Budget ax falls again.

Reduction slices evening class schedule

by BARRY BLOOM

Highline Community College Vice President Ed Com- mander announced this week that portions of the Spring Quarter
highline is trying to cut as evenly as they can across the
opposite, according to a Jan. 3 Time article.

The following year, 20 more companies sold 724,000 personal computers, doubling sales to 1.4 million units at just under
million.

“Without a major bargain, the computer is an expensive luxury," said Robert McFarland, dean of the

Reduction slices evening class schedule

Continued from page 1

However, as Command and McFarland both stressed, if the budget passes, this may not happen. Should the budget fail, not only would additional cuts have to be made but the community college officials will have to work on March 1 to June 30 to take the cut. The cut will have to be completed before the start of the 1983-84 session, which begins July 1.

Even though officials at the various state community colleges have been anticipating a budget cut for quite some time, Command said that he hopes the legislators will pass the supplemental budget.

"I figured that if they (legislators) don't pass it by mid-Feb., they probably never will. For every day past mid-Feb., the chance of the budget passing will grow dimmer," he said.

Budget unfurl to CCCs

"I really think it's unfair that the community colleges are always under so much pressure to make the cuts," Command also added that community colleges are considered a state agency whereas the public schools, kindergarten through 12, are not.

"Since we're a state agency, we have to make the proposed cuts. The public schools, however, can just write off the amount of the cut as a deficit if they can't make it. This is not fair to the community colleges. We don't want to make any cuts but if we don't, the Legislators will be on our backs until we do (make the cuts)," he said.

Even though Highline has already been making cuts, if the supplemental budget fails, more cuts will have to be made.

KING gives away $1500

KING broadcasting scholarships were awarded to three Highline students at a Jan. 15 Board of Trustees Meeting. All the recipients of the $500 scholarships are members of the Journalism/Mass Media program. They are Karen Beulinga, Caroline Bleakley and Denise Chavez.

Applicants were required to prepare a resume, a cover letter, any project they had done and include two letters of recommendation.

After presenting the awards, Dr. Shirley Gordon, Highline president, said, "I had the opportunity to read over each of the applications that the students prepared and I felt that they were first-class."

The selection committee consisted of Julianne Crane, journalism/mass media program director, and Tom Tachichart, electrical media producer.

"We ended up with three outstanding women," said Crane.

They were chosen on the basis of their grade point average, if they have contributed to their education and their potential for success.

"I hope the scholarship helps them in furthering their education and career," Tachichart said.

KING gives the awards to selected schools in Seattle, Tulsa, Oregon, California and Illinois which offer courses related to broadcasting and cable television industry.

Crane wrote a letter to Dr. Gordon recommending the winners for recognition.

About Beulinga, Crane wrote, "She has a proven track record of taking on leadership positions and shouldering major responsibilities.

Beulinga is a graduating sophomore and current editor of the Thunderword. She will be attending Western Washington University next year and would like to double major in journalism and education.

"It's strange because you go through journalism there's no few times that you got recognized for your work," said Beulinga. "So, scholarships like this are really nice to receive."

The current Thunderword Production Manager, Bleakley, has received her Associate of Arts degree and is working on her Associate of Applied Science degree in journalism.

"I was really excited," said Bleakley, adding that "The day before I found out, though, I was really nervous."

She is planning on returning to Alaska to establish an internship with a television station "that will hopefully lead into a job."

"Ms. Bleakley is an asset to the journalism/mass media program," wrote Crane.

Chavez has worked on the Thunderword for three years as a photographer, production and ad manager, and senior reporter.

Of Chavez, Crane wrote, "Whether working in advertising, production or news reporting, Ms. Chavez shows professional potential."

She is planning on attending WWU fall to major in broadcasting.

"I want to be a regularly-featured broadcaster," said Chavez.

Workshops aid financial woes

Students interested in applying for financial aid should be aware of workshops taking place next week to help them in their quest.

The workshops will be held Monday through Thursday from 9 a.m. to 3 p.m. to 7:30 p.m. in the Gold Room located in Bldg. 4. According to Jeff Abrahamson, Highline director of financial aid, these workshops are designed to help the student fill out his or her financial aid applications.

The College Scholarship Service must receive all applications for financial aid by May 1. The student should apply prior to this time.

Applications are still being accepted for Pell Grants and guaranteed student loans to be awarded Winter and Spring Quarters.

Wish your sweetheart a Happy Valentine's Day in the February issue of the "Thunderword"

McFarland said that should the budget fail the money that Highline is saving from the cuts will then be used in such a way that the additional cuts won't be as severe.

Bedding other expenses

"We're deducting expenses on such things as heating, lights and library supplies," he said.

According to Gordon, HCC is saving roughly $8000, checks to Mother Nature.

"With the mild winter that we're having, money is being saved from what would have been used for maintenance (to shovel snow), fuel costs (for heaters), among other things," she said.

Highline will also be saving money by not hiring students to help out in the administrative and other office buildings on campus. This would include students helping in the physical education department.
I

"Students planning on earning an Associate in Arts degree need to be aware of the requirements for which they are responsible.

An Associate in Arts Degree is the first two years of a four-year degree. Highline offers two options for the A.A. degree: options A and B.

Option A is for liberal arts and sciences while option B leads to a four-year specialization or professional degree.

Students who plan to transfer under the A.A. option A are required to earn a total of 90 quarter credits with at least a "C" or 2.0 GPA.

Distribution of credits must be as follows: 15 in Humanities, 15 in Social Science, and 15 in Science. Five additional credits must be distributed throughout these sections to total 50 credits.

The credits in the above divisions must be divided between at least two disciplines. Courses which are given three to minutes teach only credits in music, or in any one particular area.

Total credits must also be earned in communications. They must be divided between at least two disciplines. Classes which are given three to minutes teach only communications are Journalism, Speech, and Writing.

Five credits must be in Writing 101 or Writing 102.

These credits must be earned in Physical Education. This can be done by taking an activity class and receiving one credit per class.

Students may take PE 100, Personal Health or PE 105. Two credits per class must be earned in a physical education class to satisfy the PE requirement.

Two years of high school college preparatory mathematics are required, according to Michael Groshak, assistant dean of student services.

The student should have taken two years of math in high school. Two of the following classes Beginning Algebra, Geometry, Trigonometry, Intermediate Algebra, and Calculus must be taken.

This means, for example, that they must have taken one year of Beginning Algebra and one year of Geometry. These math courses must have been completed with at least a "C" grade.

If the student does not meet the above requirements, then a passing score on the Math Placement Test, or taking Math 211 or 22, Philosophy 120, or Business 135 is required.

After these requirements are completed, they are planning on earning an Associate in Arts degree. Highline offers two options for the A.A. degree: options A and B.

These credits must be earned in Physical Education. This can be done by taking an activity class and receiving one credit per class.

Students may take PE 100, Personal Health or PE 105. Two credits per class must be earned in a physical education class to satisfy the PE requirement.

Two years of high school college preparatory mathematics are required, according to Michael Groshak, assistant dean of student services.
Females fight shower freeze

Dear Editor:

Being of sound mind and not so sound body, I elected to enroll in an Aerobics class this quarter. The class is all and most of the time I probably would have been there and dealing with everything.

I was directed to the "soiled room" with my little card in hand and stood in line for a shower. What I got did not even remotely resemble a shower. They handed me a piece of worn cloth about the size of three washcloths, dirty and stained with some unknown blue substance. Having nothing else better to use, I was obliged to press toward the shower stall.

Ah, but there was an even bigger surprise in store for me. Although I am not a genius by any means, I do have some amount of intelligence. However, it was beyond me which of the handles was for hot and which was for cold.

It was then that I realized that neither was hot — or, not even warm.

I would venture to say that the water coming out of those shower heads could have been piped in directly from a Puget Sound, with not so much removed.

After attempting to shower and have my breath taken away several times, I finally managed to dress and depart. I happened to meet a young man emerging from the men's locker room. I quickly asked him if conditions were similar on his side of the wall. He replied, "Oh, no, we have plenty of hot water."

Is this a case of gross discrimination or merely one of total neglect for female students? Who is responsible for maintaining the showers? What are my alternatives about the problem?

I had my second Aerobics class today previously and then the door was open for sinks, the only place that hot water seems to exist in the area. Have you ever tried to wash under a faucet that has to be held down in order to operate?

Let us (me and my fellow showerers) know what, if anything, can be done about this intolerable situation. I know the budget cuts are bad but this is ridiculous.

Anne Dorell
Highline Student Council

Opinion differences prove fatal for prospect

by TERRY FIALNT

It's pleasing to note that the Highline College Student Union will be rewriting the constitution and by-laws this quarter.

Some would object to the choice of radio stations, or that everything is next to trined much longer and therefore must have missed the entire concept of trying to keep the lounge dean. Students are expected to study there, or that studying is next to trined much longer and therefore must have missed the entire concept of trying to keep the lounge dean.

I have not heard about any pending special elections. I went through the same spiel I had previously and then the floor was open for questions. I was asked by one member, "If the council voted in favor of a certain policy, say, by a vote of 6-3, and you were one of the dissenting votes, would you be willing to head the committee to enact this policy?"

Thinking this was an opportune time to have him say what I am a man of principle, I could not support something that was opposed to what I thought was right (Who in his right mind would?). But, as it turned out, that was the fatal mistake.

I later asked Allen and he said the primary reason I was not appointed was because they didn't think I could get along with the group. And, I thought to myself, where would this country be if there were no differences of opinion? Do I appear to be someone who is interested in justice? Or, am I just a poor loser who is letting off steam?

Interviews

The Thunderword office is located in Bldg. 10, room 105. Office hours are 10 a.m. to 4 p.m. daily.

We welcome all letters, news, and criticism from the campus population. Letters should be kept to a 250 word maximum. Longer letters will be subject to editing.
Focus on crime

People getting ‘M.A.D.D.’ over DWI’s

By CAROLINE BLEAKLEY

"Death caused by the drunken driver is the only socially accepted form of homicide in this country," affirmed Jackie Baggen.

Baggen, president of the South King County chapter for Mothers Against Drunk Drivers, M.A.D.D., commented that the 16-19 year old age group has the highest rate of deaths compared to the number of licensed drivers.

"This age group comprises 40% of all drunken driving fatalities," said Baggen.

She also mentioned that the 25-34 year old age bracket for males is predominantly the age group that causes deaths due to drunken driving.

Every 21 minutes someone will die as a result of an alcohol-related crash and eventually one out of every two persons will be involved in an alcohol-related accident.

"My reason for getting involved in M.A.D.D. is my experience with a drunken driver. My whole family, myself and my husband, was in a vehicle which was struck by a drunk driver," said Baggen.

The Baggen family was involved in an accident in July, 1981, in which her sister-in-law instantly lost her life. She was 2 years old and five-months pregnant.

"Myself, my son and daughter and brother were all killed. The only one that wasn’t injured was my niece, maybe because she was a baby and sleeping," said Baggen.

"We were on our way home from the Valley Drive-In (Kent). My brother lives in Ephrata and they were spending a week’s vacation with us. We had spent the day at Seattle Center and then we went to the drive-in that night.

"I was driving a 1979 Chevy Blazer and never had any indication he was behind me when he hit us. He hit us with such force we went down a 10-foot embankment. At the bottom of that embankment there was a tree and we were pushed right into that tree."

"Drunken driving arrests are directly related to the number of places that serve alcohol in this area."

The drunken driver who hit the Baggen’s vehicle had a blood alcohol level of .34. In the State of Washington, a person is considered legally intoxicated.

The drunken driver was charged with negligent homicide. He was sentenced to the maximum 10 years, the judge recommended he serve a minimum year and a half.

"I doubt he served six months in prison," commented Baggen.

Every 21 minutes some one will die as a result of an alcohol related crash.

"We work with them (victims) right through the adjudication process," said Baggen.

M.A.D.D. is hoping to get some kind of victims compensation program going.

Accord to Baggen, "right now death by drunken driver is not considered a violent crime, as the victims are not covered under a victims compensation act in Washington."

"We added a ‘list of times families are left in very bad financial situations." Candy Lightner founded M.A.D.D. in May 1980, in Fair Oaks, California, after her 12-year-old daughter was struck and killed by a hit-and-run drunken driver.

M.A.D.D. is a non-profit, tax-exempt organization that solely depends on memberships and donations.

There are approximately 98 chapters of M.A.D.D. in 20 states including four in the State of Washington.

In 1981, King County had 3,360 alcohol-related accidents, in which 81 people lost their lives, and 2,862 were injured.

The Des Moines Police Department, DMFD, arrested 400 drunken drivers in 1982.

Schnorr also mentioned that this area is one of the high Driving While Intoxicated, DWI, areas, and that maybe a third of the people arrested for DWI’s are under the age of 21.

Schnorr explained that when a person is pulled over on the highway, they are given a field sobriety test which is a group of physical tests given on the street, such as walking heel to toe, walking the line, touching your nose, saying the alphabet, and balance.

"necessarily, by the time you stop somebody, you have a good suspicion they are intoxicated, the team just give you more evidence to that conclusion," said Schnorr.

The person is then brought into the DMFD and booked, and read their constitutional rights, they are then asked 20 questions on an Alcohol Influence Report Form.

The arrested person is then asked to take the breathalyzer test. They have the right to refuse the test, but if they refusing to take the driver’s license is revoked for six months.

After the person passes through the above procedures, the suspect is placed in a cell and kept there until approximately 7 a.m. the following morning. If the suspect pays the minimum bail of $250, he/she may "walk out the door."

"We try to step in and help from the first 72 hours, such as making an appointment with a lawyer who will assist them through the critical 72 hours," said Schnorr.

"We recommend that the victims participate in court cases, such as writing letters to the court as to what type of effect this has had on their family."

"We work with them (victims) right through the adjudication process," said Baggen.

We recommend that the victims participate in court cases, such as writing letters to the court as to what type of effect this has had on their family.

Child abuse problem continues to grow

by TERRY PILANT

Child abuse in King County is undoubtedly a large problem. It is a problem that continues to grow.

In 1982, King County had 7,000 reported cases of child abuse and neglect. In the early 1960s, there were 40,000 reported cases, which is a substantial increase over 1981. These numbers have reflected only reported cases.

Child abuse covers a number of different areas. It is a problem that can be physical, mental or emotional. According to Carole Diament, Chairperson of the Prevention of Child Abuse, CPCAN, board president, physical abuse is defined as "non-accidental injury inflicted by anyone, usually a parent or guardian.

Mason County, like most other counties, usually occurs in cycles. "Most abusive parents were abused themselves," she said.

Along with this, Mason explained that there are three components that are necessary for abuse to take place. One is the parent or adult with a potential to abuse.

We generally believe that everybody has the potential to abuse," she said.

Mason also said that it is a myth to believe that the abusive parent is someone who is sick or psychiatrically impaired. "Ninety percent of abusive parents are normal people who love their children," she said.

The second component necessary for abuse is that the child is in some respect, special to the parent or guardian. This can be either physically or emotionally handicapped or the child could be a way to make the parents wanted a girl (or vice versa).

Another reason could be that the child resembles a husband who is hostile or abusive to his wife, so that the wife is transferred behind bars to abuse the child or is more aggressive.

The third thing that is necessary for abuse to take place is a crisis situation. A crisis situation could be major, like the loss of a job, or it could be something minor like a car or television breaking down.

At a time where the tension is so great the parent can't cope any longer so he or she retaliates against the child.

"Most abusive parents go from one crisis to another and are usually involved in some sort of crisis constantly," said Mason.

Mason emphasized that the most important part of preventing abuse is to break up this cycle as early as possible.

To do this, Mason explained that parents who find themselves abusing their children or who even have the potential to abuse should get involved in parent education or counseling.

Mason also explained that there is a program called Parent Aides, where a volunteer parent can help an abusive parent by age, race and also by the nature of the abuse.

Under these circumstances the volunteer and the abusive parent can build a trusting relationship and show the abusive parent how to handle the problem and lessens the danger of abusing their children again.

Another way to prevent abuse, Mason said, is for people who suspect that a child is being abused to report it to someone. That means following two simple steps. First of all, one must actually suspect that a child is being abused. Secondly, one must be reporting the incident with good intentions and not just to get back at someone.

The place to call if someone suspects abuse would be the Children's Protective Service, of the centralized service unit of the Department of Social and Health Services, Burien, 721-4115, Kent, 672-6300. This service is available 24 hours a day.

For those who may be in doubt as to who to contact, the local police department would be a good bet.

Resistance to child abuse can cause the breakdown of families.

"We want to help both the child and the parents," Mason said. "We want to keep families together.

Victims have rights

by KIM BLAUV

The victim of crime, whether it be robbery or rape, feels violated. When a crime is committed against someone, that person takes it personally.

"Why not?" the victim asks. Often, the only answer is bad luck — being in the wrong place at the wrong time.

This year, one of three American houses has been violated by crime according to the National Organization for Victim Assistance.

Many feel victim's rights have been secondary to the rights of the accused. In the early sixties, the Miranda Warrant was established. In the late sixties and early seventies a program was implemented by crime according to the National Organization for Victim Assistance.

In the late sixties and early seventies a program was implemented by crime according to the National Organization for Victim Assistance.

In the late sixties and early seventies a few states began to establish victim compensation programs. Washington's program was established in 1974.

The purpose of the victim compensation program is primarily to get victims to testify against their assailants.

According to Mary Phillips, adjutant for the state program, victims must agree to prosecute in order to receive benefits. At a maximum of $10,000 can be paid for time lost from work and up to $5,000 can be paid toward vocational rehabilitation.

Any innocent victim injured by any felony or gross misdemeanor may be eligible to receive benefits. However, the program's benefits are secondary to any other coverage such as Medicare, worker's compensation and insurance.

There are several medical benefits for injuries on the same for schedule as workmen's compensation. Anyone who is injured in need of medical or psychiatric treatment can receive it without the courts

Crime rate responsible for increased weapon use

by TED ULMER

As violent crime continues on a rampage, and with the employment situation as it is, many people are becoming increasingly aware of that need for self-defense.

John Blake, a crime analyst for the King County Police, agrees that the use of weapons is becoming more widespread.

"Usually, it's a firearm for their own personal protection or for their business. Some think society is getting out of hand and they don't want to be one of the victims," he explained.

He added that the police discourage the use of a gun, perhaps that is why mace has hit high popularity levels.

"Usually, it's a firearm for their own personal protection," he said.

Bill Higbee, an employee of J.R.'s Liquor in Burien, says that modern pistols are his best selling items.

"I believe that it is far from enough. A look at some statistics may explain where this concern is coming from. London, England reported only two handgun murders in 1972. Boston reported 43 counts of that same crime during the same year. However, London's population is 12 times that of Boston.

In Tokyo, Japan, there was only one handgun murder in 1971. In Los Angeles County, California, there were 308 that same year. Tokyo's population is 11 million, L.A.C.'s is seven million.

It is a fact that the U.S. guns fall from all kinds of guns lead others nations by a wide margin.

Naturally, one would wonder why the U.S. hasn't done something about trying to limit this catastrophe.

Perhaps it is because of the historical tradition behind firearms in America. Let's take a look at this idea.

The first settlers, a gun was as necessary as food, clothing and shelter. They were challenging wilderness and the security of a free State, the right of people to keep and bear arms shall not be infringed on.

By the beginning of this century, when the country had been settled from coast to coast, the tradition that the American needed and had the right to own a gun was firmly rooted. This is still with Americans today — from families keeping firearms for protection to individuals using them for recreation.

Laws vary from state to state on possession of handguns, but there is a source of federal legislation that came into being known as the Gun Control Act of 1968. It took the place of the old Federal Firearm Act that passed in 1938 and contains of two main parts called "Titles."

Title II, also known as the Firearms Act, strikes at the weapons most "popular" with criminals: machine guns, sawed-off shotguns, and cheaply made handguns. It aims to discourage the usage, even existence, of such weapons by imposing heavy taxes on their manufacturers and by demanding that their owners register them with the federal government.

The wave of violence that washed over the 1960's and rolled into the 1970's is now proceeding into the 1980's.

Those for gun control argue that the Gun Control Act of 1968 isn't strong enough to do any good. Despite many regulations, they insist that it hasn't reduced the national degree of crime and violence even by a small amount.

Those against gun control also have an argument. They contend that the Constitution guarantees every law-abiding citizen the right to own a gun.

"We want to help both the child and the parents," Mason said. "We want to keep families together.

We generally believe that everybody has the potential to abuse," she said.

The police are very good at gathering the facts," said Phillips.

We want to help both the child and the parents," Mason said. "We want to keep families together.

The police are very good at gathering the facts," said Phillips.

**Battered women should fight back**

by ART CHRISTOPHERSON

Society is beginning to realize that battering of a loved one is an ugly problem that can be stopped.

There is a growing awareness that the majority of the victims of domestic battering are women.

If telephone inquiries to Domestic Abuse Women's Network, DAWN, are any indication, women abuse is a significant problem in South King County.

According to DAWN, there were 1,730 phone inquiries last year. Most of these calls were received from people unknown to the organization, from the front and rear windows near the front and rear doors of one's home.

This sticker informs "would-be burglars" that goods stolen from a Crime Watch home will be difficult to dispose of.

Armstrong returned home one evening to find that his house had been broken into. Armstrong telephoned the police to inform them of the burglary. The police gave him several suggestions on how to secure his home, and told him about Crime Watch.

Crime Watch is a crime prevention program out of the Washington State Office of the Attorney General in cooperation with the Association of Sheriffs and Police Chiefs.

Part of the Crime Watch program is the posting of an operation identification sticker in windows near the front and rear doors of one's home.

This sticker informs "would-be burglars" that goods stolen from a Crime Watch home will be difficult to dispose of.

Armstrong said, "It is also good to let your neighbors and make sure that they know you. So, when you go out of town let your neighbors know. Also let the police know because they will patrol your area."

Another way to guard against crime is to mark all personal possessions with an electric engraving tool with a Washington State driver's license number.

This procedure should be done even if property includes a manufacturer's serial number in order to make property easier to recover.

Armstrong added, "I think Crime Watch would be good for everyone in the community. I've been involved with it for five years and have had little trouble."

**Crime watch involves citizens**

by LOUIS HERRON

Crime can strike anyone at any time.

Highline instructor Michael Armstrong returned home one evening to find that his house had been broken into.

Armstrong returned home to inform them of the burglary. The police gave him several suggestions on how to secure his home, and told him about Crime Watch.

Crime Watch is a crime prevention program out of the Washington State Office of the Attorney General in cooperation with the Association of Sheriffs and Police Chiefs.

Part of the Crime Watch program is the posting of an operation identification sticker in windows near the front and rear doors of one's home.

This sticker informs "would-be burglars" that goods stolen from a Crime Watch home will be difficult to dispose of.

Armstrong explained that the physical battering usually starts with slapping, pushing, and punching until bruising occurs. These forms of battering produce scars that penetrate deeper than the eye can see.

In our society the burden of domestic violence is placed on the backs of women. DAWN added that they (women) have been put in the situation of being financially dependent, trapped, powerless and alone.

According to the book "Getting Free," by Genny McCarthy, women find it hard to leave the situation because of the fear of reprisal from the abuser. Also, many have no place to go, little or no money, and a complete lack of self esteem.

McCarthy added that, up to 42 percent of the work force and 16 percent of the female population never marry. Thus the myth still persists that every woman needs a man.

McCarthy also explains that most women believe that men can get along well without them. This contributes to their placing a low value on themselves and the fear of never attracting or keeping another man.

The battered woman pamphlet explains that the battered women could be the woman's husband, ex-husband, boyfriend, father, lover, or ex-lover.

In many cases the male perception of his role, according to the pamphlet, has been distorted by the way he was raised.

McCarty explains that the battered woman feels a need to dominate and control the woman. Thus, the batterer ends up not being able to control his behavior and generally shrinks responsibility for his own actions. But also many men are usually very dependent on their victims.

The pamphlet also states that many men have been programmed that the woman's role is to be dependent and powerless. So, when the woman stands up for her rights, which is contrary to the set role, the man experiences insordinate humiliation.

Also, the reaction on a masculine level is his the one that is closest, which can cause the man his drive or lower. These reactions have been learned and can be unlearned.

The problems of battered women have been with us since the dawn of history and have been tolerated by many social groups. The problems may seem to be impossible to break out of, but, according to McCarthy, for the first time women are saying "no" to battering.

"Women are working together to get free of dangerous men," she said.

With changing laws, police procedures, and attitudes, many new shelters and organizations are being developed.

In Seattle, battered women's counseling can be obtained at New Beginnings, Salvation Army, and the YWCA resource center and shelter. All are on a 24-hour hot line.

**Police offer advice**

by BARRY BLACK

Crime related problems in the college are a few compared to neighboring areas of the campus.

According to Kent police officer Bill Swainney, the students greatest risk is being involved in a pedestrian accident due to the amount of traffic on Pacific Highway South.

Students crossing Pacific Highway South in the proximity of the South 240th Street intersection should never take their eyes off the road while crossing.

Highline Community College's Campus Security helps to keep problems to a minimum. King County Police are not present on campus but do patrol the area as much as possible.

Of the crimes committed on campus, theft seems to be the most prevalent.

An officer from Kent police patrols the area and will be offered again in the spring.

In, students should take precautions to prevent thefts if at all possible. Donald McGraw, "studies show that the sooner one starts to fight back, that presents a deters attackers.

**Self-defense course deters attackers**

by JO ANN FOSTER

The women leaving their self-defense class on Monday night are a bit more confident than when they arrived. The class is Self-Defense for Women, which is intended to teach women defense against rape and attack.

The class is taught by Betsy Batten and Kay McGraw, members of Alternatives to Fear. A non-profit organization that is Seattle based. Aside from the class they have here, they have an assertiveness training class for senior citizens and a class for parents and children. A class for teenagers is also in the making.

Rape occurs in the victim's home 50 percent of the time. Only 10 percent of all rapes are reported.

"Refuse to be victimized," explains McGraw, "studies show that the sooner one starts to fight back, that presents a risk. McGraw suggests always walking in a mature and natural manner.

They also suggest yelling, not screaming. Kicking and punching are among the defenses that are taught. In these cases, technique dominates strength.

King County's prosecution rate is about 50 percent. At Batten puts it, "The weak link in the judicial system is the jury. They tend to believe the stereotypes." She feels these people tend to look at the nice defendant sitting there in a suit and tie and feel he doesn't fit that horrible image they have of a rapist.

This course is in its third quarter here and will be offered again in the spring.
Fun Ways To Firm Up The Flab

Do you find your winter flab hanging around in the spring and summer? The Highline Physical Education Department offers a wide variety of classes to help you get into shape and improve your athletic abilities. Within this wide scope of classes are many of the more popular sports activities; Touch Football, Basketball and Softball to name a few, but Highline also offers many other dynamic and challenging sports classes; Archery, Folk, Jazz, and Modern Dance, Aquatic Sports, Pat and White Water Canoeing and Karate are just a small example of what is available. Spring quarter would be a good time to prepare for the summer swimsuits.

Neptune features ‘Many Faces of Dustin’

by KEVIN KERR

Dustin Hoffman has played many characters during his successful career. Now the chance to see these roles portrayed back to back has come to Seattle. The Neptune Theatre is presenting The Many Faces of Dustin Hoffman, a festival of eight of Hoffman’s best. The films are being shown every Tuesday night over a four-week period. The festival began Jan. 11 and will run for another two weeks through Feb. 1.

Next Tuesday will feature two of Hoffman’s best remembered roles—the confined and searching college student in The Graduate, and the frustrated but successful, receiving an Academy Award nomination, of an ex-convertime the 60s’ which earned Hoffman yet another nomination. Hoffman played two different characters, but in each he brought to life emotions that are so natural for “Dustin.”

The Neptune Theatre is located in the University District on 4415 11th Ave. W., just west of University Way. The Neptune is a non-profit theatre offering a different double feature every night.

Michael Dorsey somewhat autobiographical of Hoffman’s own life and career, but Dorothy Michaels reveals Hoffman’s skill at what he does best — making his characters real.

Like the Dorsey-figure, Hoffman has always been recognized as an artistic actor, but he, too, was thought to be “difficult” in his earlier years. At age 20 he kicked out of acting school for “screaming at the teacher” when she started talking. The first work of the series highlighted Midnight Cowboy for which Hoffman received an Academy Award nomination. John Voight starred with Hoffman in this

Tootsie makes Hoffman ‘a better man’

Dustin Hoffman, noted for his accomplished portrayal of diverse roles, has most recently taken on a totally different role — that of a woman.

Hoffman’s newest character, Tootsie, is a far cry from those he has played in the past. Which have ranged from the 20-year-old Benjamin Braddock in The Graduate, to the 120-year-old Jack Crumble in Little Big Man. In his latest movie, however, Hoffman has outdone all past efforts.

This is Hoffman’s 13th film since he gave award winning performance in The Graduate. Kramer (1979), but he remains at his polished best for 1982-83. In Tootsie he departs the Silver Screen network actor, Michael Dorsey, who has a reputation with directors as being “difficult.” Outraged to learn he was turned down for a lead role because he’s too old, Hoffman changes his name for Dorothy, Dorey, Desright by dressing up as a woman, and lands a starring role in a daytime soap opera.

Dorsey becomes “Dorothy Michaels,” an overnight success, representing the independent women every housewife and liberated girl wants to be. Soon, however, Dorsey learns that being a lady isn’t as simple as he thought it would be. That only makes him more determined to carry on with his role. He falls in love with his co-star (Jessica Lange), and his father (Charles Durning) falls in love with Dorothy. Throughout Tootsie the viewer is struck by a comical yet rich essence of who Dustin Hoffman really is. Not only is Michael Dorsey somewhat autobiographical of Hoffman’s own life and career, but Dorothy Michaels reveals Hoffman’s skill at what he does best — making his characters real.

Like the Dorsey-figure, Hoffman has always been recognized as an artistic actor, but he, too, was thought to be “difficult” in his earlier years. Famous names behind drama scholarships

The Henry Fonda Scholarship has been established by his daughter Jane Fonda, and the Spencer Tracy Scholarship is being established by Spencer Tracy's widow, Joan Bennett. The two scholarships are available to students of the 1983 Karen Kramer Drama Program for Young People. The program, now in its third year, is open for students from 10 to 20 years of age, and previous theatrical experience is not necessary.

The four scholarships are new this year and will continue to be offered annually. The scholarships will offer a free drama program.

Dart team launched by professional

by BARRY BLACK

Dennis McLau#hlin is a darter, but that doesn’t mean he’s continually rushing off in one direction or another. McLau#hlin is a dedicated darts player from Bozeman, Montana. He takes the game seriously — seriously enough to pay $40 for a professional dartboard and $85 for tungsten alloy darts. He has four North American Darting Tournaments behind him and has practiced three hours daily for the past five years.

Although McLau#hlin’s darts aren’t too deadly, novices don’t have to invest much money to begin playing. A dartboard can cost from $20 to $50 and a set of three darts from $8 to $25.

In the North American Tournaments, players pay an entrance fee to cover travel and hotel expenses. McLau#hlin said, "The players need to pay enough to cover their expenses."

He organized darts tournaments in Hawaii and Montana. With McLau#hlin’s experience, he is helping to organize the Seattle North-End Darting Association and hopes to organize an inter-collegiate Darting Association. Dart tournaments are open to anyone who would like to join.

"Tell me, what’s the point to darts?"

The Highline indoor track team will be getting underway as the track season opens its doors for the 1983 season.

Along with the many athletes participating in the track season, there will be five returning from the cross country and tennis teams.

They are Todd Henry and Kevin Spradlin, 1,500 and 800-meter runners; Kirk Williams, 80-meter sprinter; and Mike Carver and Jeff Good, long jumpers.

"I’m excited about the coming year," by ANNE DOWELL

Walters returns to reach full potential

by ANNE DOWELL

The Thunderbird tennis team should have a fighting chance to win the state championship this year, according to Steve Walters.

The 30-year-old sophomore just returned from Texas, where he worked as an assistant tennis pro at a country club. During the last year, he also worked as a tennis instructor and pro at the John Newcombe Tennis Ranch in New Braunfels, Texas, and the John Newcombe Tennis Center in Stratton, VT.

"I improved my game and I worked out and got in shape so that when I came back to Highline, I would be ready to try the state title under Coach Dave Jodlowski," said Walters.

That’s why he’s been running, lifting weights and practicing daily in order to reach his full potential this year, his second year at Highline.

"Last year I used a regular-sized racket, and this year I’m using a Stearns mid-sized which has really helped my serve and volley game," he said.

In Walters’ view, he started playing tennis "a little bit late," at 16. But he said, "in one aspect I’m really lucky that I started later, because now I’m really excited about playing." Even after playing daily he said, "his serve and volley are his strengths.

Joining Walters from last year’s team are Ray Merce and Greg Scott. Coach Johnson also has one or two new recruits lined up, according to Walters.

"This winter I’m playing the Pacific Northwest Men’s Open Circuit, which includes tournaments with some prize money in Washington, Oregon and British Columbia," Walters added.

The 1983 track season is more of a pre-season warm-up for the track season begins," said Walters, "and that’s why he’s been running, lifting weights and practicing daily in order to reach his full potential this year, his second year at Highline.

The 1983 track season is more of a pre-season warm-up for the track season begins," said Walters, "and that’s why he’s been running, lifting weights and practicing daily in order to reach his full potential this year, his second year at Highline.

The Thunderbird tennis team should have a fighting chance to win the state championship this year, according to Steve Walters.

The 30-year-old sophomore just returned from Texas, where he worked as an assistant tennis pro at a country club. During the last year, he also worked as a tennis instructor and pro at the John Newcombe Tennis Ranch in New Braunfels, Texas, and the John Newcombe Tennis Center in Stratton, VT.

"I improved my game and I worked out and got in shape so that when I came back to Highline, I would be ready to try the state title under Coach Dave Jodlowski," said Walters.

That’s why he’s been running, lifting weights and practicing daily in order to reach his full potential this year, his second year at Highline.

"Last year I used a regular-sized racket, and this year I’m using a Stearns mid-sized which has really helped my serve and volley game," he said.

In Walters’ view, he started playing tennis “a little bit late,” at 16. But he said, “in one aspect I’m really lucky that I started later, because now I’m really excited about playing.” Even after playing daily he said, “his serve and volley are his strengths.

Joining Walters from last year’s team are Ray Merce and Greg Scott. Coach Johnson also has one or two new recruits lined up, according to Walters.

"This winter I’m playing the Pacific Northwest Men’s Open Circuit, which includes tournaments with some prize money in Washington, Oregon and British Columbia," Walters added.
T-birds tally three straight after defeat

by TED WLMER

Thanks to some fine shooting, Highline (

Olympia, who had the home court advan-
tage, needed more than just to offset the
T-bird's balanced scoring.

"We started out real slow. We didn't
play to our potential in the game. We let
them stay in the game too long," said
head coach David Byring.

Charlie Marquard led HCC in scoring
with 23 points and Carl Yaw in
with 12 rebounds.

The T-bird's men's basketball team
travel to Eastern Washington to play their
junior varsity game on Jan. 12 and then
away with a convincing 84-64 victory.

Jim Callen scored 22 points in going
along with seven assists and nine rebounds.

Jim Breunig, who led in points, said,"They
couldn't play well that well, but we
found ourselves going low to our knees.

Highline's men's basketball team
returned to Edmond on Jan. 6 and with
the help of a strong second half were able to
subdue their opponents.

T-bird Coach Harris stated simply
"we wanted it more than Edmond, but
we did with other teams the Toole.

It's not that we way the first half
Highline squandered away with a 41-40.

However, this was a game where the
T-birds were disapponted not to be able
away from Edmond.

Statistics showed that a combination
of poor shooting, especially from the free-
throw line, and unplayed rebounding
troubled Edmond.

The T-birds scored 100 points, 64
percent from the floor compared to
Edmond's 40 percent. At the free-throw line
the T-birds scored 10 of 22 attempts for
17 percent. Edmond scored only 66 percent
converting on only 9 of 14.

Late score:

HCC 88
Shoreline 75

The T-birds outscored Edmonds 40-24,
thanks largely to Charlie Marquard's
16 points. Edmonds' statistics were
higher in one department, though. They
stretched for 20 minutes against Bellver's
2-0 lead for the T-birds. After holding a
more than comfortable 30-point, 55-25 lead
at the half, Highline scored a way to a
smashing 60-77.

"If we scored, our team didn't score
It was all out in the second half with an
impressive Bellver's 3-0 lead,

Delight the Toole outcome, the
outside Harrison picked out a few good points.

"That was the best of the best High-
line has ever played as a team," he said.

Harrison who has had been with
the performance of the only slightly
You know what that means.

Maxwell, who is a transfer from
Western Washington University, Harrison
also expressed his regard for
Marquard's 17 points and as rebounds.

Also hitting double digits for the
T-birds were Marquard with 14, Callen
with 10 points and 7 10 and Breunig
with 13 points.

Cagers prominence bounces to 4-0 high

by BARBARA THOMPSON

Last Wednesday night the women T-
birds left Shoreline in the dust. Half-rate
found Shoreline thinking (Tbirds behind.

Top score was Jin Snyder with 18, Anga Davis with 18, Trish Armstrong
with 16 and 10 rebounds. Final score,
Highline vs up 64-46.

As Coach Dan Belling said, "Shoreline
scored better than we do, but they
do make you work to keep ahead with
the lead."

Last Monday, the cagers displayed their
talent on Olympic's better court. Half-rate
found the T-birds with a 12-point lead
and Olympic found Highline pretty out
out of reach.

Trish Armstrong led in rebounds with
17, Shelly Weaver handed off six assists
which contributed to the point totals by
Jen Armstrong with 12, Anga Davis with 12
and Brenda O'neale with 10.

Highline added another victory by
defeating Olympic 104-69.

Last year's T-birds defeated Everett
for the state Championship. The T-birds
scored 44 points to Everett's 39.

Highline lead at halftime 20-15.

T-birds' second game was against
Europe, who were 60-44.

"I feel that we didn't score much,
leadership on the court and the team
It just got too physical under the boards
and I gave them up," said Trish.

The cagers bounded right back through
Jen Armstrong, pulled down 17 rebounds
and totaled 15 points. Davis led in
scoring with 17 and Weaver, who had
14 points. Weaver's performance was an
outstanding offensive with 15 assists
rebounds, and Davis had 14 points. Final
score was Highline 77, Chelan 59.

Game two of the tournament was played
against Clark Community College. Half-
time showed the cagers with a 22 point
lead.

The T-birds' running game pulled
points fast, as Jen led the scoring with 23 points
and Weaver followed with 19 and nine
assists. Trish grabbed 11 rebounds once
over the T-birds were victorious 94-6.

"A lot of movement. Clark moves like
we do, they're quick with the first break," said
Stamps.

Second and final game was against
Bellver and Belling made it back to watch
the game at a distance. Stamps managed
to catch the cagers in their success
against Bellver's watchful eye and subtle hits.

With about seven minutes remaining in
the game, the T-bird point guard and four
handle, Weaver, had to to be pulled just
slight breathing difficulties. Joel from
this, the T-birds pulled through.

At the conclusion of the tournament,
Stamps and Davis were chosen for the
Clay DeVilbiss tournament team. Weaver
also received Most Valuable Player honors.

For the second straight year, Edmonds
Community College has been unable to
form a team. This leaves only 10 league
games, making such 10 more important
according to Belling.

The T-birds will host Skagit Valley
tomorrow at 6:00 p.m. in the Pavilion.
Belling speculated that Skagit Valley
will present some tough play with two
6'3" players.
Incidents on campus decrease in frequency

Continued from page 7

some, or all, of the items missing. Purses, wallets, calculators and books are the most common articles stolen.

There was one rape reported Fall Quarter. Chapman explained that students should be aware that assaults don't necessarily occur at night on the dark pathways. This particular incident occurred during the day. The suspect was apprehended, and formal charges are being pressed.

Vandalism is next in line. Although there were no incidents reported Fall Quarter, there were six during Summer Quarter. The majority of vandalism was to the video games and the pool tables in the student lounge, located upstairs in Bldg. 8.

There have not been any burglaries on campus for more than two years. Chapman credits this to the alarm systems in several of the buildings.

One report of a tire slashing incident was turned in last quarter. Also various reports of harassment, suspicious characters, and personal property loss for the 1981-82 academic year were reported. Students were found guilty of theft or receiving stolen property.

A monthly bulletin is published by the Campus Security office to inform students and faculty of the crimes that have been committed on campus.

This is to help people be aware of potential situations, and aid in the apprehension of suspects. The monthly report is available in the Campus Security office, located in Bldg. 8.

According to Chapman, students can help to better the campus by keeping an eye and an ear out for crimes. If anyone hears of, sees, or suspects a wrongdoing, they should report it immediately.

Being a media technician isn't always the easiest task, with having to be knowledgeable in cameras, audio production, recording, and many other areas. But Highline Media Technician Bill Brown finds that it enables him to make a living while including his hobby interests.

"For instance, I'm very interested in audio production," said Brown, "and GI uses a lot of sound equipment in the Literacy Program." Brown became interested in the media when he was 12 years old and began collecting movies.

"Most of the films are silent and early sound films. Or films of technical interest."

Later, Brown got a job as a disc jockey and announcer at a Bellingham radio station. His interest flared up again when an advertisement appeared in the newspaper for a media technician job at Highline Community College.

"It was an ad for a medium and it sounded like me. So, I applied and became a media tech at college," said Brown.

Brown added that he enjoys his job even though it does have its drawbacks.

from time to time. He said that the school and students come first in this job and anything really creative he has to do on his own time.

At the present time, Brown is in the market to buy another movie — hopefully a 1920's color fashion show. Thus, Brown is busy writing and calling to different film companies in his search to find the movie.

The Bible and Science Agree 100% An honest investigation concerning the other side of the evolution issue

January 27-30, 1983

Ward F. Ellsworth, a public school teacher from Issaquah, Washington, has had many years of experience dealing with his subject matter, both in the classroom and in public forum.

Plan degree in advance

Continued from page 5

students must earn the remaining 27 credits through elective courses.

Courses that apply toward the A.A. degree must be numbered 100 or above.

"Students can run into some general myths," said Grubach. "One of the myths is that the A.A. degree is a 'universal transfer degree.' That is, students believe that when they have an A.A., it transfers in all cases."

According to Grubach, some students get their A.A. but they don't take any classes in their major. As a result, they don't become a junior and have to take departmental requirements at the university of their choice.

"Most colleges will only accept a maximum of 15 credits in the "gray area," which is, for example, traditionally non-academic classes such as Occupational, Vocational, and Human Services," he said.

Like the A.A. option A, students are required to earn 90 credits for the A.A. option B.

Students meeting the four-year college or university requirements receive an option B when an option A doesn't work.

The option A doesn't work in two cases: when the four-year college or university does not have a contract, or because of the major's numerous departmental credits needed to be taken that there isn't enough room for the general distribution requirements.

According to Grubach, the latter happens frequently in Science, Pre-Medicine, Pre-Veterinarian, or other highly specialized fields.

Applications for graduation from Highline should be turned in two quarters in advance. This is so preparation can be made before the last quarter registration to pick any class that might be needed.

Additional information can be obtained in the advising center located in Bldg. 8, upper lobby. Here the student will find several brochures and various college catalogs. Advisors are also there to specifically answer any questions that the student may have.

Help may also be received from the student's program advisor or from a counselor.

"Besides working with an HCC advisor, students should work with the catalog and an adviser in the department at the college where they wish to transfer to," Grubach emphasized.
