 21-12 at halftime.

In the second half when Highline took the floor, only two players, Larry Walker and Laurie Hutchinson, remained from the five who had started the game. Jeff Davison, Greg Rhemke, and Bob Lindshead had all watched the opening tip-off from the bench. It proved to be a good combination with Highline out-scoring Ft. Steilacoom 24-14 to take a 54-35 lead. The T-Birds tied the score on a tip-in by Jeff Davison and went ahead on a fast break shot by Bob Lindshead. The Raiders didn't let down and the lead continued to change hands. With little time remaining Ft. Steilacoom went ahead 56-55 on two free throws by Dave Deakin. Following a Highline turnover the Raiders scored to give them a 58-55 advantage. The T-Birds worked the ball down low to Nick Sweeney who put up a jumper that was good and he was fouled. Sweeney put in his free throw to tie the score at 56 with only seven seconds remaining. This set the stage for Thomas game winning desperation shot.

Going into the second half, Highline had the Mt. Hood Saints. It was the third meeting for the two teams and the first game at the Grays Harbor Tournament. The Saints met it again to the T-Birds. This time by a score of 74-64.

After trailing early in the contest, Mt. Hood took the lead at 14-11 and never gave it up again. The Saints, taking most of their shots from outside, twenty feet built up a 42-28 halftime lead.

Going into the second half, HCC forced several turnovers with an effective fullcourt press to close the gap with only a ten point split.

Highline's top scorer was sophomore Laurie Hutchison with 20 points. Mt. Hood's Perry Campbell was game high with 26.

HCC's next game will be against Green River College tonight at 8:00 in the HCC Pavillion.

Intramural Basketball Begins

With intramural basketball coming to an end, it's time to don your sneakers and tune up your shooting eye because intramural basketball has arrived.

Mr. Dale Solander coordinator of the intramural program would like team rosters turned in by January 1.

All games will be held in the Pavilion on Tuesdays, Thursdays, and Fridays at 12:30. If there are enough teams the 2:30 time slot may be opened on Fridays.
Highline Third In Cold Turkey

The Highline College Thunderbirds opened their season by taking third place in the first annual "Cold Turkey" basketball tournament in Aberdeen, Washington, November 24 and 25.

In the first game of the tournament, Highline was matched up with the Mt. Hood Saints, the preseason favorite and eventual winners of the first place trophy. The Saints edged the Thunderbirds 79-75.

After leading 14-9 early in the game, Highline watched Mt. Hood rack up 23 unanswered points to take a commanding 19-7 advantage. The Thunderbirds came back strong, however, and were able to pull to 28-30 with 9:12 left in the half. The Thunderbirds continued to pull away and took a 45-32 lead into the locker room. Sidney led the comeback with 17 first half points.

The Cardinals staged their comeback in the second half. After trailing 66-61, Skagit strengthened their lead by 62-65. The Thunderbirds hung onto their lead and with 8 seconds remaining in the game, Rusty Murphy, who was in the lead line to give the Thunderbirds a 2-point lead, came through and the ball broke.

In the second half, the score tied seven times. Mt. Hood broke the game open and pumped into six straight points. It was the last in the run that nearly ended Highline's hopes for a trip to the tournament. The Thunderbirds were able to catch up and the Saints went home with a third place finish.

Highline was led in scoring by Nick Sweany, 31 points, and South Seattle's 30 points and Laredo's 24 points from West Seattle. With 1:25, Perry Campbell passed the winnser with 1:22. The nextDirector into the consolation game against Skagit Valley will be a best-of-three-series at 11 a.m. Admission is free when you present your student ID card.

Chapman Ponders Ocean Wealth

Dr. Duane Chapman, Oceanography and Chemistry instructor at Highline, was educated at the University of California, Berkeley receiving his B.A.s in Math, Chemistry and Physics and his Ph.D in Comparative Biochemistry. He has been a part faculty member at both the University of Washington and the University of California at Berkeley. In addition to his teaching positions, Dr. Chapman has done various research works for the government and private institutions, one of which included his appointment as half of Boeing's Life Support System research project. He is also the founder of the Sea and Science Research Labratory Company, an organization which remains in operation today. His works have appeared in the form of some 45 technical publications and other related magazine articles. His most recent accomplishment was the acceptance of his novel, tentatively entitled "Red Tide," by the Ace Publishing Company in New York. Dr. Chapman joined Highline's staff in 1972.
