Speakers debate role of Moral Majority

by Dave Middleton

A lively debate between two Moral Majority representatives and two members of the Green Grange Church of God took place at HCC's Midway Center on Friday, December 11, 1981.

The Moral Majority was represented by Reverend David Bloom and ReVeverend Ken McFarland. The other side was represented by Reverend Robert Ridge and Reverend Bob McFarland, head of the organization's state chapter.

Reverend Bloom argued that the Moral Majority is important in defending moral values, while Reverend McFarland said that the Moral Majority is a brainchild of the New Right.

Reverend Ridge believed that the Moral Majority is woefully lacking in love and grace, while Reverend McFarland argued that the Moral Majority is effective in defending moral values.

The proposed solution is to make these religious concepts more appealing, according to McFarland.

The proposed solution is to make these religious concepts more appealing, according to McFarland. The Moral Majority is working to improve its image and make its message more accessible.
Money is tight. Many students are becoming more aware of this fact as they try to get financial aid to pay for rising tuition rates for higher education.

According to a report on college costs in Washington, compiled by Washington Natural Gas, many economists say college and university costs will probably continue to grow faster than family incomes. The recent predicted costs at Washington's private four-year colleges and universities would rise 16 percent this fall.

However, said Edward Treanor, a counselor at Highline, "All tax supported schools are pretty good bargains compared to private schools."

Currently, the University of Washington and Washington State cost $1,069 per quarter for tuition and fees. Room and board costs and additional $2,118 for U.W. and $2,004 for W.S.U.

Directly or indirectly, rising costs in other areas affect the student. For example, Treanor, (vice to the University of Washington), said, "The cost of housing has gone up. Consequently, Area have become a premium." Tuition and fees for community colleges rose this year from $182 per quarter to $185. It is scheduled to increase to $173, according to Treanor.

Highline Foundation starts campaign to raise funds

by Kathy Smith

In the midst of rising costs everywhere, Highline is attempting to raise funds through the Highline Community College Foundation.

The Foundation, nearing its tenth year in existence, is now engaging a full-time money raising campaign through newspaper advertisements and brochures. A raffle is scheduled for early in 1982, and a summer fun-run is planned to raise money and make the students aware of the Foundation.

Ted Treanor

As a result, more students are using financial aid such as grants, scholarships, loans, etc. to pay for their education. However, scholarship funds aren't keeping pace with rising college costs or the number of students competing for them, and other types of aid are becoming harder to obtain.

According to Jeff Abrahamson, director of financial aid, the only aids available at Highline until the summer quarter are basic grants and student loans.

 Pell Grant Program, formerly Basic Education Opportunity Grants is open to many undergraduate students enrolled at least half-time at an eligible school. Grants range from $140 to $1,070. Family income, family size and assets are determining factors.

Students enrolled at least half-time and in good standing, or accepted for enrollment at an accredited school in the state of Washington are eligible to receive a Washington Guaranteed Student Loan. Undergraduates can receive loans up to $1,220 for all undergraduate years combined. Graduates are eligible to receive up to $2,000.

When determining need, things such as how much federal assistance the student is already receiving, the number of members in the student's family and how many are enrolled in college are taken into account. For most types of assistance, financial need must be proved. Currently, according to the College of Scholarship Service, financial need is defined as the difference between the cost of attending college and the total amount the student and/or parent can afford.

This procedure for determining eligibility will be changed by the Federal government beginning in 1983.

According to the report, the U.S. Department of Education has yet to decide on details; however, early indications are that there will be, on the most part, higher parent contributions than those produced by the CSS need analysis method. A Financial Aid Form must be filed by the student to qualify and Pell Grant or a loan. Forms that have been accurately completed and submitted to CSS should take from ten to fourteen days to be processed; according to the report.

Billie Hilliard, counselor for financial aid at Highline, stresses getting the FAF in January 1 so as to get it back earlier.

After the CSS has received the student's FAF they will send a need analysis to the colleges indicated by the student and the financial aid officer will determine how much the student will receive.

This process can take a long time so Treanor suggests that a student should get your name in the hat pretty early. This is the time.

For students who can't prove need, there are alternatives such as cooperative work experience and apprenticeships. However, Treanor's advice is, "Don't wait around. You don't know when you'll have to come up with the money."

The financial aid officer in Bldg. 6 has information on all types of aid.
Holiday celebrations vary in different cultures

by Lillie Parks

Christmas is perhaps the one day of the year that fills the heart of the world with joy. Ancient times of the ninth century saw people of all races hold festivals or feast days usually in reverence to their gods. "Christmas is the most important celebration in Christian history as the birth of Jesus is recognized, and people all over the world express their joy and devotion in their own individual ways," wrote Marguerite Eckis, author and educator.

The celebration begins with Advent, the first Sunday in December, and continues on to Twelfth Night, January 6. In many countries, Christmas celebration is intertwined with ancient folk and beliefs that have been handed down from the past.

"This may be especially true in Africa and Asia where the Christmas story is comparatively new, having been introduced during the past century by Christian missionaries," Eckis wrote.

Lunar New Year

The Lunar New Year is a festival celebrated by some Chinese and Vietnamese people.

Auditorial labs: Students work at own pace

Auditorial labs, a program designed to let students work at their own pace, will be offered again for Winter Quarter, according to Gity Erickson, Natural Sciences department head.

"The program has had a positive effect on the students," she said.

"The auditorial program allows science students to work at their own pace with instructors providing help.

"The lab holds 60 students and is open from 8:30 a.m. to 4:30 p.m.," Erickson explained. "To see if this is an effective project, a sign-in-sign-out format is used. This is placed on an open participant basis with self-paced learning units which are in conjunction with the auditorial lab."

Erickson recalled that she and other Natural Science instructors worked at making plans for the lab during the fall before it was actually put into effect.

"The lab holds 60 students and is open from 8:30 a.m. to 4:30 p.m.," Erickson explained. "To see if this is an effective project, a sign-in-sign-out format is used. This is placed on an open participant basis with self-paced learning units which are in conjunction with the auditorial lab."

Gift Giving

A practice set aside for a certain period of the year in order that people may share the good things of life with each other is gift giving.

In Scandinavia, gifts are received from little gnome-like creatures that live in the attic throughout the year; St. Nicholas and his companion Peter bring gifts on December 6 to children of northern European countries. In the Middle East, gift giving is closely associated with the Nativity with the Three Wise Men arriving by camel with gifts for the children.

Christmas Tree

The myths and legends connected with the Christmas tree are many and varied. They came down to us from the pagans and Scandinavians on the way the tree was Christianized in Germany and Holland, in Sweden, Norway and Denmark long before it had been made holy in the same manner among the English-speaking people.

According to Eckis, "This little tree, a young child of the forest, shall be your heart tonight. It is the word of peace, for your houses are built of it. It is a sign of endless life, for its leaves are ever green. See how it points upward to heaven. Let this be called the tree of the Christ-child. Gather around it, not in the wildwood, but in your own homes; there it will shelter no deeds of blood, but loving gifts and rites of kindness."

Special Incentives for veterans include:

* No Basic Training Required
* Technical Training at your option
* Special introductory one year mini-membership
* You automatically retain your rank no matter how long you've been out of the service.

* You receive full military pay while attending Tu.
* Your training will be directly related to civilian careers
* You know precisely what training you'll be getting and exactly when you'll be going through school, before you enlist.

and Presi-idents) has been getting a lot of publicity. A statewide student organization, with the community college communication system.

Another organization is the community college system. It began in 1968, one year after CORP was founded. It is appropriate to tell you something about CORP.

CORP was founded in 1968, one year after the community college system. It is appropriate to tell you something about each college in the community college system. There is a different college hosted each month. There is a different college hosted each month. There is a different college hosted each month. There is a different college hosted each month.

The goals of CORP are:

(1) CORP strives to bring community college students together as a cohesive group.
(2) CORP strives to develop a relationship between community college students and relevant local businesses.
(3) CORP strives to understand the financial aid programs and to study the newly created financial aid programs.
(4) CORP strives to educate community college students about the financial aid programs.
(5) CORP strive to understand the financial aid programs.

(f) CORP strives to research administrative procedures. CORP's major concern this year is the reorganization of the community college system.

This is the season to be humblebug.
Interior Design opens its doors

by Mimi Malgarini

The Interior Design Technology Department held its annual open house exhibit yesterday to display their completed projects for the Fall of 1981.

The host and hostess of the exhibit were members of the Interior Design 161 class. The class dealt mainly with plants and accessories, which are considered the finishing touches to the interior, according to Helen Wolff, interior design program director.

The open house featured the entire area of the interior design department, from floor plans to wall hangings. Although exhibits were represented from all the classes taught in the department, Wolff said that emphasis was placed mainly on plants and accessories.

"Everyone, including the outside public, was welcome to the open house to view the individual projects, according to Wolff. The purpose of inviting the public was because 'it was an introduction to the holiday season, and accessories are probably used more extensively in an interior at that particular time. This also gives them the opportunity to see what is done in this department.'"

Each of the 25 students from the 161 class contributed three items to the exhibit. One was a design, another a hanging, and the third a place, all of which were worked on throughout the Fall quarter. In addition, there were instructor selected projects that were submitted by students from the other interior design classes.

Among the many projects on display, were plants which the students had grown to make suitable for residences or commercial building interiors. There were also hangings of macramé that could be used as permanent decorations for the interior. Such items as these served the purpose of replacing items like pictures and sculptures in the home, according to Wolff.

Students from the 161 class were also instructed to create a design on their own. "They have been taught different styles of designs," said Wolff, "and they were assigned to create one design that might be used with figurines, with flowers, or a combination of materials."

This model house designed and created by Shirley Shadowro was among the many items on display at the Interior Design Technology Department's open house. Photo by R.A. Brown.

Food drive boosts spirits

As a token of their good will and to give a boost to this season's Christmas spirit, Highline's student government has been holding a food drive this past week.

Tom Jackson, HCSU Council member, inspired the drive.

"There seems to be little Christmas spirit this year," he said. "We want to help motivate more spirit on campus."

As an extra incentive to get people to donate, Highline was in competition with Green River Community College to see which school could gather more canned goods. The food drive was sponsored by the Black Student Union of Highline Community College which was formed in 1970. Each fall, new officers are elected to serve from fall quarter to the end of the summer quarter.

This year's officers are: Regina Baylor, president; Stanley Holland, vice-president; Jackie Walton, recording secretary; Dancy Hickson, corresponding secretary; Dee Miller, treasurer, and Terrence Smith, sergeant-at-arms.

The purpose of the B.S.U. is to help draw the black student population together and give them a feeling of unity. "We want to help black students come together and get to know each other," Baylor said.

A majority of the newly elected officers said that they hoped this year would see a more active, involved B.S.U. with better communication with other ethnic groups as well as with each other.

"My main goal is to get black people communicating with each other, to talk with each other," Walton said.

Garbage cans were located at key points throughout the campus for donations to dump their goods. For symbolic purposes, the cans were placed under a Christmas tree in the student lounge.

The beneficiary of this food drive will be the Northwest Second Harvest Food Bank. In future drives, the council's goal will be to try and help needy students on the Highline campus.

"If this one works," explained Scott Stewart, HCSU Council member, "then we will gear future drives toward getting the food to needy students on our campus."
'Reds'- Beatty's brainchild a mammoth movie

by Will Hartley and Ron Del Mar

As fall quarter nears its end, a look back at the season's big flicks is in order. Superman II and Raiders of the Lost Ark took 1981 out of its movie slump by ballooning up the box offices. Gallipoli paved the way for an adult film phase with Chariots of Fire riding that new trend. Prince of the City gave a lift to a new breed of actors. It would only be appropriate to wrap up the year with a real huggy.

Enter Reds — a mammoth of a motion picture, beautiful in almost every aspect. Warren Beatty is obviously pushing for an Oscar or two, and they would be well deserved.

Reds is the true story of Portland-born journalist Jack Reed (Warren Beatty) and his triumphs and tribulations with his principles. As a free spirit of socialism, he eventually makes a transition from Socialist to Pacifist activity.

Reed goes to Russia for writing purposes, where he is sucked into the Bolshevik movement. His increasing involvement with the cause starts to affect his health and relationship with his partner and wife, Louise Bryant (Diane Keaton).

The love story of Reed and Bryant is typical at times; the get-together, the building conflicts, the separation and the climactic reunion. It's all predictable, but no less desirable.

The actor is wrapped around an emotional and involving plot which keeps an audience enthralled except for laughing during humorous moments. Reds humor is subtle and real, much of it coming from the narration and appearances of the "witnesses" — people who actually knew and loved Jack Reed of his activities.

The witnesses, who appear in the present (aged now) provide an excellent transition between scenes or periods of time. Their narrations, which occasionally run over into the early 1900's, accentuates characters and events.

One might expect a movie of this length (about three and a half hours) and complexity to drag on and be difficult to follow. Beatty and co-writer Trevor Griffiths conquer this handicap by switching a plot that is free-flowing, absorbing and consequently, easy to follow.

Highline Happenings

New Course...

Literature, business and journalism join forces for a one-time only class to be offered winter quarter.

Business Civilization: A Literary View (Humanities 150) is a team-taught course examining American business as reflected in literature and the mass media.

The class is scheduled for 9 a.m. Monday, Wednesday and Friday. It will be taught by Catherine Harrington from Humanities, Michael Cicero of Business and Julienne Crab from Journalism.

Class format is a lecture on Monday with small group discussions on Wednesday and Friday. The course may be added to the first week of Winter Quarter.

Come Blow Your Horn

Scholarships and work grants are now being offered for students registering for Winter Quarter.

The Stage Band, Pep Band and Pipe Orchestra are in need of primarily woodwind players, but all musicians are asked to audition.

All interested should see music instructor Ed Fish in Faculty Bldg. 5-200 between 11 a.m. and noon before January 8.

Christmas Carol...

Highline's Choral Department, featuring the Vocal Ensemble, the Women's Choral Ensemble and a number of soloists, will be giving a noon performance on December 11 and a 7:30 concert on December 13 in the Art/Student Center. All are invited to attend this holiday show.

Holiday classic performed at Centerstage

Little Women the Louisa May Alcott classic, adapted by Kristin Lavon and directed byu Theresa Lattey, is now playing at the Centerstage Theatre through December 25.

by Kevin Kerr

In this day of the liberated homemaker and the career woman, Little Women takes a step back in time and tradition to see what women were like a century ago.

Little Women is a story about the wonders of childhood mirrored against the hardships and heartaches of life. The play begins with the four March sisters, Meg, Jo, Beth, and Amy, a few days before Christmas. They are dejected because their father is away serving as a chaplain in the Civil War. But their mother, Marmee, arrives home with a letter from Father that brightens everyone's spirits.

This scene sets the stage for the rest of the play. Father sends his wishes that his daughters will do everything they possibly can to become the best “little women” for daughters will do everything they possibly can to become the best “little women.”

Eventually, the eldest sister, Meg, portrayed by Jane Munson, has performed for Centerstage before and does an exceptional job of playing this sister, though not as prominent as Jo nor as lively as Amy, manages to turn the whole world upside down for the girls at the end of the play. On the very day that Father is to come home, Meg goes out and, in the words of Jo, “accepts that Mr. Brown,” a local teacher that wishes to marry Meg.

Following the engagement, the action reveals an uprooted peace. Jo is carrying on how Meg just can’t break up the family circle and Amy finds out that she is the serious illness of Beth, their quietest sister. Kendall Kay Munsey does a praise-worthy job of playing this sister who helps all four learn how dear life is and what it means to endure everything for its sustenance. Munsey has an impressive record as an actress, having appeared in film (Stanley Kramer’s The Runner Stumbles) as well as on stage for several other productions.

Leaves it to a jazz guitarist to provide a country number without the traditional slick twang.

Side two displays more of the material that is associated with Earl Klugh. The Rainmaker is a cover of the orchestral arrangements of DAVE Matthews, nearly stealing the show from Klugh.

After Balladina (obviously meaning ballad), the title track wraps up the album in a fine, but restrained manner. Fans of Earl Klugh will not go crazy over Crazy for You, but the album by no means a disappointment.
Highline fast breaks to un unbeaten mark

by Jeff Andrews

Highline’s hoopsters have started the season on a winning note, starting off the new season by a 44-40 advantage at the intermission and then using their fast breaks to unbeaten mark.

The Thunderbirds played a running game in the first half, fast breaking their way to a 44-40 advantage at the intermission. Secondary half action was slower as the Thunderbirds used a steady style of offense, hoping to set up for the good defense. "We were just relaxed in the second half," Harrison explained. "You tend to relax after you get on top."

The delay strategy seemed to have worked as Highline built up an 11 point lead halfway through the second half. At the seven minute mark the visitors fought back to within six points, the score at that point was 72-66. Despite Central’s tough play, Highline hung on to its advantage, winning by a score of 86-77.

Tops in the scoring department was Valentine with 25 points. Radliff’s 20 point effort was further strengthened by his seven assists. Joe Callero scored eight points and found the open man several other times, finishing off six assists.

Depth proved to be a factor in this game as well, with Highline using nine different players in the first half. "Everyone contributes," Harrison noted. "We all share in the win, including the people on the bench."

After the first half, the Thunderbirds held a 44-36 lead. Radliff was the top scorer, leading all players with 20 points. He was followed by 17 points from Radliff, completed the trio with 19 points. Radliff wasn’t ignored as he was given the status of Most Valuable Player for the team. This year included, he has been named MVP in three of the last four tournaments he has played in.

Averaging 20 points a game thus far, Harrison described Radliff as the best offensive player he’s ever coached. "He’s getting better on defense, too. I just love everyone on the team," Harrison said.

Harrison also mentioned that defense is what he’s trying to get his team to improve on. "If you can force your opponent to do what you want, you can control the tempo of the game," Harrison said.

Spikers fourth in state tourney

by Jeff Andrews

Highline’s volleyball team finished its season last weekend with a fourth place finish in the state tournament at Edmonds Community College. The T-birds defeated Walla Walla Community College in their opening match with a score of 15-9.

On Tuesday, Highline hosted San Juan Islands, winning with a score of 15-10. Highline’s Ivy Richardson was named to the all-tournament team.

Saturday, the T-birds were defeated by Spokane Valley, the eventual state champion, with a score of 15-10, 15-9, and 15-2.

Sunday, Highline was defeated by Skagit Valley in the last match. The T-birds easily won with scores of 15-3 and 15-4.

Highline took fourth place honors for the tournament after defeating Fort Steilacoom in the last match. The T-birds easily won with scores of 15-3 and 15-4.

Radliff contributed 42 points and five assists as the men marched on to 104-87 Community University J.V. triumph in the Nov. 27 outing.

Radliff added ten points apiece. The final outcome of 78-77 gave the host team Skagit Valley an 86-77 victory. "We will take this game as a learning experience," Harrison explained.

"You tend to relax after you get on top," Harrison said. "But it’s not the best game we’ve played." The win was further strengthened by his seven assists. Joe Callero scored eight points and found the open man several other times, finishing off six assists.

Depth proved to be a factor in this game as well, with Highline using nine different players in the first half. "Everyone contributes," Harrison noted. "We all share in the win, including the people on the bench."

"I really thought we were going to beat them," Harrison said. "I really look forward to next year." The women compiled an overall record of 29-16, and will be ready for next year with six freshmen returning.

Merry Christmas & Happy New Year
You have to keep in shape so you won’t get hurt,” Hanson said. “So far I’ve been lucky enough not to have any injuries.”

When he’s not running, Hanson can be found working out on Highline’s swim team. His motivation for running remains high as the track season draws nearer.

Hanson’s goal will be to break 30 minute for 10 kilometers (6.2). He especially hopes to do well in track because he would like to obtain a scholarship from a major university.

The university’s of Idaho, Oregon, Portland and Western Washington are some of the schools which have taken an interest in Hanson’s running ability. He has applied at Western, but would much rather attend University of Colorado.

Hanson is presently working toward a B.A. in mathematics. He’d like to become a teacher, focusing on math and physical education.

HCC women win two of three

by Mark Keaty

Highline’s women’s basketball team dropped its preseason record to 2-1 with a 70-67 loss to the Wenatchee Valley Knights on December 4.

The Thunderbirds were in the lead most of the game that could not hold off the charging Knights.

Both teams had trouble getting their offenses to click in the first half. Highline took a 33-31 halftime lead into the second.

In the second half the game was tied nine times and the lead changed hands six times.

A bright spot for Highline was the play of Trix Armstrong. She finished the game with 15 points and 17 rebounds.

Cohorts Kari Racov and Jan Armstrong came in with 12 points each.

They are a well coached team,” said Coach Dale Bolinger.

The T-birds opened their preseason play at Clark CC on November 28.

Led by freshman Trish Armstrong’s 19 points, Highline beat Clark, 79-49.

The women’s team defeated Fort St. Clair, 72-38, last Friday. Teresa Bachmann paced her team with her 20 points and one second place place in individual competition.

The swim team travels to Portland Community College for a meet today.

Swimmers open season with win

The swim season has arrived and things are heating up, according to coach Bill Orphan.

“The team is ahead of my expectations for this time,” Orphan said. “A few of the swimmers have come close to qualifying for state competition. Highline won the league with a special meet against Indiana University of Pennsylvania on Nov. 19 and 20.

The significance of the meet was that neither team had to travel. Instead it was conducted over the telephone.

The women’s team defeated Fort St. Clair, 72-38, 50-30.

The women’s team defeated Fort St. Clair, 72-38, 50-30.

The swim team travels to Portland Community College for a meet today.
