Building 9 remodel nears completion

By BRANDON HERMAN  
Staff Reporter

Construction might finally conclude on Building 9.

The original completion date was scheduled for, “Mid to the end of December,” said Mike Dooley, facilities project manager at Highline.

The $1.7 million project was not completed in the scheduled time, “The contractor just fell behind. We then extended the deadline at that point,” Dooley said.

The contractor is Anderson Construction; officials for the company had no comment on the delay.

“The current expected completion date is now Feb. 17,” Dooley said.

When the building is completed there will be, “Completely revamped offices, new bathrooms, and a wheelchair lift from the first to second floor, amongst other things,” Dooley said.

This structure was chosen.

Highline to dodge budget axe — for now

By BRANDON HERMAN  
Staff Reporter

Highline is safe for now financially, but state budget cuts could potentially hit the college next year.

The Legislature further cut the state’s budget, including higher education, in a special session in Olympia in December.

Highline officials say, however, that because of careful financial management, the college should be able to make it through June without major cuts to people or programs.

However, the governor’s spending proposal for the 2011-2013 biennial budget includes a 3.8 percent whack from the budget for community colleges, so Highline may again face reductions, said Dr. Jack Bermingham, Highline’s president.

As voters have rejected all tax increases, the Legislature seems likely to make cuts, many observers say.

Budget cuts for colleges have become common; 2008 was the last time that the budget actually increased.

Since then, state-appropriated funds for Highline have decreased from around $26.5 million to $23.7 million.

The only way that Highline has made up for this cut is by increased local funds, such as tuition payments beyond the official state target. Those have increased from around $13.9 million to around $16 million, said Larry Yok, vice president for administration at Highline.

If the potential 3.8 percent cut does happen, it will equate to a decrease of about $900,000.

The upside of this scenario is that the cut might not directly affect tuition, Yok said.

The State Board for Community and Technical Colleges is the only authority that can directly set tuition, not the governor, said Yok.

Although tuition is not the only thing the college focuses on, cuts could affect in other areas as well, such as program funding, wages, and benefits.

“We will protect the college’s operating budget this year if anything came up,” said Yok.

Because of conservative budgeting and careful planning, Highline is not in as much of a hole as other surrounding colleges, Yok said.

The college has been helped by high enrollment and therefore more tuition. When this happens, the extra money from this is recycled into the follow-up quarters to make up for other areas that have lost funding, Yok said.

The big question right now is, “When the economy returns, what happens?” said Yok.

While Highline is currently riding on high enrollment, but when that drops because of job openings in a stronger future economy it will pose a potentially bigger dilemma, he said.
Highline donates nearly a half ton of food to local food bank

BY RASCHELLE CASEBIER  Staff Reporter

The holidays come once a year, but the need for donations at the Des Moines Food Bank remains year round.

Recently, Highline was able to help this need by donating $1,000 and 800 pounds of food through a canned food drive, and by selling raffle tickets.

"The canned food drive and raffle ticket sale benefit the Des Moines Food Bank has been conducted by the Classified Staff of Highline for the last 15 years," said Dave Weber, Highline graphics production instructor.

"The drive began after Thanksgiving and ended just before the Christmas holiday," Weber said.

"We placed holiday wrapped donation barrels around campus in areas where we thought they would be highly visible," Weber said.

The raffle tickets were sold to the faculty and staff prior to the Winter Luncheon at the end of Fall Quarter to help raise money, Weber said.

"The Highline Foundation has supported the effort by donating stationery to solicit donations and thank you letters to area businesses that donated raffle prizes," Weber said.

"We have the students, staff, and faculty to thank for the contributions to the canned food drive," Weber said.

"The 800 pounds of food donated by Highline is equal to about 640 meals, averaging one and a quarter pounds of food per person," said Kristi Gasken, executive director of the Des Moines Food Bank.

"On average throughout the year, it costs 20 cents per meal for someone," Gasken said.

"The Des Moines Food Bank feeds around 1,000 families a month," she said.

"Money is a good investment here because we are able to stretch dollars, it goes a long way," Gasken said.

The food bank is happy with any form of donation, anything helps, she said.

"We receive the most food during November and December and luckily we are able to keep most of the food through January and February," Gasken said.

"It’s important to remember that hunger is the same year round," she said.

In addition to food, the food bank currently needs help with their school backpack program. They need items such as: EasyMac, 100 percent Juices, and individual apple sauce or fruit cups. Other non-food items are in demand too, from paper grocery bags, cat food and diapers to soap and laundry detergent.

If you would like to donate to the Des Moines Food Bank, they are open every day of the week from 8:15 a.m. until noon.

Their address is: P.O. Box 98788, 22225 9th Ave South, Des Moines, WA 98198 and their phone number is 206-878-2660.

Crime and Punishment

Honda Civic stolen

A Highline student reported that his 1998 Honda Civic was missing from the south parking lot on Jan. 10. He parked his vehicle at 10:45 a.m. and found it missing at noon.

Highline student assaulted

A female Highline student was assaulted by a man at the south bus stop near Building 29 on Jan. 11. Des Moines Police Department officers looked for the man on campus and surrounding area, but couldn’t find him.

The student was followed by the same man on Jan. 4, and she obtained a protective escort by security officers.

Odd man needs a ride off campus

A strange man was asking people to give him a ride in Building 29 on Jan. 15.

He didn’t respond to any questions from security officers.

He walked out the south entrance of Building 29 and stood on the steps in the rain for about 10 minutes not moving, and then he left off campus.

News Briefs

Should there be a Curriculum re-design?

Dr. Katie Hern of Chabot College is coming to Highline to speak about Attrition in Developmental Sequences. Using Curricular Redesign to Stop the Hemorrhaging and Increase Student Completion.

Dr. Hern will focus specifically on successful models in English and Math at Chabot and Los Medanos colleges in California.

This is important to Highline because many community college students are not making it through developmental courses to then enroll in college level courses.

The discussion will be on Jan. 21 from 11 a.m. to 12:30 p.m. and the location is yet to be decided.

Inter-Cultural Center’s Diversity Poetry Lounge

The Inter-Cultural Center is having its first Diversity Poetry Lounge of the Winter Quarter.

The Poetry event will be held to day in the Inter-Cultural Center in Building 6, room 164 at 1:00 p.m.

The poetry event is open to all campus. The purpose of the Diversity Poetry Lounge is to use the poetry to open discussions about multicultural issues.

The next Diversity Poetry Lounge will be on Feb. 3.

Blood Drive flows onto campus

The Cascade Regional Blood Services is hosting a blood drive on campus to keep local blood supplies flowing. The blood drive will be held in building 2 from 9 a.m. to 3 p.m.

The Cascade Regional Blood Services encourages you to make an appointment to cut down on the time it takes to donate.

They also encourage you to tell your friends and co-workers to come in and donate. For more information visit www.crhsb.net

Science on the sound: Deep Seagliders

Science on the Sound presents Fritz Stahr, research scientist and seaglider fabrication center manager, School of Oceanography, from the University of Washington, who will be discussing how important Seagliders are to researching the depths of the ocean.

The Science on the Sound presentation will be held at the Marine Science and Technology Center located near Redondo Beach Park on Jan. 22 from noon to 12:45 p.m. For more information and directions visit math. highline.edu.

Academic Achievement Awards have arrived

The Academic Achievement Award applications for Spring Quarter are now available for students to pick up.

This program is offering 15 full time tuition waivers to students with a 3.5 or better cumulative GPA.

Students can pick up from Brit Exworthy in Building 25 on the 6th floor. The odds of a student receiving the scholarship are 1 in 3 and the application is due by Thursday Feb. 10.

Generous donors help Highline Foundation

By ELI EIR
Staff Reporter

The Highline Foundation recently received two large donations from local residents Lana Arlene Mills and Daisy S. Sonju. Mills aims to help the campus community with her $25,000 donation, announced on Jan. 11.

“I wanted to do good with the money,” Mills said. Her late husband, Robert Mills, was a teacher at Highline, before he was committed to a dementia hospital.

Mills said she is a big believer in education and “this is a good way to honor his name.”

The next day, Highline received another donation of $155,325 from Sonju’s estate. One of her goals for the donation was to help struggling college students pay for tuition. She also donated her 9.3 acre estate on 16th Avenue to the city of Des Moines.

Sonju had been a Des Moines resident for almost 50 years, and died in 2010. Sonju “worked with students on donating it instead, Thorell also said Sonju “was really active at the Des Moines Senior Center,” and that she would most often play bridge or cards.

When the city asked her to sell her property, she insisted it tables where the representatives will have enough time to answer brief questions, but leave the detailed questions at home, said Siew Lai Lilley, Highline’s transfer adviser. This busy event could be described as some kind of college speed-dating.

“Instead of lecturing all the time teaching in the U.S., she earned her master’s degree at Boise State University in Idaho. Wang said that she has much more freedom to be more independent now compared to when she was a student, since she lived at home at that time.

The only thing troubling for her now is that she doesn’t have a car and it’s not convenient to go anywhere.

Wang has a husband and a 13-year-old daughter in Shanghai, and when her family knew she was going to the U.S., they depend so much on her. Wang said back in China she takes care of her daughter’s school work, and all of her extracurricular activities.

“Imagine how life would be like there when I am here thousands of miles away,” Wang said.

Therefore, I wish students can do more practice outside of class,” said Des Moines Parks and Recreation Director Joyce Thorell. Thorell also said Sonju “was really active at the Des Moines Senior Center,” and that she would most often play bridge or cards.

When the city asked her to sell her property, she insisted on donating it instead, Thorell said.

Chinese professor learning to teach again

By RAINY HUANG
Staff Reporter

After 30 years of teaching English and being an experienced language teacher, Wang has come to Highline to re-develop her teaching skills through being the new Mandarin teacher.

“Speaking Chinese is a very natural thing for me to do, on the contrary, it is a new language for students. So I am still trying to figure out what is the best way to teach, and it feels like I have to re-start everything,” Wang said.

Before coming to Highline as an exchange scholar, Wang was an English teacher at Jiaotong University in Shanghai.

Wang pointed out that most Chinese students will have a certain degree of English skills when they are in a university, so teaching English in China is a lot easier than teaching Mandarin to students here. Wang also noticed that compared to American students, Chinese university students are more self-disciplined to review and prepare for their classes.

She said that students in the U.S. are perhaps too busy to practice and do preparation, and she always has review at the beginning of the class which may waste time on lecturing.

“Instead of lecturing all the time, I wish to have more interactions with students through activity, but that requires a certain level of speaking skills.

Therefore, I wish students can do more practice outside of class,” said Des Moines Parks and Recreation Director Joyce Thorell. Thorell also said Sonju “was really active at the Des Moines Senior Center,” and that she would most often play bridge or cards.

When the city asked her to sell her property, she insisted on donating it instead, Thorell said.

Transfer Fair returns to campus

By ELI EIR
Staff Reporter

More than 25 different colleges will send representatives to Highline for the Winter College Transfer Fair, Jan. 26 in Building 8. Colleges from all over the state of Washington, as well as five from out of state, will set up tables from 10 a.m. to 1 p.m. on the first floor of the Student Union, offering information to prospective transfer students.

The fair is open to all students interested in transferring to a four-year college or university.

Schools slated to present at the fair include the University of Washington, Washington State University, Antioch University Seattle, Art Institute of Seattle, Central Washington University, Northwest University, Pacific Lutheran University, and many more.

For a complete list of the schools attending, you can visit http://www.highline.edu/stuserv/transfer/transfair.htm.

During the fair, students will have the chance to visit tables where the representatives will have enough time to answer brief questions, but leave the detailed questions at home, said Siew Lai Lilley, Highline’s transfer adviser. This busy event could be described as some kind of college speed-dating.

“It’s kind of a fast paced event, a first ‘meet and greet,’” Lilley said. Lilley also suggested students bring their transcripts as well, this will make it easier for students to figure out which colleges they want to pursue their interests.

Highline transfer advisers will be there to help people figure out where to go, and find out who they should visit.

They will be passing around informational handouts with questions for students to ask, as well as answering any questions you may have, Lilley said.

“We look forward to seeing you there,” she said.
Editorial comment

Cole under a microscope

The University of Washington's newspaper, the Daily, published an article on Jan 4 that has community colleges in an uproar. The article contained quotes from University of Washington Regent Craig Cole, voicing his concerns about community colleges around the state and how beginning at a community college could affect your future.

Cole said, "of course you would expect a large number of bachelor degree holders from a community college. "

"The student who starts at a community college is less likely to complete is less likely to complete a bachelor's degree." These two statements sound contradictory. Especially when seen next to the "statistics" that Cole threw around. Cole insisted that if you were to take the number of community college students and divide it by the number of students who acquire bachelor's degrees, and repeat the process with the number of students who start at a four-year institution, the results would be reliable statistics that could be compared.

Cole overlooked the fact that not every student who attends a community college continues on to a four-year institution to pursue a bachelor's degree.

"Statistically, the worst way to create a baccalaureate degree is to start somebody in a two-year [institution]," said Cole. So, it looks like there is some hope for us community college students. Maybe we should just give up now.

In a letter that Cole addressed to some community college presidents, he explained that he believed that every student has to choose a path that whether beginning at a community college or beginning at a four-year institution is the right path for them. However, in the same paragraph, he said that doing all four years at one school "provides the opportunity for a more logical and cohesive curricular experience, but it is under-appreciated in favor of piecing together credits from class menus offered by a variety of schools."

But unless you have the same teacher in one subject for your entire time at college, your experience in classes of that subject are going to be different, regardless of whether you transfer from a community college to a four-year or start at a four-year school right off.

Community colleges offer a wide variety of certificates to pursue, as well as technical and professional degrees. Or, perhaps a student just wants to excel at a particular skill before jumping into a community college, "providing the opportunity for a more logical and cohesive curricular experience, but it is under-appreciated in favor of piecing together credits from class menus offered by a variety of schools."

"We owe to our students a quality education," Cole said. Cole is of the opinion that the quality of education at community colleges is being compromised by the large enrollment numbers, that result from the open door policy at community colleges.

This open door policy allows anyone and everyone the chance to become physically capable and this tends to reflect some other kind of inner mechanism at work. This very well may be looked upon as either immaturity or maladjustment manifesting itself in submissiveness or sublimation repression and the like. This in relation affects some people's growth and development academically.

Emotional control is perhaps the hardest control to develop and this tends to reflect some other kind of inner mechanism at work. This very well may be looked upon as either immaturity or maladjustment manifesting itself in submissiveness or sublimation repression and the like. This in relation affects some people's growth and development academically.

Responsibility behavior shows maturity, for there is no wrong way to do right and there is no right way to do wrong when you think about it. Adolescence is the stage before maturity that may take some of us a little longer to emerge from then others. Making the right decisions in life shows maturity.

Each individual perception should change the meaning to this editorial to suit their understanding. One might be maturity in other areas more so than another, so it's best to describe some behavior patterns as maturity and others as still developing towards a proper criterion.

Adolescence is much talked about during the period of growing up. A sequence of major and rapid variations that occur simultaneously. Excitement, mystery, expected and the unexpected, desires and fears. To some, all of these things jumping off may be ever demanding and difficult handle.

This major development in adolescence is less years. Some people have yet to cross that bridge from adolescence to adulthood maturity.

An adolescent goes through rapid psychological changes in values, interest and knowledge; rapid growth and awareness of new things in life; and of new relationships among people. One's adolescent nature ventures through constant growth in several areas. Some emerge out of different stages of adolescence before others do. These are the stages where being conscious of the the possibility of the diagnosis would help a person to make a less turbulent transition.

Moodiness, irritation, demands and a constant need to prove and reinvent one-self, all dance around ambiguously within an adolescent and clearly shows itself in their character traits.

Recognize these traits of adolescence in your daily life and how it separates the adolescent from the mature in action behavior and attitude. How have you matured and grown from adolescent state, is a question more relevant than, "To be or not to be." If one uses the resources at Highline maturity is inevitable. How you come to a level of maturity from adolescence is totally irrelevant to achieving that mature state of being.

Highline maturity is inevitable. You have to be aware of what those elements are in reference to your particular situation or circumstances that requires that journey from across the proverbial bridge from adolescence to maturity.

I hope that this composition offers you some insight into these two stages and the transition that some of reach faster than others.

Michael hopes to grow up someday.

From adolescence to maturity

As students move on from high school or find their way back into the relevancy of prosperity through a higher education, often times they have crossed that bridge from adolescence to maturity.

Maturity suggests a state of wisdom, personal self-control and understanding that allows one to solve problems another less experienced cannot handle. We become physically capable of doing various things at various ages but emotional maturity is perhaps we see to base our description of maturity.

Emotional control is perhaps the hardest control to develop and this tends to reflect some other kind of inner mechanism at work. This very well may be looked upon as either immaturity or maladjustment manifesting itself in submissiveness or sublimation repression and the like. This in relation affects some people's growth and development academically.

Responsibility behavior shows maturity, for there is no wrong way to do right and there is no right way to do wrong when you think about it. Adolescence is the stage before maturity that may take some of us a little longer to emerge from then others. Making the right decisions in life shows maturity.

Each individual perception should change the meaning to this editorial to suit their understanding. One might be maturity in other areas more so than another, so it's best to describe some behavior patterns as maturity and others as still developing towards a proper criterion.

Highline learns tough lesson from North Idaho

Highline falls to third-ranked North Idaho at home last week

By RICHARD MEIER
Staff Reporter

Highline’s men’s wrestling team stumbled last week, falling to third-ranked North Idaho. Highline hosted the men from Couer d’Alene this past Thursday.

After winning their past three meets by a combined score of 91-29, Highline was outscored by North Idaho 26-11.

Highline’s wins came from 125-pound Steven Romero who topped No. 1 ranked Kyle McCrite in a 2-1 decision, 149-pound All-American Jason Gray who defeated North Idaho’s Troy Cunningham by way of pin fall in 4:38, and Eric Jones who beat 157-pound Jeremy Bommarito.

Highline’s Daren Faber fell just short of beating top-ranked Jamielle Jones, losing in an 8-5 decision.

However, even after suffering their worst loss of the season, Head Coach Scott Norton was not short in spreading praise toward his wrestlers.

“I think our guys did really well,” Norton said. “Steven [Romero] knocked off the No. 1-ranked guy; our core group did what they were supposed to do and [Daren] Faber almost knocked off the No. 1 guy too,” Norton said.

Norton continued his praise for his 125-pounder. “He’s [Romero] been a blessing in disguise. We butted heads last year and I honestly didn’t think that he was going to be back this year,” he said. “But he came back, we’re on the same page now and he’s doing a great job of leading by example. I don’t think there’s a harder worker out there than him.”

Highline also competed over the weekend in the Clackamas Open in Oregon City, Ore.

Highline’s top finisher was Jason Gray, who finished third in his weight class. Highline also had four fourth-place finishers with Steven Romero at the 125-pound weight class, Tyler Story at 165, redshirt sophomore Evan Parberry at the 184, and Daren Faber at 197. Eric Jones also placed fifth.

“I think the loss was good for him,” Norton said of Gray, who lost to someone he beat earlier in the season. “It’s better to lose now than in nationals and it’s a great motivator going forward for the rest of the season.”

A lot can be learned from this past week, Norton said.

“I think we just need to work on our focus,” he said. “That’s the biggest part, part of that is believing in ourselves and believing we’re the best. From what I saw was some of our guys were overwhelmed with who they were facing, so we’re going to shuffle some weight classes around and work on things. We need to make sure we execute or we’re going to get executed on.”

Highline next faces top-ranked Clackamas at home on Friday at 7 p.m.

This is Highline’s first chance to redeem themselves after falling to Clackamas on the road 28-21 in a dual that both coach Norton and his wrestlers felt they should have won.

“Don’t think they’re the best team in the country. I think North Idaho is, I definitely think we can beat them [Clackamas].”

Highline’s All-American working toward national title

Jason Gray has one last thing to do to finish his two seasons at Highline — win a national wrestling title.

He is optimistic about the wrestling season this year and hopes he can place at nationals, Gray said.

“If I hold onto the lead and my composure and finish the match — I think I can beat anyone I do that,” Gray said.

Gray has a long history in wrestling. Growing up in Enumclaw, he started wrestling in the third grade for a team called Hornet Junior Wrestling.

After four years with the Hornets, he wrestled three years in middle school and four years in high school.

At Enumclaw High School, he placed third at state his freshman year, fourth at state his sophomore year, and first at state both junior and senior years.

In his first year at Highline, he went into the national tournament ranked second but finished seventh.

Gray is ranked third in the nation this year at 149 pounds.

At 5 feet, 9 inches tall, he sports an 18-3 record.

Each of his three losses were by one point or came in overtime, Gray said.

In addition to Gray, the team also has a winning record. Eric Jones, 157 pounds, and Darren Faber, 197, are key wrestlers for the team, said Gray.

Jones has won his last four matches and Faber won three out of his last four.

The coaching staff has had a lot to do with how well the team has been doing, said Gray.

“The coaches have been harder [this year]. [Head Coach] Scott Norton has a lot of experience. He wrestled Division I [in college]. He helps out a lot,” Gray said.

Gray attributes the team’s success to the high expectations of his coaches.

“[Norton] expects a lot of us. Last year he was easier on us. We’re feeding off his high expectations,” Gray said.

Gray’s mother also has high expectations for him. His family financially supports him for school, so staying in classes and earning good grades is a huge motivator, Gray said.

Aiming for an associate of arts degree from Highline next year, he hopes to transfer to a four-year university after graduating.

After finishing up his wrestling career at a Division I school, Gray wants to go to a police academy and pursue a career in law enforcement, he said.

Gray is out of eligibility at Highline, and plans to take a redshirt year before transferring.

He will be able to practice with the team, but will be unable to compete in NCIAA wrestling meets.

“I work out five days a week with the team and do weights on Sundays and Wednesday,” Gray said.

Gray said he wants to wrestle for any Division I school that will offer 90 to 100 percent in scholarship funds.

With so much talent in wrestling, Gray could have gone straight to Division II or even Division I, but he chose Highline because it was close, affordable, and Head Coach Norton “is one of the best [coaches] for community college,” he said.
Thunderbirds second in the West

T-Birds 1-1 last week, one game back of first-place Tacoma

The Highline men’s basketball team moved into second place in the NWAACC West division with its win against Green River last week. The men had a chance to move into a tie with Tacoma for first place but suffered a loss to Lower Columbia.

The Thunderbirds currently sit with a 3-1 record in league play and a 10-3 record overall.

The Thunderbird men beat Green River 76-60 on Wednesday, Jan. 12 before losing to Lower Columbia 81-75 on Saturday, Jan. 15.

This was the Thunderbirds’ first chance at redemption against Green River and the players were feeding off the opportunity to get payback.

“We were motivated. It’s always nice to have an external reason to get ready to play. We have to make sure we always have an internal reason to be motivated though,” said Highline Head Coach Che Dawson.

The Thunderbirds stormed out of the court and took a 39-25 lead going into the half.

“The primary reason for our success was our level of collective focus on doing the right things,” said Dawson. “We also rebounded much better this time and did an excellent job with our half-court defense.”

Highline sophomore forward Travis Miller, The Thunderbirds’ sophomore guard added 16 points.

Robert Christopher led the Thunderbirds with 21 points. Christopher went five of six from the floor, with 11 of his 21 coming from the charity stripe. Going 11 of 13 from the line, he also added four assists and also grabbed a steal in his 34 minutes on the court.

The Thunderbird men out-rebounded the Gators 45 to 34.

The Thunderbirds also had the advantage from the free throw line shooting 69 percent compared to Green River’s 23 percent.

Following its win over Green River, The Thunderbirds traveled to Lower Columbia.

When it was all said and done The Red Devils came back from behind for the victory over The Thunderbirds 81-75.

The Thunderbirds took a 39-26 lead into the half against Lower Columbia, but weren’t able to sustain the lead in the second half to hold on for the win.

“The main cause of the loss was my coaching and lack of ability to make necessary adjustments in the second half,” said Coach Dawson. “I was stupid and did a terrible job of counteracting their halftime adjustments.”

The Red Devils out scored The Thunderbirds 55-36 in the second half.

The Thunderbirds were led by PJ Bolte who led the team with 26 points. Bolte was 10 of 17 from the field and six of six from the line.

“In our defensive discipline, specifically not using our hands, is better. We need to get back to looking people out on the boards more consistently,” said Dawson.

The T-Birds have a big game ahead against the No. 1 team in the NWAACC West division, Tacoma.

The Titans are currently ranked No. 4 in the latest NWAACC Horizon Air Polls right above Highline who are ranked No. 5.

The Thunderbirds will host the Titans on Saturday, Jan. 22 at 3 p.m.

With two wins this week The Thunderbirds could move into first place in the west division.

Highline’s AJ Banks goes for a layup against Green River.
Lady T-Birds split two to stay in hunt

By JOSHUA HART
Staff Reporter

The Highline women’s basketball team lost their perfect record in league play on Jan. 15 when they fell to Lower Columbia on the road, 67-60.

However, Highline did beat Green River at home on Jan. 12, 56-46.

Highline is now 3-1 in league play and in first place in the West Division of the NWAACC.

They had a good showing against Lower Columbia despite the loss.

Highline was ahead at halftime, 37-32, but got outscored in the second half, 35-23.

The primary scorer for Highline in league play has been Carol Howard, who is averaging 13.75 points per game.

She had an off day against Lower Columbia though, shooting 19 percent from the field on 3 for 16 shooting including 2 of 8 from three-point range.

Highline had big contributions from Heather Hitch who had 14 points and five rebounds and Dani Carlman who scored 10 points and had four steals.

Coming off the bench, Kiemba Pearson also played well, scoring 10 points and adding eight rebounds.

Highline won the battle on the offensive glass which contributed to 17 second-chance points, compared to 10 for Lower Columbia.

Highline started off playing good, but couldn’t overcome the poor second half shooting in the loss.

Lower Columbia is now 5-0 in league play and in first place in the West.

Highline also played on Jan. 12 against Green River in the friendly confines of the Highline gym, winning 56-46.

Despite 29 turnovers due to many traveling calls, Highline managed to pull out the 10-point victory.

Women’s Basketball Head Coach Amber Rowe Mosley wasn’t upset with the officials however. Rowe Mosley said that her team deserved the calls because they have very sloppy footwork and it needs to be worked on.

After Highline turned the ball over several trips down the floor, Green River went on a 7-0 run with 12 minutes left in the second half. Rowe Mosley responded to the poor play of her team by calling a timeout.

“They didn’t seem to change after the timeout though. Green River extended its run to 11-0 and took the lead by three before Highline center Shaleece Butler-Woods ended the run with a free throw.

Butler-Woods finished with nine points and 10 rebounds.

Highline’s Heather Hitch looks for opening against Green River last week.

Highline’s Heather Hitch looks for opening against Green River last week.

The teams continued to trade the lead for the next several minutes. Both teams were using a version of the full court press at the time.

Highline played a 1-2-1-1 press, while Green River played a more unorganized rush-the-ball press. Neither team’s full court press was working very well, which led to easy buckets on both ends of the floor.

With six minutes left, Highline’s Carol Howard got in a coma and Jan. 26 against Centralia, also at home.

However, when Green River switched back to a man-to-man defense, Highline began scoring and playing better on offense, getting rebounds and looking immediately for the quick shot.

They also played well on defense, forcing turnovers and running quickly on fastbreak opportunities.

Carol Howard led the fast-breaks down the floor along with Dani Carlman.

Early in the first half, Jocelyn Jones stole the ball from the Green River ball handler, passed to Howard at half-court, who passed to Dani Carlman along the 3-point line. Carlman then made a no-look pass to Jones for the easy layup.

“As long as they are gonna run, I’m gonna get them the ball,” Carlman said.

Whenever Carlman was playing point guard, Highline rarely turned the ball over.

Since Howard is a scorer, Carlman said she likes to play point to help Howard get better looks at the basket.

Highline went on the road on Jan. 19 to play Pierce with results unavailable at press time.

Their upcoming games are on Jan. 22 at home against Tacoma and Jan. 26 against Centralia, also at home.
Arcturus is looking for submissions

By GEOFF ANDERSON Staff Reporter

Arcturus, Highline’s annual arts publication, is currently accepting submissions for this year’s issue.

This year’s theme is water in all of its forms, and how it carries different meanings in different parts of the world.

“We played around with tons of ideas,” said Kayla Carlile, an editor of the magazine, which has been published since the 1970s. Ultimately, water was chosen due to its symbolic significance and universal nature.

It also has multi-cultural importance, she said.

Submissions to this year’s Arcturus should be related to water in some way. Issues of Arcturus are released each year in May or June.

It showcases the works of art, poetry, fiction and non-fiction writers, and photography of all students, staff, faculty, and alumni.

Students interested in editing Arcturus should also contact Sharon Hashimoto, an English professor at Highline and advisor to Arcturus, at 206-778-3710, ext. 3158 or by email at shashimo@highline.edu.

The deadline for submissions to Arcturus is May 31. Submissions to Arcturus can be made by either dropping off your submission to Sharon Hashimoto in Building 5 or mailing to Arcturus.

The address is Highline Community College, Arcturus, Hashimoto MS 5-1, P.O. Box 98000, Des Moines, WA 98198-9800. Email submissions will not be accepted.

Hashimoto suggests including a self-addressed stamped envelope with all submissions so that they may be returned.

‘Casting Call’ scores on several fronts

By KATIE ADAMS Staff Reporter

It’s rare to find a production with enough action to hold your attention and quality lines to keep you laughing, but Breeders Theater never fails to impress.

The theater troupe opened its 10th season on Jan. 14 with the production Castling Call at E.B. Foote Winery in Burien.

The play takes place at a major theater festival, where three actresses in an acting company are vying for the leading role in a production that has been optioned to Hollywood.

It’s a role that could skyrocket them into stardom.

It’s a role that any actress would do anything to get, but at what price?

One of them makes that decision.

Cast for the production are Teresa Widner as Edith, Erika Zabelle as Tamryn, Eric Hartley, Andrew Smith as Owen, Steven Coffey as Zooder.

Breeders Theater combines many aspects of entertainment in their shows.

Rainbow Dance Theater brings mystery and magic to Auburn

By MELINA BROWN Staff Reporter

Rainbow Dance Theater’s Mystery and Magic is coming to the Auburn Performing Arts Center Jan 28 at starting at 7:30 p.m.

Averaging about 25 full shows a year, Rainbow Dance Theater combines world dance, computer animation, hip hop, martial arts, and modern dance to create a notable show.

Rainbow Dance Theater brings “hip hop back to West African dance drumming,” said Artistic Director Valerie Bergman.

Bergman also said that this performance does not express traditional partnering.

Mystery and Magic is made up of three different dances, starting with Man of My Dreams, which takes traditional ballet and fuses it with scooters and a Segway.

The second performance, Big Bang, uses an illusion to form a dark sea which would show the creation of life and the progression of creatures as time goes by.

Mixed Bag offers a look into humanity and its devastating production of garbage. Garbage bags are used as both set and costume pieces to create things such as garbage bag monsters.

Artistic Directors Darryl Thomas and Valerie Bergman both have previously danced professionally.

Thomas toured the world as a dancer with the Pilobolus Dance Theater and won a 1996 Emmy.

Bergman served as principal dancer and ballet mistress while with the Nina Wiener Dance Company and later started the Valerie Bergman Dance Company.

Rainbow Dance Theater started in Hawaii, where Bergman and Thomas first teamed up as members of the Valerie Bergman Dance Company.

Bergman and Thomas decided to rename the dance company to Rainbow Dance Theater to display their interest in the different styles of dancing throughout the world that inspire them.

They also wanted to honor the company’s roots in Hawaii, the “land of rainbows.”

For tickets, call 253-931-3043 or online though Brown Paper Tickets.
Suzanne Vega coming to Kent

Suzanne Vega will be coming to the Kentwood Performing Arts Center as a part of the City of Kent’s Spotlight Series Saturday, Jan. 29.

Vega will be performing one show at 7:30 p.m. and tickets can be purchased through her website suzannevega.com or at www.ticketturtle.com.

Tickets are $35 for adults, $32 for seniors, and $25 for youth 25 years of age and younger.

Vega began her career in 1985 with her self-titled debut album and has since won seven Grammy awards.

The Kentwood Performing Arts Center is located at 23800 164th Ave. SE, Covington.

The full City of Kent Spotlight Series schedule can be found at http://www.ci.kent.wa.us/content.aspx?id=1454.

**Dress for success**

BY PHAITRA VORASANE
Staff Reporter

Keep your look professional, clean, and comfortable when going on an interview for the job of your dreams. This first impression lets your employer know that you are the right person for the job.

Now that it is the winter season, look to bundle up on the way to the office. For men and women, pea coats are a go-to staple this season.

They complete any outfit with a polished finishing touch. Stay clear of hats and scarves when going on a job interview for they come off as casual and would be a hassle to take off beforehand.

Ladies, you always have the option of wearing either a nice pencil skirt or dress pants. When choosing the option of a pencil skirt, make sure to put on a pair of nylons or tights to keep those legs warm.

Stick to a color that matches your skin tone, or black would be your best bet. Highline student Erika Meneses said she wears nylons and a really nice blouse on a job interview and thinks jeans are not the best choice.

Put away the jeans, choose dress pants, and take them to the next level.

Try a high-waisted wide leg trouser. The ’70s are making a comeback this season. Now there’s the choice of the button-up versus a blouse.

Keep to the masculine power suit look with a button-up structured for a woman’s curves.

In blouses, keep a feminine touch by choosing tops with lower details and silky materials.

Watch your neckline. Nothing is more unprofessional and desperate than revealing your décolletage on a job interview. Men’s dress attire is pretty basic.

There’s your dress shirt, dress pants or khakis, dress shoes, and a blazer.

Nick Apple, Highline Bookstore employee, goes “business casual” and usually picks out a button down shirt and khakis on most of his job interviews.

When going business casual, have a little fun. Try pairing on a red bowtie to outfit against all your neutral colors, a bold striped tie without a blazer, or simply go with a vest instead of a jacket.

Don’t be afraid to let your personality shine through your clothing.

Highline student and Fred Meyer employee Todd Howard likes to let his future employees know that he is serious, professional, and determined to get the job and says he tries to dress to impress them.

Where to shop varies on your budget. Big department stores, such as Macy’s, JCPenny, or Nordstrom, usually have a career section with all dress clothes.

For those on a smaller budget, there is always attire at thrift shops as well.

No matter what outfit you choose, make it your own. Never wear something that is uncomfortable for you, it will show on your face.

Don’t just walk into an interview with a great outfit; walk in with poise, confidence, and knowledge of the company that you’re looking to be employed by.

Highline student Rae Elwell says that since it is your first impression, what you wear makes a huge impact on if you get employed or not.

If you come dressed for the job, you might just get the job. Sometimes the first impression is your only impression so make the best of it.

The Odyssey

* The Highline Jazz Festival is on Feb. 19 at 2 p.m. and 7 p.m. at Highline Performing Arts Center on South 152nd Street in Burien.
* Tickets are $20 for each show or $35 for an all-day pass. Children under 18 are free.
* Expect The Impossible! Mark Nizer In 3-D is performing at the Auburn Performing Arts Center on Feb. 25 at 7:30 p.m.
* Tickets are $20 or $18 for students and seniors. Call Auburn Parks, Arts & Recreation at 253-931-3043, Monday through Friday from 8 a.m. to 5 p.m., or online at www.brownpapertickets.com.
* The Renton Civic Theater begins performances for their newest production *The Mousetrap* on Feb. 25.
* Tickets are $22, or $17 for students and seniors. Call Auburn Parks, Arts & Recreation at 253-931-3043, Monday through Friday 8 a.m. through 5 p.m., or online at www.rainiersymphony.org.
* The Federal Way Symphony is performing on March 6 at St. Luke’s Church in Federal Way at 2 p.m.
* Tickets are $30 and can be purchased by calling 253-529-9857 or buying online at www.federalwaysymphony.org.
* Handsome Little Devils “Squirre Burpee Circus” is playing at Kent-Meridian Performing Arts Center on March 12 at 3 p.m. They are a Vaudeville comedy, high-skill circus act.
* Tickets are $18, general, $16 senior, and $12 youth. They can be purchased at www.ticketturtle.com.
* Uncle Bonsai is playing at the Auburn Avenue Theater on March 12 at 7:30 p.m.
* Tickets are $17 or $15 for students and seniors. Call Auburn Parks, Arts & Recreation at 253-931-3043, Monday to Friday 8 a.m. to 5 p.m., or online at www.brownpapertickets.com.

**The look right can help you land the right job**

BY PHAITRA VORASANE
Staff Reporter

Don’t go breaking out the five-inch stiletto pumps for this occasion ladies.

Keep the heel to a maximum of 2 inches. Go with a cute ballet flat or a sling back kitten heel this time around.

For her last job interview, Highline student Lindzy De Bie wore a nice button-up shirt, nice black slacks, and cute flats. As for accessories; save the cocktail rings and statement necklaces for girls’ night out. Gentlemen, break out your irons.

Nothing is more clean-cut than a pair of pressed slacks and a dress shirt. Men’s dress attire is pretty basic.

There’s your dress shirt, dress pants or khakis, dress shoes, and a blazer.

Nick Apple, Highline Bookstore employee, goes “business casual” and usually picks out a button down shirt and khakis on most of his job interviews.

Math professor wore a lot of hats before choosing education career

By TAYLOR LUNKA
Staff Reporter

Razmehr Fardad had a lot of different jobs before becoming a math teacher.

“Oh my gosh. You want me to count?” she said about how many jobs she had under her belt before becoming a professor.

Working at Robinson’s, Macy’s, hostessing at the International House of Pancakes, managing LensCrafters, and going through several other jobs helped to figure out what she wanted to be. It made Fardad realize that becoming a math teacher is where she was meant to be. Now, she is exactly where she wants to be.

“I feel in my element every day. I’m happy to come to work,” she said.

Before becoming a math professor, Fardad dealt with the same struggles that many high-line students face today with mathematics, and she is trying to help them solve their problems.

“I try to explain it in different ways. Students have different learning styles. I try to help my students reach as many students as I can,” she said.

Reaching out to students might not be easy, but Fardad wants students to know she will not give up on them and wants them to understand what she teaches in class.

“I don’t want you to just pass math, I want you to get it,” she said on the kind of teacher she hopes to be for her students.

Fardad’s has a strong drive to love all my students,” she said.

Students are a big part of the reason Fardad loves her job, and when combining that with her passion for math is one perfect happy professor.

“I really love what I do at the end of the day,” Fardad said.

The college’s annual celebration of the late civil rights leader.

To reflect upon the world today, an episode from the cartoon series Boondocks was shown to the audience.

“[Boondocks] represents absurdity and contradictions in an intentionally offensive way that allows people to see themselves in the political mirror and then decide if that’s the image they wish to project,” Bolden said.

The particular Boondocks episode shown, “It’s a Black President, Huey Freeman,” features a young boy who is not excited for the inauguration of Barack Obama, and all the African-Americans in the show are offended.

One of the characters on the show even says, “I’m supporting Obama because he’s black.”

“Boondocks is filling a void,” Dr. Ball said.

The issue the United States and the world faces today is how come there is no greater black public sphere than the cartoon Boondocks the pair said.

“We want to make a point about the absence of political media,” Dr. Ball said.

Even though we have an African-American president, things are not fixed, they said.

“Black invisibility is not black power. Black leadership doesn’t mean the conditions of people will be met,” Dr. Ball said.

For change to happen, Dr. Bolden and Dr. Ball had the audience second-guess their day-to-day behavior.

“The purpose of this is to question your assumptions,” Dr. Bolden said.

“When it’s all thrown into a cartoon you can make all kinds of fun,” he said of these horrific cartoon images, such as those shown in the Boondocks episode.

In today’s society, there are still major issues, the pair said.

“Boondocks makes a powerful point. It’s a beautiful move to cause dysfunction,” Dr. Ball said.

Dr. Bolden and Dr. Ball want people to realize what society as a whole has become.

“We want to make people uncomfortable, squirm in their seats and leave,” Dr. Ball said of the material shown in the presentation.

The issue the United States and the world faces today is how come there is no greater black public sphere than the cartoon Boondocks the pair said. "We want to make a point about the absence of political media," Dr. Ball said. Even though we have an African-American president, things are not fixed, they said. Scholars use cartoon to challenge assumptions

By TAYLOR LUNKA
Staff Reporter

Cartoons such as Boondocks can be a political mirror for how we see ourselves in day-to-day life, two experts said Tuesday.

Dr. Jared Ball and Dr. Mark Bolden said that such work empowers the audience to look at themselves in the “political mirror” and decide if that’s the image people wish to project.

Dr. Bolden has a Ph.D. in counseling psychology with concentration in African-centered psychology at Howard University.

Dr. Ball is the founder and producer for FreeMix Radio as well as being a current peer reviewer for the first academic journal dedicated to hip-hop.

The pair spoke as a part of Martin Luther King Jr. week, the college’s annual celebration of the late civil rights leader.

To reflect upon the world today, an episode from the cartoon series Boondocks was shown to the audience.

“[Boondocks] represents absurdity and contradictions in an intentionally offensive way that allows people to see themselves in the political mirror and then decide if that’s the image they wish to project,” Bolden said.

The particular Boondocks episode shown, “It’s a Black President, Huey Freeman,” features a young boy who is not excited for the inauguration of Barack Obama, and all the African-Americans in the show are offended.

One of the characters on the show even says, “I’m supporting Obama because he’s black.”

“Boondocks is filling a void,” Dr. Ball said.

The issue the United States and the world faces today is how come there is no greater black public sphere than the cartoon Boondocks the pair said. "We want to make a point about the absence of political media," Dr. Ball said. Even though we have an African-American president, things are not fixed, they said. Ex-radical Bill Ayers to speak at Highline

By KANDI CARLSON
Staff Reporter

A controversial 1960s radical turned educational reformer will speak at Highline today as part of Martin Luther King Week.

Dr. Bill Ayers, former member of the Weather Underground and noted education scholar, will speak on educational reform at 11 a.m. in the Student Union.

Dr. Ayers is known for his participation in efforts to protest U.S. involvement in the Vietnam War. He was the co-founder of a sometimes-violent protest group called the Weather Underground.

Dr. Ayers has disputed that the Weathermen were terrorists, noting that they did not set out to kill anyone.

The organization took responsibility for several bombing of small office buildings in the late ’60s and early ’70s. The buildings were empty and there was no documented loss of life.

Three members of the group, however, apparently blew themselves up in the process of building a bomb inside a house.

Dr. Ayers’ visit has led to a number of critical letters to the editor in local publications such as the Highline Times and B-town Blog. He is also an acquaintance and neighbor of President Obama, which provoked some criticism of the president in conservative circles.

The recent spate of local letters criticized the college for everything from using taxpayer money to bring Dr. Ayers here, to the alleged need for police presence during his speech.

Organizers of Martin Luther King Week did not respond to requests for comment about the invitation to Dr. Ayers.

He holds two master’s degrees in early education, one from Bank Street College and the other from the Teachers College at Columbia University. He earned his doctorate in curriculum and instruction from Columbia in 1987.

He has written many books on a variety of subjects, including his own memoir, Fugitive Days: A Memoir, published in 2001.

He will be speaking at 11 a.m. in the Mt. Constance Room of the Student Union with a question and answer session to follow until 12:30 p.m. His topic will be “Education for Democracy: School Reform and the Legacy of Martin Luther King.”
College still battling email scams

By ALISA GRAMANN
Staff Reporter

Highline’s Instructional Computing staff has been working hard to keep Highline-based email addresses working.

The Highline staff email system encountered some trouble in December when malicious “ phishing” messages were received and opened. These messages ask for the username and password of the email account, and usually offer some misleading excuse as to why the information is needed. The phishing messages that plagued Highline claimed to have come from the helpdesk or the IT staff.

Unsuspecting recipients of these kinds of messages reply and send their information, which compromises their email accounts. The aftermath is a mess of spam messages, which places strain on the servers, resulting in sketchy performance, and on two occasions, server downtime.

Also, email systems automatically see the spam for what it is — spam — and place the Highline email addresses into the spam-sending category. This is why some people discovered Highline emails in their spam folder, even though they did not mark it as such. Other email addresses just refused to receive Highline emails all together.

Highline’s IT staff was able to pinpoint the compromised emails and restore them, making them clean and operational again, as well as restore the compromised reputation of Highline emails. Also, the server admins were able to make some changes to the spam filters for outgoing mail, which should curb the amount of spam that escapes.

“We have also been working on getting the message out to our faculty and staff about watching out for phishing messages and not responding to them,” said Tim Wrye, the director Highline’s Instructional Computing. “The Highline helpdesk or IT staff will never contact a user, via email or otherwise, and ask them for their password, so if anyone receives such a message, they should not respond.”

Wrye said that, if a user is concerned, they can always forward the email to the helpdesk (helpdesk@highline.edu) for clarification.

Highline’s student email, hosted by Google’s Gmail, also experienced some turbulence in December.

After some spam filter revisions, email addresses on that system were being sent automatically to the spam folder.

Highline vice president for administration, Dominguez said.

“This sort of thing (sound attenuation) happens to all of the buildings eventually. Building 16, 4, and 1 are just about the only ones on campus left,” Yok said.

As for the future, it seems construction will settle down for a while.

“Right now there are not a lot of big projects in front of us,” Dooley said.

Turn your Highline degree into a teaching career.

Highline Community College and Heritage University at SSCC have joined hands to help you seamlessly expand your AA or AS degree into a Bachelor of Education. For details, call Heritage at 206 764-5371 or e-mail seattle@heritage.edu.
