**Library plans unveiled**

By Larry Russell

With approval of funds expected during the next session of the legislature, Highline College is on the verge of unveiling its plans for a new library.

Funding for a new library (Learning Resource Center) in the heart of Highline's campus has been approved by the Board of Community Colleges. Construction of the present library is scheduled for completion in 1984, said Larry Russell, director of the library.

The new structure, to be located just north of the campus heart, will replace the present library, which is located in the old college building.

The new library will contain approximately 150,000 books, the largest book collection in the state. The new library will also have more than 100 study rooms, and will be equipped with electronic services, including cataloging, automated card catalogs, and microfilm machines.

The library staff is currently working on plans for the new library, and is seeking suggestions on furnishings and art to be used in the new structure.

The new library will be a smoking area library. Those who desire to seek a quiet place to study, should submit their suggestions as soon as possible.

More than 100 million dollars will be cleared for construction of Highline's new six-story library building. If approved, the library will be designated as a community college storage facility.

The new library will be located on the east side of the campus, next to the parking lot.

The new library will have the opportunity to assist the campus with any problems. Veterans student service to all areas of the HCC, and its alumni will receive top priority.

The new library will be a community college storage facility. The new library will be a community college storage facility. The new library will be a community college storage facility.

Democracy here?

by Cody Bryan

Can Democracy survive at Highline? What at first seems like a question with an automatic reply on second glance deserves a closer look.

Democracy can only exist if people are willing to decide issues by popular consent. It therefore requires a certain amount of knowledge with which to weigh and decide each issue. This can hardly be the case when only 7 out of a possible 4,000 or 5,000 students made their beliefs known by voting in the recent student elections.

This means that our student government had a majority of its influence exercised by 7.6 per cent to 9.5 per cent of the total student voting population at Highline. This does not include the night school students because the voting booths are required by the present constitution to close at 10 p.m. This is hardly a good showing of Democracy in action.

A poor voting turnout is usually caused by a distrust of the election process or the people for some reason are not interested in the outcome of an election.

Rejecting the first because I helped run the library polling booth for an hour, where I witnessed at least 250 people walk in and look at the booth, while only nine stepped to vote, leaves us with the second alternative.

Now we must ask why people were not interested in voting for student government leaders. Most people have spoken to express a complete lack of desire for student government. Their main complaints seem to be that dances just can't interest the majority of students, especially the married students. They can not find anything that they are able to identify with in student government.

This must be the present leaders main concerns — how to get the people interested in student government. To do this will require a lot of work and perhaps a complete change in the concept of student government and we all want to accomplish for the students. In order for Democracy to survive in this atmosphere it has to be changed to keep in tune with the people. When it doesn't, the people tune it out.

Truth hurts

By Bob Colasurdo

The American public is proving it again — they don't want the truth because it hurts. This is, of course, speaking of the presidential family. The Ford’s reputation for hair raising candor is spiraling faster than the national inflation rate, and it’s no wonder. Ford’s response to the Watergate scandal was to suggest that the American people are not capable of handling the truth. The most admirable quality as the national opinion polls are showing. It started with Betty Ford’s comments about pre-marital sex, an innocent statement meaning she had open pathways of communications between her and her daughter. She was immediately avalancheed with protest and hate mail, probably by the same people who so adamantly supported one of the biggest liars in American history, Richard M. Nixon.

Mrs. Reagan, wife of Mr. Ford’s biggest re-election headaches, turned to political advantage by issuing a statement that she would never stand for such a thing. Is this politics or a soap opera? It is sometimes hard to tell.

Then Mr. Ford’s 13 year old son admitted to all that he has smoked marijuana, and actually thought that that was somewhat normal for a teenager growing up in the sixties — it is probably true.

We must ask him his son’s honesty in acknowledging that fact. Now — since a drug report, ordered by Mr. Ford from his Domestic Council was three days late — he is being questioned as to whether it has anything to do with his son’s statement.

When will the public learn that it would be better to have human failings with human fallibility than the images of the perfect president combined, because while we watch the images, concentrating on them, the human failings go out of our conscious sight.

Ask any magician or con man.

Be a participant

Perhaps by now you have heard of your student govern- ment and have that you are somehow represented and it has something to do with the elections that just ended.

Well, you are right. In those elections you have elected six new officers to your govern- ment and have created six new representatives of your interests. Please use them.

Now we must ask you to have a government with representatives who one and only job is to represent your interests. Do not only to inact legislation to protect your interests.

We have questioned that you have certain rights and responsibilities and that you would like to bring them to your attention.

Also we have been concerned with rights and responsibilities of the student government is charged with the responsibility of various administrative duties, such as seeing the students are represented on all Faculty Senate Committees — in try and provide information to the students as to how to keep them informed, and to provide various programs and entertainment to improve the campus life of the student and promote interaction between students.

One of our primary concerns is the organization of our activities, which locals have almost overcome, however, there are still issues where we are weak and one of these is programs. We can use people with interest and preferably in the areas of forums, films, recreation, and publicity.

Another of our primary goals is the allocation of space of space for students. At the beginning we basically have the same amount of space as in 1964, when the Student Center Building was built.

One of the most frequent re- quests we have is for a Student Handbook. This handbook might contain such things as the rights and responsibilities of code, government Constitution, an explanation of student government, and any other information pertinent to the student.

The overall concept of the handbook would be to have it written from a student point of view and be aimed at student interest and concern.

Hopefully this article has enlightened you to the function and some of the needs of the student government, and if nothing else remember we are here to serve you.

John Hendricks

Film series

At first the idea of paying 50 cents admission for a major film picture sounds like a good deal compared to the inflation of price that the theatres are asking for, but after watching "Billy Jack" in H.C.C.'s Lecture Hall, 10 cents would have been asking too much.

If the movie was good or bad it is important. It was presented that I am concerned with a presentation which literally insulted everyone who paid and through the p.m. showing of the film.

There is absolutely no excuse for the sloppiness and downright stupid mistakes made by the people who were in charge of presenting the film. I believe that if Tom Laughlin was in the audience that evening he would have destroyed the Lecture Hall. Most of the poor souls who got stuck with the 50 cents would have helped him.

Here is a list or complaints which should be looked into:

1. Improve the sound quality! (Most of the dialogue was inadequate because of a lack of clarity. Very "bushish").
2. Try getting the film in focus before it is shown. (I guess they figure that the students and visitors who get in so cheap like to watch blurry figures for the first 10 minutes of each reel.)
3. Don't make popcorn during the film. (Although this didn't happen during the 8 p.m. showing, "of Billy Jack", it was done at the 5 p.m. showing of, "American Graffiti". Come on, let's get a little more professional.)
4. Print your equipment before the film is shown! (This is a sound request which would probably eliminate some of the above.)

I hope the people in charge of showing these films will follow what I have said. If they don't, and feel these complaints are unjustified, they may be relieved of their current duties. Their sincere, but inept attempt of presenting films is insulting to the college, and a disgrace to the college of its student body.

T-Bird Harriers
Dean of Students wears many hats

by Stella McNutt

Jesse Caskey's position requires, among other things, a big closet for all the different hats he wears as Dean of Students at HCC.

A number of colorful notebooks on his credenza tell a visitor to his office that his responsibilities include Intercollegiate Athletics, College Planning Council, Board of Trustees, member, Instructional Council member and Administrative Staff member.

Perhaps his biggest responsibility is director of Student Services, Health Services, Special Aids, Admissions, Registration, Student Financial Services, Veterans Affairs, Counseling and Placement and transfer staff in his area.

As Dean of students, he handles student complaints in areas other than classes and instructors. He is also able to authorize the schedule of a student wanting an overload of class credits.

One half of the team... Ed Morris attempts to bridge the fear students have of mathematics in HCC's Math 100 class.

Math 100 develops ideas

An unusual course with an intriguing title is slowly making itself known to Highline Community College students: Math 100, Appreciation of Mathematics.

The course is featured this quarter, and is a five-credit class which is transferable to any area of the University of Washington.

An unusual course with an intriguing title is slowly making itself known to Highline Community College students: Math 100, Appreciation of Mathematics.

In Ed Morris' section, for instance, the noon hour this quarter, students can apply to one's everyday life. This is a mathematics course which is widely known in HCC's Math 100 class.

The course is featured this quarter, and is a five-credit class which is transferable to any area of the University of Washington.

The only course prerequisite is that the student know how to add, subtract, multiply and divide.

‘Math 100 is a course designed for the liberal arts student who doesn’t have a strong background in math,’ Morris commented.

The only course prerequisite is that the student know how to add, subtract, multiply and divide.

“We try to get students to use their own ideas about math,” Morris said. Some of the areas the class will discuss this quarter are deductive reasoning, topology and probability.

Guest speakers from time to time give talks and demonstrations on how mathematics relates to their particular subject matter.

Dick Plagge, who is interested in kite flying, may give a talk later this quarter.

The course is divided into two sections, and students have the choice of either doing a written report, and exam or an oral report on a subject that relates to any area that concerns mathematics.

Math 100 will be offered again Winter Quarter.

Time will tell how long before the class is widely known around campus.

Clubs begins activities

HCC's Phi Theta Kappa service activities for this year began with sponsoring Richard Wordsworth Oct. 6 and being asked to include a Halloween party for the Child Development Center, a leadership conference on Nov. 1, and "An Apple for the Teacher" day on Nov. 19, according to Joan Fedor, club advisor.

Also scheduled is an initiation of the new members and a Christmas party, pool tournaments and the annual Spring raft race and picnic.

The popcorn stand, manned by veteran "poppers" during movie times, has been successful since its inception last year.

While the price of popcorn at regular movie theaters tops 40 cents or more a pop, one can hardly complain of the popping prices set by the Vet. Club—buttered popcorn pops for 40 cents, while unbuttered popcorn pops for 30 cents.

Vets pop corn for money

A movie is just no movie without popcorn.

Noticing the "popcorn gap" at recent HCC movies, the Veterans Club decided to fill the gap for many moviegoers on campus.

Don Gorton, president of the club, said the freshly popped corn sold at the movies has been a real money maker for the club. Proceeds further explained profits from the sale will be used for club activities this year.

Activities planned by the club include a Christmas party, pool tournaments and the annual Spring raft race and picnic.

The popcorn stand, manned by veteran "poppers" during movie times, has been successful since its inception last year.

While the price of popcorn at regular movie theaters tops 40 cents or more a pop, one can hardly complain of the popping prices set by the Vet. Club—buttered popcorn pops for 40 cents, while unbuttered popcorn pops for 30 cents.

JESSE CASKEY...
Kong Olav, Velkommen

Highliners help honor Norway's King Olav this week in Seattle

The Norwegian community here in Kent, Tacoma, Highline and the greater Seattle area paid tribute to the King of Norway this week as he visited in Seattle and Tacoma. The occasion was the 50th anniversary of the beginning of Norwegian immigration to this land.

Northwesterners expressed their greetings as an "international event" that could easily be transcended by any farm or city campus and by Highline in particular. "We consider ourselves a living extract from the Northwest and visit major institutions such as Karen Foss and St. Martin's in Mathematics," said Roger Landrum, editor of the University of Washington Daily's Journal Advertising-Prints Relation.

As part of the celebration, King Olav's boat trip to Blake Island aboard the kring-kraft boat Anna Marie with a mass of fishing and pleasure craft that numbered 76. While aboard he expressed congratulations to the staff of the Puget Sound region.

The King is now in San Francisco. He will go to Los Angeles and Alaska before ending his 26-day tour of the United States.

Those who met the king in Seattle, Poulsbo and Tacoma, said he lived up to his reputation as "the people's king."

Instructor will leave to refresh course content

Dr. Ruth Alexander has been granted an educational leave for the Winter and Spring Quarters. She will be reviewing and re-evaluating the objectives of the applied psychology courses in order to bring greater relevance to teaching.

Dr. Alexander was delegated to interview instructors to review their objectives and correlated instruction all. The input from these will then be integrated into objectives for the applied Psychology courses.

During Spring Quarter Dr. Alexander will be attending Stanford University.

New addition for Redondo?

The Redondo Community Club at its meeting Oct. 7 acted to appeal the recommendation of the Department to the King County Council on approving a Planned Unit Development (PUD) in Redondo.

Mal Feron, HCC student and president of the club, reported a recommendation involved in the proposed $1.25 million project for 25 town houses.

Approval of the PUD is contingent upon the applicant, Norval B. Lattimore, securing vacation of certain right-of-ways," Feron added, "and we must be vigilant to prevent a give-away of public land."

A report was given by Council Secretary Will Doughty on the community meeting with the Redondo Library Board and King County Library officials respecting the scheduled year-end closing of the Redondo Library.

Vice-President Norman McChens was delegated to inquire into ways to prevent this closure.

Attention was also given to the danger of children waiting for pickup in the present school bus bays. Naomi C. Rechid, treasurer, was delegated to take this matter up with Federal Way School authorities.

The next Redondo Council meeting will be held at 7:30 p.m. Nov. 3 at the Bayside Recreational Room.

Board meets leaders

Student government leaders met with the Board of Trustees for Highline Thursday, Oct. 16.

The purpose of the meeting was the first step in forming good relationship with the most important administrative group on campus, according to Mary Sacks, student senator.

"We felt we liked to see a total integration of student minority affairs, student activities and student government," according to Vice-President George Hazo.

It was felt by student government leaders at the meeting that the separation of the various offices tended to make communication somewhat arbitrary.

The idea of a student handbook, written by students for students was also mentioned at the meeting. The handbook would contain student rights, the student body constitution and various programs on campus for students. According to Hazol.

Mary Sacks summed up the meeting by saying, "I was very encouraged by the warm reception we received by the board."

Civil War to be seen

Bicentennial documentary film will be shown in Highline Community College Oct. 27 and Nov. 3.

All of the Bicentennial documentaries will be shown in the Lecture Hall 12 noon and again at 8 p.m.

He's mobile two (too)!

Chuck Rosebeary is a pretty happy fellow these days. He not only is the proud owner of a new battery operated wheelchair, but also has been elected to the office of senator in this Fall's ASHCC election.

Chuck, who is 34 and a Cerebral Palsy victim, has waited many months for his automated wheelchair.

"I feel much more independent now," says Chuck. "With the old manual wheelchair, Chuck relied on friends, aids, or whoever was handy to help him to his destination."

Being "left-footed," Chuck merely flips the switch on the left footrest of his new chair and it responds instantly, carrying him unaided to nearly any place he desires to go.

Chuck feels that his newfound freedom has made him more self-confident.

"I'm able to chase girls better," he laughs.

Chuck said that having an automated wheelchair does have its advantages. On two separate occasions he's had minor accidents. For instance, on Sept. 29, he was maneuvering the ramp on the south end of the Student Center Building when his wheelchair tipped over backward. Luckily, he wasn't hurt and a nearby friend, Debbie Pardy, managed to right the wheelchair (and Chuck).

Also on Oct. 1, as Chuck rounded a corner in the student lounge, he slipped on a bench, knocking off the foot control. The controls were welded back on courtesy of some welding students on campus.

"I was just sick about having knocked the controls off. I thought my chair was ruined."

"You'd be sick, too, if your new $4,000 wheelchair was ruined less than a week and a half after receiving it. Chuck had waited over four months to get such a high-quality chair."

In the Student Programs office defining and outlining Handicapped Programs, "I hope to receive funding at the federal or state level in the form of grants to help finance the program."

Chuck the Student

Chuck heads for class in his new wheelchair, operating it with his left foot. The battery which powers it is situated under the seat. "I feel much more independent with my new chair!" Chuck no longer needs help to get around campus.

story by Mary Sachs

photos by Mark Oswald

Chuck the Director

He spends many hours a day in the Student Programs office defining and outlining Handicapped Programs. "I hope to receive funding at the federal or state level in the form of grants to help finance the program."

Southaven Nursing Home in Burien is Chuck's present residence. He had planned to move January 1, 1976.
Norwegian experience commemorated at U.W.

by Jim Osmondson

Focusing on the "Norwegian experience" in the Pacific Northwest, the University of Washington Scandinavian Department produced a newspaper commemorating pioneers.

"Nordmenn ved Kysten," a special immigration issue, was dedicated to Americans of Norwegian descent and "to those we reach in Norway." 10

Editor of the special paper, Solveig Bower, an HCC instructor, says the paper is "a point of departure in the Norwegian arena and furthering an ethnic heritage that has added culture to our land."

Business department big on campus in evenings

One fifth of HCC's evening students are enrolled in business programs. One of the major reasons for this is the high demand for highly qualified people in business and secretarial fields, according to instructor Robert Hester, chairman of the Business Department.

Instructors teaching their specialized fields consist of regular faculty and specialists in business and industry in the community. Programs in business include: Hospitality Management, Secretarial, Business Administration, Marketing and Selling, Office Occupations, Real Estate, Small Business and Accounting.

Activities underway for most minority clubs

The minority clubs on campus meet regularly, and in general are composed of students interested in the study of different cultures for upcoming projects.

The Minority Student Union met Oct. 8, but due to sparse turnout resulting from scheduling conflicts, the official election of officers was postponed so that more members would participate. Melanie Johnson was unanimously selected to serve as president pro tem.

The members in attendance then focused their attention on prospective club projects for the year ahead. A wide spectrum of ideas was put forward, ranging from fund-raising projects to charitable activities within the community.

Black students wishing to become involved in the Black Student Union as well as minority club members may check with Brenda Edwards or Lee Piper in the Minority Affairs office to find out the time and location of the next meeting.

The Indian Student Association (ISA) held their first meeting of the year on Oct. 13. The main order of business was the election of officers. Elected were Mary Ann McGregor, president; and Chrissie Wright, co-chairperson; Debbie Wright, secretary; and Rosemary Edwards, treasurer. Candy Shoppel was elected to the ISA club representative to the ASB.

The Minority Club, an officially sanctioned club, is composed of all the minority students on campus, and was recently and officially elected its officers. Newly elected co-chairperson, Candy Shoppel; co-chairperson, Betty Brown; secretary, and Betty Brown, co-founder, and John Moore, club representative to the ASB.

The next meeting of the Minority Club is tentatively scheduled for Oct. 27. Information regarding the time and place is available in the Minority Affairs office, located in the north end of the Student Center.

Meet Jim...

by Mark Held

Believe me, this guy is really "deep." Jim was designed for use in the oil industry with the major purpose of saving time. Unlike conventional scuba gear, Jim's air supply is a closed circuit rebreathing system and no tanks are needed. It is designed so the pressure is that of a full foot depth so that the diver can work deeper. Company tests have certified Jim to 1,000 feet while Duke University tests at 2,000 feet have been successful.

Conventional equipment on the other hand has limits. Only certain depths can be reached and saturation is a common everyday problem.

EUROPE CALLS...Robert Williamson visited the mechanical deep sea divers in hopes of bringing it back to Highline.

Perry Williams and Maurice Talbot are co-instructors of HCC's Diving Technician Training program. Classes are held at Redondo Beach where HCC recently constructed a new dock.

The two year program qualifies graduates to assist engineers in the scuba diving field. Forty-eightfreshmen and thirty-five sophomores are enrolled this quarter.

Robert Williamson is a second year student in the program. He is also the deck's technician in charge of Jim equipment. Williamson described Jim's features and explained the advantages of this suit over a conventional one.

"Jim is composed of magnesium, aluminum and some stainless steel. It takes twenty hours of instruction before a diver is qualified to operate the suit," he said.

A crate is needed to lift Jim off the dock into water. Once under, the suit weighs around 14 pounds on land and is quite mobile.

"Whatever man can do on land you can do in the water with this thing," he can roll and tie knots and run around," Williamson added. "The only problem is the suit is not made for use in the oil industry with the major purpose of saving time. Unlike conventional scuba gear, Jim's air supply is a closed circuit rebreathing system and no tanks are needed. It is designed so the pressure is that of a full foot depth so that the diver can work deeper. Company tests have certified Jim to 1,000 feet while Duke University tests at 2,000 feet have been successful.

Conventional equipment on the other hand has limits. Only certain depths can be reached and saturation is a common everyday problem."

Meet Jim, a new 900-pound suit manufactured by D.H.B. Manufacturing of Haughton England. Last Summer, instructor Peter Williams and
Japanese language: New course receives positive student response

Ephraim Ga-Tolentino's Japanese language class, a first this quarter at HCC, has had enthusiastic student response. Lonny Kanzaki, humanities chairperson said. In Japanese 101, taught this quarter, Ga-Tolentino will stress simple conversation, grammar and pronunciation, he said. In Japanese 103, he will work on the introduction of conversational skills and grammatical structure with the introduction of simple writing known as the "kana."

Japanese 103, in addition to conversation, grammar and "Kana," will include a few characters known as "kanji." Ga-Tolentino is Eusebian. He spent several years with his Japanese grandparents right after World War II, he said. He took his instruction in Japanese teaching at the University of Washington.

Next Summer and Fall he hopes to travel in Japan; not only to renew his cultural ties with the country and its people, but also to gather educational materials which he and other teachers of Asian courses can use in their classes. Ga-Tolentino is very much interested in the Monjii, Japan's fall festival.

With Japanese now a part of the curriculum, Ga-Tolentino wants to see an integrated full program of studies in which students can specialize and graduate with an AA in Asian studies.

"We have for several years offered Asian history, political science and business courses; and I hope that very soon we'll be able to offer Asian literature and humanities. A core program of Asian will be a good addition to our areas of specialization at HCC," he said.

New registration system to begin this Winter

A new registration system will begin this Winter at HCC, according to Edward Olney, director of the Educational Data Center. This system will not affect students, but will greatly change the Data Processing system.

The system, Computer Co-operative, will be located at the Central Administration Office at Seattle Community College. Computer Co-operative will be a common system, which will handle registration and accounting for most community colleges in the Puget Sound area.

The organization Computers Co-operative will improve the accountability of the college to the legislators and citizens of Washington, state accountants say. In addition to this, it will cost the state less money.

The change will give HCC an opportunity to improve their instructional purpose because the computer will be more accessible to the students.

"Computer Co-operative will do a better job with resources available compared to each individual institution doing it their own way," Olney said.

Expert will discuss November ballot issues

William L. Massey, executive director of the Municipal League of Seattle and King County, will appear in the Lecture Hall on Tuesday, Oct. 28, to discuss important issues on the election ballot for Tuesday, Nov. 4.

Massey is a leading authority on state and local government problems and will appear under the sponsorship of Dr. Henry Perry's classes in State and Local Government.

"Do you plan to vote in the November election?" Dr. Perry asks. "If so, how well informed are you on such issues as the following?"

Capital punishment; the 12 per cent state corporate profits to assist school funding; the state constitution to reorganize the court system; amending the constitution to allow state assistance to private and public schools; a new Seattle city charter; a modified bond issue to provide new facilities for the Seattle Center; a new method to determine pay of state legislators and a new method for determining King County council district boundaries.

Massey will examine the pros and cons on these issues, indicate the Municipal League position on each issue (where a position has been taken) and then answer questions from the audience. He will also be available afterward to answer individual questions.

"If you do not plan to vote, be sure you do not complain about the manner in which your government is run," Perry adds.
Sam comes back to read

HCC has had a number of guests who have returned to the Lecture Hall to read rather than listen—on Nov. 5, Samuel Green will come. Sam left the HCC campus in 1967 and received his MA from the University of Washington State College, where he received his BA with distinction and honors in June of 1967.

His major was English Literature. He went on to get his MA and has now advanced to candidacy for his doctorate which he projects for June of 1976.

At Highline he edited the "Genius," and at Western State, "Goethe." He is editing a poetry magazine, "Java." His work has been published by a number of journals and he has done a number of public readings.

The next one will be in the Lecture Hall on the HCC campus at noon on Nov. 5.

Crafts seen at festival

An authentic 'old time' Harvest Festival will be held in Seattle Oct. 1-3. The "Carpenters" won't be the only ones with hammers and a can of varnish. The tricksters who are experts in making butter will be shown, as well as making "apple squashings," or cider. Old time food will be on sale.

Dotty Harper, president of the Burien Bicentennial Committee, advised that the Harvest Festival is a memorial event this year. It will be held at the Burien Liberation Hall, 10th & Pacific, and the nearby Pine Arts Gallery Burien Park.

Biennial train coming

The Freedom Train, bringing 25 cars of artifacts gleaned from 200 years of American history, will roll into Seattle's King Street station Oct. 1 for a nine day stay.

The train will be open for viewing from 8 a.m. to 10 p.m. Tickets are $2 for adults and $1 for children, 12 and senior citizens 65 and older. Tickets are available for children under three. Tickets may be purchased in advance at Pay 'n Save and local grocery stores in the area.

Thomas Jefferson gives interview on campus

by Becky Morris

August, 1776. On the back page of a London newspaper, in a not too prominent place, is the Declaration of Independence, just accepted from the Colonies. The paper seems to attach as much importance to the document as it does to the recipes next to it.

Then the English citizens begin to write in their opinions. The verdict? Two out of three are in favor of the colonists.

Richard Wordsworth, Englishman and great-grandson of poet William Wordsworth, presented the above collection of little-known facts at one of three lectures he gave on Oct. 4 and 7. His topics, besides the "British Reaction to July 4, Florida, Mississippi and Georgia," were "Enlightenment and the Age of Reason," "The British Reaction to the American Revolution." In his first presentation, "The Reasons for Tyranny: British reaction to the Declaration of Independence," he read selections from letters to newspapers, showing reactions both for and against the Colonies.

A "British Reaction to July 4, Florida, Mississippi and Georgia"" was a gem of a two-hour lecture. It is a sort of history lesson in British reaction to the American Revolution.

Selections were read from letters to newspapers, showing reactions both for and against the Colonies.

After his engagement and reading in Colby, he was scheduled to go to the U.S. sponsored by Phi Beta Kappa, the two year college national honor society. After his engagement and reading in Colby, he was scheduled to go to the U.S. sponsored by Phi Beta Kappa, the two year college national honor society.

As anyone who has ever come in contact with a rock writer knows, we all know that the average rock writer would give his left ear to be on a stage for even two minutes before the screaming multitudes.

Bearing this in mind, La Belle concert, Oct. 3 at the Paramount Northwest was a unique experience for this writer. But more on that later...

La Belle themselves are one of the most dynamic live acts in the world. From the moment Nona Hendryx, Sarah Dash and Patti La Belle walk on stage in their outrageous glitter and feather get ups, they just plain radiate energy. Backed by a five piece band, La Belle rump through a stunning two and a half hour set which focused mostly on their new "Phoenix" album.

The thing that makes La Belle unique is not just their stage costumes or the fact they are all three great singers, but the individual personalities they radiate on stage. Nona is Queen Bitch, a soft, almost untouchable voice, yes she's leaving.

... The hot dynamic style in which Labelle captivates the entire crowd at their concerts.

The preceding night Frank Zappa returned to the Paramount with his latest band of Mothers besides two sold out crowds, which was usual came expecting a different Zappa than they got. Although Zappa's latest vocalist, Napoleon Murphy Brock, is an absolute riot to watch, Zappa has for the most part abandoned the gross humor which has been his trademark for years. In its place is some of the best music Zappa has done in years, with songs such as "The Motor City" and "A Filly of a". And during Zappa's show, which was typically obvious...
T-birds host invitational

T-birds Cross Country Invitational Meet tomorrow, Oct. 25 at 12:00 noon. Alcluding Shoreline, Bellevue, Everett, Edmonds, Green River, Highline's wooded, hilly course that measures 1.1 miles in length, which will be necessary to fill out the roster to in present number. An afternoon schedule is planned because of the in- crease of noon classes.

The Seattle Sonics quietly changed their ticket pricing policy for this coming season, with the college student sadly tossed aside. Up to the approaching 1975-76 NBA season, the Sonics had given a half-price discount to all students with a student body card. This meant that students, of any age, were eligible to attend Sonic games at a special rate. This year, Coach Russell's troupe will only be giving the discount to kids 16 and under.

The Sonics change prices, force students away

Highline's last appearance was held on Idaho's home golf course. The T-birds were in a close battle with Spokane C.C. and Idaho's junior varsity throughout the entire meet. At the end of the fourth race the final score showed the University of Idaho JV's and Spokane C.C. tied for first place with 27 points each.

Harriers win big on road

by Bill Smith

The Highline Cross Country team captured first place in the Oregon State University Invitational meet, Oct. 4, at Avery Park in Corvallis, Oregon.

Eleven community colleges and over 100 athletes competed on the wet and muddy four-mile course. Each team entered seven runners with only the first five finishers counting in the team scoring.

Highline placed three runners in the top ten spots and five in the first 14 places. Karl Goetzinger finished a very strong second place in the time of 20:25.

Next came T-bird Rick Adams who took fourth position in 20:28. Steve Stagesberg raced to an eighth place finish of 20:36, while Bob Pierce hit the finish line at 20:44 which was good for thirteenth place.

Highline's head coach Don McConnaughey grabbed the fourteenth position in the very respectable time of 20:46.

The T-birds topped the field with 30 points, while their closest contender, Clackamas C.C., came in second with 56 points.

Coach Don McConnaughey was very pleased with Highline's performance and pointed out that the key factor in the meet was the overall consistency of the team time wise. As all five of Highline's runners finished within a 20 second span of each other.

The T-birds traveled west a week later to Moscow, Idaho to compete in the University of Idaho Invitational, which was held on Idaho's home golf course.

Outstanding individual performances were turned in again by Highline's Goetzinger and Steve Stagesberg, they placed fourth and sixth in race number four. Goetzinger covered the 1.0 mile course in 21:38 while Stagesberg crossed the finish line at the 21:39 mark.

The T-birds were in a close battle with Spokane C.C. and Idaho's junior varsity throughout the entire meet. At the end of the fourth race the final score showed the University of Idaho JV's and Spokane C.C. tied for first place with 27 points each.

Sonics change prices, force students away

The Seattle Sonics quietly changed their ticket pricing policy for this coming season, with the college student Sadly tossed aside.

According to the Sonics, student identification cards were required. As one student put it, "At $1.11, those seats were GREAT! Too bad that we as students will have to suffer the $2.50 fare." Students feel that this is not fair to them. As one student put it, "At $1.35, those seats were GREAT... at $3.35, you're just fair."

Football off the ground

HCC's six team intramural flag football league began play this week. Lack of participation delayed the start of the season and a deadline extension was necessary to fill the roster to 10 present number.

An afternoon schedule is planned because of the increase of noon classes. Games can take place on a more or less weekly basis.

Sports

T-birds host invitational

by Bob Nitz

I am probably in the minority, but whenever the issue of "whether Seattle will ever get a "big league" baseball team" comes up, I am one of the few who hopes it never gets one.

I would have been happy if the Pilots had never been here and we still had the Pacific Coast League team here.

As far as I am concerned, big league sports is nothing but a problem. It seems like players up in the big leagues are always complaining about their pay, their coaches or some idiotic thing. Rarely do you hear a minor league player with such complaints.

I also feel the competition between players in the minor leagues is more fierce, because they have to get into the majors. Once a player is in the major league, he doesn't have to work as hard to stay there as he does to get there. So I think minor league baseball is more interesting to watch.

This year, Coach Russell's troupe will only be giving the discount to kids 16 and under.

This new ticket policy has already drawn much criticism from high school and college age students, who cannot afford to attend Sonic games at the full, regular price.

"The Sonics were getting ripped off pretty bad last year," commented a spokesman for the Sonics public relations department. "So, to remedy the situation, they (the Sonics) decided to limit it to students 16 and under."

According to the Sonics, student identification cards were really missed last year, allowing many people who were not students the half-price privilege. It is too bad that as students will have to suffer the consequences. As one student put it, "At $1.35, those seats were GREAT... at $3.35, they're just fair."

Alice doesn’t what? Well, according to NOW, (National Organization for Women), on Oct. 29 America’s Alones don’t — go to work, do housekeeping, laundry, cook, change diapers, chauffeur kids, or strike.

Who is Alice? Every woman in America is an Alice. According to Cindy Clark of NOW, as quoted from United Press International, "We are teaching every woman in the United States. We want them to know that they can support the system — that women provide 51 percent of the support."

The idea originated from the theme of the current move, "Alice Doesn't Live Here Anymore."

The strike organizers are asking women not to go to work Oct. 29. If they do not fear losing their jobs, Ms. Clark says, "If they have to work, we will have buttons and arm bands for them to wear."

NOW says that quite often people are reluctant to support an effort termed "striking," saying that a strike is too militant, radical, or feminine. Then when people see what the Alice Doesn’t strike day is about, they will, at least, change their attitude to one of questioning interest.

Locally, it seems as though women realize anything that will detract from the positive aspects of the women’s movement will not be accepted by women. Women would realize that there will be no women on Oct. 29 and wish to take advantage of this opportunity to discuss the contributions to society and responsibilities that women have made.

Joy Barrera, co-president of the Federal Way-Auburn chapter of NOW says that she is concerned that some men and women have natural hostilities toward militant actions. She says that she is concerned with the feelings of men and more conservative women with whom she also try to relate.

Ms. Barrera stated, "The idea arose for a vivid nationwide reminder of contributions taken for granted. Pull the plug Day. Women are in many ways making a statement. While some refuse to go to work, those who go might meet with management as a group to set timetables for affirmative action and state their grievances as women. Women are asked to call in at least one of their family members reiterating the positive message of the support for NOW." Most women will realize that there will be a considerable amount of women’s movement on Oct. 29 to recognize and arm bands for them."

The Women’s Program Advisory Lunch was for all students and community members to be held on the Highline Women’s Program.

Betty Colasurdo, the coordinator of the Women’s Program said that women at Highline will only get what they have if they demand something in terms of course offerings, services and affirmative action.

Many women would like to have a center on campus as a meeting place. It would be meaningful to them, she says, as a place to communicate and socialize.

One student said that she believes that Alisons, as a liberated woman is to have her entire family know how to take over if she’s in the household. Her husband would do the cooking while she’s absent. She would like to take classes in home repairs and auto maintenance.

"It is my goal to be independent, but we also allow in the family members to work together."

Fall shows total increase; more women this year.

An increase of 819 students over the same eight day of last fall is evident in the enrollment statistics released by Booker T. Watt, registrar. The total headcount is 8,276 with more women students than men.

The college is funded on full time equivalent students (15 hours). The increase in this area is 5,787 over 4,737. The occupational PFT’s are 300 below the academic PFT’s.

Age range from 18 (207 students) to 60 years and over. The normal transfer age from high school is 18 or 19 years of age. There are 2,053 in this category.

Those from 20 to 24 years are 1,759; ages 25 to 29, 1,327; from 30 to 34, 1,353; from 35 to 39, 1,325; from 40 to 49 years of age, 948; from 50 to 59 years of age, 580; and 60 and over, 67. There were 486 women students who are not to indicate their age. Summer of 1973 also showed an increase in Summer of 1974, 2,223 over 1,903.

A relatively new statistic is in reference to senior citizens.

The Senior Citizens Tuition Waiver program offers them classes at a cost of $3.50 per credit hour. There are 17 senior citizens in the program.

In regard to credit hours, students are taking loading ranging from one to 20 (those over 18 require special permission). Some of these loads are augmented with non-credit classes.

Among the “favorite” loads are: five (768 students); 15 (752 students); three (412 students); 12 (465 students); four (412 students). There are 237 people taking credit or more.

Tom Holmes

The appointment of Brian Holmes as Behavioral Science Division Chair was approved by the HCC Board of Trustees last week.

Holmes will serve a three year term.

Health is a ‘mîni’ problem.

Alcoholism as a treatable illness, family planning, and belief that self-examination is important in health and tips and subjects available through the Nov. 4, Mini Health Fair on campus.

The entire HCC-community is welcome to take part in this fair. Mary Frances Eckert, counselor said.

Alcoholism as a treatable illness will be discussed by Ms. Mary Mueller, psychologist, from the Southwest Community Alcohol Center.

Ms. Madden and Ms. Mueller will be in a booth at the Student Center from 9 a.m. till 3 p.m.

Part of their organization's philosophy is that the alcoholic is not readily identifiable. "Did you know," she says, "that in any image of a typical alcoholic, all you have to do is look in a mirror?"

Fall health fair will be available by appointment from the Health Center, Sono 111 (Bldg. 10) to make an appointment on self-examination also be presented.

Free eye and dental examinations will be offered by Henry Zegula, DDS, and Dr. David Boza, optometrist, of Federal Way, who have participated in previous HCC Mini Health Fairs.

The object of health fairs is to allow persons free tips to keep abreast of health problems, Mrs. Eckert said.

"What is else important except our physical well-being?"

She leads a weight control class with this focus in mind. "Just around the corner are the best years of your life," she says, and probably more of those best years too, if you join our weight control workshop."

Workshops are held weekly in Wayah 109 — at 11 a.m. on Thursdays.

Mrs. Eckert serves on the steering committee of the American College Health Association, watchdogs for all national programs involved with student health.

For information on Mini Health Fair activities or weight control sessions, she can be contacted at the Health Center or phoned on extension 250.

New course offered

Anatomy and Physical Therapy, a new course at Highline, will be offered Winter Quarter for the first time.

This course will be on the 200 level, and is designed to be the equivalent of a sophomore biology class at a four year institution.

According to Robert Wright, director of the Natural Science Department here, there will be no fees for transfers for credit Biology majors who complete this class, a development that unfortunately occurs in some of the lower level classes.

By Robert Wright
Famous journalist brings world news to HCC

John Scott, vice-president of Radio Liberty, returns to the campus. Reporter to the 1960s, Scott is a member of the National Academy of Journalism and winner of the Pulitzer Prize for spot news reporting; he is also a Fellow at Pencils of Promise.

He will talk about his global assignments and his latest book, "Focus on the World." His talk will be a centerpiece for the College Thursday, Nov. 6, to celebrate the 101st birthday of the University of Washington.
