T-Word takes all-American

The Thunderword has been named all-American college newspaper by the Associated Collegiate Press for spring 1977. The newspaper was named one of the ten best college newspapers in the nation. The newspaper won first place in all five judging categories, including cover appearance and visual communication, writing and editing, editorial leadership and opinion, entertainment sections and photography.

The newspaper was nominated by the Associated Collegiate Press for the award, and the final decision was made by a panel of judges. The newspaper was previously nominated for the award in 1975 and 1976.

Fall enrollment slides

The college experienced a slight decline in fall enrollment this year, with 7,950 students enrolled, compared to 7,611 last year. This is the largest ever summer enrollment at the college.

Parking problems haunt HCC

Parking problems have been a recurring issue at Highline Community College. Students and faculty are frustrated with the lack of parking spaces available. The college is exploring various options to address the problem, including the possibility of expanding the student parking lot and improving the parking system.

Campus changes due this year

The college is planning several changes to improve the campus experience for students and faculty. Some of the planned changes include the addition of new facilities, improvements to existing buildings, and the implementation of new programs and services.

**Election Special:**

Whisker is 29, close to the average age of the campus. The impact of the council is still minimal, and will be probably on minor issues. Notwithstanding the fact that this state's seven

Secondly, the effect of having gay ex-Tacoma schoolteacher James Gaylord strikes a true blow for bigotry. This is happy proof of the statement calling Maggie the most effective of the nation's 100

**Court plays God**

The U.S. Supreme Court's refusal to hear the case of avowed gay ex-Tacoma schoolteacher James Gaylord strikes a true blow for bigotry. We do not condone homosexuality, since the reproductive act is a sacred act to scare away investors.

**Families, workers need quick settlement**

The strike against Boeing Company by 70,000 members of the Machinists Union will have little effect on the overall area economy. But it could have devastating personal effect on the personal lives of the families of the striking workers.

Boeing itself will suffer if the strike drags on. The company has commercial and military aircraft orders to fill. Striking safety inspectors charge that Boeing's usually high safety standards cannot be delivered while their positions are being filled by supervisory and other hourly personnel.

**mailbox**

Not what he paid for

Dear Editor: Ever since the advent of conscious consumer awareness, the concept of "getting what you pay for" has been drummed into our minds. Somehow, after viewing the parking situation here on campus, I feel that I have been stripped of this concept.

I, and many others like me, have paid five dollars for the privilege of fighting each other for spots close to the HCC campus. The losers must set park at Midway Drive-in, a facility which at times can seem to be an eternity away from the actual campus. Many of these vehicles have no visible parking stickers. The threat of being towed is real for these cars by Security does exist. The action against the owners of these cars was life-risking ritual of crossing Highway-99, an area which has been stripped of this concept. I feel that the company

**Marketing gives six options**

Six specialized options are open to students choosing the two-year program in operating and selling at HCC. Students may select options in air freight sales, retail sales, media sales, broadcast and print media, computer sales, small business administration; and sales representative, according to Karl E. Beeler, program director.

Avoiding rape possible

by Vicki Whitney

The rapist: A classic stereotype would paint him as a small man, unsuccessful with women and life. In another view he might be the horn-stuffed construction worker, a sex-hungry psycho.

At a rape prevention workshop held in the Lecture Hall Oct. 5 by the Rape Prevention Forum from Seattle Claudia Black, a guest speaker and social worker, stated that the actual rapist is usually quite different from the stereotype television image.

The workshop focused on myths and facts of rape, using verbal assertiveness and body language to escape uncomfortable situations.

A demonstration of basic self-defense techniques was offered by Jenette Halverson instructing women in handling dangerous predicaments.

Sitting a black belt in karate, she is also with the Forum. Ms. Black said a large majority of rape victims in the Seattle area know their aggressors. Making matters worse is the fact that she herself was raped.

Master rapists are married or have a girlfriend, Ms. Black said. They're not rape for sex, but to degrade and humiliate, and very often the rape is premeditated.

Nearly all convicts raped are considered sane. A slightly higher than normal need to be violent is the only thing separating them from completely normal men.

Both speakers agreed that verbal assertiveness will prevent rape.

Saying no insistently to a strange man's suggestion to ride home with him is not rude and may stop something before it starts.

The rapist is looking for an easy victim. Being assertive with him may remove you from the "easy" category.

If a stranger begins a conversation of no information about himself, and asking suspicious questions about a woman's residence and roommates, she should be wary. With a confident body stance, strong eye contact and knowing how and what to do, the woman can survive the man into fleeing.

When a woman is physically attacked, verbal assertiveness is usually futile. When her only choice of escape is to hurt her aggressor, knowing where to strike can give adequate escape time.

If the attacker holds a weapon, being verbally assertive may be the woman's only recourse. If he is unarmed, the eyes, nose, groin and knees prove valuable target points.

There are times that an editorial writer enjoys the fruits of his labor when a large group of people read and agree with the editorial writer's editorial. But for all you budding editorial writers out there don't hold your breath waiting for this to happen.

It is very infrequent and you could die before it ever does.

Another one of the hassles that editorial writers go through is that some people who disagree with his recent editorial and he was in for a bad time of trying to defend himself. Too bad he didn't have to, which he had just said.

"Well, I really don't know. You see I only empty the wastebaskets around here and change typewriter ribbons. Why?"

"You mean you don't know who wrote it?"

"Yes it was great!" the voice asked again.

"You know who wrote it."

"I know who wrote it."

"I don't know who wrote it."

"Well we don't know who wrote it."

"I don't know who wrote it."

"Then I don't know who wrote it."

There are times to disagree with him, as an editorial writer to write the editorial, as we are and that is more than was happening before ever does.

Magi rocks hot despite setbacks
by Kevin Stauffer

Magi again brought its brand of “magic rock and roll” to the HCC Lecture Hall Oct. 2. A packed Lecture Hall witnessed two sets of music from one of the area’s better-known bands.

Highlighting the first set was the inclusion of three Magi originals, two of which were penned by songwriter Sky Keegan. Second set standouts included a Boston-type opening of “Fireplay Longtime,” and a frenzied version of Deep Purple’s “Lazy.”

A variety of styles within the rock spectrum appeared to be Magi’s forte. The inclusion of a John McLaughlin number was a pleasant surprise which helped to separate Magi’s material from that of so many other local rock bands.

Magi came across with a powerful sound despite a flase signal through the onstage microphones loud enough to destroy several speakers. All in all, a high energy performance by Magi, coupled with an enthusiastic, appreciative audience made for a fine afternoon of rock and roll.

Artwork to be displayed by HCC students this fall

Paintings, drawings, and graphic designs will flourish in the Fall Art Show and Sale to be held Fall Quarter in the HCC library. The exhibition is slated to show through Dec. 19. Students outside the Art Department are also invited to participate, although the event is sponsored by the HCC art students. Entries for the show must be submitted by Nov. 18. For further information, contact John Amendola, Bill Mair, Jim Gardner, Jan Vakoc, or Kevin Nicholson.

Kappa
Give us your garbage!

This year Phi Theta Kappa is involved in studying the survival of man. But not being passive people, Phi Theta Kappans all over the United States (22,000 of them!) are doing something about it as well. The PTIK national project is to raise funds for the United Way, and HCC’s Pi Sigma chapter is involved in that effort. This year we will have boxes near pop machines in the cafeteria and the Hot Dog Hilton so all the campus Tab freaks can throw their cans in and get them recycled. So lend us a hand and give us your cans. We all need them.

Moon’ shines for fall

“Ring Round The Moon,” a comedy by Jean Anouilh, will be the HCC Drama Department’s Fall production.

According to Christiana Taylor, drama instructor, “Ring Round The Moon” is a “romantic and intriguing comedy about love, money, and honesty.”

The play is set in France at the turn of the century, and concerns two mothers—one clever and deceitful, the other straightforward and kind. The twins live in a mansion peopled by “sassy and eccentric” characters who contrive to have things work out properly for everyone involved.

The Drama Department had excellent turnout for auditions last week, and still welcomes anyone interested in working on the production. Credit and work-study positions are available. Those interested should see Dr. Taylor or Joan Kusilup in the Theatre Lab Tuesday and Thursday.

According to Dr. Taylor, the play is “warm, witty, and appropriate for all ages.” It will run Dec. 3-5 and Dec. 8-10 at 8:00.
A two program joint concert featuring the First Chamber Dance Company, Artists in Residence at HCC, and the Philadelphia String Quartet highlights the University of Washington concert series for October.

These unique programs, to be held Oct. 27 and 28, will integrate dancers and musicians together on stage. The two premiers will be choreographed by Charles Bennett, Artistic Director of the First Chamber Company with music from Debussy and Shostakovich.

"Contemporary Group," co-directed by William O. Smith and Stuart Pompard is offered by the U of W on Oct. 19. Included on the program will be Shostakovich's Eighth Quartet with the Philadelphia String Quartet and Elster's Concerto for Violin (Irvin Eisenberg and Woodwinds). The University Sinfonia, directed by Mordecai Sheinkman, will play Oct. 21. A sinfonia is a small symphony orchestra made up music faculty and students. The U of W program includes works of Bach, Haydn and Brahms.

Alan Paton, South African writer, will appear at the U of W Oct. 31. Best known for his novels "Cry, The Beloved Country" and "Too late the Phaeton," he will be on campus to discuss "A total view of South Africa."

"Howard Hawks in Retrospect" is the theme of the U of W's Autumn Quarter Film Series. Nine of Hawks' films, including "El Dorado," "Rio Bravo" and "The Dawn Patrol" will be featured.

Information on ticket prices, times and locations for any of the programs in the concert series, call the University of Washington Office of Concerts and Lectures, 564-4480.

Budding stars should get their acts together for a college talent contest coming up this fall. "Search for the Top in Collegiate Talent," sponsored by comedians Bob Hope, will culminate with top 10 performers appearing with Hope in a television special in late February.

Local universities will be the sites for the initial competitions. If we get any more information we will pass it on to you.

A Chicago Disco will be held Friday, Oct. 14, at Freeeway Hall, 3015 7th Ave. A Mexican dinner will be served prior in the dance. Donations will be asked. The dinner will be served from 6:30 to 9 p.m., and the dance will last from 9 p.m. to 1 a.m.

The disco is a benefit for the Rosa Morales Defense Fund. For more information and child care call 723-3509.

A series of ten free concerts has been planned by the Seattle Parks & Recreation for Sunday evenings at 7 p.m. at the Poncho Theatre beginning Oct. 9 and continuing through Dec. 11, 1977.

The 9th Annual Seattle International Auto-Rama will be held at Seattle Center Exhibition and Display Halls, Friday through Sunday, Nov. 11 through 13, 1977. Show times will be Friday, Nov. 11, 9 p.m., Saturday, Nov. 12 and Sunday, Nov. 13, 12 noon - 11 p.m.
Vote Tuesday and Wednesday, Oct. 18 & 19, in the Cafeteria, 9 a.m. — 2 p.m., 6—7 p.m.

Carole Calvin
Carole is a graduate of Glacier High School where she was an honor student and served as editor of the school newspaper. At HCC she is sports editor for the Thunderword, and plays varsity basketball and volleyball. A 3.9 student, she received an excellence in journalism award for her work last year on the Thunderword.

CAMPAIGN STATEMENT
"Involvement is always necessary for a productive student body. Previously the HCSU staff has represented a small amount of Highline's students. As an involved member of the HCC sports and journalism programs, I think I am aware of different kinds of student needs. Last year on the Pep Staff I encountered a lack of trust and communications between students and school officials. If I can help bridge the gap between students and school officials, I will feel I have accomplished something as an HCSU representative."

NO PHOTO AVAILABLE

Nat Underwood
Nat, a business administration major here at HCC, was past business manager for the HCSU. He is chapter president and state vice-president for the Student Washington Education Association. Nat also is active in the Republican Party and his church. He received an award last year from the HCSU for his contributions as business manager.

CAMPAIGN STATEMENT
"In past, student government has been pointed by members less than genuine in their motives. This is especially demonstrated by the cold callousness of our student government to the real problems of students, like the parking situation or higher tuition. HCC students no longer ask if their representatives are representing them. Students know they're not."

Doris Dahlin
Doris is a graduate of Simms High School in Simms, Mont. Her current activities include skiing and playing golf. She has been active in the League of Women Voters, Church Council, Homemakers Association, Campfire Girls, H.A.V.E.S. (Health, Active, Voluntary, Educative) Directors, Volunteers and Services) and, prior to attending college, was Social Activities Director at Judson Park Retirement Residence for 5 years.

CAMPAIGN STATEMENT
"Women and other students comprise a large portion of the student body at Highline Community College. I identify with these students. My goal as a member of the Student Union Council is to represent this faction. I will be open to ideas, comments and special concerns from the students."

Michael L. Whitaker
Michael, enrolled in the legal assistant program, graduated from Robert E. Fitch High School in Connecticut. He has a 2.6 GPA. While at Fitch he was captain of the basketball team, played football and was a student council member. Currently he is a basketball coach, a disc jockey and plays tennis and swim.

CAMPAIGN STATEMENT
"My aim in this position is to see that we not only have more activities but also more participation from all students. It is my opinion that those who are elected should reflect the attitudes and concerns of the entire student body. In my four quarters at Highline I have enjoyed the day-to-day interaction with people of various backgrounds and beliefs and I believe I would enjoy the challenge of student government as well."

Election update...

A total of eight candidates, the largest turnout in several years, will be running for five positions on the HCSU Council of Representatives. Late entries in the race were Mary Bush and Ernie Londino. Information on these two candidates was not available at press time.
World’s record attempt soon

by Allan Latham

During last summer under the lights of Federal Way Stadium, a group of finely conditioned athletes from Track Club Northwest tried to break a world’s record. 10 runners, all world class athletes, took turns at running one mile, and tried to keep the pace up for 24 hours or 300 miles which ever came first.

They failed.

In Midway Washington there is another attempt at breaking a world’s record. There are no athletes involved, there are no stadiums as the show place, there is no hard work involved. It is a different kind of world’s record.

The world’s record is for the largest sub in the world. 10 runners, all world class athletes, took and made the largest sandwhich in the world.

The Seattle Art Museum in Volunteer Park will be showing an exhibition featuring “Pilchuck Three”. Artists Italo Scanga, James Carpenter and Dale Chihuly will exhibit their outstanding talents in the media of glass and film. The exhibit will be presented Sept. 29 through Nov. 5. Also at the Seattle Art Museum in Volunteer Park will be a special exhibition of Chinese Snuff Bottles of the 18th and 19th Centuries from the Eugene Fuller Memorial Collection.

The bottles are made of ceramics, glass, jade, lacquer, wood, bamboo and various metals. The show will run through Oct. 23, 1977.

T-birds undefeated—sweep foes

by Carole Calvin

The Highline Women's volleyball team has battled to an early undefeated standing again this Fall. The Highline Women's volleyball team has battled to an early undefeated standing again this Fall.

Holding a 3-0 league record and winning their matches in the Shoreline Invitational is just a beginning for the varsity team. Last year Highline stepped on a few toes when they capped the league title and finished first in Washington state. Several teams have been on the lookout for the T-birds and in the Shoreline Invitational alone HCC had to play the league's second place finishers and the only team to beat the ladybirds in league play last year.

Although no one was officially declared a winner of the Shoreline Invitational, Highline came away with four wins and no losses. Defeating the only team in their division of the invitational, HCC never played several other teams participating in the invitational.

Their first opponent was Shoreline CC, the team HCC faced in last year's league championship. The first game was a serving duel, as Highline's servers made sure their serves were accurate. Almost every ball played by Highline resulted in a bump, set, spike. The first game ended in a 15-4 HCC win.

The second game with Shoreline was a closer contest. Serving by the T-birds was picked up by Shoreline but still was rarely set up for a spike. The T-birds had several good pick ups by Beth Strayer and Bev Rockwell and setters Lynette Brown and Carole Calvin helped the T-bird spikers. Hitters for Highline were Cheryl Taylor, Kelly Mannion, Strayer and Rockwell.

The second game ended in another T-bird victory, this time with a score of 15-13. This ended the first match for Highline, winning 2-0.

Seattle University was HCC's next opponent. With one of the top spikers in the tournament S. U. was the only team to defeat Highline even once. Setting in the first two games was done by Brown and Gibbs, and the spikers were Taylor, Mannion, Strayer and Broggi. These Highline women scored 15-5, 15-7 wins in the final two games to beat Centralia 3-0.

At the Seattle University game the T-birds struggled through their first match against Tacoma. Highline did win their first league match 15-8, 10-15, 15-9, 9-15, 15-0. Throughout the match consistent setting and spiking was done for the ladybirds. The main trouble for the team was inconsistent serving. Many nice saves were picked up by Highline and the final match ended in a shut out for the HCC women.

Centralia

After traveling to Centralia Wed. Oct. 5 to the T-birds came home with another victory. Spiking and serving were both HCC's finest showing of this season. All the T-birds were hitting well, and when the T-birds won the first game 15-2 Coach Eileen Broomell was not entirely surprised.

Setting in the first two games was done by Brown and Gibbs, and the spikers were Taylor, Mannion, Strayer and Broggi. These Highline women scored 15-5, 15-7 wins in the final two games to beat Centralia 3-0.

Tacoma The T-bird women struggled through their first match against Tacoma. Highline did win their first league match 15-8, 10-15, 15-9, 9-15, 15-0.

Throughout the match consistent setting and spiking was done for the ladybirds. The main trouble for the team was inconsistent serving. Many nice saves were picked up by Highline and the final match ended in a shut out for the HCC women.
Harrilliers victorious again!

HCC off and running to the top

by Allan Latham

Before all the students returned to school, before the parking lots were filled, and before the school year officially opened, the Highline Community College cross country team began its defense of its 1976 Northwest Championship and third ranking in the nation as they traveled to Seward Park for the Bellevue Invitational.

The harriers went into the meet being one of the favorites to win. It is a race of intense competition, and the harriers have a chance to win.

Here at Highline being slightly disappointed with the cross country team means that they didn't totally outdistance everyone else in the meet. Highline tied for first place in the team standings with its major competition for the Northwest title, Spokane Community College.

At Seward Park the team ran over the Championship course, which they will compete on later this season for the conference championship. The team did.

The scoring for the meet was five schools that competed in the Willamette Invitational in Salem, Oregon. Highline was the only school in the meet with a team title, collecting a bare minimum of 42.5 points. The real test at the meet was for second place. Highline got another chance to win against Spokane and the harriers finished 24 points in front of the Spokane runners.

"We should have beaten them," Maples listed his team the best team there as they finished fourth overall behind the University of Washington, Club Northwest, and the University of Idaho.

One of the happiest aspects of the meet was that Highline got another chance to win against Spokane and the harriers finished 24 points in front of the Spokane runners.

"I think that we have a little bit of an edge against them now," Coach Maples said after the meet. "We have been training hard and we will ease up a little now to get ready for the conference championship in November."

In the meet Mark Anderson again led the Highline runners, finishing second overall to Bob Walls and Scott Conley. In 25th respectively. Ray McConnaughy came in 31st and Richard McCann pulled fifth in the meet.

The real fight at the meet was that Highline is the team title battle was won by the team that finished with scores of 33 and 12 respectively.

In Highline's first heat finishing just behind Spokane runner Bobby Smith with a 21:01 timing.

After the meet coach Bob Maples listed his team the best team there as they finished fourth overall behind the University of Washington, Club Northwest, and the University of Idaho.

In the meet Mark Anderson again led the Highline runners, finishing second overall. In the meet Mark Anderson ran what Maples called the race of his life finishing with a 24:39 over the five-mile course.

Maples also added that with the team title the harriers are on the road again led the Highline runners with scores of 131 and 137 respectively.

As for his new task as the Women's Basketball coach, Bolinger is very enthusiastic. He is planning on a well disciplined team, built around strictness and deliberate offense. He feels the way to work with the team should depend on the ability of the players.

...most runners reach peaks during the year that last from three to six weeks. During this peak the runners produce their best times. Reaching this peak to early in the season will ruin the team's hope for success in the conference championships. Highline may not have that problem. Working the team into shape Maples had the team doing anywhere from 60 to 100 miles a week in basic conditioning running and now that the season is here the miles have dropped a little but other workouts have taken their places.

"We do some hard workouts during the week," Maples said, "and we do some more speed work."

This has been their running two weeks where they raced it out and finished 21st.

"The kids have been running tired and doing well," Maples said, "now we are going to ease up the miles to about 60 to 80 a week and we should hit a peak at the conference championships."

If that is the case then the Highline harriers will again be the number one community college team in the Northwest and depending on how a couple of other schools in other parts of the nation do, maybe they will be the best in the country.

Highline College has always been known for its outstanding coaching staffs and the new Women's Basketball coach who was announced last week, Dale Bolinger, is no exception.

As the physical Education Technician at HCC since 1966, Mr. Bolinger is very familiar with the sports program here. He has coached small city league and intramurals, but for Bolinger, this new position is an exciting step up.

Sports has always been a major part of Bolinger's life. He played AAU ball for six years after graduating from high school in Emmett, Idaho. Coach Bolinger came to HCC as a student in 1964. He lettered in track, specializing in throwing the javelin. After graduating in 1966, he was hired by the college.

As for his new task as the Women's Basketball coach, Bolinger is very enthusiastic. He is planning on a well disciplined team, built around strictness and deliberate offense. He feels the way to work with the team should depend on the ability of the players.
Prentice at home with Highline harriers

by Allan Latham

When most college freshmen set to their new school, they worry about a large variety of problems such as what to wear, will the classes be hard and the what not.

When Ray Prentice arrived at Highline for his first year, his main concern was not of these usual freshmen dilemmas. He was just worried about making the team.

Prentice comes from Glacier High School where he was the number one runner on the Glacier cross country team going through the season undefeated. Prentice's outstanding running record at Glacier included personal bests of 1:55.9 in the half-mile, 4:14.8 in the mile, and 9:49.2 in the two-mile.

With that kind of record preceding him, one would wonder why was worried about making the team. This isn't just any cross country team that Ray was trying to make. The HCC harrier and track teams are some of the best in the country.

"I was worried about making the team when I first came here," Prentice said. "but I think its great that there are a lot of good runners here. It helps all of us achieve all that we can."

Adjusting from being the best man in the state to being just another one of the runners has been fairly easy for Ray. "Last season I had to set the pace for all the workouts and everyone on the team kind of depended on me to win my races," Prentice said. "Now the pressure is off and that will help me more in the future."

The pressure had to hurt Ray more than it helped. Being the best he trained hard all during the winter logging up the miles on long road runs and came up with a knee injury that hampered him during last spring's track season.

"I set goal of running a 4:05 mile and I didn't come close to that," Prentice said. "But this year I think I can do it. I have taken it fairly easy over the summer only doing 35 to 45 miles a week on the road and now I am just starting to build that up a little."

"A special glow grows in Bob Mapleton's eyes when he talks of Ray. "Ray has already exceeded all that I expected from him this year in cross country," Mapleton said, "he has run some really fast races for us."

"If he can stay healthy, I know that he will break four-minutes for the mile. He has speed and speed is what you need to be a fast miler. Ray runs the 100 yard dash and that is excellent for a mile."

Mapleton said, "he has run some really fast races for us."

"If he can stay healthy he will run well. When he is running well sooner or later he'll break the four-minute barrier in the mile. And in 1984 when the summer Olympics return to America don't be surprised if you hear the name Ray Prentice running for the United States team in the 1,500 meters and winning."

"I have considered the University of Oregon because of their outstanding track program and Washington State University," Ray said, "but just briefly."

"The only long range goals that I have set for myself are the only plans that I have made. I have been healthy again, and running well."

If Ray stays healthy he will run well. When he is running well sooner or later he'll break the four-minute barrier in the mile. And in 1984 when the summer Olympics return to America don't be surprised if you hear the name Ray Prentice running for the United States team in the 1,500 meter event and winning."

The cards can be picked up and turned in at the office of veterans affairs or at the veterans desk in the Administration Building.

Attendance verification cards are due no later than Tuesday, Oct. 18. Veterans should be aware that they must fill out attendance verification cards and have them signed by their instructors. Failure to do so will result in non-payment of benefits for October.
Bellevue Invitational Cross Country Meet
Seward Park, Seattle, Sept. 24, 1977 Course: 4 Miles

Men's Results:
1. Rusty Smith, HCC, 22:47
2. Rick Gower, SCC, 23:06

PTK: Can man survive?

The Phi Theta Kappa activities for this quarter will focus on "Can Man Survive?" This theme will explore the choices people must make in a technological society. The PTK in the national honor society at WSU and is part of a larger campaign to help the organization and its chapters become a voice for the college and for the community.

Old library to shelve offices

By Susan Brown

The old library building will take the following $1 million renovation, scheduled for this year. This spring the library will begin moving to the new building at the north end of the campus. The old building, which is located in the center of campus, will be renovated into a new library and offices. The renovation will involve the removal of the library's second floor and the addition of a new first floor. The new library is scheduled to open in September 2018.
