Instructors propose business division split

by Melodie Steger

A proposal concerning the division of the Highline College business program was presented to the Board of Trustees on Oct. 17. Dr. Robert McFarland, chairman of the Instructional Council, explained that the proposal was made in an effort to improve the education of students.

"The current business program is divided into two separate divisions: business and business administration," McFarland said. "The proposal is to split the program into two separate divisions: business and business administration." He added that the proposal would be presented to the Board of Trustees for approval.

Lounge space disputed by Student Union

by Karen Carpenter

A proposal to split the space in the lounge has been presented by the Student Union. The proposal, which is to be presented to the Board of Trustees, is in response to a request from the Student Union for additional space.

"We have been told that we need more space," said Mackintosh, the student activities coordinator. "The Student Union has asked for additional space, and we have been told that we need more space." He added that the proposal would be presented to the Board of Trustees for approval.

President Gordon appointed to national science council

by Terri Bollinger

Dr. Shirley Gordon, highline College instructor, has been appointed to the National Science Council. The council is a national organization that promotes the advancement of science and technology.

"Dr. Gordon has been a member of the National Science Council for several years," said Dr. Robert McFarland, chairman of the Instructional Council. "She has been involved in the council for several years, and we are pleased to have her as a member of the council." He added that Dr. Gordon would be a valuable addition to the council.

In conclusion, the proposal to split the business program is being presented to the Board of Trustees for approval. The Student Union has requested additional space, and Dr. Gordon has been appointed to the National Science Council. These proposals are expected to be approved by the Board of Trustees.
Highline enrollment up 14 percent for Fall 1979 by Craig A. Steed.

Like all the other colleges in the state, Highline College has experienced an increase in enrollment for this fall quarter over last fall quarter, according to Registrar Booker Watt. There are 9,896 students registered for this fall quarter as opposed to 8,837 last year, which is an increase of 14 percent.

Reasons given for the increase have been the number of people migrating to the state, the improving area economy and a general mood that's more pro-higher education. All programs of the college have shown an increase in the number of students taking courses.

"Right now in this quarter we have by the registrar's office, indicate that the largest group of students are going to Highline College for the general studies degree or certificate. The second largest group is here for general studies but not to receive any kind of degree. Around 400 students-listed are under the why they're here.

Fall quarter saw a total of 553 people withdraw completely from classes. This year 663 have gone for Fall quarter of 1978. Not surprisingly most HCC students graduated from high schools in King County. In fact 3,675 students were from Central Michigan University in the two to Tulane University, and the weekly Thunderword, has received the American Newspaper Publishers' Award.

"This is the first program set exclusively for Vietnamese veterans with their unique problems. It is also the only counseling program to be separate from the hospital. Those using it will not be patients," he added. The program is run by the Community Involvement Program, which is discussed in the next section. The center will be located in the downtown area of Seattle, according to VA Hospital personnel.

Students interested in the new service are urged to call the Outreach Center in Tacoma, 472-0751, or the Psychiatric Center at the Veterans Hospital in Seattle, 762-1010.

Reaching out to help: the Community Involvement program by Gwen Whyte.

The Community Involvement Program at HCC gives each volunteer student an opportunity to match his or her skills with a community organization needing volunteer help.

While the student gains knowledge and experience through volunteering, he or she may earn up to three HCC credits which are based on community involvement.

There is a wide range of community needs open to the HCC student volunteer. Students can be involved in areas such as crisis intervention, tutoring, recreation and health occupations.

Other students may choose to help with youth or elderly programs, day care programs, mental health centers. A woman student has even been a volunteer firewoman.

It was stressed by the Community Involvement Program staff that often students are already volunteering, but fail to realize they are eligible for college credit for their community service. "CIP" derives for flexibility so that a student can initiate his own project," the staff explained.

According to Phil Swanberg, who is the coordinator of the CIP program at HCC, "Volunteering not only benefits the community, but it has a great impact on the volunteer. The students learn about themselves, relative to work situations, and may find a potential career answer to a career.

Swanberg continued to state that "volunteering is one of the few opportunities students have for practical learning, and it gives them a sense of doing something for someone else," he stated.

One such student, who has been volunteering for two years, is Wilma Storms, and Robert Wright, each spending two hours per week.

After experimenting last spring, the biology department decided to continue the program and have each biology instructor volunteer a couple of hours per week to staff the center. The study center serves several purposes to students, especially those who are taking biology classes.

"Students can drop by and get help on anything such as study questions, preparing assignments, and studying for tests," said Gilstrap. Students are advised to drop in and meet fellow students. Instructors agree that this can increase informality between student/student and student/teacher interactions.

"Another good purpose for the center is that it has books available to students," explained Gilstrap. "These books can be borrowed by faculty members and can be used at the center or can also be checked out for a short-term use," she continued.

Since the center is located as a part of the biology lab room, students can also get a chance to see set up displays such as a marine aquarium and a desert biome. Linda Minkwitz, lab technician, is available to any student who wants to talk about these and some other displays.

Finally the center will also be used by students, Gilstrap explained, during more hours if there is an increase in student interest.

Right now the program is staffed for a total of eight hours a week. The posted hours include 9 a.m. on Monday, 10 and 12 on Tuesdays, 2 p.m. on Wednesdays, 9 a.m. and 1 p.m. on Thursdays, and 10 a.m. on Fridays. 

"I realize the program because it gives me and the other instructors a chance to get to know students on a one-to-one basis, and to make the classroom a more comfortable situation," said Gilstrap.

Way, under the leadership of Don Nelson. Since September 1979, she has been the editor of CIP program.

Her activities involve working with students from Federal Way, Thomas Jefferson High School who are in the Youth for Christ groups. As a result, the students are discussing, such as problems they are currently facing and difficulties with friends. But Islam feels that the program is one of the greatest roadblocks.

Meanwhile the Youth for Christ program is one of the youth for Christ groups. Field trips were discussed by the leadership of the Youth for Christ program of which Islam is involved as a CIP volunteer.

Another HCC student who is part of the CIP program is Barbara LeRoy, who is a student for a second time, on page 12.
Instructional Improvement Council joins NISOD

by Craig Steed

The Instructional Improvement Council recently joined the National Institute for Staff and Organizational Development (NISOD), based at the University of Texas in Austin, according to Dr. Charles Sandifer.

The Instructional Improvement Council, under the chancellorship of Scalander, is a committee designed to upgrade the curriculum at Highline Community College. Membership in NISOD can provide HCC with a number of seminars and workshops on instructional improvement and provide access to NISOD's extensive material resources, according to Sandifer.

The consortium also puts out a monthly newsletter, "Linkages," with a feature called "The Abstracts." These are short texts detailing innovative ideas in various areas. A typical one is entitled "Creative Use of Silence in the Classroom." Sandifer described the abstracts as "really nice little learning devices."

The Council's main activity is providing funds to instructors who have innovative projects for improving the context of their classes. These projects range from the purchase of plaster casts of fossils for the geology classes to a slide show on the disease process for the nursing units.

The application process starts with an instructor submitting an application to his/her division chair for consideration. If the division head endorses the idea, the applicant then prepares a detailed description of the project and submits it to the committee.

The 14 member committee (one representative from each division plus Sandifer) then evaluates the project and either rejects or approves the allocation of funds, sometimes reducing or increasing the amount requested.

Memories of Black Student Union is work to eliminate those feelings of loneliness and increase the awareness of the entire campus to black students and their culture, she stated.

In order to achieve their goals the BSU needs more participation from blacks on campus. Only one quarter of them are now active in the Union, Jackson estimates. "This is unfortunate," she says, "because blacks must keep trying to do a little better than everyone else to get ahead, and they have to work together to help each other."

The Union is "not a social club or a crust," but a means of support to its members and an advocate for blacks with the rest of the campus, Jackson emphasized.

This year's BSU officers are Rebecca Evans, president; Lillie Brinker, vice president; Felicia Newton, recording secretary; Annette Rogers, correspondence secretary; Byron Crudup, sergeant-at-arms; and Leslie Williams, treasurer. Edard Morris is the BSU's advisor.

The leadership is promoting several changes and activities designed to promote black pride on campus. During Black History Week in February, the BSU plans to bring outside speakers and to use the programs as a showcase for the talent of Highline students.

Meetings of Highline's BSU are announced in the daily bulletin and on bulletin boards on campus. Anyone interested in joining should attend.

Two chosen for HCSU council

David Scott Hyres and Bertrice Kenkeli were chosen by the Highline College Student Union committee to fill the council positions left open by two non-returning council members.

Three of the current council members served on a committee which reviewed the applications and held personal interviews with the five applicants. Among the qualifications taken into consideration were: previous leadership experience, time availability, enthusiasm, and motivation.

"All of the applicants were well qualified and it was a difficult choice to make, but the needs of the council were a predominant factor," said Greg Hartman, council member.

Since the average age of Highline students is 30, age was also a factor. "We want the council to be a cross section of the student body in order to truly represent everyone," Hartman said. "But age was only one factor among many."

"We have high expectations of the people selected," said Cheryl Roberts, HCSU president. The newly appointed council members will officially assume their positions at the next council meeting.
The student activities budget committee of last year needed to take a stand forward on an unbalanced budget to a balanced budget. They included a step forward to a freeze of last year's budget. This has caused confusion among many different areas on campus ranging from the athletic department to the Child Care Center.

The confusion is further escalated by the fact that the major source of revenue, the student activity fee paid in the tuition, was estimated for considerably less than the 10,000 students presently attending Highline College.

The S & A committee stated that the frozen budget was effective pending revisions in the fall. Thus far, there has been no action by the committee.

One of the reasons for the seemingly inactive committee was their awesome task. All they had to do was cut over $48,000 out of an already tight budget with no set priorities for cutting.

Also, the committee had only two months before their final deadline. The kind of circumstances it is no wonder that budget problems resulted.

What needs to be done is for somebody to determine priorities for budget cuts. Supposedly there is a S & A task force committee to do just that, but they took no formal action.

What needs to happen is for committees to accomplish what they are supposed to do.

Let's face it, priorities need to be set and followed so the budget can be balanced. If not then the various departments and activities who have been responsible in their recent requests, may go to trying to grab all the pie.

In the mean time, this year's budget conclusion should be resolved formally so everybody can move on to next year knowing what to do.

Why all the women on Highline campus?

There comes a time each year when football is barely getting interesting, when baseball is over, and basketball is still in its infancy. This is the time each year when a young man gathers his books and struts off to classes and his thoughts become absorbed with women!

Devoting one's self along such lines, the casual observer may discover a definite imbalance in gender on Highline's campus.

"One might ask, "Why all the women?" or, on the converse side, "Where are all the men?" For clearly the women on campus have been outnumbering their worthy counterparts by a ratio fast approaching two to one, nor is this trend a recent one. In a breakdown of registration statistics in Winter Quarter of 1978, there were 1,200 more women on campus than men.

This year the figure jumps to a staggering five to three, to put it into biological terms. The progressive increase in this figure is repeated throughout the state, according to Booker Watt, HCC registrar, as more and more women are going to college.

Early in the present-ages when community colleges were as fledgling as wingtip oxfords and Whammy bullocks, the relaxed homoness and inseparableness of a small post-secondary campus like Highline's was a haven welcome for men and women alike to phase into the rigors of college life. Today, these reasons still stand.

Add to this the fast-fading vestiges of the pre-liberated era— that a woman must have an education superior to that of a man to get a similar career with equal pay—and you have a fair amount of motivation for a young woman to pursue her education at the community college level.

For the first time, it is not only acceptable for a young woman to advance herself through education, but while the concepts of today, it is virtually mandatory.

The small college is rapidly replacing all of the advantages of sorority colleges with a co-educational bonus. Are a large percentage of women on campus, long out of high school, presently pursuing a second or possibly third degree within their field of interest? Do women beyond their child-rearing years return to college later in life when they've greater stability?

No set of statistics can entirely map out the drives and motivations for a person attending college, but one thing is certain: women are rapidly expanding into the limitless horizons of opportunity awaiting the enlightened minds of men and women alike.

Staff opinion and comment

Services and Activities budget frozen in imbalance

The Thundervolde welcomes all high school juniors and seniors who are visiting our campus on Nov. 8 by printing extra copies. We have printed up extra copies of this issue for your information and convenience.

There will be 2-3000 students from 15 high schools in the annual High School College Conference, which is an event that brings representatives from various universities, community colleges and vocational schools together with interested students.

We hope that you will find Highline a beautiful and hospitable campus and take time to consider us as an option in your education.

Hartman concerned with student interest vs. apathy

By Greg Hartman

From time to time you will find a HCSU representative sitting in the cafeteria. This is an odd creature, looking rather conspicuous, with a large sign on its table. Why are we there? What could our purpose be?

For one, we want to make contact with you. Secondly, we are there to discuss problems and/or solutions you might have. The biggest reason is to help you become involved in student affairs.

Did you know that America is considered a nation of apathy? None wants to become involved in anything; "look out for Number One." seems to be the motto.

Just look at our public turnout for elections and other community functions. There is little or none. Those that do turn out end up doing most of the work. You and I both know how long that lasts.

So, you might be asking, "What does our nation have to do with HCC?"

Exactly the same question I asked myself. What I came up with was that HCC is our nation.

Look at our student involvement. What was the last time you helped out at a HCC function? Are you involved in any clubs or organizations? How many times have you taken advantage of the fine movies, provided free, for your entertainment?

When did you last hear a free concert or a guest speaker provided for your entertainment? Did you know that every week, and almost every noon, there is entertainment available to you?

If you are not into entertainment, there are over 20 clubs or organizations that need you. These clubs are an integral part of campus life. You can have an input to the problems that you see, or put into effect ideas that you have.

You say you have only an hour a week. What's wrong with putting that hour to use?

Becoming involved is a responsibility. It is a commitment. The ability to become involved is a sign of freedom. It represents America. What can you do to help keep this tradition alive?

When you decide to become involved, you can contact: Student Affairs, ext. 255-236.

Francis Coppola intended his new film, *Apocolypse Now*, to be an indictment of the United States involvement in Vietnam, but in the end, he delivered a haunting condemnation of all war. Coppola stated that his film was created with the audience in mind because he "wants the world to see the madness that comes with combat. He attacks others with recorded Wagner blaring from speakers on his helicopters because "it scares hell out of the Slopes."

The final half-hour of the film deals with Willard's confrontation with Kurtz and this is where the masterpiece begins to fall. Coppola is able to convey the ultimate madness of Kurtz, he fails to come up with a satisfactory resolution and leaves many people shaking their heads trying to decipher the last scenes and ultimately ends up with an unfinished symphony.

For all its flaws, *Apocolypse Now* is undoubtedly the finest war film ever made. The performances of Sheen and Duvall are extraordinary to say the least. Brando's performance was not as commanding as his salary but he is everything that you expected Sheen to find in Kurtz.

It is extraordinary not only because of the performances but because of the conditions under which they were performed.

The movie crew fought a typhoon that destroyed sets, equipment and forced evacuation to Manila, and if that wasn't enough, many of the crew became sick - most seriously Martin Sheen, who had to be hospitalized.

Despite all the problems, Coppola and company returned with perhaps the greatest triumph of any epicles.

This is a film no matter what your feelings on the Vietnam War are or were. It is certainly the highest hit of the Town Theatre in Seattle in 70mm and six track Dolby sound. (Special thanks to SFO for the persistence in getting one of the few 70mm prints.) The film is rated R for violence and strong language.

Epic Theatre appeals to audience reason, not emotion

by Annabel Staab

Dr. Christiana Taylor feels that Epic Theatre needs explaining to Highline Campus students and all who come to see the current production "The Caucasian Chalk Circle" by Bertolt Brecht which opens the weekend of Nov. 29 and 30, and a matinee performance on Dec. 3.

Cynthia Redmond and Stephanie Vassallo, Canadian students and all who come to see the current production "The Caucasian Chalk Circle" by Bertolt Brecht which opens the weekend of Nov. 29 and 30, and a matinee performance on Dec. 3.

The essential point of Epic Theatre is that it appeals less to the feelings than to the spectator's reason, according to Taylor.

"Instead of sharing an experience, the spectator must come to grips with things and at the same time, it would be quite wrong to try to deny emotion to this kind of theatre," added Taylor.

**Cross country team excels in T-bird meet**

The Athletic Association of Community Colleges championship cross country meet is only one week away, and the Highline College team is now preparing for the race. "The Thunderbirds' hopes should be a little brighter after last Saturday's T-bird Invitational," Kaiser, the Highline's only female competitor, said.

Larry Kaiser, the Highline College cross country team's number one runner, now has his sights set on the AACC championships. And the freshmen have excelled.

Larry Kaiser

Kaiser was involved in cross country championships, according to Raiser, but Kaiser feels the spirit of the runners is at a peak and that will help them in the stretch.

The T-birds competed in the Mt. Hood Invitational in Gresham, Oregon Oct. 30 and tallied a sixth place out of 11 colleges. Kaiser led Highline coming out 16th out of a pack of 100. His time was 25:48. Running mates Doug Smith and Peter Waller finished 33rd and 44th respectively.

**Kaiser optimistic about chances in championship meet**

Larry Kaiser, the Highline College cross country team's number one runner, now has his sights set on the AACC championships. And the freshmen have excelled.

Larry Kaiser

The team's performance, especially the performances of Kaiser and Fisk, should give the freshmen a boost of confidence going into the championship meet set for Nov. 9 in Spokane.

"I would say we will take anywhere from second to fifth in the meet," said head cross country coach Tom Frank.

Frank believes that Bellevue will most likely take the title, but after that, the placings are wide open.

The Thunderbird runner has reason to be optimistic. Last Saturday he came in second in the T-bird Invitational with a time of 26:42.

"So far that's the best race I've run this year," he stated. "The time was good, but I'm a little faster." Kaiser has been steadily improving over the course of the season. He has placed 4th, 14th and 16th in other meets this year. The 46th came in the Fort Casey meet on Whidbey Island, where over 200 runners competed, many of them from four-year schools.

A 1979 Puyallup High School graduate, Kaiser was involved in cross country all three years of his high school career. Running behind high school standout Orly Waller the rest of the Highline team, and feels he will be in top form for the race.

"We've been working very hard and burning ourselves out in practice," he exclaimed. "For state, we're going to react the week before which will help us."

**Athletic department awaiting S&A budget decisions**

by Gary Lindberg

While athletics at Highline Community College are moving onward and upward, the department's budget is motionless.

During the summer the Student Activities Budget Committee submitted the previous year's budget with the option to have revisions later on. It is basically a budget freeze at the present time.

"We're living with the decision, but we can't wait for the committee to do something," stated Don McConnaughey, HCC athletic director.

"Things like recruiting are a 10-month process that can't stop just because of uncertain budget," he added.

The total budget for HCC athletics last year was $9,160, with the this year's proposed request at slightly over $10,000. Highline did drop their wrestling program this year which "allows us to fill in for other areas," according to McConnaughey.

"We had to do some felling last year also and the wrestling money gives us some leeway," the athletic director commented.

"We don't anticipate any problems with out budget when it is finalized," elaborated McConnaughey.

HCC's athletic department did propose an assistant women's basketball coach who was hired and a women's track coach who was not. There was not nearly enough money, McConnaughey stated, referring to the proposed track coach.

Included in the budget uncertainty is the coach's salaries or stipends.

"We don't know how much our stipends will be this year," said Eileen Bromwell, head women's volleyball coach, referring to a proposed increase in all stipends.

However, those involved with HCC athletics agree that the budget freeze has not affected the quality of the programs.

**Featuring:**

**Sandy Stone**

Offense is the emphasis of the Highline College women's volleyball team, but defensive specialist Sandy Stone is the one you want around when the other team is retaliating.

Stone is considered by head volleyball coach Eileen Bromwell the perfect player to have around.

"Sandy is the kind that every coach likes. She's a tremendous player and she's absolutely flawless," Bromwell said. Errors are just not on her list.

Stone's versatility on the court has been instrumental in the T-birds' current success and their 8-0 record.

"She can do everything—spike, set or serve," Bromwell stated. "She's one of my best blockers."

Stone has been actively involved in sports since eighth grade, mainly in basketball and volleyball.

Sandy Stone

Stone is a 1979 graduate out of Evergreen High School in White Center.

Spikers at 8-0 tting ground on league title

by Rod Weeks

Picking up three more Coastal League wins, the Highline College women's volleyball team has its sights set on league title and the state championship. The team has won all nine matches thus far, scoring a 24-0, 15-2, 15-0 victory against Peninsula College last week. The win marks the team's ninth straight victory, setting a new school record for most consecutive wins.

In other news, Highline College's men's cross-country team won the regional championship last Saturday, qualifying for the national meet in November. This is the team's fourth national championship in five years, with the previous three titles coming in 2018, 2019, and 2021. The team is coached by Paul Johnson and is comprised of 12 runners, including five returning seniors.

Another story of note is the successful launch of the Highline College esports program, which has already seen some success. The team won the Pacific Northwest Collegiate Esports Conference tournament last month, securing their place in the national championships. This is the first time Highline College has participated in the national tournament, and they hope to continue their strong showing in the coming weeks.

Off The Record

Why aren't there any T-birds in nationals?

by Steve Smith

"Two of our students did." This is the first response of Highline College Athletic Commissioner Jesse Caskey when I asked him the following question:

Who doesn't compete in national competitions?

"It's against the policy of the college," Broomell said. "We know they are a defensive team and not an offensive team, so we went at them offensively."

Superior, aggressive offense has been Highline's major advantage this season, according to the HCC coach. In eight league matches the T-birds have outscored their opponents, 36-16. Broomell also hinted at the win to better all-around play, and had praise for Teresa DeLuccio, Sandy Stone and Julie Wakefield for outstanding defensive performances.

Grays Harbor became another of the T-birds many victims Oct. 24 at GHC. Highline stomped the Chokers in the first two sets, 15-5, 15-1, but just edged GHC in the final set, 15-16, in overtime. Despite low scores for Grays Harbor in the earlier sets, Broomell felt the statistics weren't indicative of the Chokers' game.

"Grays Harbor is by far a better team than their scores show," she said. "Their never give up, and they chase every ball."

With only three league matches remaining, including tonight's contest, HCC is still a month away from the state championship. The team's depth will make the difference.

"This is a better team than I've ever had, and if we ever win a first, this will be the year," she exclaimed.

"I have a lot of depth and six good players always on the floor. I also have eight great spikers," she added.

Even though Clark has been the T-birds' only recipient of this season's league individual awards, Broomell said referring to the increased competitiveness of the league in the late season.

Highline will host a tournament Nov. 4 and 10 in the Pavilion. Matches will commence at 6 p.m. on Friday and at 9:30 p.m. on Saturday. Participating schools include: Tacoma, Seattle Central-GMC, Columbia Basin, Clark, Fort Steilacoom and Bellevue.

Sandy Stone makes a kill in Highline's win over Lower Columbia last week. Baro

HCC computer faire 'a success'—Olney

The first Highline Community College microcomputer faire held Oct. 19 and 20 in the sixth floor of the library, was a "real success," according to Ed Olney, director of management systems, and chances of repeating the faire next year are good.

The faire brought in 400-500 people altogether. Vendors for the event came as volunteers, and the event was free to the public.

"The purpose of the faire was to provide information to the public about all types of computers and their capabilities," stated Olney. The event also publicized the HCC microcomputer lab and training programs.

The featured computer was the Commodore II, used in such areas as business calculations, graphics, and math functions. Information from the machine is transmitted through different televised colors.

Demonstrations also included the display of the TRS-80, 280 Series CP/M System, the 80-80, and the Alphameter.

Eric Smith, a 15-year-old Federal Way student, won a contest by creating a program for handling mailing list to be stored on a disc. Computer games and displays were also conducted.

The computer system permanently installed in the library is being used by both the math and science divisions of HCC, with a huge number of drop-ins, according to Olney.

The system is set up for scheduled class use, scheduled lab time, and drop-in use.

Winter enrollment begins for Highline

by Ray Ball

Enrollment for Winter Quarter classes begins November 3 and continues through December 7. Enrollment is at the Career and Placement Center, 170 Building 10, Fielding Hall, or by calling 448-2111.

For more information, call the Highline Community Involvement Program at 448-2235. The program serves all students as a link between the college and the local community.

Woman officer a first for security force

Campbell to make Mexican studies

by Ray Ball

Laurel Campbell, one of four Highline Community College security officers, is the first woman to join the security force.

Campbell was hired by the College after the position was opened because of the demand for additional security officers. The college expects to increase its security staff to meet the needs of the facility.

Campbell is a junior from the Seattle area who is majoring in Criminal Justice and Law Enforcement. She hopes to work in the field of investigating fraud and embezzlement.

Campbell was trained in the police academy for six months and is currently a certified officer. She was hired by the college in June but did not start work until the beginning of the fall quarter.

She is currently working on her Master's Degree in Criminal Justice and plans to graduate from the program in December.

During Winter quarter leave

The experience of traveling can help the student learn about other cultures. The student can become familiar with the way of life in another country.
