Government's late, budget has to wait

by CAROLINE T. BLEAKLEY

Highline college is currently processing its fall semester presidential, the last in the series. The Spring hill at state's capital 95638 is based essentially on the same level as being fixed, we're not planning the 30000, 30000 students are now being discharged from the school. The school is the Governor's recommended budget.

We don't regard any of those budgets as being fixed, we're not planning the 30000, 30000 students are now being discharged from the school. The school is the Governor's recommended budget.

"We don't regard any of those budgets as being fixed, we're not planning (the of support imposed by the state govern."

We the undersigned

Grants are thrown-out
by TERRY PILANT
The Reagan administration has pro-
posed to congress a reworking of federal
programs for the 1984 student aid budget.
In a report prepared by the Department
of Education’s office for post-secondary
education, the major features of the pro-
posed budget is the consolidation of the
present six programs into three.
The budget, if passed by congress, will
see the elimination of the State Student
Incentive Grant Program (SSIG), the Sup-
plemental Educational Opportunity Grant
Program (SEOG), and the National Direct
Student Loan Program (NSL).
Those programs that will be retained
are the Guaranteed Student Loan Pro-
gram (GSL), the College Work-Study Pro-
gram, and the Pell grant program, which
will be referred to as a Self-Help grant.

Co-op student wins
by CHERYL TEMPLE
A Cooperative Education student at
Highline has won Honorable Mention in the
National Cooperative Education Essay
Contest. Casey Martin, enrolled in the Legal
Secretary program, entered the contest with
her job as administrative aid with the
Mariners as the topic.
“Were not were a great topic,”
said Martin, “and I think that made writ-
ing harder.” The topic was how both the
student and employer benefit from the
Cooperative Education experience.
Martin centered the subject of the essay
on her boss, the Director of Promotions for
the Mariners. Duties of her position include
making arrangements with speakers, buses
for player appearances in hosp-
tals, Little League opening days, Rotary,
and schools.
Martin also has other administrative
programs. “I meet and deal with

Adventure filled evening
For the first time, the Highline College
Women’s Resource Center will hold a
women’s recreational fair, Tutsdry, April
19, between 6:30 and 9:30 p.m., in the
Artist-Lecture Center, building 7.
This fair will present information and
recreational opportunities especially for
women in the Puget Sound region.
Highlighting the evening will be a film,
“Annapuma: A Women’s Place,” a docu-
mentary featuring an all-woman expedi-
tionary team climbing Mount Everest.
Other people and groups that will have
displays at the fair are the Highline Bike
Club, with information about their 1983
summer bike tour of the People’s Republic
of China; Northwest Women’s Climbers,
with information on future mountain and
climbing excursions; sheet Dowd, who
coaches at the University of Wash-
ington experimental college, will have
material about group day hikes in Mt.
Rainer; Rod Amundson, who offers a
river rafting course; Diane Navicky, will
have some details of the Backpacking
for Women course that she teaches at
Highline.
There is no charge for the fair, and
refreshments will be served.
For more information call the Women’s
Resource Center, at 878-3710, ext. 365.

Phi Theta Kappa is ‘honored’
by FAM SCHWANDER
Highline Phi Theta Kappa members
had a notable year at the 1983 National
Convention held in Kansas City, Missouri.
Jack Thomas was elected 1983 West/
Northwest Regional Vice President at the
convention. He will be replacing Highline
student Vipi Stoutenberg, who was
elected as one of five national officers.
Highline’s PTK chapter, Pi Sigma, did
well in national competition, receiving two
first place awards: The Freeman Science
Award and the Worden-Wyllie Audio-Visu-
al Award.
The Freeman Award was given for Pi
Sigma’s science paper written on the com-
puter as the “Master Machine of the
Twentieth Century.” This was in keeping
with the national theme “Signed by the
Masters.”
The Worden-Wyllie Audio-Visual Award
was given for the Pi Sigma’s twenty min-
ute video tape presentation. It used the
format of “Hearing of the Minds,” and
brought together three famous historical
computer prophets through actors.
Highline student Vipi Stoutenberg was
chosen as one of ten students from across the
country to be remembered in the Hall of
Honor. Phi Theta Kappa’s showcase of
outstanding students.
Aside from being recognized with var-
ious awards, the convention was also
the scene of students conducting their cam-
paigns for national offices.
As part of Thomas’ campaign for office
he had to give a two-minute speech in
front of 1,500 people at the convention. He
also attended caucuses and tried to con-
sider each of the state’s chapters to vote
for him.
“Each chapter has one delegate that can
vote — that’s the man to impress,”
said Thomas.
The two opponents that Thomas de-
fated were from Washington’s, Grays
Harbor Community College and Oregon’s
Lane Community College.
The award-winning science paper in-
volved a computer survey which included
responses from 560 Highline students,
faculty, and administrators.
According to the report taken from the
survey, a total of 33 questions were asked
ranging from, “Do you own a home com-
puter?” to, “Don’t think computers should
project winners in an election.”
Pi Sigma’s award winning videotape
was chosen as the best out of 16 entries.
Pi Sigma’s four members who attended
the West/Northwest Regional Convention
were Thomas, Kerr, Stouten-
berg, and Michelle Wannemacher.
The chairman of Dr. John Fodor, accom-
panied the group.

Dance-athon’s for Dystrophy
Students will have the opportunity to
raise money for the Muscular Dystrophy
Association at a dance marathon to be held
April 29, in the Student Lounge.
The dance will be sponsored by the
Student Programs Board and will last from
5 p.m. until 2 a.m. According to Fred
Frohmadner, concert chairman for the
Student Programs Board, they are aiming to
make $2000 to be donated to the M.D.
Association.
All participants will receive free t-
shirts and Pac-West passes. Stereo equip-
ment, luggage and other prizes will be
awarded to the couples who bring in the
most donations and the couples who last
the longest.
“It’s for a good cause,” emphasized
Frohmader. “It’s also a great chance
for guys to meet girls and vice-versa.”
He encouraged students to participate
because those without pledges will be con-
considered as the general public and be charged a $5 admission.
Sign-ups will be taken until April 27
from 3 p.m. until 10 a.m. in the cafeteria
and from 1 until 2 p.m. in the student
lounge.
There will be four dance playing includ-
ing Aerosion, Boneyard, and Yeuxinstitution
Between April 21 in the lecture hall.
According to Frohmader, “The dance
will make $2000 to be donated to the M.D.
Association.”

According to the published report the
GSL will operate at one billion dollars less
than the ’83 budget. However, it also
states that there will be one billion dollars
more available to student borrowers.
Jeff Abrahamson, director of financial
aid for Highline, cleared up this apparent
contradiction.
“The cases for operating the financial aid
programs have gone down because of
the lower interest rates offered by the
lending institutions,” he said.
Another change in the GSL program
will be that the current financial needs
test, which now is only required of those
students whose family income is above
$30,000, will be required of students at all
income levels. This is an, Abrahamson says,“the GSL program will direct funds to those who are needy.”

Health kick infects Highline

by EVA SOBUL

You can't get enough of a good thing, and because of this, Highline's Health Services will be bringing back its Health Fair.

Revealed for the new year, Health Fair was changed to Health Kick '83, but still offers the same services as last year. These services include free screening for height, weight, blood-pressure, visual acuity and anemia testing. There will also be referrals to local health resources.

An optional blood chemistry analysis test can be administered to detect possible high levels of sugar and cholesterol. There is an $8 charge. Students interested in taking this test must not eat for a minimum of four hours before the test.

This year the Health Kick will be held Wednesday, April 27th, from 9 a.m. to 3 p.m. in the downstairs lobby of Bldg. 6. The health screening will take between 20 to 30 minutes to go through. Individuals will be required to fill out a history form for the health professional to review and discuss with them.

Other services include a visiting CAPRI unit (an EKG machine) and two nutrition consultants. One consultant is from the Division of Social and Health Services and another from Seattle Public Health Services.

Mary Lou Holland, R.N., coordinator of Health Services, is very excited about the fair and hopes for a good turnout. Last year over 200 people were screened with the help of 60 volunteers. Holland also commented that there is an even greater need for volunteers this year.

"This is the first year that we can make this Health Kick possible," said Holland. She is looking for 60-75 volunteers to help with setting up, registration, taking blood pressures, vision screening, and also clean-up activities.

Individuals who are interested in volunteering an hour or more of their time should contact Holland in health services.

Faculty grievance turned down

by CAROLINE BLEAKLEY

The actions of the state legislature have prohibited the school from granting a raise to part-time instructors.

According to Highline College Education Association (HCEA) President Kay Gribble, the instructors will not receive a salary raise that was agreed upon two years ago.

The HCEA and HCC Board of Trustees negotiated and adopted an hourly rate of pay for part-time instructors in 1981.

"We negotiated two years ago for a certain amount of money on the contract, and it was agreed on," explained Gribble.

The legislature said instructors would get a seven percent increase, but as of a year ago the legislature couldn't afford it.

"The faculty felt their contract had been misappropriated in some way," said former HCEA President Bruce Roberts. As a result, a grievance was filed on Oct. 23, 1982 against the policy.

HCEA protested that the legislature was not adhering to the agreed upon raise only to the seven percent pay increase. Part-time instructors still felt they deserved their agreed upon increase.

The filed grievance went through a three-step internal process involving Association Dean of Instruction Glen Edmonson, Dean of Instruction Robert McFarland, and finally HCC President Dr. Shirley Gordon.

When the grievance reached Gordon, she had the responsibility and power to execute her decision.

"Gordon denied the grievance," said Roberts.

Tuition could be frozen by House bill

by ANNE DOWELL

A bill that would effectively freeze community college tuition at its current level for at least the next two plus years may pass between now and April 24.

The bill, introduced by the Washington Association of Community College Students (WACCS), passed the House and is now in the House Ways and Means Committee. It will be decided on by a majority of that committee.

"WACCS is the only organization that represents the interests of the community college student and protects those interests," explained Neal Allen, Highline student council representative.

According to Allen, the organization is made up of representatives from each community college in Washington state. Each school has one voting member and pays to join the organization according to the number of students attending the college.

Michael Marvin, president of WACCS, said the bill drops the percentages of the cost of education that a student has to pay up to 18 percent at the community college level.

"This bill will pass," said Marvin, "only if the student gets behind it and work to pass it."

Dean of Instruction Robert McFarland said he believes that tuition increases have hurt part-time students more than full-time students.

Thunderword gains recognition

by DOUG SIPPY

Spirits were high in the Highline Thunderword newsroom when Journalism Advisor Julianne Gran announced some good news.

The Thunderword staff was recognized for "general excellence" by several journalism organizations.

All American

The National Collegiate Press Association (NCPA) has reported the publication an "All American" rating, the highest honor in this national competition.

The Thunderword competes in the same category as four-year colleges and universities.

This is the first time an All-American rating has been received. The Thunderword has been competing in this contest since 1979.

The NCPA judged the entries in five categories: Coverage and content, writing and editing, opinion and content, design and photography, and art/graphics.

On coverage and content, NCPA Judge Les Gogen wrote, "The Thunderword gives the reader complete coverage in all areas in an interesting and lively manner. Your readers are definitely well-informed."

Mark of Excellence

In addition to the national honor rating, the publication won the Sigma Delta Chi/Society of Professional Journalists "Mark of Excellence" award in the "Best Student Newspaper" category.

This category was judged by the newspaper staff of the Minneapolis Star Tribune.

The Thunderword again competed with four-year colleges and universities. It was the only community college newspaper in the five-state region to place in any category since 1979.

There were more than 200 entries in all categories, including the "Best Student Newspaper." "The judges looked for total excellence," said Marlowe Churchill of the Tacoma Tribune.
Restaurant industry frowns on new tax

Although the pay usually is not great, until recently being a waitperson was considered to be a fairly lucrative job—because of tips. Before the eight percent federal tax on gratuities, that is.

A mandatory eight percent tax should not be implemented because it is not fair. The federal government decided that tipped employees make at least eight percent of their income in tips. Thus eight percent figure is taxed—regardless of how much they actually earned in gratuities.

It is said the law was passed because some tipped employees have not included gratuities when filing tax returns. Employers were able to do this because there was no way to keep track of how much each employee earned in tips, except in the case of credit cards.

In order to enforce the new tax law, an employer must keep track of each employee's total sales. This must be done because the eight percent figure is based on the total sales of the period.

This would mean more book work, more time and the maybe the need to hire more bookkeepers.

The state of the restaurant industry may not be much of a setback. However, in these hard economic times, it could be an extra expense that may cause a struggling restaurant to go under.

In fact, the extra expense would be more likely be passed onto the consumer in the form of higher prices. Consequently, this new law will fail to consumers and to some restaurants.

According to Webster's New World Dictionary a gratuity is "a gift, as of money, especially for a service; tip." The word tip itself is an acronym for the phrase "To Insure Prompt Service." In other words, when customers feel their waiters or waitresses have earned a gift by giving good service, they tip accordingly.

Custom dictates that donors should tip 20 percent of their total bill. This is not a law. Some people do not tip over that, many people tip below and some people don't tip at all. Tips vary widely, according to the establishment, the service and the service.

It is impossible to know exactly how much an employee makes in tips, therefore some will always be treated unfairly.

Since the hourly wage usually is not high, wait persons know the most work hard for their tips. They desire to keep the total amount of the tips they earn.

Supporters of the new tax law argue that it would bring in more money for the government and better equality of enforcement.

The law may indeed bring in more revenue but it may be at the expense of some people having to pay higher rates than they inform should be required to pay. Consequently, this enforcement provides little more equality than the law that was in effect before.

Several suggested alternatives to the eight percent tax include putting a mandatory tip up to 20 percent or lowering the eight percent figure.

The mandatory tip is not practical because the tipped employees may be receiving a tip they may not deserve. Likewise, lowering the percentage is not practical because, it is advantageous to some and disadvantageous to others.

Tips are part of the wait person's total income and should be taxed. However, until a requirement is made that tips be used, it is unfair to collect on across the board eight percent tax perks.

Student council plans projects for spring

Spring quarter is underway and the Student Council is working hard to complete projects by term end. A overview of what is happening this quarter as follows:

A definite date has been set for a spring lecture in the Artist Lecture Center, Bldg. 7, April 28, from noon to 2 p.m.

A panel will be discussing, "Preparing for International Careers in the Puget Sound area." Some of the questions to be addressed will be:

- How does the growth of tourism affect Puget Sound area? What skills are needed because of the international influence? and
- How does international trade affect careers for the student who intends to work in the P.S. area?" After the success of the High Tech panel last quarter, plans are being made to videotape the presentation and replay it for the students who will be unable to attend.

April 29 from 6 p.m. to 2 a.m., is the scheduled date for the M.D.A. Super Dance. All students and friends are invited and urged to attend this marathon dance to raise money for Muscular Dystrophy. The big prizes will be given for the most pledges taken and of course for the dancers who can remain on their feet the longest. Sign-ups will be held in the cafeteria and at the Student Lounge coordinators desk. For more information contact Vickie Hammrich in the RUCSU office.

A recent Student Affairs Council meeting approved the final draft of the much needed, revised edition of the Student's Rights and Responsibilities Handbook. Final decisions through with the College President and the Board of Trustees. With luck we should see the completed form by Fall quarter 1983.

Student elections for council positions will be the first week in May. Newly elected members will have the chance to participate in council activities and with current members prior to taking office in Fall quarter. Anyone wishing to work on the election committee should contact Jeff Johnson in HCSU.

The Consumer Guide to the Faculty is almost complete. Neil Allen reports that this guide will aid students in matching their workload with a particular way an instructor teaches. This information could possibly eliminate a lot of add/drops, due to student's unawareness of class requirements.

In the process of being approved by various committees in a traffic revision. Upon approval, traffic fines will be increased in $5-$5. The significant change up until that time will be the increase in part-time student rates to $5 and the elimination of the first offense of $1 to $5. Under consideration also is a reduction in fines for traffic violations unless all unpaid fines are paid in full.

This area in particular is stirring up concern by some faculty and students.

If you do have fines unpaid, find out what they are and be prepared to do something about it. Don't have the excuse of not knowing.
Social Security's future provides reflection

by KAREN BELONGIA

Fever hits Highline — spring is here!

by GEORGE DONOVAN

Dear Editor,

It is a strange paradox that people who are often roiled by social inequity, and among them are many military personnel, find it hard to get along with themselves. This is a common problem for many people who are in a constant state of high stress, and it is important that they find ways to relax and unwind. Some people find that they can relieve stress by engaging in physical activity, such as running or yoga. Others find that they can relieve stress by talking to a friend or family member. Whatever their method, it is important that they find ways to relax and unwind, and that they take time to do so. Thank you for your help.

Barry Black

Mail welcomed

Dear Students, Faculty and Staff,

The Thunderbird welcomes all letters from the campus community. Unfortunately we rarely receive any. This means that either no one reads the paper at all, or no one reads the paper at all. Do you know about our mailboxes?

If someone ever has a comment about anything, a bone to pick, or would simply like to give the Thunderbird a little praise, please write us. Letters should be kept to a 250-word maximum and addressed to the editor, mail stop 10-3. If it was more convenient for you to bring your letter to our office, we are located in Bldg. 10, room 106. Phone hours are from 9 a.m. to 4 p.m. daily.

We would appreciate hearing from you.

The Thunderbird staff
Summertime employment challenges, and Stalking big game: summer job safari

by PAM SCHWANDER

Nothing can cause the summer blues faster for the job hunter than those discouraging words "we're not accepting applications." Professionals agree, however, that with the right techniques students can overcome the blues and get the summer jobs they are pursuing.

First, students need to be looking in the right places. One spot to begin on campus is the job order board located in Bldg. 6, next to the Financial Aid office. The board offers jobs ranging from ice cream truck drivers to federal clerks.

The process requires finding a job on the board and taking a number from the sheet to the job placement office, also located in Bldg. 6. There the student will be given the details about the job. For example, it will include information on job requirements and any testing that might be done.

While in the job placement office, students might also ask to see the camp application folders if they enjoy recreations. The YMCA Camp Orkila is one such camp that operates nearby. Some of the job offers include water-safety instructor and cabin leader.

Students might also ask to see the job application folders if they enjoy recreation. The YMCA Camp Orkila is one such camp that operates nearby. Some of the job offers include water-safety instructor and cabin leader.

Advisement on job targets may be acquired by attending the workshop, "Finding A Job in the Market." Sign-ups for the workshop will be taken in the counseling center, Bldg. 6.

The class will also involve guidelines for resume writing and interview tips so students can follow job leads. If the student is looking for summer jobs without the assistance of the school, Beverly Paske, Highline College Job Developer had some suggestions:

- Local parks and recreation departments
- Tourist attractions (Mt. Rainier, Sea-Tac Airport)
- Private owned clubs
- Organized clubs
- Harvest Work
- Park employment that students should check before applying for.

The student will have a job placed. The student should not rely totally on them. They should also rely on other resources. Another aspect of Co-op Education is that it also offers volunteer work experience positions.

According to Paske, "Students at Highline now have the opportunity to accumulate academic credits while earning wages. As long as the job is related to what students are taking in school, the opportunity to earn credits at work," according to Paske, "is a fact that students should learn something about something that is occurring at school."

Students who are eligible for Co-op Education are those who attend Highline at least half time, are taking six credits or more and have or will have a job that relates to the classes they're taking at school. The six credits may include credits earned through work experience, Paske added.

Additional services from Co-op Education include helping students find work. This started last year when Paske began working there. They also try to offer an up-to-date as possible labor market information in areas that students are interested in. In effect, Co-op Education tries to advocate with students in the marketplace.

Paske adds, "What I'm selling is the student population at Highline. That's a product like anything else. I tell the program to employers and I sell the program to the students."

Those students who wish to work should list with Co-op Ed. Paske said, but should not rely totally on them. They should also rely on other resources. Another aspect of Co-op Education is that it also offers volunteer work experience positions.

According to Paske, "Students at Highline now have the opportunity to earn wages to support themselves so they don't feel they can give up this up to volunteer some hours for work experience. Paske stresses that students are advised to keep their paid jobs but to also volunteer some hours to three hours a week to an unpaid job. She added that if there is any way a student can volunteer some hours, Co-op Education has some fantastic volunteer jobs available. According to Paske, a good example is History. The program now has 12 history positions available."

Work study applications now being accepted for summer employment.

by DOUG SIPPY

As part of a program to help students who most critically need funds for Summer Quarter, the Financial Aid office in Bldg. 6 is now accepting applications for summer work-study.

In order to qualify for work-study, students must be enrolled in Summer classes and show ample proof of their financial shortcomings.

Financial Aid Director Jeffrey Abrahamson explained that the jobs were available only to financial aid recipients because funds used to pay the wages for work-study come directly from the financial aid budget. According to Abrahamson, the program helps both the students and the school by providing the student with a job while allowing the school to benefit from funds that might otherwise be used simply to pay student tuition.

Paske said, "It's the (booklet) a nice thing to have but it's not any sense of the word complete."

If students want a Federal job, the best approach according to Paske, is to submit an application to the particular agency that best fits the students skill.

People looking in the newspaper for jobs might be looking in the wrong place, according to Phil Swanberg, Job Officer and Acting Dean of Students.

Jobs in general don't appear in advertisements according to Swanberg.

Swanberg agreed and said that the summer job should be a "career exploration."
What are your job plans for this summer?

People in the streets
by LOUIS J. HERRON

Karen Richards
I have worked full time at McDonald's for the past two years.

Chad Farrington
I have worked at Lenguru every summer for the past two years. I take bets and sell tickets for the room.

Tami Bissoni
I'm taking Computer Programming classes and have been for the past two years. I'm studying for the SAT and I'm planning on attending Berkshire Community College.

Bill Brown
You will find me on the 6th floor of the library in the Television Production room.

CETA offers work experience
by BETTINA BINDER

King County will be offering summer and annual employment through a Comprehensive Employment and Training Act (CETA) subsidized work training program.

The goal of the program is to teach skills and provide job finding assistance in order to help people find more permanent jobs. The program has employed 1000 to 1200 youths every summer, according to Jerry Degrieck, summer work program coordinator.

To be eligible for the program applicants must be between the ages of 14 and 21, low income, disabled and/or handicapped and live in King County outside Seattle city limits.

"The summer program offers work experience to the applicant who has never had a job before," said Degrieck. "We have an Employee Development Plan that sets goals for the youth." They also have a labor market orientation for the applicants to provide information on how to find a job on their own.

The jobs available are in the government and non-profit sector, training skills in the areas of clerical, recreational, custodial, day care, grounds maintenance and in some areas of the labor industry. Wages are $3.35 an hour.

As of Sept. 30, the CETA job training work program will evolve into the Job Training Partnership Act according to Degrieck. The change will emphasize the job training vocational exploration in the private sector.

The summer program begins at the end of June and lasts between eight to ten weeks. It is recommended to apply as soon as possible, as the job availability is limited. To apply, call the Highline representative, Judy Diste at 544-7574. Diste will have an office at Highline beginning the end of May.

Employment choices are limited
by JO ANNE FOSLER

"Compared to last summer there are more jobs, but the competition is much greater. Students looking for summer jobs could be coming up against other applicants with 10 years experience," said Swanberg.

"Students should understand that they may not be able to work the entire summer," said Swanberg.

Tourism, retail, restaurant and clerical industries also have openings for summer jobs. Swanberg suggested that students look for jobs that will provide career exploration or experience toward the field that they eventually want to work in.

Beverly Pauley, of Cooperative Education said, "We are now seeing an increase in the number of students looking for summer work. The reasons are diversified, but most students are looking for some type of experience that will help in their future careers." Swanberg said that any computer knowledge, typing skills, 10 key by touch, communication skills, either through writing or speaking, and experience on electronic cash registers are all beneficial to the job seeker.

Students accepted to major drama schools

by KEVIN KERR

Eric Berg used to be a "nerd guy" in high school. Now he's performing in the spotlight. Lisa Fredrickson has been involved "behind the scenes" in drama for a number of years. Now she, too, has come to the forefront on stage.

Both of these high school students are very involved actors in the campus drama program. They both have received the distinction of being accepted to major drama schools on both coasts.

Berg will be going to the North Carolina School of the Arts in the fall. He was accepted at the Neighborhood Playhouse in New York, but when it came time to decide, he chose North Carolina.

"I really like the program at North Carolina," Berg said. "It's structured more like a university. I can get my Bachelor's degree and probably get a little more straight off."

Fredrickson has been accepted and will be attending the California Institute of the Arts (CalArts) just outside Los Angeles, Calif. She had thought of going to New York, but decided the program at CalArts was better suited to her talents.

"I completed my A.A. here last year," she explained. "And even though I'll be entering as a second year student, I want to graduate with my Bachelors."

To be chosen by CalArts, Fredrickson had to prepare a "showcase portfolio" (bits and pieces from several plays, etc.) and present it in San Francisco when most of the major drama institutions across the country held auditions last year. She was one of 15 out of 400 applicants that made it.

Presently both Berg and Fredrickson are working on one act plays for Spring quarter, plus the yearly Spring Children's Theatre Show, which will go on tour to Ellensburg in early May and return home for two weekends of performances.

Berg is directing several of the one acts, and Fredrickson is also directing one, titled Brenda and Jerry. Both are helping with various aspects of the children's show, including scripting and puppet design and construction.

With regards to the future, both cheerfully aspire for noteworthy acting careers. Berg would like to first do live stage "because that is where the best skills are learned; it makes you a skilled, excellent actor."

But what about the film industry? "It's quite attractive," Berg confided, "and it's a good way to further your career. But the directors are normally more established actors."

"I enjoy films like the old John Wayne and Clint Eastwood westerns; they're fun. But I'd probably want to do something more dramatic — something memorable — to start my career."

And when it comes to TV, Berg admitted "It's a way to make money, but it's only doing, say, commercials if I had to. It's not a career."

Fredrickson's attitude comes from a direct opposite point. "I like TV," she said. "I've worked on both sides of the camera, and I enjoy both. As far as my future career, I also enjoy musical comedy. I know the two don't go together, but I'd like to do either."

And her school is reflective of that. "CalArts is a relatively new school," she commented. "It was opened by Walt Disney in 1962, and it encourages free experience and experimentation. But what I like best is the offerings of the different departments."

"Since it was founded by Disney, it has a great school for art and animation, of course. But it's the TV production department, along with acting and staging, that I'm interested in," she added. "I've taken TV classes here at Highline, and that's given me a good background."

Both Berg and Fredrickson have gotten a lot from experience from school productions, behind the scenes as well as in front.

Fredrickson reminisced about working backstage.

"It's harder than acting. I've helped pack the sets, worked the lights, and the schools."

Fredrickson, as Berg, both agree that their training at Highline has been important.

'High Road' hits dead end in China

Four Stars

High Road to China, starring Tom Selleck and Bess Armstrong, is playing at several local theatres. Rated PC.

by CHRISTINE VALDEZ

There are a couple of jokes that run throughout the movie that may provoke chuckles, if not belly laughs. But there are the usual clichés, which, although they worked once, now seem trite.

The two words that best describe this film are standard and simple. The acting is standard and the plot is simple. It's almost impossible to take apart a movie that is already laid out just like it is.

Monty Python's The Meaning of Life

by KEVIN KEER

Monty Python is at it again, this time trying to find The Meaning of Life. These six English comedians introduce us to the war of the world, trying to answer to most of life's basic questions, and coming up with explanations that are quite base themselves. In something short of any decency, they manage to dissect (very literally in some cases) all of life's greatest issues, leaving a raucous, disgusting mess.

"But isn't that typical of the Pythonists?" some critics say. In that case it is.

Some of the Pythonists' most memorable moments are the scenes in which they manage to ridicule the Church, the State, and the Establishment. They do this in a way that is both clever and pointed, while at the same time satirizing the Establishment.

An example of this is the scene in which the Pythonists are shown watching a film about the life of Jesus. They mock the film's depiction of Jesus as a simple, humble man, and instead present him as a violent and dangerous figure. This is a clear reference to the way that the Establishment has presented Jesus as a simple, humble man, and instead presents him as a violent and dangerous figure.

Another example of this is the scene in which the Pythonists are shown watching a film about the life of Stalin. They mock the film's depiction of Stalin as a wise and benevolent leader, and instead present him as a cruel and bloodthirsty figure. This is a clear reference to the way that the Establishment has presented Stalin as a wise and benevolent leader, and instead presents him as a cruel and bloodthirsty figure.

ThePython lampoon the Church as well as the Establishment, creating a world where the Establishment is seen as both stupid and evil.

High on the list of the Pythonists' pre-occupations is the Roman Catholic belief of the sacrality of life. This belief is mocked in a scene in which the Pythonists are shown watching a film about the life of Jesus. They mock the film's depiction of Jesus as a simple, humble man, and instead present him as a violent and dangerous figure. This is a clear reference to the way that the Establishment has presented Jesus as a simple, humble man, and instead presents him as a violent and dangerous figure.

The Meaning of Life is divided into seven chapters. From Chapter I, "Birth," they move along to "Growing and Learning," and then the next logical step, Chapter II, "Fightin' Each Other." Leaving the pandemonium of the Zulu Wars, the film arrives at Chapters IV and V, "Middle Age" and "Live Organ Transplants." The following chapters, VI and VII, "Autumn Years" and "Death," are, of course, some of the best scenes in the film. In "Death" the Pythons equate western religion's Heaven and Hell with the "Christmas Time in Heaven.

You've got to see this one to believe it.

There are many excellent songs and skits that add to the general circus of the film. Before the film is shown there is a 10 minute short feature: The Crimson Permanent Assurance.

For those women who are satisfied with just seeing Tom Selleck, watch for two hours, it's all here. They'll even get to see him on horseback, reminiscent of his Winston commercial days.

Bess Armstrong portrays the spirited heroine who believes she can do anything and anything is done for example, after an easy lesson, Eve is truck flying. O'Malley's plane complex with loops. Of course, if reality is what viewers are after, they should probably see Gandhi.

As far as acting talent is concerned, Armstrong ranks right there with Selleck, competent. She's helped along by the Python's acting that is almost looks like she's trying to compete with Selleck's popularity by marginalizing whatever she does. Armstrong does nothing to improve her image. She's trying to break out of his set role and prove herself as an actor. However, it is unrealistic to think that most of the people in an audience made up mostly of teenagers, were there to witness Selleck's acting. He is a competent actor. However, he doesn't seem to be able to get out of the

Orr tells her story

by PAM SCHWANDER

A lady who tells herself by telling others about arctic mons, Zen and bull tales, and other stories from around the world. Her name is Cynthia Orr.

She will be performing at Highline on April 26, at noon in the Artist-Lecture Center (Bldg. 7). She is being supported by Highline's Special Events Committee.

"It's not a lavish thing, but I've betn trying to find The Meaning of Life. Another scene of senseless debauchery is "The Meaning of Life, Part Five - Live Organ Transplants." It had been one of Python Gilliam's lunatic animation sequences, that might have been "tomcatism." But to watch Graham Chapman throw some blighter on a table and go at it with a butcher's knife and bit much, even for British humor. The Meaning of Life may have a few valid points, and even a couple of funny sketches (I did like the fish), but overall it is a senseless onslaught of depravity that leaves the audience wishing they had probably lost his popcorn all over the person next to him.

Tracksters conquer Everett Invitational

by TRISH ARMSTRONG

Seeking the state conference championships later in May.

Trackers on homecourts. The win boosted their overall record to 7-2.

For the men, Gail Stoll landed first in the high jump with a 6'2" effort. He also competed in the long jump event as he jumped 21'3".

跟踪者们在西雅图社区学院、雅基马和一个独立的团队。

Notable performances by Lauren Walker helped him co-athlete of the meet. Walker had a running time of 50.4 for the 400 meter run and 326.3 for the 1600 meter run.

Netters set state title as ‘season-long goal’

by DUNCAN McDONALD

Highline’s men’s tennis team won a dominating victory over Clark on Apr. 12 by the score of 6-4.

This match was much like the one against Bellevue. Overall we performed very well, but we didn’t come through when it counted,” Johnson said.

“We had to cancel so many practices that we could only fit two in before spring break,” Johnson explained.

This factor proved to be evident on Apr. 13 as the team lost their first league match of the year to Bellevue by the decisive margin of 9-1.

“We were depressed with indoor tennis courts, and that makes a big difference in performance,” he added.

The competitive netters performed extremely well in their four pre-season matches. They won three of those matches by convincing margins.

At Columbia Basin on Mar. 25, the T-birds won by a score of 9-0, with number three doubles player Lisa-Livermore, who did second-slated Lisa-Livermore, who won the match.

Highline continued their winning ways on Apr. 2 by defeating Columbia Basin again, 6-4, in a home match.

“We are performing rather well, considering our great lack of practice,” Johnson said, purified and normalised, drunk with their greatest foe – rain.

Consistency paves ladies’ way to victory

by TED ULMER

Highline’s women’s tennis team played a consistent style of tennis and defeated a second Bellevue club last Tuesday on the Helmsman’s homecourt. The final score was convincing - 7-2, and showed some of the potential of Coach Slaner’s team.

“Much of our success was due to the steady and patient play of our players. They never got impatient. In other words, they let their opponents make the mistakes,” Slaner explained.

And with Bellevue as perhaps their toughest Division I competition, it appears as though the T-birds will continue to have success this year.

“I think we have potential to take the division,” Slaner added.

The top doubles team of Field and Lowdove did second-slated Lisa Livermore, who won the match.

At this point in the season, the netters boast a 6-3 record. However, the “mess” of their schedule is yet to come.

Next Monday, the T-birds will host powerhouse Tacoma, who has already beaten Highline. Since they are a good server and volley team, the T-birds strategy will be to keep them off balance.

Highline played Clark again on Apr. 8, but in Vancouver on Clark’s home court. Clark, 3-4, 4-6, 6-2, 6-4, 6-1. By this time. Only five wins are needed to assure a win.

“Sleener’s not real strong. Also, they lost their first and third singles players,” Slaner said.

“Shoreline’s not real strong. Also, they lost their first and third singles players,” Slaner said.

One day earlier, Highline hosted Shoreline and won both number one and number two.

'Birds boast 50-5 two-year record

by TED ULMER

It was a bitter end to a sweet season—an end that was somewhat unexpected and certainly unwanted.

Hightline's Lady Hoosiers, after posting an overall season record of 26-3 and a perfect 10-0 league mark, were upset in their bid to retain the community college state championship trophy they won a year ago.

The T-birds fell at the hands of Spokane Falls, who provided for two of Hightline's three defeats, including an early season victory over HCC.

But, as defending champion, the T-birds had grown accustomed to being labeled as "the team to beat." Every game, despite the final score, was a battle—everyone was gunning for them.

Often during the season they had to rally late in the game to win. At Skagit, the T-birds found themselves down by 15 points with only five minutes left in regulation play. They miraculously battled back and sent the game into overtime, eventually securing a victory.

Sometimes the other team rallied late in the game, only to have Hightline thwart their comeback.

A good reminder of that would be the championship game at the Lower Columbia Tournament. HCC had Bellevue in a one-point lead in the second half.

The Ladybirds battled back to within one, but that was as close as they got. The T-birds hung on and used that one point to win.

In the past two years, the Ladybirds have accomplished much. They took consecutive league titles in undefeated fashion, posting perfect 10-0 records, won the Shoh Devil Tournament in Longview two years ago and the state championship trophy they had won a year ago.

As with all great teams, the Thunderbirds have talented individuals and good coaching.

HCC sophomore forward Alice Davis was voted to the Region I all-league first team. Sophomore forward Jan Armstrong, the T-birds leading scorer at 18.3 points per game, was honored with a second team berth, as was sophomore guard Jane Snyder. Missing from either team was sophomore center Trish Armstrong, who led the team in rebounding with 13 boards a game. However, she received some consolation when she was chosen to all-tournament team along with her sister Jan.

Also, T-bird head coach Dale Bolinger was unanimously selected as coach of the year.

Bolinger commented on the season-ending game.

"It was very disappointing because we didn't get that last victory, but we did accomplish a lot this season. They're a group of nine people. I'll always have fond memories of them," he said.

Below: Head coach Dale Bolinger and Asst. Steve Stamps give encouragement to the streaking 'Birds against Everett. Right: Jan and Trish Armstrong lament after defeat.

Martial artists display hard, soft style skills

by TERRY PILANT

There was more than enough excitement to last the entire day, when Hightline hosted the 10th annual Shorin-Ryu Open Karate and Kung Fu championships April 2 at the Pavilion.

The tournament, which was rated "B*" (non-contact matches where winners are awarded trophies, as opposed to "A*" rated tournaments which consist of contact matches with winners being awarded prize money) by Karate Illustrated magazine, attracted competitors from all over the Northwestern U.S. and Canada.

The action started with the youth division (16 and under) Kata competition at 10:30 a.m., with the adult division (16 and above) starting soon after.

The Kumite matches in all divisions started several hours later.

The Kata, according to tournament director Jerry Gould, is a dance-like routine which shows the individual competitors' knowledge of Karate's basic movements.

"Kata is the backbone of Karate," stressed Gould.

Gould noted that there are two different styles presented in most Kata routines, one is the hard style which includes Karate and other martial art forms originated in Okinawa, Japan, and Korea.

The hard style uses basic straight, linear movements. practitioners of this style use primarily straight, quick punches and kicks.

In contrast with the hard style is the soft style, which includes the Chinese martial art forms, such as Kung Fu.

The soft style uses more circular movements and is more dance-like with more leaping and running, and the use of sweeping kicks and punches.

There is a panel made up of five judges, all of whom are black belts, that score each Kata entry. They use a 1-10 point system. Each judge scores the individual performances, then the high and low scores are thrown out and the remaining scores are tallied to give a cumulative score.

Gould said that during a Kata routine the judges look for an individual's balance, power, speed, concentration, and continuity of movement.

The Kata competition covered many different divisions, from the youth division to the adult (both men and women's) white belt, colored belt, green belt, brown belt, black belt, and the black belt weapons.

The black belt competition culminated with the Grand Champion Kata playoffs, which were conducted later in the evening.

Pat McCarthy, of Victoria, British Columbia, winner of the black belt weapons division, put on an impressive display to defeat three others including 1982 Grand Champ Keith Hirabayashi of Seattle, to win the 1983 version of the Kata Grand Championship.

The Kumite are the actual fighting matches. Each match consists of one two-minute round. The fighter with the most points after a round is awarded the victory. However, if one or the other fighter scores three points within the round then he is given the win, and the match ends at that point. If the score is tied at the end of regulation time, then the fighter who scores first in the sudden death overtime wins.

Karate and Kung Fu championships April 2 at the Pavilion.

The tournament, which was rated "B*" (non-contact matches where winners are awarded trophies, as opposed to "A*" rated tournaments which consist of contact matches with winners being awarded prize money) by Karate Illustrated magazine, attracted competitors from all over the Northwestern U.S. and Canada.

The action started with the youth division (16 and under) Kata competition at 10:30 a.m., with the adult division (16 and above) starting soon after.

The Kumite matches in all divisions started several hours later.

The Kata, according to tournament director Jerry Gould, is a dance-like routine which shows the individual competitors' knowledge of Karate's basic movements.

"Kata is the backbone of Karate," stressed Gould.

Gould noted that there are two different styles presented in most Kata routines, one is the hard style which includes Karate and other martial art forms originated in Okinawa, Japan, and Korea.

The hard style uses basic straight, linear movements. practitioners of this style use primarily straight, quick punches and kicks.

In contrast with the hard style is the soft style, which includes the Chinese martial art forms, such as Kung Fu.

The soft style uses more circular movements and is more dance-like with more leaping and running, and the use of sweeping kicks and punches.

There is a panel made up of five judges, all of whom are black belts, that score each Kata entry. They use a 1-10 point system. Each judge scores the individual performances, then the high and low scores are thrown out and the remaining scores are tallied to give a cumulative score.

Martial artists compete in tournament

continued from page 13

One point is scored when a fighter throws a punch or a kick that is potential-ly incapacitating to the opponent. Inten- tional or excessive contact is not allowed (it can result in either the awarding of points to an opponent or disqualification). However, incidental contact will be over- looked.

As displayed by Gould before the final matches, some scoring punches would be a backhand to the head, any good counter- punch, a punch that would take down your opponent, and also effective, con- trolled kicks.

There are four judges and one referee. There must be agreement by at least three of the five before a point is awarded.

In the black belt finals, the winner of the women’s first place match was Sea- hawk Sea-gal Dawn Gray.

The men’s lightweight (150 lbs.) champ was Ferdi Orbino, Seattle; the middleweight (130-155 lbs.) champ is Mel Cherry, Tacoma; the light-heavyweight (155-175 lbs.) champ is Mark Heyerdahl, North- west Washington; and the heavyweight (180 lbs. and above) is Robert Edwards, Tacoma.

The semi-finals for the overall Grand Championship consisted of matches be- tween the lightweight vs. the middle- weight, and the light-heavyweight vs. the heavyweight. The winners of these two matches (Orbino and Edwards) met in the Grand Championship final.

The story of the entire day’s competi- tion had to be that of Orbino, who last won the Grand Championship in 1976 and 1977.

He nearly lost in his lightweight match against Hirabayashi, but scored with seconds remaining to send it into overtime and then scored with a good straight kick to win.

In his semi-final against middleweight Mel Cherry, it was almost a carbon copy of his previous match. After Cherry appar- ently had the match won, Orbino came back by tying the match with less than 30 seconds to go. In the overtime Orbino came out with an aggressive attack to score another win.

The final match was an appropriate climax to a day full of great matches. It pitted Orbino the lightweight against Edwards the heavyweight—the light-heavyweight versus the bagnain, David against Galliath.

The match had a total of three 2 minute rounds, the winner would be the one with the highest cumulative point total.

In the first round both fighters appeared tentative. Orbino depending on his coun- terpunching scored two points to Edward’s one point in that round.

The second round saw Edwards come out as the aggressor and totally dominate the round by scoring three points to Orbi- no’s none out.

Edwards scored early in the last round to take a seemingly inescapable 5-2 lead. Orbino, counterpunching again, scored another point to close the gap, but time was definitely running out. How- ever, in what appeared to be deja vu, the game Orbino wouldn’t give up and scored two quick points with less than 20 seconds left in regulation to send the match into overtime.

In the overtime Orbino was a man pos- sed, he came out attacking and scored an immediate 10 to win the 1983 Grand Championship.

Grants are thrown out

continued from page 2

The proposed budget for the College Work-Study program will call for an increase of $310 million. The Reagan admin- istration’s hope is that this will help create jobs for an additional 345,000 students.

This might cause a bit of a problem for colleges because Abrahamson said that the colleges are still going to have to find jobs on the campus, and if not, students will be directed to off-campus jobs.

Off-campus employers want workers with specific skills,” he said, “but first and second year college students usually don’t have a specifically trained skill.

The Pell grant program will be changed to include a “Self-Help” provision. Stu- dents will be required to provide a min- imum of 40 percent of the cost of attending school with an absolute dollar minimum of $800.

Students will be allowed to use the other forms of federal financial aid along with their personal income to meet the minimum requirement.

The amount of the Self-Help grant will depend on the cost of attendance. While the maximum Pell grant currently is $1,800, a student who attends a high cost institution and has a small family contri- bution, could possibly receive a $3,500 Self-Help grant.

In the Department of Education’s report, it states that the main reasons for simplifying and consolidating these programs is to benefit the student, making it easier for the taxpayer, in the form of a lower tax burden. But it also states that simplifica- tion will dramatically reduce the adminis- trative burden colleges now face adminis- tering the present system.

Not so says Abrahamson. “Highline will still have to administer the programs.

Co-op helps

continued from page 6

Cal societies crying out for volunteers to earn credit through their programs.

“There’s all sorts of opportunities for students if they’re willing to think about them,” Paule said.

She informs students of the program mainly through speeches at the beginning of each quarter. She speaks to 10-15 distrib- ution classes plus hangout posters.

Each new school year, Co-op Education follows up in developing a job market for students at Highline. Being active in local Chambers of Commerce helps, as does sending mailings to new businesses. Job development is a whole discipline in itself, according to Paule.

“We are fortunate enough to have the reputation of the school preceding us. It’s a well respected institution,” Paule noted.

Additionally, Co-op Education includes summer employment with students work- ing in paid positions overseas. Last summer the program located three positions for students in Europe. This summer, five positions have been filled abroad.

However, students are required to finance their transportation to and from the job location. They will then get the benefit of earning credit while working there. Students interested should contact Ann Tuch in Bldg. 9.

Government delays new budget

continued from page 1

“There might be some part-time instruc- tors in Physical Education next year, but not to the same level there has been in the past,” said McFarland. He added during Spring Quarter no part-time instructors were employed in the Physical Education department.

“One thing we’re concerned about is the loss of the orientation and guidance services that are necessary to students in order to finish programs,” said McFarland.

We want to have as little impact on the student program as possible,” he said.

The schedule is put together to accom- modate about eight credits a quarter commented McFarland.

A couple of years ago we were serving 11,000 students,” he concluded.

House bill could freeze tuition

continued from page 3

“The cost per credit is more for part time students,” said McFarland. “Many of them are housewives who are returning to school and are short on funds.”

He explained that critics of the bill argue that the users must pay for the privi- leges of education. He compared this to the increases in park users fees.

However, McFarland said he looks at “education as an investment,” both by student and by the state.

“By allowing more people to be edu- cated, the state could end up paying less unemployment and less for other social services,” he added. “The result would be better and more employable citizens.”

According to an aide for Rep. Richard O. Barnes, 32nd District, any bills involv- ing money are cut during the last six days of a session. This session ends April 24.

He urged concerned students to contact their own representative, members of the House Ways and Means Committee, or the bill’s prime sponsor, Rep. Donna Charnley.

Marvin advised students to make their views known by calling the legislative hotline at 1-800-562-6000.

Easter Eggs Galore

The Easter bunny came to town and visited the Highline student care develop- ment center April 1. During the Easter egg hunt, Russell Stevens shows all the living easter eggs prize as a disappointed Christopher Lebo hopes for better luck next year.

Spring Elections

The municipal government systems run elections in their communities. This allows for the electorate to choose their elected officials and make decisions that affect their lives directly. The process of elections includes the registration of voters, the creation of ballots, the tallying of votes, and the announcement of the winners. The elections are usually held at regular intervals, such as every four years for presidential elections or every two years for local elections. The candidates for these elections are often campaign to gain the support of voters and win the election. The outcome of elections can have a significant impact on the policies and priorities of a community, as the elected officials are responsible for making decisions that affect the community's well-being. It is important for citizens to participate in the election process by registering to vote, learning about the candidates, and casting their ballots. This ensures that the elected officials represent the will of the people and that the community's interests are taken into account.

STATEMENT OF POLICY: The Thunderbird does not endorse any advertisement and reserves the right to receive or delete any advertisement which may be offensive or contain false information.

Welcome to the Classifieds section of the Thunderbird. Below is a collection of various classified ads, including cars for sale, appliances, and personal items. Each ad is described briefly, providing details about the product or service being offered.

For example, one ad lists a car for sale, stating its features, condition, and asking price. Another ad advertises a boat trailer for sale, specifying its model and offering information about its condition and price.

These classified ads provide a platform for individuals to buy and sell products, services, and opportunities, allowing them to connect with potential buyers and sellers in the Thunderbird community.

Additionally, there is a section for personals, offering various services and opportunities, such as job listings, career advice, and personal services.

The Thunderbird also includes a list of services available to students, faculty, and staff, including information about career services, job search assistance, and other related resources.

Overall, the Classifieds section serves as a valuable resource for the Thunderbird community, promoting communication, networking, and opportunities for its members.
