Six win in HCSU race

Word Strike and Terry Sell led the race for six seats on the HCSU executive, May 8 and 9. Word Strike offices for the 1977-78 term were Malan Martinez, second place; John Scott, third place; and Steve Christoph, fourth place. Word Strike also claimed the presidency, which goes to the student with the highest number of votes.

WPEA strike ends

The strike of the Washington Post-Puerto Rico Press Association ended Thursday morning, May 10. The Washington Post, through its local office, marked the end of the strike which began March 15. The strike was called by the newspaper's workers and was in protest of the company's decision to close its Puerto Rico office.

Eure...
An explicit statement concerning the Ku Klux Klan was the subject of an article in The Seattle Times on April 14, 1977. Information was given to the newspaper, Eric Lacitis, by the Imperial Wizard of the Klan, Bill Wilkinson. Thunder Word received the following comment from a Humanities student who quotes from Lacitis’ article.

There is a certain adrenaline-born pain which follows the reading of a highly provoking literature—a kind of wild rise to migraine and blood pressure at the top of the gauge. Then a wash of emptiness and frustration, and instead of fertility, Mr. Eric Lacitis, you did this to me. “Move over old K.K.K.—we’re starting for the new.” You wrote and continued on to exemplify that nothing was new. Your anger became my anger.

And you wrote, “major concerns of this new K.K.K. — are (1) blacks and (2) Jews.” These “blacks and Jews” are my concerns, too, because they are people and because Klan judgments disagree with my unique experience.

Not long ago, I worked for a Negro nurse, Mrs. Flora Gordon, a person who could not be anyone’s “intellectual inferior,” nor was she an example of a “strange and brutal race.” Rather, she was a nurse in humility and concern with duty worthy of emulation. Not that she couldn’t evidence irritation if some little thing were neglected—little things, because her team didn’t neglect big things.

And, on those nightmarish shifts caused by two or more team members calling in ill or no-show, she’d leave her desk work or hurry her medications and do a room, perhaps two rooms. Sometimes she’d bring a special chocolate cake, baked with honey rather than sugar, something different as appreciation for team cooperation. I was surely not surrounded to “black terror.”

But the “terror” encountered with regularity—“Get out of here you old, black”—“Don’t touch me, you black”—“This, from people who she was helping, and always with emphasis on the black. Such people would accept my interventions, however, because I was white, though much less capable. We never discussed the incidents except, perhaps, in mention that someone was agitated, but I’d address her as “ma’am” at these times, and I always called her Mrs. Gordon rather than Flora. She understood this was my respect for the person she was.

And a long time ago, I worked for Jews at Meier and Frank Company in Portland. I never saw Julius Meier or Aaron Frank that I knew of, but Aaron Frank, Junior sometimes addressed employee’s meetings. My department head, boss, was a Mr. Pinklesstein, a small, capable, nice man with thinning hair and a big nose who called me by name and proffered constructive suggestions.

But his name brought smiles and giggles from the customers in those loud speaker days: “Calling Mr. Pinklesstein. Calling Mr. Pinklesstein.” So the Company changed his name to Burton; “Calling Mr. Burton.” Sounded better, less Jewish. There I was, surrounded by, by Jews, and most, and even more Jews, and I didn’t feel any one of them wanted to “mesmerize” me. And I wouldn’t have advised them they should be systematically removed from their positions because Meier and Frank was a good place to work. Recognition of seniority, capability, employee discounts, bonuses were company policies way back in the Forties.

Sorry, Klansmen, I cannot agree with your ideations, and I am not preparing for a race war. I pray for your enlightenment.

Ode to a Therapist (or, “No Overtime for Me”)

At times I think about my work
and put same coffee up on perk.

Relaxing, finally, I know it's all right.
I wonder how it goes up there,
suction, bag, and raise my guard...

She comes a cough and oh! my dear,
the spumum whizzes past my ear.

Then yet another, sure
I once more I duck—it strikes my neck.

So I sit her and here I stay.

Water...a good solution

In scanning through the Carter Administration energy proposals we were quite amazed that one major source of energy was not included in the possible solutions to helping America out of this energy crisis. Hydro-electric power was not included in the list of areas that the Carter Administration propose that we strengthen to help our energy problems.

Water was the earliest known source of usable power. The Industrial Revolution was powered by water. Now, here in this country and abroad.

Water is a natural source of energy. Water recycles itself. After flowing through a turbine, it will eventually make its way to the sea where evaporation takes place and the water is recycled ready to feed the turbines again. Water flowing through a turbine doesn’t pollute the air, the land or any of the surroundings. It seems that water could be used to the sea where evaporation takes place and the water is recycled ready to feed the turbines again. Water flowing through a turbine doesn’t pollute the air, the land or any of the surroundings. It seems that water could be used to the sea where evaporation takes place and the water is recycled ready to feed the turbines again. Water flowing through a turbine doesn’t pollute the air, the land or any of the surroundings. Brunstrom is qualified to "engineer" HCC progress

Trustee profile

This is the second in a series of profiles on HCC's Board of Trustees. The next profile will be featured in the next edition of the Thunder Word.

Gerald R. Brunstrom, new member of HCC's Board of Trustees, has a keen interest in industry with a difference. His extensive experience in the management of his own companies qualifies him well for the job of directing an institution of higher education.

Brunstrom was born and raised in the southwest Washington city of Husky. He graduated from Husky High School in 1947, subsequently attending Washington State University.

He received a Bachelor of Science degree in Civil Engineering from Washington State University in 1951. A Science degree from W.S.U. in 1952 followed in 1952, this one in Mechanical Engineering. His duties included participating in design and construction management of major construction projects in the United States. Brunstrom attained the rank of Lieutenant Colonel before receiving his discharge from the U.S. Force Reserve.

In 1955, Brunstrom joined R.M. Tracey and Company, an architectural engineering firm. There he served as a principal in charge of a number of overseas engineering design and construction management projects. Brunstrom's job took him to such locales as England, Australia and New Zealand.

In 1966, in common ownership with Tracey and Brunstrom Company, Olympic Engineering Corporation was formed, with Brunstrom installed as president. In that capacity he has been instrumental in guiding the firm in the fields of program management, scheduling, cost control, construction claims analysis and in engineering design and construction management projects.

In addition to his various work, Brunstrom is a member of the Society of American Civil Engineers. He is also affiliated with the American Concrete Institute, Consulting Engineers Council, Society of American Military Engineers, and the American Arbitration Association.

Brunstrom has published papers on construction scheduling and management and has conducted many training seminars on construction management in the U.S. and overseas.

In addition, Brunstrom is registered as a Professional Engineer in the fields of Civil and Structural Engineering in the states of Washington and Oregon, and in the field of Civil Engineering in California. He is also a Fellow of the Institution of Engineers, Australia.

Brunstrom resides at 12660 Shorewood Drive S.W., Seattle, with his wife Betty and their four children, Diana, Janice, Gerald and Eric. The family has owned a home in the Hillsboro District since 1955.

VETS FORUM

John Lunyer's

Two weeks gone...six more to go

The 60 days of drought which I first visualized two months ago after reading the News Release from the V.A. office, indicates that the impact of the situation hit us, inquiring for veterans and paying rent and a few assorted bills, that the drought left us...until July, first.

I've been racking my brain to come up with ways the affected veteran can pick up a few to do to tide him over until July first. Some are sound, some are illegal, and others are insanity but in any case they all achieve the same final end money.

The first and probably most sensible is the 100 dollar student emergency help loan from the Financial Aid Office here on campus. These loans are 30 day loans which are designed to get the needy student through troublesome periods such as this 60 days. The only problem I can see with this kind of loan is that after you pay it back you might be in the same condition as before you drew the loan, so this is a temporary solution.

The second, and probably illegal, scheme I have is raffle off your next V.A. check. All you need is to find 150 people who would be willing to gamble two dollars apiece for the chance of winning 292 dollars in return. The more people over 150 is course added security. The only way I know of keeping the method is very effective.

There are also many other ways to make money ranging from standing next to the 50 dollar window at Longacres listening for the hot tip to promoting you are dead and crying on the street corner. In the case that nothing works there is always food stamps or the Millionaire's club.

For long range plans there is the V.A. educational loan. The veteran can borrow up to 300 dollars a quarter if he or she attends and accredited school or institution at least a half time basis. In order to qualify for a V.A. loan first the veteran must be refused a loan from two loaning institutions then be able to show a deficit between their needs and income. Since the loan takes between four and six weeks to process they are not an immediate solution but at least while you're sitting in the dark, with no telephone, going hungry you can feel secure that it will all be over soon.

Probably the best solution is to apply for an Emergency Student Loan from the school and at the time of application apply for a loan from the V.A. That way by the time the Emergency loan is due you can pay it back without financial difficulty. Regardless of whether you're in the military, we can all survive this longer term so long as you can prove you are in a necessary reaction. I can envision a day when veterans will have some kind of word in the policy changes that affect them. This sounds idealistic but I don't see why it can't happen. Until that day though we're stuck with the present system which is just to cause more trouble.

Just remember in June when you happen to be downtown and you see that person selling pencils on the street corner, buy one, it just might be a veteran student trying to work his way through college.

HAPPENINGS AROUND CAMPUS...Veterans and other people receiving V.A. benefits are reminded that the credit requirement for Summer quarter is on 40 points in credit. At all courses must be at least eight weeks long. If the courses you sign up for are less than eight weeks in length the V.A. will not pay benefits for that class. All classes must also apply toward your V.A. approved educational objective.

Also a reminder that those neat little attendance cards due again before Friday, May 20. The cards can be obtained from either the registration building or the Office of Veterans Affairs.

Next year's veterans on this Campus will have the representation of at least two veterans on the HCC Council of Representatives, with the election last week of two veterans of the six positions open. With veterans comprising about 14 percent of the student body, it's about time they had an effective way of voicing their opinions or feelings on policies that effect them. This, I feel, is the best way to make the voice of the veteran heard on campus.

On the lighter side of things around campus, Spring is here and it is once again time for the annual Green River Ratti Race. The raft's used must be homemade and must carry from two to eight people. Participants must supply their own life jackets. Green River Community College, who sponsored the annual event, took the trophy from HCC last year and this year we are aiming to take it back. There are two dollar entry fees which are due by the 18th of this month along with the raft being used. On May 20th the rafts will be inspected at OROS and the race begins at 9 a.m. May 21st. The race starts at 11 a.m. with check in at 8 a.m. All rafts must be equipped with a rope which is at least 25 feet in length and 1/4 inch thick. Any team will be disqualified for throwing bottles or debris out of the raft. Let's hope the river is wide and the sun is burning for what promises to be a great day on the Green River. Gavin Wallis has more details in the Office of Veterans Affairs.

8 states are arrest-free.

Free Washington.

In Oregon, Alaska, Maine, Colorado, California, Ohio, South Dakota and Minnesosna marijuana smokers are no longer arrested.

But arrests continue in Washington. Get off your butt and do something about getting the use of marijuana decriminalized. Let your representative in Olympia know you feel about this issue. You don't have to smoke marijuana to know it's today's marijuana problem. Call the Legislative hot line and leave a message for your representative. The number is 1-800-565-0956 (toll free).

APPLY TODAY: graduatjion

Students planning to graduate from Washington College at the end of Spring Quarter, May 20, are reminded to register at the Office of the Registrar prior to 5 p.m. Friday May 13 if they want their names to appear on the list of graduates in the Commencement Program.

May 13, 1977

Thunder Word
Alum of distinction
Sam Green has many roles --- Student, teacher, writer, publisher

Sam Green came "home" last week, preparing for his July masters degree exams at Western Washington State College. He's a publisher, an award-winning writer, a teacher.

"Home" to Sam is Highline Community College where he spent 1970-71 earning an Associate of Arts degree with honors. He recommends the community college experience for everyone. "You can maintain your pace of individual small classes give you a chance for individual attention.

But he suggests that anyone planning to transfer must research the four year institution requirements. Sam is an example of someone who planned ahead.

His academic activities included earning BA degrees in English from Western Washington State College (with special honors for academic distinction) attending the University of Washington doing graduate studies in creative writing, working inward an MA degree with special emphasis in creative writing.

One would think Sam had his hands full with his academic responsibilities. But he's found time for his college, state and national writing awards. These included Poet and Critic award from the State University Press and Second Place Prize in the 1976 WPA William Stafford Award competition; a $500 honorarium from WWSC for "For the Times," a special award for "The Directory of American Poets." He was awarded two National Endowment for the Arts fellowships for the 1977 Washington Artists-in-the-Schools Program. And he was awarded a National Endowment for the Arts fellowship to the 1976 Western Regional Poetry in the Schools Program at Fort Worden, Port Townsend. Another Poet-in-Residence award was the Tacoma Gifted Children's Programs at Fort Worden, Port Townsend, May, 1977.

Most recent are Into the Bright Oaks: The Great Knight Reason. It was written by Jean Bentley, daughter of Nelson Bentley of the University of Washington Faculty. It's been praised by both the Portland Oregonian and the Seattle Post-Intelligencer.

His current teaching is in writing, at King's Garden, the senior citizens' community in Seattle. In the current past he has been a guest teacher for poetry at the University of Washington, University of Washington Experimental College, Tacoma Community College and Highline Community College.

Add to that his frequent public readings of poetry and his current job at director of communications in Seattle and the 1977-78 Washington Artist-in-Residence Program. Sam is an alum of distinction.

PI Equals New Approach to Algebra

An innovative approach to beginning algebra will be offered in two math 21 sections for the Fall of 1978. This new method will have a "light speed" feature which permits the student to move through the course at his own rate. The student is permitted to go ahead only after demonstrating mastery of preceding material.

Lectures, textbooks and handouts will be used. Teacher-student communication will be more of a dialogue than in the traditional class.

The system is a modified, unstructured method called Personalized System of Instruction. PSI was developed by Prof. S. Keller of George-town University. This approach is being tried because students with very different backgrounds are taking the course. Some students are just brushing up on skills and other students are developing those skills for the first time. PSI requires regular class attendance.

The class selected for this system are Math 21, P-14, section C and P-19, section D which meets daily at 11:00 in room 17-201 and P-19 which meets daily at 11:00 in room 17-101.

Student Services accepting applications now.

People who are interested in applying to the 1977-78 Human Services Program may now visit four local meetings in the King and Snohomish Counties.

These meetings are designed to give the public more information on the Human Services Program and to accept the applications from individuals who could devote their time for the 1977-78 program year.

During all four meetings Human Services instructors as well as several current Human Services students will be available to explain the program and answer any question that you may have about the program.

Arrangements will be made for meetings for individual interview appointments with all interested students.

The first meeting is scheduled for Thursday, May 19 from 7-9:30 p.m. at 3826 Woodland Park Avenue North in Seattle. On Monday May 23 the second meeting will take place from 7-9:30 p.m. at the P.U. D. Building Auditorium, 2230 California located in Everett. You should enter the building from the parking lot in back.

The third and fourth meetings will take place on Saturday, June 4 and on Thursday, June 9. The Saturday meeting will be held from 10 to 11:30 a.m. while Thursday the meeting will be from 7 to 9:30 p.m. The last two meetings will be held in Seattle where the first meeting was located.

To reserve a space at the meeting you would like to attend, you should call the Human Services Program at their Seattle office at 545-6634 between Monday and Friday from 1 to 5 p.m.

The Human Services Program people look forward to meeting with you and sharing information about the program.

Page 4 Thunder Word May 15, 1977
‘Trustwalk’ opens doors to darkness

It was a scene straight out of science fiction: an almost empty campus and pairs of amber looking people. In each pair a blindfolded member was accompanied by a ‘sighted’ partner. They walked, all over the place. It was not a bizarre religious ceremony or a strange response to floods in the water. The pairs of people were all students in Bob Baugher’s Psychology 100 class, engaged in an exercise in perception and reliance known commonly as a ‘Trustwalk.’

‘Trustwalking’ involves any two people, one wearing a blindfold and the other ‘leading.’ The exercise is designed either to make the blindfolded person aware of his or her own sensory experiences other than sight, and aware of how a truly blind person “sees” the world. The other purpose to the activity is to exemplify to the participants what it’s like to place trust in another person.

“It depends on the emphasis on which way you want to go,” Baugher says of the purposes, but adds that a little of both experiences is bound to be had. “Some are reluctant to try it at first,” Baugher confides of his students. “At first they say, ‘I’m not going to do that, are you crazy? But then afterwards they really like it.”

Baugher relates that for some the sense of hearing becomes keen, for others the sense of balance. And some, like himself, immediately lose their sense of direction.

“Others have it all the time,” Baugher says. “They can be spinned around and still know exactly where they are.”

Those that have trouble with direction “probably have low spatial ability,” explains Baugher.

“The ‘why’ behind that are yet unknown to psychology, Baugher says. “You get into the nature-nurture controversy then.” That’s the conflict over whether such traits are learned or hereditary.

Having tried unsuccessfully for some time to learn a sense of direction, Baugher says he is now “60-40 toward nature.” Baugher says there is a fairly common reaction to the multi-purpose activity.

“What they find is that very quickly the other senses become attuned,” Baugher says of his students.

“I make sure I touch everyone during the course of the exercise,” Baugher continues, “to give them the feeling of human touch and ask them how it feels.”

There are generally two responses to unseen touch, states Baugher, upset and negative and one of pleasant surprise.

“At first some will be startled and pull away, but others will say ‘Oh, that’s a hand’ and explore a little.”

Baugher adds that in asking for response in class afterwards he usually finds that the ‘extremes’ speak up more often.

Gloria Hutchinson, a student who participated, said of the exercise “It feels weird. You can still perceive a little light but I feel like I’m going to walk into things. I feel like people are staring. Things seem louder.”

Brian Ward, another student, said: “You really feel the dependence you have on the other person. It feels strange.”

Of his other senses besides sight, Ward said: “I’m paying more attention to them, I’m feeling more with my feet, I’m perceiving them, I’m really making more of an effort to hear.”

Dave Gore had a particular interest in the exercise, following a comment by T-Ward.

Gore continued, “I’m dependent on Mike (Suddeth, his partner).”

“You don’t notice it day-to-day,” Gore said of sight. “It’s something I’d hate to adjust, but I’m sure I could. It’s frightening. It’s something I’d hate to lose.”

Baugher says that the exercise is very common in psychology. He has been conducting it in his classes for three and one-half years, one and one-half years here at Highline.

“I throw a lot of things at them in class,” explains Baugher, “so this gives them a break from the usual and gets them familiar with their classmates.”

Sometimes it even starts friendships, Baugher comments.

“After you feel a little more comfortable with a person because you know he or she won’t run you into a wall.”

And what is the long term result of the exercise?

Baugher smiles. “I don’t think they’ll ever forget it.”

Higher education—offered

Are you an employed adult with a typical nine-to-five job or a busy housewife. Well if you are you have had few opportunities for a higher education in the evening. Trying to earn an associate, a bachelor’s or a master’s at colleges the opportunity to complete the first two years of college in the evening is now available. All community colleges in the State of Washington have an “open door policy.” This means that any adult, regardless of preparation, may be admitted.

Now through community colleges the opportunity to complete the first two years of college in the evening is now available. All community colleges in the Seattle area offer this opportunity.

Community colleges in the State of Washington have an “open door policy.” This means that any adult, regardless of preparation, may be admitted.

In the first two years of community college you can earn a A.A. Degree. This A.A. Degree is required fifty percent or half of a bachelor’s degree.

The credits you earn for your A.A. Degree are transferable to most of the senior institutions in Washington, except for the University of Washington.

By receiving the A.A. Degree you generally meet the educational requirements of the receiving senior institutions.

Also Central Washington State College is offering an extended B.A. Degree in Early Childhood Education. This program would allow a student to earn a B.A. Degree and a teaching certificate from CWSC.

The location of these classes along with their time schedules have not been decided, according to Edward M. Treanor of Highline’s Counseling Center.

Local meetings have been going on to discuss the where abouts of this new program, which will begin at the start of next year’s Fall Quarter.

More information can be obtained by contacting Mr. Treanor in the Counseling Center or writing to Prof. Dale E. Otto, director of the Early Childhood Education program at CWSC.

Thunder Word
Diane Dawley: You name it, she's taught it.

by Rileen Goebel

Diane Dawley is not your typical HCC student. She's an 18 year old freshman who is currently teaching her way through school. Diane teaches dog obedience classes to cover her college expenses. She started three years ago with the help of several good books and has since devised her own special method of teaching.

"I work with all types of dogs," says Diane, "You name it, I've taught it." But why dogs?

"I believe that every dog, large or small, should be trained to make him a better family pet and member of the community," she smiles.

Diane's 10-week class sessions, which are held in the Twin Lakes elementary school, run all year long except Dec thru Feb. "I teach beginning and advanced dog obedience, and obedience handling classes," she adds, "I will also train dogs privately or give individual lessons to the owner."

The program Diane instructs uses all of the American Kennel Club (AKC) novice exercises. These include: Heeling, Recall, Sit-stay, Down-stay, and Off-lease.

Apparently these exercises are accessible through books; but as Diane puts it, "Classes give the opportunity to learn from an experienced instructor and to work around other dogs."

Diane's own dog Candy, whom she bought and trained five years ago, has won a multitude of trophies, ribbons and cups over the years. Candy also recently became the only English Springer Spaniel in Washington, Oregon and Idaho to hold the title of "Utility Dog."

"Candy is the most intelligent dog I've ever met" said Diane proudly, "She knows every trick in the book. She even likes to swim, pull frisbee, ball, and the piano."

Diane's obvious love of animals (she also has a horse, hamster, and parakeet) would give one the impression she was majoring in this field. "I used to want to be a veterinarian," she stated, "But now my major is math. I work in the Math Lab after school to get more experience."

"What does Diane think of Heights?" "I really love this school, I" added Diane.

Legal Assistant deadline May 15

by Jerry Fritzmann

May 15 has been set as the deadline for accepting applications for HCC's day and evening Legal Assistant programs.

Dr. Henry Perry, program director, said the program is expecting 15 students in the first graduates from the program this Spring. "Most of them are already working as interns at law firms and some are already assured of regular employment in this exciting, expanding field," he said.

Perry said a screening committee of lawyers, legal assistants, paralegals and educators will process all applications received by May 15 with opportunities for admission existing for qualified applicants after that date on a space available basis.

Two courses required by the program in the legal area will be offered this summer at night - Legal Research (Legal 200) and Real Estate Law (Business 178). While Legal 200 is limited to 30 students and requires acceptance in the program or permission of the instructor, Business 178 has no such limitations and is recommended for students in both the Legal Assistant and Business Programs.

"More than 75 students are in the day and night programs designed to prepare them for important positions with private law firms, corporate law departments, and public agencies of various kinds," Perry said.

"The legal assistant," as Perry puts it, "is trained to provide services that fill the gap between the work of the lawyer and legal secretary, and their work generally involves contact not only with the lawyer and other staff personnel but also with the client. The result is the more efficient delivery of legal services and the growth of an important and satisfying new profession."

The program at HCC is being developed under the American Bar Association guidelines with the cooperation of the Washington state bar association.

SPRINGING TO THE TOP...Candy has recently become the only English Springer Spaniel in Washington, Oregon and Idaho to win the title of "Utility Dog."

"Anything Goes" is going to be a marvelous production," Diane comments, adding "I'll be the assistant director of it."

So there she is, Diane Dawley, a little freshman with a lot of talent, and potential. For more information on her classes, you can reach Diane at 927-6543.

Petition needs signatures

Supporters of a King County Women's Commission have drawn up a petition to be taken to the King County Executive. They want to establish a Women's Commission on the county level.

The working draft for such a commission envisions it as an advocate for women outside the metropolitan center of Seattle. The commission would be in liaison with both the Seattle Commission and the state Women's Council.

The sponsors see a commission with two purposes. On one level it would provide information on laws affecting women and on government agencies that can process complaints concerning sex discriminations.

The second role would be to serve as a liaison from King county women to the county council. The commission could voice concerns about county services that are needed to fulfill the human needs of the citizens.

Copies of the petition are available in the Women's Resource Center and anyone interested in signing it can do so there. The Women's Resource Center is in building 9, room 213.

The Child Development Center

Will be open Summer quarter for your

3-6 year olds!

Fees will be based on a sliding scale. Children of faculty and classified staff are welcome. First come, first served!

For further information call 878-3710 Ext. 224, or visit the center in Bldg. 18-A

Theories, perversions, and Gnostic Gnome

This is about Extreme Artistic Perversion, commonly referred to as EAP. Contrary to what the psychos (mental doctors, that is, the driving force in man's life is EAP. This is the drive to do something art or sanity.

For some, this is limited to constructing simple thoughts. For others, it goes all the way to writing which is of course the simplest thoughts. For many, it goes all the way to something nasty. The U.S.KKK by qualified as a storm window manufacturer and therefore seeks to explain everything in terms of theories. This leads us to the Theory of EAP. When it comes down to it, anyone can get in trouble with the law or anything else. The U.S. KKK by qualified as a storm window manufacturer and therefore seeks to explain everything in terms of theories. This leads us to the Theory of EAP. When it comes down to it, anyone can get in trouble with the law or anything else.

---

All in the restaurant were in such awe of the garment old Gnome that they gnashed their teeth in fear. One person called out:

"Sir, I know that!" screamed the Gnome. "I'd gnash his teeth in fear."

The entire crowd fell on their knees in terror. The Gnome crossed his arms and stood motionless. "I've been gnailed," offered one. "I've gone gnailed," said another.

"I know that," screamed the Gnome. "How was the Gnome!" The brave old soul searched his audience intently. Finally one brave soul ventured forward and asked the Gnome: "Gnome, you're putting us gnailed!" He paid him homage (plus five and one quarter cents) per saltlake.

As last the Gnome broke the silence (and most of the dishes on the table). "Twenty Gnorbels to any man with information about the Gnostic Gnome!" He shouted.

"I have travelled great distances," hacked the Gnome. "I have travelled great distances."

"I have travelled great distances," hacked the Gnome. "I have travelled great distances."

"I have travelled great distances," hacked the Gnome. "I have travelled great distances."

"I have travelled great distances," hacked the Gnome. "I have travelled great distances."

The entire crowd fell on their knees in fear, and one person called out: "Indeed, 'tis the Gnostic Gnome of Gnorbels. All those paid him homage (plus five and one quarter per saltlake) per saltlake.

Women's programs report card out

Approximately 800 people, both men and women from the student body and the surrounding communities attended the programs arranged by Betty Colasurdo for the Women's Resource Center.

Colasurdo recently put together an evaluation of the programs for Fall and Winter quarters. This shows the many projects undertaken by the center this academic year. According to attendance at the most popular programs were the Saturday "Women's Employment Clinic," "Women: Opening Your Own Business," and a lecture series called "Women: Deciding for Ourselves.

The current mailing list used by the center has a thousand names on it. About two-thirds of that number has been maintained since September of 1975. Their publications include several brochures and a newsletter sent out regularly during the school year.

Anyone interested in getting on the mailing list can do so by leaving her name and address at the center or by calling 878-3716 ext. 341.

All kinds of printed materials about women's activities around the Jacksonville area are available at the center. The room is open from 9:30 a.m. to 9:00 p.m. Monday through Thursday and until 5:00 p.m. on Friday.

The hours when the room is staffed by Colasurdo or some of her volunteer helpers are from 10:30 a.m. to 2:30 p.m. on Tuesday, Thursday and Friday.

Students are encouraged to drop in and see what's happening in this area that is of interest to women.

The Naches Immigrant Trail of 1851

A naturalist friend of mine called one morning and asked me to meet him in Enumclaw. We headed southeast of Enumclaw on the Greenwater River. We left our cars on a logging road and made our way down the steep bank to the river, which was not loud, but fast-flowing and intense. Suddenly, the soothing sound of the river pushed all noises out of consciousness.

Crossing the river, we discovered the last remaining vestiges of an old trail. "There!" my friend said. "Take pictures."

The NACHES Immigrant Trail of 1851 can be followed winding along the river through the Cascades. Some parts of the trail appeared surprisingly clear and natural, but it was disheartening to see many areas destroyed by motor-driven maniacs.

Amidst the abundant vegetation and the giant cedar trees, the remains of an ancient campsite can be found: shelves grown into a pair of trees, overgrown trails barely wide enough for wagons, caves that have sheltered weary travelers.

Around noon the sun broke through low-hanging clouds and shadows were replaced by suffusions of yellow and green light.

This same great forest has stood relatively undisturbed for centuries. Since 1851 it has preserved a part of our heritage. Now, it is our turn to look out for the forest and the Naches Immigrant Trail.

And so a cry for assistance goes out. A worthy cause takes shape: that of protecting and preserving an old friend from the possible destruction by local logging companies who want to strip the area of its natural beauty.

WILDERNESS BEAUTY PRESERVED...Water originating from above passes through on its way to the Greenwater River.

WAGONS PASSED ONCE...But now trees block the way.

ONCE A CAMPSITE...Several of the shelves still remain in usable condition.

A HOTEL IT'S NOT...This cave may have been welcome shelter to weary travelers during severe weather.

LOOKS CHANCY...The only known awes8 to the Naches March 8 Thunder Word.

Native dress is accented in fashion show

by Carolyn Williamson

Native dress from the United States and the Philippines was modeled at the Third Annual International Fashion Show held in the Student Center on Thursday, April 28. Lee Piper from the minority affairs office narrated the show, and eight students modeled the dresses.

Native American Indian dress was represented by three very different styles. First Nations Raincoats, who is a member of the Blackfeet, wore the traditional Plains Indian dress of buckskin and beadwork. A woman of the Assiniboine tribe from the Winds of the Plains wore a dress which has a long skirt made of tanned elk hide, and a unique type of patchwork where the material is sewn in long strips.

The traditional Plains Indian dress of buckskin and beadwork was worn by Vivian Boothroyd, a member of the Assiniboine tribe from Maine, and Chief Antelope who is a Cheyenne. Chief Antelope also danced for the audience.

The Pacific Northwest tribe had two representatives. They wore capes of button blankets and hair worn of cats尾巴 and long grass. These blanket capes were called button blankets because of the buttons sewn on them. The buttons were given as a gift to the Indians in trade for bear pelts. One pair brought one bear.

Lee Frank, a Halda, wore a black blanket with the symbol of a red bear on it. Between Jacoba, a Spaniard, wore a blue blanket with the clan symbol for a frog on it.

Eugenia Pacheco and Annette Guizar were the models of the Philippines. The butterfly dress got its name because the sleeves stand up like butterfly wings. A formal dress with a train and beautiful embroidery showed the Spanish influence on the Philippine Islands. They also modeled a butterfly cape and fanning sticks.

Along with the fashion show there were also booths showing jewelry, woven blankets, baskets, and hair as well as carvings. Some of the items on display were for sale.

IN FLORIDA...Seminoles wore long skirts made from tiny strips of material sewn together.

BUFFETTE COMING TO PARAMOUNT

Singer-songwriter Jimmy Buffett and his Coral Reefer Band return to the Paramount Northwest for a concert Sunday, May 29 at 8 p.m. Drawing from folk, country, rock, Buffet emerges with a style that is direct, personal, and highly entertaining.

Buffett, like John Prine and the late Jim Croce, is the epitome of the road show. His music is direct, personal, and highly entertaining.

The show has the promise of being a night to remember for Buffet fans. Appearing with Buffet on the bill will be the Little River Band. According to the booking agent, the Little River Band is a four piece combo that has had a number one hit with "Sweet Home Alabama.

Tickets for the Jimmy Buffett and the Little River Band concert are available at Portage Music, 3502 6th Avenue SW, and Budd's Candy in Bellevue.

Read at the Writers' Theatre

On June 1, there will be a Writers' Theatre show at the Lecture Hall at 12 noon and it will be open to the public. Students and faculty will read their own poems and short stories. Any interested parties can contact Carole Purdey by either leaving their name with the receptionist at Faculty B or by calling her at 438-6423 after 2 p.m.

There is no greater glory than service in the cause of peace.

Rockpile

Bad Company is... "baad!"

Of all the superstar rock bands that make it to the top sessions do any stay there. Bad Company is an exception. Ever since their formation, Bad Company has held a coveted position as a bona fide superstar band. Their show in the Seattle Center Coliseum Sunday May 1 made it apparent that they have no intention of dropping from the top. One of the reasons Bad Company is successful is the fact that they are managed by Peter Grant, who also manages Led Zeppelin. The members of the band have said in the past if it weren't for Grant the company is successful is the fact that they have no intention of dropping from the top.

Rodger Frasch, a Halda, wore a black blanket with the symbol of a red bear on it. Between Jacoba, a Spaniard, wore a blue blanket with the clan symbol for a frog on it.

Eugenia Pacheco and Annette Guizar were the models of the Philippines. The butterfly dress got its name because the sleeves stand up like butterfly wings. Bouncin' Around the Sound
by Allan Latham a+e editor

The CB bug has bitten!
Well it's that time of the week again. Time for me to gather up the usual and write my columns for the paper. Time to find something interesting for all you people out there in readersland. Time to find something that the editor and all the readers here will accept. Time for me to....write about something that I havent wanted to write about. INSANITY! Not just everyday normal insanity but a type of insanity. It's not really an insanity because as far as I know that has bitten everyone.
The CB Bug!
You know domestic little bugs, the kind that Bryon Bashnatl can install in your car or home. Yes friends, Bryon Bashnatl today and put one in your home or car. Yes friends, the amount of times that CB's have been sold all over America in the last few years probably billion more will be sold. Yes we can even see the day when they will be out-selling McDonald's Big Mac! Can you imagine that, the day when CB's will be the hottest item on the market place. There will be organizations started. Clubs started. Movements started. And all you have to do to join is to buy one. Now have you ever wondered why?
The other day while thumbing a ride to school with Bryon Bashnatl my trusty companion and cohort picked up by one bonafide CB nut. The Old Curley Top he called himself. Yes folks we know all the names. He knew everyone else's names. He knew it all. But he was an expert on all the jargon that CB's use and everyone else's name. He even knew the guy who just gave us a ride. "Ya Old Curley Top is a good old boy," he said. "I have been talking to him for about a year now.
Saying that he too was an expert we asked him why he bought his CB. "Well for one thing," he started "it helps me with my job." He was a truck driver. "You know sometimes you are in a real big hurry and you are running late so you have to put the hammer on. With this CB in the car you can park up and tell the dispatcher that you are there and you will give them time to get there and time to be safe." Besides that is there any other reason why you thought your trucky little device is worth the bucks. "Well I can talk to all my good buddies out there. The ride ended and we thanked him and went off into the sunset to find the real answer why. "I think that maybe we should ask a set of different questions," Bryon said. "Like what?"
"Like if they are satisfied with the rest of the world or their own little corner of it?" "I think you are on to something there. Bryon." The car that pulled over to help us on our way school had the familiar antedeluviant with long blonde hair. "The ride ended and we thanked him and went off into the sunset to find the real answer why. "I think that maybe we should ask a set of different questions," Bryon said. "Like what?"
"Like if they are satisfied with the rest of the world or their own little corner of it?" "I think you are on to something there. Bryon." The ride ended and we thanked him and went off into the sunset to find the real answer why.
Concerts happening at Highline — Papaya tonight
by Allan Latham
Papaya, a local jazz band will be giving a free concert today, at 12 noon in the Lecture Hall. Papaya will perform for a dance located in the Cafeteria at 7:30 p.m.
Papaya is a homegrown creation that has been one of the more successful bands to come out of Seattle in recent times, explaining of course Heart. The band has built a solid following from playing at such notable venues as the Bombay Bicycle Shop and the Piperline Tavern.
To capitalize on their increasing popularity, Papaya has produced an album which they have named the same title. It is rapidly becoming a collector's treasure among jazz buffs. Papaya is the last act to appear here at HCC for the Spring Arts Festival, and they are sure to give it a good last hurrah.
Well May 20 marks the day when believe it or not Pat Ireland returns to the campus to perform yet another show.
Pat was here back in October of last year when he gave a couple of free shows. This time there is a catch, you have to pay. But, there is a catch to paying too. If you are one of the first 100 students to get in tonight you only have to pay a buck, after that it is $1.50 per head.
The shows start at 12 noon and 7 p.m. So all you Pat Ireland fans get out there and support your favorite, in the Lecture Hall on May 20.
Topping off the musical happenings on Campus will be Sparrow. Sparrow is another local based band that will be giving two shows here at HCC. This first is at 12 noon on May 26, the second at 6 p.m. Both shows are free. With the way that veterans are getting paid these days it is an entertainment!
Life in the fast lane

by Joel McNamara

All you need is a quick blur of motion. Before your brain can react to the object moving double your speed, it has disappeared into the vastness of the freeway.

If you've ever had this happen to you, you just might have witnessed a part of an underground road race.

No Bunny, an underground road race isn't an oval track. It's a completely outlawed, illegal, underground race, not to mention dangerous, done in a completely outlawed, illegal, way of protesting the 55 mph speed limit.

There are isolated cases of drivers going all out to win their respective races. And that's ability to be a good driver.

The fact that you either will lose your insurance or spend the rest of your life in some hole, your car is gassed up and ready to go, you've accepted the fact that you either will lose your insurance or spend the rest of your life in some hole, and you will condemn you, the police company shun you, you find one of these races.

For the underground racer there is one rule: If you have ever had the chance to go fast, you will win or not.

It's not recommended to go down to your local freeway and drive over 100 miles per hour. It's not recommended to go down to your local freeway and drive over 100 miles per hour. It's not recommended to go down to your local freeway and drive over 100 miles per hour.

The Cannonball is the underground elite, well, that's another story.

The Cannonball Baker Sea-to-Shining-Sea or infamous, race in the underground circle, is the Cannonball. It was organized by J-I McNamara and his boss, Brock Yates, Senior Editor of Car and Driver magazine. It was publicized, more and more people wanted to join the next Cannonball. In May of 1971, the first race started, and the leaving point was New York. For my own personal racing, I prefer what I call a built engine. That way, our friends, the wide bodied bad, and funny lights on top of their cars aren't going to be able to recognize me as such.

Now that you've got your hot car, and your electronic play things, you've got to have something only time can buy. And that's ability to be a good driver.

AutoTronics

2381 PACIFIC HIGHWAY SOUTH

A pornostar, wearing a traditional car en-thousiast.

With those two little toys, the driver practically has a built engine. That way, our friends, the wide bodied bad, and funny lights on top of their cars aren't going to be able to recognize me as such.

Now that you've got your hot car, and your electronic play things, you've got to have something only time can buy. And that's ability to be a good driver.

It would be great if all the motorists on the road today could go to a racing school. But unfortunately they can't. There are a lot of idiot drivers on the road, and that's probably the underground racers greatest challenge, staying away from them and trying to out-guess them.

So now you're ready; you're a skilled driver, you've got your Super Sneoper and Mid land, your car is gassed up and ready to go, you've accepted the fact that you either will lose your insurance or spend the rest of your life in some hole, you found the right connections.

Well congratulations, the underground racing fraternity welcomes you with open arms. And while society will condemn you, the police company shun you, you feel proud that you're one of a dying breed of the romantic, years past, traditional car en-thousiast.
Tight race develops:
Highline stretches to conference

by Hal Breen

As we turn down the home stretch,

HCC's tracksters survived a busy weekend, finishing between Mt. Hood and Community Colleges in a triangular meet May 7 at Bellevue. Mt. Hood, the first team to host Highline in a meet this year, tallied 72 points, while the locals scored 56 markers. Bellevue took up the rear with 47 points.

The night before, many stellar HCC performers took place in the U of Washington Twilight Meet. Competition was offered by Washington, Montana, and Boise, as well as other fine cross-country athletes.

Mt. Hood 72, HCC 58, Bellevue 47

The competition found HCC lacking in the weight events, as the best the tracksters could muster was Ben Beale's blanket 4:26.7 finish. By Carole Calvin

The injury problem hinged on one area: Steve Johnson's ankle. Coach McConnaughey elaborated. "Since Steve was hurt, we didn't have anyone to run the 440. It hurts when you forfeit any chance of scoring in an event."

Mt. Hood, in the only meet in which the competition for the conference meet was held May 20-21 at Spokane.

Women win title

by Carol Calvin

To capture the league team title for the third straight year, the HCC Ladybirds managed a 5-4 victory over previously undefeated Bellevue. The T-birds have held this title since it has been awarded.

The women will participate in the Northern Area Tournament, which will be held on Highline's home course this weekend. The NCWSSA tournament to determine the North- west champions will be held May 19-21 in Chehalis where the T-birds seek to re-capture the crown they held for the past year by the Mt. Hood Saints.

HCC 5 Bellevue 4

Highline came up with wins in the 400 and long jump, as well as sixth singles against Bellevue. Kathy Waite, T-bird number one singles player defeated previously unbeaten Sue Gal- lacher 6-3, 6-2. Waite teamed up with Lim to score a victory in first doubles also. Chris Nagatkin picked up a much needed 9th T-turd victory in sixth singles as she scored 6-4, 6-4 win over Bellevue's Karen Kilpatrick.

HCC 9 Everett 0

Without two of their top players the T-birds breezed past Everett May 5 by a score of 9-0.

Lim was out of second singles with a twisted ankle and Peggy Borden, a T-bird doubles player remained out of action because of illness.

Lynette Brown stepped up to win the sixth singles match 6-2, 6-3; and Chris Nagatkin won her close 7-6, 7-6 in fifth singles. Donna Salts re- placed Borden as she teamed up with Pam Servise in second doubles.

The Women's Newcastle Tournament is May 13, 1977 at HCC. Tickets are $1.00. Highline's singles players are in action,

(continued on page 14)
Seattle trading away their number one draft choice to Dallas to exchange for Dal- las's number one draft choice and three of their second round selections, seems like a sensible deal for the second year Seahawks.

"The reason it's a good deal is that it's a rare one," Thompson said. "This is the kind of trade we need," General Manager John Thompson said. "We need quantity. This is a bumper year in the draft, one that doesn't come along very often. We're confident we'll get four great prospects out of the event." The Squad is actually the kind of trade we need," Thompson said. "We need quantity. This is a bumper year in the draft, one that doesn't come along very often. We're confident we'll get four great prospects out of the event."

Women's tennis

The HCC men's tennis team takes a near spotless record into the state tournament May 19-21 in Yakima. The squad is actually the kind of trade we need," Thompson said. "We need quantity. This is a bumper year in the draft, one that doesn't come along very often. We're confident we'll get four great prospects out of the event."

Tennis team marches to state

The HCC men's tennis team takes a near spotless record into the state tournament May 19-21 in Yakima. The squad is actually the kind of trade we need," Thompson said. "We need quantity. This is a bumper year in the draft, one that doesn't come along very often. We're confident we'll get four great prospects out of the event."

Sports Profile
Mike Krause: a positive approach

Highline has enjoyed considerable success in its track program the past two years. One of the major producers of this success story is Mike Krause, stellar sophomore sprinter from Tyee High School. Krause's family has a history of swiftness of foot. His grandfather, who Mike gives his name to, once held the world 60-yard sprint record. "He was always teaching me how to breathe and carry my arms," said Krause, "and all the medals he won impressed them, but I was scared of the two-legged race, and everyone else."

Mike discovered his fleetness at an early age. "In the second grade, we went to a picnic for the Republican Party and I entered in the sprint event where you would list a series of goals, building up to the most difficult. I took pen and wrote a big 'STATE' on the pyramid. "My coach looked at it and said, 'maybe you should put something more realistic on that.' I shook my head and put the pyramid in my dresser."

"When I got to my ninth grade year, I was pretty good. I won the junior high conference meet and set the conference record for the 100 yard dash. The Tyee High coach was after me to work out with them, but I was scared of the older guys."

Mike has dedicated most of his sports career to track, but like so many budding young athletes, he played football in high school. "You know what they say about fast guys. 'Boy, he sure would be a good football player.' So, I tried it."

"It was the first time I really played football, and all through my sophomore year I was afraid of breaking my leg. I got over that phobia, but when I was a grand total of five games my junior and senior years, what can you say?"

Mike is a dedicated person who strives for success. "I set a series of goals before every season for winning, best times, going to state, all that stuff. So, I did it differently my senior year."

"I thought it was pretty funny. My coach, Dave Frank, developed this pyramid system where you list a story by Hal Benner

Gordon named to PTK

MCC President Dr. Sherry Gordon received honorary membership in Pi Theta Kappa, the national honorary scholastic fraternity, at a ceremony held at Highline Community College in February. Dr. Gordon has been formally invited to be an honorary member of the organization for her significant contributions to educational achievement at both the local and national levels. At the ceremony, held in the Golden Room on Wednesday, May 4, Dr. Gordon was sworn into membership by President Price of the College of the Holy Cross, the national PTK president. Dr. Gordon is the first and only woman to be named to the PTK fraternity for two-year college campuses.

In her address, Dr. Gordon congratulated the students of the organization for their contributions to educational excellence. She also acknowledged the importance of the role played by the organization in fostering a sense of community and camaraderie among college students. Dr. Gordon emphasized the significance of the contributions made by the students and faculty of Highline Community College to the organization's mission.

Terry M. Sell made the presentation, thanking her on behalf of the organization for her contributions to educational excellence. Dr. Gordon was joined by faculty and staff members of the organization who attended the ceremony. The ceremony was attended by a large number of students and faculty members of Highline Community College, who were present to celebrate Dr. Gordon's achievement.

According to White, "Gordon was selected for her contributions to educational excellence at the local and national levels. At Highline, she has been instrumental in the development of the college's academic programs and the enhancement of the educational experience for students. Her contributions to the college and the organization have been significant and deserving of recognition. Dr. Gordon is a true leader and an inspiration to all who are associated with her."
