## Program Map

Bachelor of Applied Science (BAS)

### Program description

The BAS in Elementary Education focuses on Elementary Education (K-8) certification and the English Language Learner’s endorsement. Our coursework has been integrated with social justice and equity throughout.

The program offers coursework for working professionals, looking to sharpen their skills and meet rising employment requirements, as well as those just beginning their careers, whose goal is to become a leader in the field. Enter program description information here for the area.
