

# Interior Design

Associate of Applied Science – Transfer (AAS-T)

## Program description

Interior Designers know how to plan and visually present a space to either an individual and business client. Interior designers are knowledgeable in every aspect of interior planning from material and production specification to health and safety issues, building codes and other technical aspects. [Learn More](#)

The Interior Design degree is designed to prepare students to enter both residential and commercial design fields. Graduates will learn specific job skills and have the opportunity to apply their skills through an internship.
