Administrators fight to keep library

In Olympia

Administrators fight to keep library

As part of the budget, the legislature approved the construction of a new six-story library at Highline Community College (HCC). The new library is expected to be completed in 1978 and will provide much-needed space for students and faculty. The new library will be a significant improvement over the current library, which is small and overcrowded.

The new library will include a variety of features, including a large reading room, study areas, and a computer lab. It will also have a modern design that is intended to provide a comfortable and inviting atmosphere for students.

However, the construction of the new library is not without its challenges. The cost of the project is estimated to be $5,213,674, and there is concern about whether the legislature will provide enough funding to complete the project.

In response to these concerns, the administrators of HCC have been working to secure additional funding. They have reached out to local businesses and organizations to solicit donations, and they are also exploring options for state and federal funding.

In addition to the new library, the budget includes funding for a number of other projects at HCC. These include:

- A $1,162,040 project to remodel the existing library and add heating, ventilation, and air conditioning.
- A $512,179 project to build a new two-story library.
- A $511,270 project to build a new two-story student services center.
- A $450,000 project to build a new high school.
- A $300,000 project to build a new middle school.

The budget also includes funding for a number of other projects, such as the construction of a new gymnasium and the renovation of a number of existing buildings.

Legislative bills

Students will feel impact if enacted

Several bills have been introduced in the legislature that could have a significant impact on students at HCC. These include:

- A bill that would increase tuition by 5%.
- A bill that would eliminate financial aid for low-income students.
- A bill that would require students to work a minimum number of hours per week.

If these bills are enacted, they could have a significant impact on students at HCC, who already face many challenges.

Students and faculty are urging legislators to consider the impact of these bills and to find alternatives that do not place an undue burden on students.

In addition to these bills, the legislature is also considering a number of other proposals, such as the creation of a new community college district and the expansion of the community college system.

4-year Students can map transfer

Many students at HCC are interested in transferring to a four-year institution to complete their degree. To help students with this process, the college offers a transfer planning service.

The service includes a transfer planning tool that allows students to map their coursework and see how it will transfer to a four-year institution. The tool can be accessed online, and it provides information about the transfer process at a variety of schools.

With the assistance of the transfer planning tool, students can map their coursework and see how it will transfer to a four-year institution. This can help them make informed decisions about their educational path and ensure that they are on track to meet their academic goals.
Bonzo goes bonzai
by Greg Bennett

Isn't it a shame that until after the Republican National Convention is held this summer, no one will be able to enjoy watching the touching movie, "Bedtime For Bonzo." "Bedtime" and other classics on the same high level of popularity and ingenuity are currently banned from television because Ronald Reagan, the Republican candidate, appears in them. Reagan is, of course, seeking the nomination on the Republican ticket (of course, one of the states is the United States.

The one-time matinee idol appeared in scores of films and the television series "Death Valley Days," which now cannot be shown because of the equal time law. Should Reagan's movies or shows be shown on the tube, President Gerald Ford and other hopeful candidates could be screaming "bloody murder" for equal time.

This is totally ridiculous! Although Reagan's mug appears on the screen, he's not saying anything political (did you ever hear Bonzo pick apart the state of the Union address?).

I would think the President would be delighted to have local television stations screen Reagan's old movies. If you've ever seen Ronald in "Bonzo Goes To College," you'll know just what I mean. In other words Reagan wouldn't be able to act his way into the presidency. Come to think of it, Ford really is an "acting" President. Let's bring back "The Klute Rockne Story," and all the unforgivable Reagan motion pictures as a means of promotion of business.

If Reagan's quest for the nomination of his party begins to die, he could always go back to "Death Valley Days." On the other hand, Ronald could have all the Ford Motor Company commercials taken off television.

In the last paragraph he proceeds to speak for all high-line College students, (this is a neat trick, I wonder if he also knows all the 3,000 students at the University of Cincinnati and he wants the issue brought to the attention of the Student Government. Well, Mr. Salter, I can safely say that we hear you, and would like to extend a personal invitation to you to grace the office of the Student Programming Board, and say anything you wish."

Word staff to grace the office of Student Programming Board so that you might be better informed of current events, not just in the campus. It would be very nice to have you say anything you wish- any complaints, from low-line students, (this is a neat trick, I wonder if he also knows all the 12,000 students who attend the University)."

It is strange that Bryan Gerard, ASBNC Student Senator

Schorr shouldn't have...
by Larry Russell

Several weeks ago, CBS news correspondent Daniel Schorr released a secret report on the CIA with the title "Operation Chaos: How the CIA Manipulated Public Opinion." The report aired and quickly became a cause celebre among the American public. The story of how the CIA had engaged in a secret campaign to discredit the anti-war movement and to create a climate of fear and distrust among the public was an explosive revelation. The report generated a great deal of discussion and debate about the role of the media in holding government accountable and the implications of CIA interference in public opinion.

Decriminalization of pot
by Cody Bryan

What do the American Bar Association, the American Medical Association, the National Council of Churches, the National Advisory Commission on Criminal Justice Standards and Goals, the Governing Board of the American Medical Association, the National Education Association, B'nai B'rith, the San Francisco Committee on Crime, the Mayor's Advisory Committee on Narcotics Addiction in Washington, D.C., the American Academy of Pediatrics, the Bar Associations of Illinois, Massachusetts, New York, Washington, and Vermont have in common? They have all endorsed the idea of marijuana decriminalization.

Five separate state legislatures have endorsed the idea of marijuana decriminalization. These legislatures are following independent studies made by each of the legislatures that endorsed decriminalization.

What all this means is that a lot of professional organizations, as well as religious and political groups, are calling for changes in the marijuana laws as they are presently written in most states.

According to the latest Louis Harris Survey on the legalization of marijuana, a majority of people interviewed are opposed to decriminalization of marijuana, but the number of people favoring decriminalization has grown in the last year or so.

This means that there is a change in the public's attitude toward the danger of smoking marijuana in the last 10 years that will probably continue in the next few years as well.

In our state legislature there are presently two bills calling for decriminalization of marijuana in this state. These bills are House Bill 689 and Senate Bill 291. Each bill would make it a misdemeanor to possess 250 grams or less of marijuana by an individual for his or her own personal use. Everything over 250 grams would not be considered for personal use. Another provision would make distribution of 20 grams or less for no remuneration or possession of 46 grams or less of marijuana to be punishable by a fine not to exceed $50.

It is time for people to support legislation of this type as a start toward a more sane view of drug use in our society. Anyone interested in supporting the passage of the two bills is urged to contact the legislative offices of Representative Larry Russell, 820-335-0000, or to let their representatives know how they feel.

Register Early
Due to limited space, Continuing Education evening students are being cautioned to register early for Spring Quarter.

Registration for Spring Quarter will start March 1. Evening students are urged to sign up early in order to secure themselves a place.
The energy race is on

by Bill Kelly

Today there is more interest in energy than there ever was before. As fossil fuels become more scarce, scientists are developing other energy sources. Millions of dollars are being poured into research, and it is paying off in break-throughs in nuclear power, solar energy and wind powered generators.

Nuclear generated electricity remains clouded by questions. Scientists are still trying to build a nuclear reactor that will produce more fuel than it uses. United States and Soviet scientists are working to develop such a device. If it works it would be a major power source.

Conventional power could provide a lot more energy than it does now. By burning subterranean heat to produce steam, New Zealand gets eight per cent of its electricity. Our government is not doing enough to develop such energy sources.

Wind power could eventually provide five to 10 per cent of our electricity, according to the Space Agency, which is working on better wind generators. Wind power can be used to break water down into oxygen and a clean-burning fuel—hydrogen.

If costs of building solar cells can be greatly reduced, which is happening, solar power could provide a pollution free energy source. Some scientists have suggested assembling large solar panels in stationary orbits and beaming the energy to ground stations as microwave, for affordable, permanent electricity.

Coal is presently used in some places to generate electricity. Our country has plenty of coal—but what are the environmental costs of mining it? And what would the costs to consumers be?

It's a step backward to rely more on coal. We can be self-sufficient without it.

State tuition waiver program

The following is a list of state tuition waiver programs for Washington college students. Eligible students should contact the college financial aid office before coming to Building 21a.

(1) Three Per cent Waiver Program

Provides that institutions may waive tuition, operating and service fees for needy and disadvantaged Washington residents and that the total amount of all such waivers shall not exceed 3% of total-collectives exclusive of the added amounts paid by nonresidents.

High School Completion

Allows community colleges to waive tuition, operating and service fees for such children as the age of 16 years, initiated in 1973.

(4) Children of Deceased or Totally Incapacitated Veterans

Provides that no tuition shall be charged to such children when certified by the Council for Post-Secondary Education. The program began in 1957 and is still in operation.

(5) Children of POWs or MIAs

Provides that no tuition shall be charged to children of persons who were classified as a prisoner of war or were missing in action in Southeast Asia after 1961.

(6) Veterans Who Have Experienced Certain Service

Provides that veterans who have served on active duty for a sufficient period of time during any war shall be exempted from tuition in the State of Washington.

(7) Waivers of Nonresident Fees

Certain classes of people are entitled to this waiver by classification as residents for fee purposes.

A. Any person who is employed not less than 20 hours per week at an institution and the children and spouses of such persons.

B. Military personnel and federal employees residing or stationed in the State of Washington, and the children and spouses of such military personnel.

(8) Veteran's Furlough Benefits

A. Veteran's furlough benefits in the State of Washington so long as such veteran is receiving federal educational benefits.

(9) Benefits of Student Body

By virtue of their military service.

Students! Push evaluation

by Jackie Kroeppe

Progress stems from change. Yet not all change produces progress. Change can be initiated in the interest of progress when its source is a group of students by careful evaluation of past and present events and circumstances.

Concerned students, faculty and administration might achieve progress toward higher quality course offerings and better student-faculty relations through a more comprehensive faculty evaluation program.

According to Dr. Shirley Gordon, vice president of BCC, "There is no policy at Highline which calls for teacher evaluation by students on a regular basis, however, the college does encourage the use of evaluation methods by all instructors. A more comprehensive program is only fair to both student and teacher. It is unfair to an instructor to have his or her professional reputation built on unverified heat of student frustration and rumor. Honest and open criticism is a release for this pressure.

Education is not something done to a student by an institution. Students participate in their education planning process. They are d ubbed apathetic. Evaluation of faculty and courses gives every student the direct opportunity to participate.

Communication must be two-way or it is not at all. Evaluation should be a learning process for teacher and student. Such a program must deal with differences in a fair, objective and mature atmosphere. This should build a climate of trust and professionalism within the institution.

Progress can be achieved toward upgrading courses. Faculty and administration concerned could recognize the need for changes. They could also learn what successful aspects of a course to expand on. Evaluation should routinely eliminate dead weight in a course—and not pick it up around for ages to come.

Faculty and course evaluation should be for the sole purpose of improving the course content and the teacher's ability and effectiveness without the restrictive elements of tenure, salary, and promotion considerations included. In spite of changes in a course year after year.

"Student evaluation must also be used by instructors according to the present salary appraisal for movement on the salary schedule."

This policy might inhibit students in their evaluation. A student may feel that he is "hanging" a teacher with a negative evaluation. Whereas, if his/ her or her comments had no influence on a teacher's professional affairs, the instructor would be more likely to get the necessary remarks needed to "clean up his or her act."

This is not to say that student input must not be a part of faculty and college policy decisions, as students should always participate in the planning of their education.

This matter is the responsibility of both students as well as faculty and administration. Although this is the responsibility of all students, student government should be the vehicle for action as they are the collective representation of the entire student body.

To be effective, the method chosen for an evaluation policy must ensure students that an instructor would have access to their comments only after grades have been turned in. Also, the content of the evaluation would be critical to be of greatest value. To begin formulating an evaluation system, thorough researching and sampling of other college evaluation system policies should occur.

Although various instructors and divisions have their own evaluation methods, this matter is too important to the welfare of the college to be hit-or-miss policy.

Homes for young

The Federal Way Youth Service Bureau is looking for more people to become foster parents for teen-agers. People are needed for both the long and short term programs. The foster parent receives $150 per month to help with the cost of the children. Single people, single parent families and young couples are urged to apply.

There is a great need for more foster parents. "These kids have had rough some lives, and some have run away," said Janet Hesse, spokeswoman for the bureau.

Mr. Hesse will be a booth in the Student Lounge to speak to those who are interested in becoming foster parents Tuesday and Wednesday, March 2-3, from 2 to 7 p.m. She can also be reached at 636-8130.
Native style displayed

Minority students from Highline College participated in the International Fashion Show Friday, Feb. 20, on campus. Lee Piper, director of minority affairs, was the master of ceremonies for the 6 p.m. program.

The students modeled attire from their native countries ranging from traditional to more contemporary styles. China, Japan, Thailand, the Philippines, Africa, and Native America were a few of the countries that were represented.

Chief Antelope wore his Grass Dance attire, designed and created by students. The outfit modeled was a contemporary Native American ensemble, a man’s robe from Japan and a sari from India.

The models were accompanied by music as they displayed their native dress.

Class harmonizes Vets

The circle-situated class how he was "pushed into school" by his wife. He took the course, "to get the needed amount of credits to be a full-time student. But I've benefited more from this course than any of my others. In the service I was kind of secluded but here I've learned a great deal.

The Veteran's Readjustment Seminar will be offered during the day next quarter.

CIP needs volunteers

The Community Involvement Program (CIP) has a special need for volunteers to work with youth. The Department of Juvenile Services is looking for men who work with boys who are on probation. These boys are located in various areas of King County and need attention on a one-to-one basis.

The Puget Sound YMCA needs tutors to work with fifth, sixth and seventh grade children in the White Center area. Their aim is to work with children to bring up their overall grade point averages.

College credit is available through the CIP office. For further information contact Judy Bonson or Judy Walker in the CIP office located in Building 8, room 210. Office hours are Monday through Thursday, 9 a.m. to 3 p.m., and Friday, 11 a.m. to 3 p.m.

Research aided by night class

"Effective Use of the Library" (Library 100) will be offered Thursday evenings from 7 to 10 p.m. by Linda Melvin whose regular job has been at the Seattle Public Library for 20 years.

The course is in answer to former Highline graduates who recommended it as a valuable aid in higher education, in community college classes and in general life. It covers principal books that give information about "Who? When? Where?" It covers periodical indexes to help locate magazine articles in the 300 magazines currently available in the HCC library.

Bees are back!

The evening course, "Beekeeping for the Hobbyist," will be offered again this year. Roy Thurber, retired bee inspector, will be teaching the course. The class will begin March 21 and continues through April 19, Spring Quarter.

Founder of NORML to visit

by Cody Bryan

The founder and Executive Director of the National Organization for the Reform of Marijuana Laws, Keith Stroup, will be making an all-night visit to Highline College campus Monday, March 21.

Stroup will begin his visit Thursday night with a one hour rap session in building 21, room 206, at 10 p.m. Everyone is invited to attend. After the rap session, Group will be speaking to classes until noon.

"Marijuana: The New Prohibition," will be the topic of discussion in the Lecture Hall at noon. Stroup will be showing some slides and then will be available to answer anyone's questions.

An evening panel discussion which will deal with the right to use marijuana is scheduled for 7:30 p.m. in the Lecture Hall. Group will then panel along with the Mirrak Roy of the HCC Anthropology Department and Valentine Stroup, coordinator of the program.

NORML is one of a few organizations that are lobbying for marijuana personal use. Some other organizations that are lobbying for marijuana reform are the Marijuana Reform League based in California, Playboy Enterprises and High Times, a magazine that emphasizes drug education and use.

NORML is a non-profit, public interest lobby seeking a non-criminal response in the private use of marijuana, and fully supports a policy of discouragement for all recreational drug use, including alcohol and tobacco.

Civil War focus in history class

A bicentennial feature, a four-part series of lectures will be presented in a history class beginning this Friday, Feb. 26. The first lecture, "The Early Days of the House," will be presented by a former history teacher at Highline College and the history staff spring
Open house

‘Star’ attracts young and old

Story by Jerry Fritzmann

Photos by Larry Steagall

A crowd of approximately 2,000 people insured the success of Highline Community College’s Open House held on Sunday, Feb. 22.

As expected, the “star” of the Open House was the new occupational complex which generated most of the attention from visitors.

The assistant dean of Occupational Programs indicated that quite a few people were excited about the facilities in the new occupational buildings.

“People are really committed to the new programs,” Beardemphl said. “They seemed excited about the modern facilities.”

The visitors to campus ranged from toddlers brought by their parents to senior citizens checking out the facilities for a possible return to the academic scene.

Mrs. Walter Plumb of Seattle stated that she hadn’t seen the inside of a classroom in over 40 years, but said that “I just might decide to start college after seeing those beautiful facilities. I really didn’t think that education had come this far.”

When a young pre-schooler was asked if he would consider attending HCC when he got older, he replied, “No, I’m going to quit as soon as my mom lets me.”

Despite the youngsters reluctance, his mother was enthusiastic. “The feeling of the college makes it more attractive to the older student who starts college after an extended absence from school.”

The administration of Justice area in Building 23 was among the most popular of the exhibits. People who visited this area saw the new courtroom and the different types of identification procedures such as footprints, fingerprints and mug shots.

Several of the younger visitors were photographed and given their “mugs” as souvenirs.

McNulty, head of the Administration of Justice Program, was enthusiastic about the Open House. “I think this is a good way for people to see what’s going on on campus,” McNulty stated.

“We had good reactions from people who were serious about coming to Highline and enrolling in our programs.”

McNulty added that he would have liked to have seen more high school seniors at the Open House. “This is a good time of year to contact prospective Highline students and show them our programs.”

Other popular areas during the Open House were the new auditorium that seats 275 people and extends from the second floor to the third floor in Building 26; the graphics area adjoining the gallery of the auditorium where visitors saw how the Thunder Word and the new Night Light are produced; the Automotive Services Lab that can handle eight cars; the Sports Vehicle Mechanic Program where students learn to repair motorcycles, motor-bikes, Sonics on local television, and show them our programs.

DENTAL ASSISTANT PROGRAM...A popular area was the Dental Clinic and Laboratory on the second floor of Building 26. Comfortable and colorful vinyl upholstered chairs for patients highlighted the section. Many visitors inquired about joining the new program.

Business and typing labs with modern equipment were shown from both sides.

In Building 23 the visitors watched the Thunder Word in glass viewing room as toddlers played in the new preschool classroom laboratory. Crowds gathered to see the colorful exhibits in the fashion studio and to note the plans for the March 11 fashion show; women visitors admired the sewing laboratory with its brand new sewing machines.

How to make your last two years of college mean even more...at Seattle University

Take the Army ROTC Two-Year Program.

If you’re just about completed your second year of college, and you’re planning on two more, it’s not too late to take Army ROTC.

You start with six-weeks of Basic Camp (you’ll be paid for it) between your freshman and sophomore year. If you do well in college, you can compete for a scholarship for the fall. Learning how to become an Army officer while you’re working on your college degree. Earning an extra $1,200 a month, up to ten months a year.

And two years later, you’ll graduate with your degree, your commission as an Army officer, and some real experience at leading and managing people.

That means a lot. Take the Army ROTC Two-Year program and you can make them mean a lot more.

Professor of Military Science

Seattle, Washington 98122
Phone 626-5775

Tell me more about the Army ROTC Two-Year Program.

Mr./Ms.
City State Zip

Throughout the campus other activities were held including: a drama rehearsal of “You Can’t Take It With You” which will be presented March 4, 5, 6, 11, 12, 13, 18, 19 and 20; a Vocal Ensemble rehearsal; a “see yourself on TV” exhibit in the library; a continuing education art display in the Student Lounge featuring work of night students and natural science lab tours.

The large number of attendees at the Open House was probably due to the good weather, according to Beardemphl. “Although we were competing with the Sonics on local television, we had more people than we had, hoped for.”
The entering judge took his courtroom audience to rise. Jury on procedures for the day. The scene was the newly finished courtroom in Building 32 where on Feb. 11 mock trials were staged to give real-life experience to SCC Administration of Justice students, police cadets in training at the Seattle Police Academy, and law students at the University of Washington. Former Superior Court Judge Charles S. Smith was slated to preside but chose instead to advise the law students throughout the day-long event. Smith, who is associate dean and professor of law at the U.W., arranged for Joseph Coleman, legal advisor for the Seattle Police Department, to preside as judge. Judge Smith said there are advantages in a moot court setting. "It is an exercise for persons involved in the court system because it gives an accurate idea of what is like before events are put into actual practice...for the police officers and the lawyers, it is a duplication as close as we can get it." "This is an excellent soundCloud by an excellent judge (Coleman). The prosecution and the defense have done a good job of background preparation. The police officers and students have prepared as if under field conditions. Although there is no perfect substitute for real experience, this comes close and when it is as well prepared it is a highly valuable experience."

The simulated cases presented throughout the day were examples of some of the most common violations in the community and showed extensive background preparation by all involved. Careful attention was given by Judge Coleman when instructing the jury composed of SCC justice students, in advising the prosecution and defense attorneys or in admonishing the spectators to remain silent.

The first proceeding, a "Driving While Intoxicated" (DWI) case, was joined into some lengthy discussions of the videotape taken at the scene station after the arrest of the suspect and the competency of the officers in administering the breathalyzer test. Mike Ballard, training officer at the Seattle Police Academy, said, "In regular trials attorneys try to back the officers and witnesses into a hole after a minor mistake is made while testifying."

"It is a good experience when students make mistakes...everybody watching sees them (the mistakes) and learns too. An officer has a great deal of paperwork and it must be properly prepared or it just looks like an officer cut and paste their testimony," Ballard said.

After the first case was declared a mistrial because of a hung jury, Coleman thanked the jury and mentioned that he (Coleman) would have found the defendant guilty if he had not been a jury trial.

Carl Matt lowers, SCC Justice student and member of the jury, felt that if all the jurors could have been present at the beginning of the case, they could have brought back a verdict.

"The experience on the jury was very helpful, it gives me a better understanding during the time we were deliberating."

The ensuing cases — robbery, DWI and burglary — kept the interest of the standing-room only court. In each proceeding the attorneys, officers and justices had done their homework.

Officer Danny Bryant, a cadet at the Seattle Police Academy, explained that the cases developed from the law classes at the Academy where mock scenes were created on the grounds and recruits acted as the arresting officers.

"Because this was my first courtroom appearance and first time on the stand, I learned a great deal from the experience," he said.

Officer Leslie Peters said that it also was her first time on the stand. "It was an excellent experience, I only wish that all the recruits would have had the same opportunity."

Peters will be graduating from the academy in five weeks as one of six women from a class of 27.

Pam Cowan, one of the law students, explained that the video tapes shown at the program which would provide students with the experience of going through a complete trial in court.

"It was a valuable way to learn how to use the cases of evidence," she said.

Ed McNulty, director of the Administration of Justice Program at SCC, coordinated the spring simulated trials. He said it was obvious that the students had learned something shown by all persons involved including it was a success.

The simulated cases were examples of some of the most common violations in the community and showed extensive background preparation by all involved. Careful attention was given by Judge Coleman when instructing the jury composed of SCC justice students, in advising the prosecution and defense attorneys or in admonishing the spectators to remain silent.

The jury, composed of HCC justice students, gets the final details.

The Social Science Division is in the process of experimentation and evaluation.

According to Robin Buchanan, head of the Social Science Division, the Pacific Northwest History course in experimenting with a large group approach to presentations. The group consists of approximately 100 students who will hear lectures and see presentations as one large group but break into smaller working groups for discussions. This enables students to contribute to the course greater flexibility.

There will be a continuing effort to look at the evaluations and upgrade the quarter of the Social Science Division will bring into the curriculum with lecture skills and including discussion classes.

The Social Science Division will offer a new mini-course spring quarter, entitled "The United States Constitution. The instructor will be Davidson Dod. The course will deal with the United States Constitution, the Supreme Court interpretations and its present day influence.

New approach tried...

COMFORT IS HER NAME...A young Ghanaian woman displays a fashionable hairdo and tribal facial markings.

And, as in most of the Ghanaian language is not written down, it is difficult to teach the children except by memorization. Most Ghanaian adults cannot read.
With the nominees having been announced last week, voting currently under way and everyone and his brother predicting their winning choices, the 48th Academy Awards (the coveted Oscars) is nearly upon us again.

Oscar night is slated this year for March 29, and until then no one but a select few from the independent accounting service, which tabulates the votes, will know the foutcomes of the awards for the best this or that of 1975.

Predicting the winners for any award presentation is an impossible feat, particularly for the Academy Awards — for those who are deserving of the award are not always the ones who receive it. Many factors are responsible for this Oscar farce: popularity, advertising, studio affiliate and sentiment — the latter which pops up again this year. (It was Fred Astaire who was the favorite last year).

Since predictions are a difficult task and most are only based on a popular consensus, I will again this year state only those choices I would like to see be presented the Oscar.

FIRST, THIS YEAR'S Oscar nominees:

**BEST ACTOR:** Jack Nicholson — "One Flew Over the Cuckoo's Nest". Al Pacino — "Dog Day Afternoon".

**BEST ACTRESS:** Louise Fletcher — "One Flew Over the Cuckoo's Nest". Anne Bancroft — "The Sunshine Boys".

**BEST DIRECTOR:** Stanley Kubrick — "A Clockwork Orange". Robert Altman — "Nashville" and Miloš Forman — "One Flew Over the Cuckoo's Nest".

**BEST PICTURE:** "One Flew Over the Cuckoo's Nest", "Dog Day Afternoon".

**MY CHOICE TO WIN the Oscar are Jack Nicholson (actor), Louise Fletcher (actress), Burgess Meredith (supporting actor), Sylvia Miles (supporting actress), Miloš Forman (director) and James (Jaws) (pictures)."One Flew Over the Cuckoo's Nest" has picked up a total of new nominations with "Dog Day Afternoon" following a close second with six nominations. "Funny Lady" and "Nashville" each captured five and "Jaws," "The Man Who Would Be King," "The Sunshine Boys" and "Shampoo" each, received four.

For those who have been putting off seeing this year's Oscar nominees, little over a month remains to do so. I'm sure it is going to be one busy month for me!

Grand Funk finally grows up

by Larry Swetnum

Once in a great while Grand Funk makes a listenable album. First, there was "E Pluribus Funk," then came "We're an American Band" and now "Born To Do It" (Capitol).

Among other things, Funk has finally found a suitable producer in Jimmy Ienner. Terry Knight was too much of a capitalist (an ego tripper) while Todd Rundgren only got in the way. One thing that isn't needed is a boogie group playing "Locomotion" with a synthesizer. Grand Funk's sound has become remarkably cleaner now that Ienner is at the controls.

The changes don't stop there. A major breakthrough for this band is the increased consciousness in the lyrics, especially in the melodramatic "Born To Die." "Life is too short now to waste it on a way you were born for it to happen." "I came a capitalist (an ego tripper) was "E Pluribus Funk." "You were born for it to happen. I came to show me some more." "I came to show me some more. I came to show me some more. I came to show me some more. I came to show me some more. I came to show me some more."

The history of motion pictures comes to Highline on March 10. Fritz encounters drugs, cops, Haas Angels, group sex and a Harleem riot are enough to start Walt Disney weeping in his grave.

"Fritz the Cat," the first X-rated animated feature in the history of motion pictures comes to Highline on March 10. Fritz encounters drugs, cops, Haas Angels, group sex and a Harleem riot are enough to start Walt Disney weeping in his grave.

"Fritz the Cat" will be shown in the Lecture Hall at 2:30 and 5 p.m. Admission at the door.

HCC drama's eccentric family is on its way

The HCC Drama Department's production of Kaufman and Hart's "You Can't Take It With You" will open March 4 and continue March 6, 11, 12, 13, 19 and 20. Curtain is at 8 p.m. The play is an American comedy concerning an eccentric family which has dropped out of the conventional middle-class life style by choosing instead to pursue individual interests, including playwriting, snake hunting, baton twirling and the xylophone.

The set is a conglomeration of strange and wonderful oddities which the cast has collected over the last two months of rehearsal. Old books with impossible titles, an ancient typewriter and a bootleggers' machine are among the items which add to the charm of the play.

The production is being directed by Dr. Christina Taylor, designed by Thomas Patterson, with light design by Dale Johnson, a Highline student.

"You Can't Take It With You" has been particularly fun to rehearse," said Mr. Taylor. "The play lends itself to laughter and sainthood and individual development."

Tickets are available at the bookstore and at the door.
Night News with Marty Levin

story and photos by LaVerne Basto

Marty Levin, co-anchor for KOMO-TV in Seattle, says he wants to enjoy life and if while enjoying it, he has a good time — then great. Levin says that a top anchorwoman should have a good liberal arts education and the basic ability to communicate with people. Even though Levin does have this ability, sometimes a woman can communicate better with another woman than a man can, he says.

He'd like to see more women in communications, possibly to co-anchor the news with him.

Marty Levin, co-anchor for KOMO-TV in Seattle, says he wants to enjoy life and if while enjoying it, he has a good time — then great. Levin says that a top anchorwoman should have a good liberal arts education and the basic ability to communicate with people. Even though Levin does have this ability, sometimes a woman can communicate better with another woman than a man can, he says.

He'd like to see more women in communications, possibly to co-anchor the news with him.

Levin feels that the news should be more detailed and longer in time. He says that people just aren't reading the newspaper like they should. Television news is only a headline service, they don't have the time to go into detail like the newspapers do.

Levin has to be informed on what he's talking about. People know when you're not informed. Hence the liberal arts background, that's so important to an anchorwoman, Levin says.

His day begins around 2:30, when he arrives at the station. He's seated at his typewriter around 2:30, to start writing some of the stories for the 5:30 news. Around 4:45, he puts on a tie and jacket to do the first lead-in with Bill Bruhaker at 5.

After the 5 o'clock lead-in, they both go back to the news room, to put the finishing touches on their scripts for the 5:30 program. At 5:45 they go back to the studio to do the second lead-in. Between 5:30 and 6, Bruhaker and Levin do the news program live.

As soon as the program is over Levin dashes off to dinner. Around 7 he comes back, only to face his typewriter again. Now he re-writes the 5:30 program and switches some of the old stories to some new stories just off the wire service. At 8:45, he puts his tie and jacket back on and drags back down to the studio to do the 11 o'clock news.

Levin likes the 11 o'clock news because it has a smaller audience and one can do more original stories.

He was born Martin Jay Levin on May 22, 1946 in Bar Harbor, Maine, and was raised and educated in Los Angeles.

He attended Oregon State University, where he graduated with a B.S. degree in Organizational Communications.

Following college, he worked to help develop a drug abuse prevention facility funded by the National Institute of Mental Health in Eugene, Ore., where he served as director of community relations for nearly three years.

In 1971-72, he redesigned and implemented a community relations and public affairs project for the Eugene Police Department. His duties were writing radio and television news copy, teaching crisis intervention techniques, and drug education at the police academy.

Levin, has nine years of broadcasting experience and has worked at stations such as KVAL-TV in Eugene, Ore., KNTV, San Jose, Cal., and KEO-TV in Eugene, which is the ABC-TV affiliate. He has been at KOMO-TV since May of 1975.

She keeps 'em happy at 'Hotdog Hilton'

Rosy Collette is working on one of her ninth year at Hotdog Hilton. She keeps'em happy at 'Hotdog Hilton' and increase the variety of food to attract more customers. The Hotdog Hilton received its name in a student contest held last year. Rosy said the winner won $19 in merchandise.

Rosy would like to see HCC expand the Hotdog Hilton and increase the variety of food to attract more customers.

Rosy is a grandmother of four and has many interests.

GUIDE TO MONEY FOR HIGHER EDUCATION

Guide to more than 250,000 Scholarships and Financial Aid Source — items valued at over $850 million dollars.

Contains the most up-to-date information on:

- Scholarships, grants, aids, fellowships, loans, work-study programs, cooperative education programs, and summer job opportunities; for study at colleges, vocational and technical schools, paraprofessional training, community or two-year colleges, graduate schools, and post-graduate study or research; funded on national, regional, and local levels by the federal government, states, cities, foundations, corporations, trade unions, professional associations, fraternal organizations, and minority organizations.

- Money is available for both average as well as excellent students, both with and without need.

Swimmers win

Swimming Thunderbirds of Highline Community College wrapped up their dual meet season on a positive note, winning all but one contest in a nine-team meet; three men's and six women's teams meet Feb. 14 at the Highline pool.

Dave Ganglief led the men, winning the 50 and 100-yard freestyle events and combining with Dan Terry, Dan Anderson and John Calio to capture the 400-yard medley relay. Don Engel and Pat Patterson traded first and second places in the one and three-meter diving for two more victories.

Last weekend the men competed at the North Pacific Swimming Championships, results unavailable, and the women's team finishes its season tomorrow, the last day of the Northwest Women's Intercollegiate Swimming Championships.

T-birds drop finale

The BCC men's basketball team wound up its 10-game season last week, winning against Clark CC and losing to Mt. Hood, 60-49. Mt. Hood finished its season with a 6-5-0 record.

On Feb. 14, the T-birds traveled south to Clark CC and dealt a decisive blow. Highline came home sporting a 56 per cent shooting average resulting in the 60-49 rout.

In the season finale, the T-birds drew a home game against a tough competitor. The game against the Mt. Hood Saints was close through the first half, with the Saints holding a measly five point lead during the mid-game break. But after the half, the Saints led a slow but continual rise resulting in the 96-71 final score.

Mt. Hood's average height per man was two inches taller than Highline's. That may not seem like much to many people, but on the basketball court, it could have contributed to Mt. Hood's win.

Gordon Willmarth was high point scorer for both teams. Willmarth scored 20 points. Pt. in the Mt. Hood sf. of 15. Highline's Larry Hinkle hit two of those in the first half.

Highline tourney

Hey, students! Are you looking for something to do next weekend? Have some fun before finals week begins! The Northwest College Women's Sports Association Basketball Tournament will be held here at the Pavilion March 11, 12 and 13. Over 30 colleges will attend the intercollegiate tourney, with teams from such as far as the Eastern, Southwestern, and Northwestern Women's basketball teams will be battling for the first place trophy.

Have you considered a timber trade...

as a better way to enter the job market?
as a better way to build your future?
as a stable and rewarding source of work?

In five weeks you can be ready for the job market in the machinist trade.

Limited enrollment at Pacific Coast Machinists School allows you to start the training program at your own pace with 100% success with our visual association method.

For more information and employment qualifications call today – 522-2761.

PCI MACHINISTS SCHOOL
Student Government
Students leaders work hard

by Greg Loback

Very few students realize how hard student government officials work and how many hours they contribute each week toward what they see as a very necessary contribution to the benefit of the college. Two students in particular, President Greg Sowders and Vice President George Nielsen probably put in more time than any other members of the Student Government. Sowders and Nielsen have about 40 hours a week and nearly eight hours a day. They contribute in our two years at Whittier.

President Greg Sowders is a senior, three days a year for 15 hours a week. He usually put in five or six hours a day in the student government office. Aside from his regular studies, Sowders must attend monthly meetings of the Faculty Senate, the Budget Committee and the Instructional Committee. He must make a report to the Board of Trustees and for two days each month he attends two meetings each day for eight hours long, of COPD (Council of Representatives of Presidents). Sowders was elected vice president in last year's election. He replaced President Jim Capera who resigned.

Vice President George Nielsen attends all the meetings that Sowders must attend and more. He is a member of the College Planning Council, the Capital Project Committee, the College Planning Council, the Constitution Committee, Job Development Committee, the Child Care Committee, the Sowders is paid $20 per hour for 15 hours of work each week.

Working... Greg Sowders is President of the Student Body.

By Pat Kafiock

Greg Sowders and George Nielsen, vice president of the Associated Student Body, take a break from their job.

Senator meeting:
Goodfellow to fill vacated senate seat

by Hal Kafiock

The resignation of Senator Tang was accepted by the Student Senate at its meeting Feb. 10 in the conference room with President Greg Sowders presiding.

Senator Brian Gurule recommended Don Goodfellow for the vacated position. Goodfellow was interviewed after some discussion. Senator Chris Wright abstained from the vote.

Discussion centered on whether it was fair to elect him without giving other students a chance to apply for the position and on the question of how Goodfellow knew the opening.

Goodfellow pointed out that the process of throwing the election open to interested parties would take a month and much valuable time would be lost. With the loss of three senators already this year it is important to get somebody on the job. He passed the question "How often do qualified students walk in and want to get involved?"

The Council of Student Affairs' recommendation on the status for students (which is a proposed policy) was brought up for a vote of approval by the senate. The members of the Council of Student Affairs are: Jessie Casky, dean of student affairs, Dr. Stanley Gordon, vice-president HCC; Bruce Mockett, coordinator of student programs; Mary Francis Eckert, director of health services; George Donovan, director of counseling; Booker T. Ward, director of administration; Ray Bizer, advisor of Student Affairs; Mary Sachs, student representative; and Phil Swenson, director of student activities.

The Advisory Status recommendation is as follows: A student whose grade point average is below 2.00 is not meeting minimum grade requirements. A student receives notification by letter of the end of any quarters in which his GPA is below 2.00. The letter explains his current status and indicates resources of the college which are available to assist him in meeting his goals. If a student's grade point falls below 2.00 for two consecutive quarters, he is required to attend an academic evaluation. The evaluation is conducted by two faculty members, one from the student's own area and one appointed by the dean of students. The two faculty members constitute the student's academic evaluation committee. The committee helps the student assess his academic progress, identify areas contributing to his grade deficiencies, and develop with him a plan for improvement.

A student may be suspended under two circumstances: (1) he fails to have an academic evaluation after two consecutive quarters in which his grades fall below 2.00 and cumulative GPA is also below 2.00; (2) upon recommendation of the student's academic evaluation committee. Reinstatement is on recommendation of the student's academic evaluation committee.

The discussion centered on the grading policy. Senator Peter Caprariello said he felt it was a "quiet" place, particularly in that location, one could be installed. So, speak up!
Fashion seminar will focus on bicentennial

A bicentennial fashion seminar called "Future Scope," an all day fashion seminar, to be held on campus March 11, will discuss career demands and opportunities in the fields of manufacturing, research and development, advertising, and the effects of the energy crisis on the fashion industry.

The discussions will take place in Building 23, Room 204, with luncheon being served in the Student Lounge, from 11 a.m. to 1:15 p.m. Following the luncheon, a panel discussion will be presented by Goodwill Industries of Seattle, 1976 Spring fashions will be from the Bon Marche; Jeny Caske Thrailkill of Nordstrom; Pat George and Susan Marge Hobbs, John Eccles, and Wini Jones of ROFFE-Rene, F.G.F. in Tacoma Mall; and Carol Haine of Studios.

"Future Scope" is sponsored by the Fashion Merchandising and Display classes.

Talent published

Do you have that special talent? Do you have the creative mind that can make your career in business. Fine Art, Photography, Journalism, or Mass Media? The Gallery is constantly accepting new ideas for change and one of these ideas might just be you.

Do you have that special talent? Do you have the creative mind that can make your career in business. Fine Art, Photography, Journalism, or Mass Media? The Gallery is constantly accepting new ideas for change and one of these ideas might just be you.

The Gallery is a free exhibition space for students of the university. It is an opportunity to have your work presented to the public and an opportunity to gain public recognition for your work.

If you're a sophomore and interested in entering a mass media curriculum, you should contact Dr. Henry E. Perry, Poli-Science instructor at the University of Washington, in Room 104, Science Building. He will be happy to answer any questions you may have.

At UW

2+6=4

(but only until APRIL 1st)

If you're a sophomore it's not too late to enroll in Army ROTC. Under the Two-Year Program you can attend a six-week Basic Camp, next summer, take ROTC in your junior and senior years, and receive a commission along with your diploma. In other words, complete a four-year course in just two years! And if you're a veteran you don't even have to attend the six-week Basic Camp!

Army ROTC will also pay you $500 a month while you're in school (for you vets, that's in addition to your GI Bill) so that you may be more time than you wish.

Army ROTC has a lot more to offer, too. For additional information, contact:
