Budget cuts cited as ‘crisis’

The proposed 12 percent budget cut for next academic year at Highline Community College has raised concern among students and faculty.

"We are planning on having the first day of classes on August 29," said Dr. Bill Reid, president of the college. "The second half of the quarter will be spent on developing the course curriculum, while the first half will be devoted to instruction." Reid stressed the importance of maintaining the quality of the program while accommodating the budget cuts.

"It shows that students have to take courses related to the program," added Mike Healey, HCSU member. "We can't assist students who are not familiarizing themselves with the program later."

McFarland commented that the expected FTEs for the first quarter is 29,000, which is 10 percent lower than the previously expected 32,000.

"The enrollment pressure is so great that we can't afford to reduce our capacity," said McFarland. "We don't like to see that situation, but we have to adjust in response to these new circumstances."

Locals annoyed at students' parking habits

by Dixie Rector

Residents of the Delrose Manor area, located just north of campus, and the District Manor area, so it is a terrible parking area for the students. These students, who either don't want to pay for parking stickers or don't want to park in the Midway Drive-in, park instead in the area of Delrose Manor between 24th Ave. and 25th Ave.

"I've got up with it for over a year, and I don't believe I have to," complained Delrose Manor resident, Cindy Steadman. According to Steadman, students are parking in front of the gates that lead to her Triplexes on 25th Ave. They also are parking illegally in front of mailboxes, blocking driveways and garbage dumpsters.

"Our mailboxes are being blocked, and our mailman has to climb through brush and over things, just to deliver our mail. This is something she does not have to do."

According to Vera Patterson, Des Moines Post office employee, mailmen are on motorized routes, and they are not to deliver mail if a mailbox is obstructed.

"The mailman will just bring the mail back and they (the residents) will be notified by a letter somehow."

Lee Beasley, who also lives on 25th Ave., almost had her phone disconnect because she was not receiving her mail, and consequently did not receive her phone bill. Beasley and Steadman agreed, as do their neighbors, that they don't mind the students parking on their streets, but when they park illegally and make it an inconvenience, residences become irritated.

"We don't have the problem as bad here when we moved further up the street. But when we lived in Delrose, the problem was worse because of the reason we moved," she said.

Highline registration system to be revamped again

by Shari Day

New registration procedures are being explored for Spring Quarter registration, according to Booker Watt, Highline College Registrar. The changes are aimed at alleviating some of the congestion and long waiting time experienced during Winter Quarter registration.

The most dramatic of the proposals involves students taking a tab from a machine of rolled tape numbers (similar to the ones used at Jafco), rather than having to stand in line to register.

Monitors would then be posted on both levels of 8.6: a student could observe when their number was called.

"You would be able to socialize, goof off, or study rather than biding your time to stand in a line," stated Watt.

"That's really the only benefit I can see right now," continued Watt.

"Added Dr. Ken Command, HCC Vice President, 'I don't like the number system but if it's that instead of lines..."

Command does plan to study the feasibility of the plan by interviewing other colleges to see how it has worked for them.

"We don't want a system that looks great and is a mess when we open up," stated Command.

College officials are concerned that unforeseen problems as well as inconvenience to students.

Students at GRCC registered not only on a specified date but a specified time. The registration itself ran smoothly according to Richard Barclay, GRCC Registrar.

But problems occurred when hundreds of students jammed the college lobby to pick up registration appointment cards.

"There was just too much volume," said Barclay.

"We announced the date and time registration appointments would be available for the whole quarter, also at the same time," he added.

"The departments were told what appointments would be given out on a first come first served basis," commented Barclay.

One GRCC official who wished to remain nameless said, "It was utter chaos."

Watt said other proposals are also being considered.

"We are considering holding everyone to a scheduled day, including evening students," Watt explained.

Night students have been allowed to register at any time but according to Watt, some students abused the privilege.

"They (students) would register for night classes one day and then come in the next day, withdraw the night classes and register for day classes," he said.

"We found a few bad apples; it makes it bad for the others," he added.

"The system is designed to make it easy for everyone," Watt added.

Each quarter, a different group is first to register, thus allowing everyone a chance to be in the first group.

"We're trying to progress towards getting back," concluded Watt.

Van topples during recent Ski Club trip

by Betty Brunstrom

An eastbound Highline Community College van headed for Sun Valley, Idaho, overturned near Ellensburg on December 29 at 8:30 a.m.

None of the 13 students aboard were injured.

The van, one of three carrying the HCC Ski Club on a New Year's outing, slid on a frosty hill while heading toward Yakima. The rear of the vehicle was damaged in a 100-degree angle collision on the shoulder of the road. The van overturned, resting on the driver's side.

Midle Ringeon, driver of the auto, explained that the collision occurred after a 100 yard slide, and at a maximum speed of 30 miles per hour. He added that the van was heading badly since the beginning of the trip, as though the vehicle was suffering from unknown causes.

The passengers' escape was complicated by a combination of panic and the broken sliding door shut. An eastbound Highline Community van headed for Sun Valley, one of three carrying the broken sliding door shut. The rear of the vehicle was damaged in a 100-degree angle collision on the shoulder of the road. The van overturned, resting on the driver's side.

Advising center changes hours to cope with cutbacks

by Mary Dickinson

The Highline College advising center is rearranging its hours to better serve students according to Michael Grubek, assistant dean of student services.

The center will be open from 8 a.m. to 2 p.m. and from 3 p.m. to 8:30 p.m. Monday through Thursday, Grubek said. Friday will be open from 8 a.m. to 2 p.m.

The counselors will still be available in the late afternoon for students by appointment to discuss concerns relating to academic performance, career development, personal and interpersonal life situations.

According to Grubek, the Advising Center has been collecting data on the center's utilization for the last four quarters.

"We found that very few students use the center from two to five in the afternoon so the center will be closed during these hours," he explained.

The number of students drops off after lunch and picks up again around five. Another reason for the restricted hours is the availability of money to hire part-time help needed to keep the center open.

Full-time counselors will be pulled off their overtime duty to work shifts and teach night classes, Grubek said.

The main function of the center is to answer short questions.

According to Grubek, "absolute minimum disruption" should arise from the center being closed.

"I hope it's temporary. It means stretching out, but you can't stretch that much," explained Beverly Baum, HCC counselor.

"It's painful to lose money needed to support services that are important," she added.

The center will be open all day during the spring quarter, and will return to current hours by the second week.
Grand View
An oasis for disabled students
by Ron Del Mar

Grand View has many of the characteristics of any ordinary public school. Students reach the walkways between classes, playing and laughing cheerfully on their way to class. A beautifully-kept playground lies adjacent to the school which covers 7 acres and on clear days Mount Rainier graces the horizon. Students are kept busy mastering skills needed to survive in the home as well as job skills and the basic reading, writing and arithmetic.

Although Grand View offers its students most of the activities found in any public school, it is no ordinary school. Grand View gives students suffering from developmental disabilities, hearing impairments, mental retardation and Down's Syndrome the opportunity for an appropriate education.

I.
Grand View Students roam the walkways between classes on their way to class. The woodshop at Grand View is kept busy mastering skills needed from developmental disabilities, hearing impairments, mental retardation and Down's Syndrome.

Grand View helps students develop muscle, coordination, balance and also helps the children to rid themselves of basic fears such as fear of heights.

Grand View has its own Special Olympic team which enters area and state tournaments. They compete in an obstacle course, the 25-yard dash, bocce sweep and other athletic activities.

One of the goals of the physical education program is to build up the students' endurance. This is accomplished with the aid of a rebounder, which is a small, round, bouncy platform on which the students jump up and down on. This device, supposed to build up the leg muscles of the pupil, is harder than it looks, according to Linda Clen- mans, a physical education aide. "We see a gradual improvement in the student's endurance," she explained. "At first they may be able only last 30 seconds on the rebounder. Some students can now last up to two to three minutes."

An obstacle course, which includes something similar to the running through tires of conventional obstacle courses, helps in developing an acute sense of balance.

"The obstacle course helps them get rid of the institutional shuffle," Clen- mans emphasized.

Students who are not able to participate in the more active endeavors work with physical and occupational therapists. A wheelchair class works on progressing individual wheelchair skills.

Students at Grand View also get their share of reading, writing and arithmetic. This program is defined as fundamental academics.

Here students learn how to read college-like calendars, simple adding and subtracting as well as some writing skills.

"We want students to learn how to write their own name. That way they might be able to sign legal documents," observed instructor Jackie Carrol.

Students at Grand View may be handicapped, but judging from some of the items produced in the arts and crafts department, it is hard to tell.

Items manufactured are made available for sale to the public in the "Country Store on campus. Any money made by the store is put into the school's student fund.

"Some students will probably never be totally independent."

"We have a few regular patrons that keep coming back," Jackie Whitney, secretarial aide, said. "Our busiest season is usually around Christmas."

Merchandise sold in the store ranges from snow hats to wooden yo-yo's. Embroidered rugs, straw baskets, cushion covers, jellys and jams, aprons, vents and stuffed animals are among some of the items that line the shelves.

"Instructors come up with some very creative and ingenious ideas for the students," remarked Whitney.

During harvesting season, vegetables may also be found in the store, grown by the Horticultural Department.

Younger students are put into preschool. Here the teacher works with them to improve their cognitive skills, fine and motor skills, communication and self help.

According to preschool teacher, Gail Lirard, students have improved 25 to 50 per cent in all areas since they began attending the school year. "One boy has improved 50 per cent in his cognitive skills this year," she confirmed.

"Getting the children to talk is a big accomplishment," she added. "There is on girl in the class who is hard of hearing. We use some sign language in the class room. It is just another way to communic- ate," she continued.

Students are taught to conquer fear of heights.

Unfortunately not all students at Grand View are able to participate in many of the activities that the school offers. The severe and profoundly handicapped students must constantly be under staff supervision, working almost in a one to one relationship.

These children are unable to communicate and only a few of them can understand what is said to them. One method in which an aide used in communicating with a little girl was by using pictures. One would point to a picture of a child eating and the girl would then interpret this appropriate- ly. To get the child to drink her milk the aide would point to a picture of drink- ing milk.

"Some students will probably never be totally independent," stressed Charlene Behrens, principal of Grand View.

According to Behrens, the success of the Grand View program is determined when a student is able to enter a less restrictive environment upon leaving the school. Should at the age of 21, a student not have developed any inde- pendence, the school will attempt to place him in a group home or a sheltered work shop. Grand View has an active job placement program. Several students are currently working at off campus jobs.

"We work closely with the em- ployers," Behrens explained. "We continue go in to monitor the students program."

"A large part of our program depends on volun- teers."

"Students' parents are extremely supportive of the school," she added. "Once, the State Association of Retard- ed Students wanted to close Grand View because we weren't meeting the state's desegregation requirements. The parents turned out in unanimous support to keep the school open."

Although Grand View is a public school, funded both by the state and district, there is a need for volunteer workers in the program.

Many area colleges, including Highline, give credit in their community involvement program for volunteer work at Grand View, according to Whitney.

"A large part of our program depends on volunteers," she emphasized.

Located on Military Road and South 224th, Grand View is part of the Kent School District. It also serves the Auburn, Enumclaw, Federal Way, Highline, Renton, South Central and Tahoma school districts.

Since its opening in 1965, the school has added new dimensions to its cur- riculum. Today's Grand View facilities include a gymnasium, swimming pool, wood shop, a playground, and arts and crafts centers, a nursery, gardening and home life classes.

Grand View has an enrollment of 181 students and a staff of 25. Students at Grand View range in age from three to 21. One aspect in which this school is unique is that any child admitted, no matter how severely handicapped he may be.

"Never underestimate what they can do!"

Each student is allowed to work and progress at his own personal level. Grand View lets its students exceed beyond the stereotyped molds that are put on handicapped children. They are allowed to explore their capabilities to the fullest.

"Never underestimate what they can do!" shop instructor Ken Merager warned.

Merager's shop is one of several quality programs the school offers that teach students job skills necessary to become a contributing member of society.

In the shop, students learn a little bit of everything, whether it be observing or actually doing the work. It all depends on the individual ability of the student. The scheduling is flexible, allowing each student to work at his own pace.

On the particular day, students were busy sanding woodblocks, obviously bored by the monotonous activity. Merager's philosophy is to make his pupils learn how to do the boring jobs before venturing into the more desirable tasks.

"If they can learn how to do the boring jobs, they'll be better off in the job market," he explained. "You'll get fired because you got distracted during the boring job, but they'll be able to do the job."

One of Merager's former students is now working in an aluminum factory in Kent, earning "very respectable wages."

All items produced by the shop are used by the students in their classes or sold in the "Country Store on campus. Any money made by the store is put into the school's student fund.

"Some students will probably never be totally independent."

"We have a few regular patrons that keep coming back," Jackie Whitney, secretarial aide, said. "Our busiest season is usually around Christmas."

Merchandise sold in the store ranges from snow hats to wooden yo-yo's. Embroidered rugs, straw baskets, cushion covers, jellys and jams, aprons, vents and stuffed animals are among some of the items that line the shelves.

"Instructors come up with some very creative and ingenious ideas for the students," remarked Whitney.

"A large part of our program depends on volunteers," she emphasized.
Dear Highline Coping,

I'm sorry to say that I don't like the way our school is handling the night lighting situation.

I feel that it is unfair to allow students to walk around the campus at night in almost total darkness.

Something should be done about the lighting so it will be safer for students, faculty, and visitors. Just because of the financial situation, it doesn't mean our lives should be in danger.

I feel there is a lack of responsibility on the part of security since the incidences that occurred on campus. They said they were going to increase security measures, and I fail to see the improvement.

I'm not the only person who feels this way. Other people that I have talked to feel the same way. Do you not have to do something about it?

I feel I should be able to walk to my car in safety. The campus should be lit well enough so I could get to my car unattended.

I sincerely hope that this problem will be taken care of immediately.

Sincerely,

Julie Hand
Highline student

Dear Julie,

We talked to Campus Police Chief Jack Chapman regarding this problem of the lighting situation.

Chapman feels that, for the most part, trees and sidewalks are well lit, but he will make recommendations for better lighting in a report to Dr. Command, vice president of Highline College.

"There are two part-time officers on campus."

Sincerely,

Julie Hand

HCSU Column

'Big events' slated for Highline College

by Joe Elston

Here we are—1981, Winter Quarter at Highline Community College. The "big events" in the national news are Ronald Reagan taking the Presidential Oath, the Hostage Crisis, and whether or not the economy is stable.

But here, closer to home, the Highline College Student Union is announcing two significant events that should interest students and faculty alike: the HCSU town hall meeting and the opening of the Quiet Lounge.

The town hall meeting will be held in the Lecture Hall (Big. 3) on Tuesday, January 27 at noon. Everyone is invited to sit in and discuss the proposed budget cuts and tuition increases. It is of vital importance that students planning to continue their college education, attend the meeting.

Important issues will be discussed such as the 500 FTEC's (Full Time Equivalent students) who will find the doors of education closed to them due to the lack of funds. Moreover, if you are a student who is enrolled in the Commercial Art or Real Estate programs you should be concerned because programs under the spotlight are in danger of being terminated.

If you are one of the lucky students that make it through the door, your favorite instructor might not be there through with you as a result of the 10% cut in instructional staff.

Now is the time to be heard. Come to the town meeting and express your concerns. I know how you feel.

Similarly, the opening of the Quiet Lounge (Big. 15, room 108) will be soon.

Mailbox

Don't axe our program!

Dear Editor,

We've had teachers that have taught us something, but when a teacher can take us, as raw material, and mold us into polished professionals capable of succeeding in the real competitive world with confidence, we have had a master.

John Amendola has been doing this at Highline Community College for four years. Together with Ken Dankert and Howard Bullock the graphics program has been preparing qualified commercial artists for Seattle.

But, argue the other colleges with their generous cut in instructional staff. Are we still another graphics art program, if Seattle is already saturated? Because "quality" was not available.

John has one of the smallest registrations and he's been doing this at Highline Community College for four years. Together with Dankert and Howard Bullock the graphics program has been preparing qualified commercial artists for Seattle.

And there sure are an awful lot of very healthy-looking people running around this campus.

We want to encourage and inspire students to take a strong sense of responsibility for the community by proving that they care, or someone you love in need of a blood donation. We'll sure find out on February 4 when the Puget Sound Bloodmobile comes to HCC for donations.

And there sure are a lot of students here, more than 40 students not pregnant, weigh 110 pounds or more, are not anemic, have not had hepatitis, or are not in need of a blood transfusion themselves.

And there sure are a lot of very healthy-looking people running around this campus.

We want to encourage and inspire students to be more responsible and in touch with the needs of their community by proving that they care, instead of just being sort of concerned and then forgetting or ignoring this important cause.

It's pretty grim to imagine yourself or someone you love in need of a blood transfusion and then not having enough or any at all. Think about it and then do something about it. Donate blood on February 4.

Sincerely,

Joe Elston

For those students who are forced to study in the Student Service Building (Big. 4) or the cafeteria as a result in the increase in enrollment and lack of space, relief is near. The HCSU is planning to open the Quiet Lounge in a week or two.

The hold-up in the opening is due to the late delivery of the furniture. Although most of the furniture has arrived, last minute details are being done.osen lights, hanging banners, and arranging the furniture to make a comfortable atmosphere.

The time schedule and actual date that the Quiet Lounge opens will be announced at the town hall meeting. Hope to see you there.

If you have any questions, feel free to contact Joe Elston at the Student Program Office (Big. 4, room 201) ext. 255. Elston's office hours are 1 p.m. to 2 p.m. Monday through Thursday, and Friday 12 p.m. to 1 p.m.
**Faces in our crowd**

**Korean nightmare recalled by Chapman**

by Linda Polinger

The 1950's was a time of patriotism and much of this attitude was reflected in the young people of the United States. When the Korean War broke out in 1950 many young men were more than eager to fight for their country.

But, little did he know that in only a few months he would be captured by the Chinese and held prisoner for more than two and a half years.

"I volunteered for the War," Chapman, campus police chief was different. "I don't think that any of us thought about not going," Chapman said. "I knew that they would send me where they needed me."

On the morning of November 30, 1950, Chapman's unit was over run by the Chinese People's Army.

"Through sheer superiority in numbers, wave after wave of Chinese, in the front line with small arms, rose upon the skyline, seeming never to cease," he explained. "They grabbed our weapons, ammunition, medical supplies, and any other valuables they could find."

Many of the soldiers who had been taken prisoner were suffering from wounds and the Chinese used every means of effort to treat them, according to Chapmen.

"I recall one G.I. lying on the ground next to me, a piece of his stomach blown away by a Japanese type mortar bomb," he said. "The only help we could offer was crying and screaming for help but was reduced to the care of the Chinese Communists.

For approximately the next three weeks we marched under either Chinese or North Korean guards, tattered, torn, cold and suffering, some soldiers scraping the road to live by the Chinese Communists.

"We were kept behind," he explained. "The Red Cross finally came in and told them that they had 24 hours to release us."

After returning to the U.S., many P.O.W.'s had emotional problems which related to their experiences in Korea, according to Chapman.

"He, luckily, was not one of those men."

"I made up my mind that I wouldn't let this affect me," he stressed. "I saw too many prisoners of war come back and turn into alcoholics etc., and ruin their lives."

"There is an adjustment period when you get out. It takes a while to rehabilitate yourself to be free again because you guard what you say and do," he added.

Chapman admitted that during his first two years back he had nightmares about his experiences.

"I used to wake up at night screaming," he explained. "I didn't bother me now because I chalked it down as an experience."

"But, it is something that I'll never forget," the former P.O.W. added.

"I'm not one of those men that have any hostile feelings toward the Chinese or U.S. government for sending him to Korea."

"When I was a prisoner of war, I disliked them (Chinese) for holding us and for how they treated us," he said. "It remained with me for more years after I came back."

"I don't know how I would react if I came face to face with a Chinese soldier today," Chapman concluded.

**VA changes requirements for student veterans**

The Veterans Administration has changed the requirements for those receiving VA benefits, according to Booker Watt, Highline Community College registrar.

According to the previous standards, any student receiving 13 or more credits of a falling grade would have his benefits suspended. Benefits could only be reinstated by agreeing to counseling through the VA office in downtown Seattle.

With the new standards set by the VA, students receiving benefits must now meet the minimal academic standards Highline College has outlined in its 1980-82 catalog.

"These students not maintaining these standards will have their benefits suspended," according Watt.

Instead of mandatory counseling through the VA office, the students have two options. They have the choice of either filling out an information sheet sent through the mail by the Adjudication Department of the VA, or of obtaining counseling through the VA office.

The purpose of the information sheet is to gather all information necessary standard. Student may qualify for the reinstatement of benefits.

"We have a number of students in this category," Watt said. "However, these students are being contacted by the registrar's office to be informed of the new guidelines.

Watt wishes to reassure these students that they will not be told to leave school. Also affected by the new guidelines is the college, which may now be held accountable for any over-payment of benefits and can be made to reimburse the VA for over-payment of benefits.

This is where the problems may arise, according to Watt. Although he does not wish to suspend benefits to any student for violation of the standards, Watt must also take the college into consideration.

For more information about the policy changes, contact the Highline registrar's office, 878-3710 ext. 242.

---

**Bloodmobile to visit Highline**

by Donna Pearson

The Puget Sound Blood Program bloodmobile will make its annual visit to Highline Community College on February 4.

The blood drive will take place in the southeast corner of the cafeteria from 9:00 a.m. to 3:00 p.m. It takes only one hour, and no appointment is necessary.

An average of only forty students have been showing up each year to donate blood, according to Laura Koenig, Student Activities Director.

With 10,000 students here, that's only 4 per cent.

"We've tried various means of publicizing the blood drive and the turnout has been consistently low," remarked Koenig. "This year for publicity we have someone running around in a big red heart costume (signifying a beating heart) in need of a blood "Drive Today" on it. That should draw some attention.

"If people can just take the time to realize what their time and effort can do by taking one hour of their time to donate blood it will be tremendous.

Misty Morning Solitude

Photos by Randy Lidral
Poem by Judy Elrod

An eerie silence swept over me
As I peered into the morning mist,
I stood alone in a sleeping world
waiting for the sun...a new day.
I walked at the water's edge
watching the boats silently rocking in the harbor.
A long skyblue overhead and I knew I was not alone.
As the fog lifted, the quietness of the dawn vanished
bringing each life a new challenge.
Ulffers finds KHCC news "field of opportunity"

by Donna Pearson

A good example of how hard work, consideration, patience, talent and a genuine enjoyment of one's work pays off is the budding career of KHCC news producer Dave Ulffers.

Ulffers is a student in the TV News Production and Radio Broadcast newswriting class and is also involved in producing KHCC news. He was involved initially in helping Faye Harold (<last quarter's producer>) start KHCC news fall quarter.

For those not yet acquainted with KHCC news, it is the news program that appears on the television monitors in Building 6 (registration building) on Wednesdays and Fridays. Mini documentaries are being shown on Mondays, using last quarters final projects.

"I have been involved in television since the age of six," he said. "I'm interested in directing television and film production."

"Last quarter I took photography classes and got really interested in television," Ulffers said.

When asked what advice he had for prospective students in this field, he said, "You need to enjoy what you're doing and then put your whole heart into it. It's not hard when you really enjoy it. You just step in and take on the broad spectrum of what it involves."

"You have to be kind and considerate and help other people out, and you also have to be on your own and learn more." Ulffers continued. "It's important to build good rapport, you also make good contacts.

"Try to help other students because I know what it's like to be in their position," he added.

"Dave appears to be thinking about it all the time. His presence in the television news class is one of the major reasons for the success of the news program production," commented Julienne Crane, Journalism/Mass Media and TV News Production instructor.

"He's self-motivated and turns problems into challenges," continued Crane.

Ulffers expressed that the atmosphere is very professional in the television studio, mostly because of all the cameras and technical equipment around.

Expressing concern Ulffers remarked, "I'm afraid that with the budget cuts they might cut this TV production program because it's a new, experimental pilot program. I'd hate to see that happen because it has helped me out a great deal. I've learned through the newscast, studio production and reporting.

"Not many community colleges have a program like this. It's a good way of learning," he emphasized. "You feel all the same pressures, just like on the job experience. I'm really pushing for them to keep this program.

"Because of the newscast, when we visited KOMO-TV, everything was more familiar. It was good to know that our newscast is following a commercial broadcasting format.

"Being producer takes a lot of time, there's a lot involved, but I don't mind all the work because I really enjoy doing it," he remarked.

"During class, one hour is spent on scripts and one hour on production.

Everyone has their own role and knows what to do and what their responsibilities are."

Ulffers has an internship with KVI for the Journalistic Media program here. As a work/study co-op, he receives credit for Ulffers remarked that his main career goal is television directing.

"At KVI I work primarily as a newsman with the newscasters, keep up on wire copies, and do phone interviews for information on stories," he explained. "I'm learning the overall production, how a radio station operates, and how the reporter writes his stories.

He also works with the radio wire, makes cuts from the wiretap and transfers them to cartridges to go on the air."

"I'm enjoying the internship better as it goes along. Last quarter Ulffers applied for one of the three KING-TV broadcasting scholarships awarded here and won one."

"I would prefer to go to technical college and start a career in production and work my way up through experience," he stated. "That's one of the reasons I took the internship with KVI."

Ulffers remarked that his main career goal is television production and documentary work, including PM Northwest, Northwest Broadcasting and Seattle Tonight Tonight, he added.

"The field is so broad, there are so many different areas that I think would be interesting so I'm not sure as to what specific field I'm going to go into. It's just a matter of familiarizing yourself with it," he said.

"All the hard work is worth it in the end for the experience you get," Ulffers concluded.

CBS newsman Pappas reports on world hotspots

by Gordon Weeks

"It's wrong," it was Reagan and the Republicans that said the United States was weaker than Russia."

As the top CBS military correspondent, like Pappas has seen, and reported, from the world's military hotspots, and a Highline audience in the Lecture Hall had the chance to hear his reports on January 13.

Pappas' noon lecture was cancelled because of activity in the Iran hostage situation.

"I was asked to stay in San Francisco because the hostage crisis is at a critical point," he explained at his 7:30 lecture. "But we may have something very, very soon--tomorrow (January 14) is a very important day in this experience with the hostages."

At the time, Pappas felt there were still problems in the hostage negotiations, but that "Iran does want to end this" before Reagan took office.

"Ronald Reagan happened and that's why there's a difference," Pappas stated. "It is true that President Carter's losses in the election will probably lead him to the one thing he wants--the release of the hostages without bloodshed.

"This is what the Iranians feel is most likely," he said. "That Reagan, with his reputation for frontal confrontation, will decide to use force against them."

Pappas gave former President Carter credit for trying to negotiate with the hostage situation and negotiations.

"Jimmy Carter has worked hard," he exclaimed. "His heart and soul have been involved in this very deeply.

"Wouldn't it be a fine thing for him, on his last day or days in office, to welcome back some of these people?"

Pappas also discussed the Russia-U.S. Poland conflict, pointing out that though it's quiet on the battlefield, the "peace" is deceiving.

"The Soviets still have most of their divisions surrounding Poland at top combat readiness," he said. "Russia could invade Poland from a standing start."

Poland is a vital link to Russia, but not nearly as important to the U.S., according to the correspondent. "It is not predictable what President Reagan will react if Poland is invaded, but no directed American military action is expected," Pappas reported.

"I don't think we'll be sending any forces into Poland to counter the Soviets if Poland is invaded."

"I don't think Poland is listed as one of our vital interests," he added.

Pappas spoke about the MX missile—"Reagan may want another system"—the inauguration—"a return to glimmer in the national capitol"--and military power.

"The election of most of the experts is "Yes, the U.S. is ready to fight, but I'm not sure that's another question."

The Vietnam War and the coinciding movement by the Russians in the hopes the switch of power from the American to the Soviets, according to Pappas. "Why has this happened to the United States?" he mused. "The Republicans say it's the Democrats' fault, and the Democrats say it's the Republicans' fault. In all actuality, the decline of American military power began three administrations ago."

The problem for the military draft is not lack of manpower, but lack of quality, manpower, according to Pappas.

"The law manuals in the Navy are being written down. I understand, from the [junior] grade level to the [senior] grade level," Pappas said. "They (the service men) can't understand the manuals—it's gotten that serious."

Pappas related some of his adventures as a journalist, including witnessing the La Guardia Airport explosion, and being shoved aside by Jack Ruby, who proceeded to shoot President Kennedy's slain assassin, Lee Harvey Oswald.

"I came out and stood at the end of the line, right where the car was to take Oswald from the city jail to the county jail. And what I didn't know was I was standing in front of Jack Ruby, who was waiting to shoot Lee Harvey Oswald."

"I was pushed and I looked up and there was a struggle and the only thing I could say was, 'That's been shot! Oswald had been shot!'"

His monologue often turned humorous, entertaining the audience being a travelling reporter, and the town he was visiting becoming "Wallado, Walla." In one story they liked it so much they named it for the reporter."

"I just came from Walla Walla," he explained. "Lilac oven is very nice and they liked it so much they named it for the reporter."

With that kind of logic, Pappas returned to New York, New York.

Art & Entertainment

January 24, 1981

Ulffers' responsibilities as KHCC News producer include organizing and time the "Ulffers News Express," a weekly television program that goes to air on Mondays.

"I'm interested in directing television and film production."

"The field is so broad, there are so many different areas that I think would be interesting so I'm not sure as to what specific field I'm going to go into. It's just a matter of familiarizing yourself with it," he said.

"All the hard work is worth it in the end for the experience you get," Ulffers concluded.
In 'Bedtime for Bonzo,' starring Bonzo, Ronald Reagan, and Diana Lynn, was on Channel 13 in January 26. Raisins weren't invented yet.

by Gordon Weeks

There's a scene in this Ronald Reagan vehicle that would make Carter, Khanemini, Ford, Bush, Nixon, and all of his sniveling cronies dote with the slightest semblance of wisdom unite.

Our new president, after he being told he can't marry a girl because of her ancestry, vows vengeance upon her sweeties father.

"I'll make him an example," Bonzo grimaces. And thus ends the most violent and controversial scene of Ronald Reagan's 1951 comedy fiasco, "The Next Time" (1959).

Let me tell you this right off—this Reagan film would make Carter, his sweetie's father, explode. And thus ends the most violent and controversial scene of Ronald Reagan's 1951 comedy fiasco, "The Next Time" (1959).

Reviewing a movie on TV, especially a 20 year old film, is unusual I realize. But getting the chance to review a movie co-starring an ape and the president is even more unusual. And to the slight nausea of a native Californian from the monkey's "mama." It might be better written, or better acting could have been involved. But the film is corny, and sometimes exasperating.

We'll never get him without the bananas.

Many of the weaver's sell their wares in an exhibit running currently at the Southwest King County Arts Museum. The woven art varies greatly among the artists, who are listed in the exhibit, which was organized in 1937, ranging from simple to expensive, ranging from simple to expensive. Members of the Seattle Weaver's Guild are displaying their wares in an exhibit running currently at the Southwest King County Arts Museum.

The exhibit runs through the month of February, and will be open from 11 a.m. to 3 p.m. at the museum, located on the fifth floor of the Highline Library. The museum is located on the fifth floor of the Highline Library. Members of the Guild do much more than weave. Many are involved in community service and education, with several members holding workshops on weaving. The weaving teaches the public about the techniques and history of weaving, and encourages others to learn the craft.

Women defeat Olympic, up region mark to 3-1

by Steve Walters

The Highline College women's basketball team moved its season record to three and one, erasing Olympic Community College January 17, 73-46.

Coach Dale Bolinger said that the Thunderbirds started out slowly in the first half, trailing 22-15 at one point.

"The first half was a massacre," he said. "We took it to a whole new level when we got going."

After leading 26-24 at halftime, HCC pulled out to a 43-35 lead with 15:30 to go in the second half.

"We did the things we were supposed to do and it showed," said Bolinger.

Highline started league play at Grant Harbor January 3 by strangling the Chokers, 73-46; as five T-birds scored in double figures.

HCC's balanced scoring attack was led by freshman Kelly Lyons (14 points), sophomore Linda Pornhold (14), January (13), sophomore Tammy Bailey (12) and Armstrong (11).

Bolinger started the game by full-court pressing, which worked very effectively.

HCC's number of shots made the difference in the outcome as both teams shot about the same from the field. The T-birds scored 30 of 53 attempts (57 percent) while the Chokers converted 27 of 50 (54 percent) for a 10-point margin.
Highline tops Peninsula in overtime

by Roger Haight

Highline overwhelmed the Peninsula Pirates, 61-56, in two overtimes Wednesday night in the Pavilion to raise its Region I1 win-loss record to 3-2.

Roger Radiff, Doug Hale, and Jeff Valentine combined for 46 of the T-birds' 61 points to direct the victory. Radiff, the game's high scorer with 17 points, hit an 15-foot jumper at 1:30 remaining in regulation time to give Highline a 56-54 lead. Nineteen seconds later, Ralph Wells of Peninsula hit one of two free throws to tie the score at 54-54. Valentine grabbed the rebound on the missed shot and HCC called time out.

At the 15-second mark, Valentine hit a 3-point shot to give Highline a 58-54 advantage with 46 seconds remaining. Peninsula missed shots the next two times down the floor and had to get the ball back. Radiff hit three more three-pointers, but Valentine and Dickens all grabbed key rebounds to help tenure the victory.

The T-birds appeared to be in command early as they jumped out to a 12-6 lead in the first seven minutes of the contest. Peninsula scored the next two baskets, however, to knot the score at 12-12, but then Hale scored three straight hoops and Terry Renner made a move and dribbled the length of the court for a score to put Highline up by eight points.

Highline netters take fifth in state tourney

by Bryan Jones

After losses to the top three teams in the state (Championships the Highline Community College women's volleyball team managed a fifth place finish.

Spokane won the three day event held a Highline. Last year, SCC finished fourth. Last years champ, Broomell said. "At times we played exceptionally well and at other times we looked flat. We played flat in the match, against Green River and that was a vital one," Broomell added.

Last year Highline finished third in the same tournament in what was one of the T-bird's most successful teams ever. This year's team was almost equally successful as it posted a 12-0 mark in the Coastal League. This is the second straight season in which Highline has gone undefeated. The T-birds have not lost a league match since 1978.

The sophomores left the team are Myrna Jacobsen, Barbara Moores, Nancy Snyder, Sandy Stone and Luane Sinkey. "The sophomores played exceptionally well," Broomell lauded. "They were the team's workhorses and they really came through and played with a lot of heart. The freshmen who are eligible to return are Melissa Castanza, Debbie Patton, Tammi McCullough, Val Molynoo, Kari Raumussen and Vicki Rydon."

It was probably the toughest team in the league, and afterwards he reiterated that, saying Centralia is one of the best teams he's seen while he's been a coach here.

The 46-44 loss to Centralia was very hard to take, Harrison said. The players "did exactly what we wanted," he explained. "They did a super job." With the score tied at 15-15 in the first half, Highline began using its spread-out offense, and it worked well, according to Harrison. Radiff scored 19 points in the first half.

The T-birds trailed by two points at the end of the game and in a last-second chance to tie it up, but the shot was missed.

Olympic College traveled to the Highline campus January 19 and played for a 43-43 tie at halftime when the power went out in the Pavilion and the game had to be completed January 16. In the second half, Highline got ahead quickly and utilized its spread-out offense to get some more points. Highline led 50-55 and, Radliff had the scores, with 21 points, Valentine got 18 and Jerome Sampson had 12.

Harrison emphasized that the squad is improving all the time and works better together as the season progresses.

"Everyone that has played has done well," he said.

Center Doug Hale injured an ankle and missed several games while he was recovering. Harrison lauded the efforts of Valentine during Hale's absence and also said that Arnie Pokken and Steve Turcott made some good contributions.

Highline lost its first Region I1 game of the season January 3 at Grays Harbor, but came back with a victory over Clark CC on January 7.

The T-birds have just three home games remaining: tomorrow night against Lower Columbia, Wednesday against Grey Harbor and February 7 against current Region I1 leader, Centralia.

Starting time for all three games is 7:30.
