AVISO ENGAGE

IDENTIFY THE STUDENTS WHERE YOUR INSTITUTION CAN MAKE THE GREATEST IMPACT, RIGHT NOW.

Product Overview
Engaged students are proven to be more successful.

Aviso Engage is a cloud-based platform displaying institutional data, predictive modeling results and student intervention recommendations.

Aviso Engage makes it easy to reach out to students most in need, identifies issues that may be preventing students from succeeding and develops strategies to address them.

Aviso offers persistence, course completion and degree completion models - which determines why students may be successful and who is at risk of not completing their course work and persisting to the next term.

With aviso, advisors, faculty, and staff can work together to empower students to achieve their academic, career, and life goals.

Take an inside look at our tool.
AVISO 1.0
Alerts, Notes, Messages/Texting, Tasks/Action Plans and Filtering

Coming in Spring 2022
Meet students where they are

Aviso doesn’t dictate how you communicate with students, instead messages are delivered to the modality preferred by each student.

- Push notifications when using the Aviso Student mobile app
- Two-way text messaging with automatic number provisioning for advisors
- Communicate with both institutional and personal email, connecting with applicants and enrollees
To ensure that no student population is left behind, Aviso builds a feed for every population of students. A feed allows staff to quickly get up to speed on the success of a group as a whole along with one place to see all the interactions that have occurred between a group of students, and your staff who are ensuring their success.

- Create dynamic filters to track the populations that need your engagement
- Prevent duplicate efforts or over communication with students
- Compare engagement strategies across different populations
Early Intervention Makes a Difference

Send an early alert to enable the student’s success team to do what they do best.

- Configurable alert reasons through the admin panel
- Dynamic routing of alerts to a student’s success team or defined Early Alert Coordinators
- Automated notifications keep faculty up to date on solutions and recommendations by support personnel
Tasks

Group tasks together to create an Action Plan

Tasks allow advisors, students, and staff to assign and guide students to perform activities that are proven to lead to successful outcomes. From onboarding to graduation, now your team can ensure that every student is progressing toward success.

- Students who complete tasks are 9% more likely to have a positive outcome in their enrolled courses
- Individual Tasks with due dates and resources that can help
- Staff notifications when student progress stalls

On-Demand Reporting

Report Builder allows for quick and easy creation of beautiful custom reports. Even better, you don’t have to wait for institutional analytics to create them. Just point, click, and save to start consuming insights for key cohorts or populations most in need.

- Build custom reports in seconds that tell your story through data
- Scheduled delivery and report sharing
- Gain insights into key sub-populations within your institution

AVISO 2.0

Aviso Student, Academic Planning, Aviso Next, and Aviso Predict.

Coming in Fall 2022
Aviso Student is our mobile app that guides students on their individualized journeys to success. Aviso Student makes it easy for students to connect with their success team, stay on track, schedule meetings, view attendance and more!

- Students can view current, historical and future courses
- Students check-in from mobile with accuracy through geolocation
- Pair a student with someone that can answer their question, right now
- Assign tasks with due dates and resources that can help students
### Guided Pathways

**Student Success Starts with a Plan**

Collaborate with students to build a unique guided pathway through your institution's curriculum. Then receive an alert when a student doesn't follow it.

- Build pathways that represent predetermined or custom curriculum choices
- Perform a "what-if" to explore credit applicability across programs
- Collaborate with students to adjust and approve coursework that meets their educational goals

---

Integrated Appointment Scheduling for Students

Aviso Enterprise offers class-leading appointment scheduling that helps direct students to the services that address their unique challenges.

- Pair a student with someone that can answer their question, right now
- Real-time synchronization with Outlook and Gmail calendars
Perform strategic outreach to the students that need it most

Improve re-enrollment rates for next term students

Build rapport through understanding student strengths

Recommend student referrals that can remove barriers to success before they become an issue

Artificial Intelligence Must Lead to Action

Predictive model results lead to proactive discussions with students about why they may struggle, or succeed, in each of their classes or persist to the next term.

- Perform strategic outreach to the students that need it most
- Improve re-enrollment rates for next term students
- Build rapport through understanding student strengths
  Recommend student referrals that can remove barriers to success before they become an issue
