

Anthropology Program Map

Associate of Arts– DTA
General Transfer

Program description

Anthropology is the study of what makes us human. Some anthropologists study the past through archaeology, to see how human groups lived hundreds or thousands of years ago to the recent times. Others gain an understanding of different societies around the world by living among them and immersing themselves in their daily lives. Still others focus on human biology, evolution, and forensics. The Anthropology Department offers a wide range of online and in-class lecture-based and hands-on courses for general interest or for working toward an eventual major. [Learn More](#)
